SECTION 4

The Reviewer

The Reviewer is a staff role. It receives the applications that the applicants send for review and starts their review. This section shows the pages of the Reviewer and, most important, how to set an application as review started.

> **Account.** The role of the account is shown at the top left of every page, next to the logo. For this role it reads **REVIEWER**.

In this section

4.1 The Dashboard
- Building Permit
- Permit For Occupancy and Electrical Request List

4.2 The sidebar
- For Engineering
- Processed Permits
- Processed Permits For Occupancy
- Processed Permits For Electrical

4.3 Reviewing an application
- The application form
- The requirements and setting the review as started
- The remarks

4.1 The Dashboard

The Reviewer signs in with the same sign in page as the applicant (Section 2). The first page is **Application For Review**. It has three cards, each with a switch, a search box and, for the building permit, a number in a blue circle that counts the applications waiting. Click **Scan QR** at the top right to open an application by scanning its QR code.

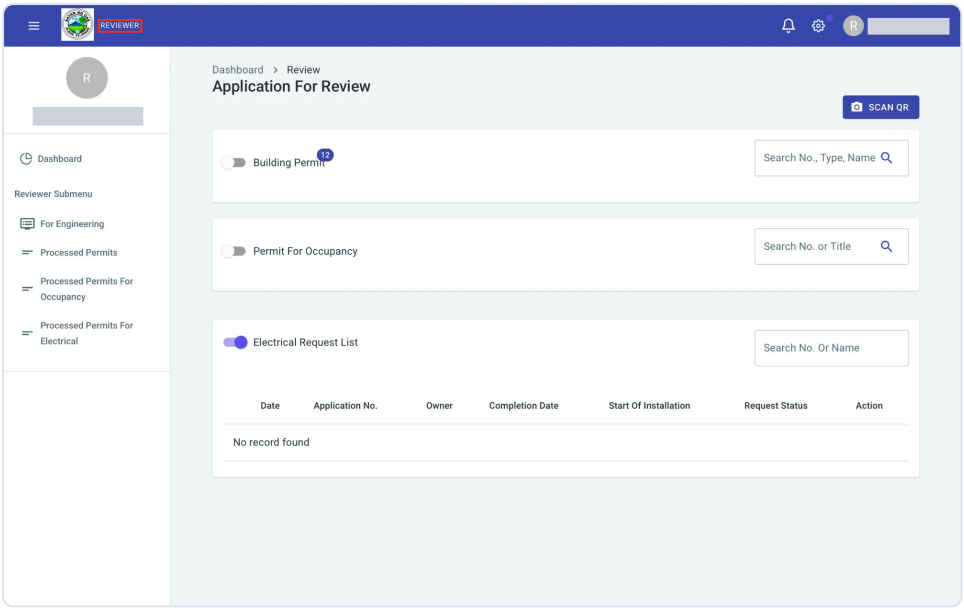

Figure 4.1. The Dashboard of the Reviewer. The role is boxed in red, and the switch of Building Permit is boxed.

Building Permit

Click the switch of **Building Permit** to show the building permit applications that are waiting for review. Type a number, a type or a name in the search box to find one. Click the arrows beside **Date** and **Owner** to sort the list.

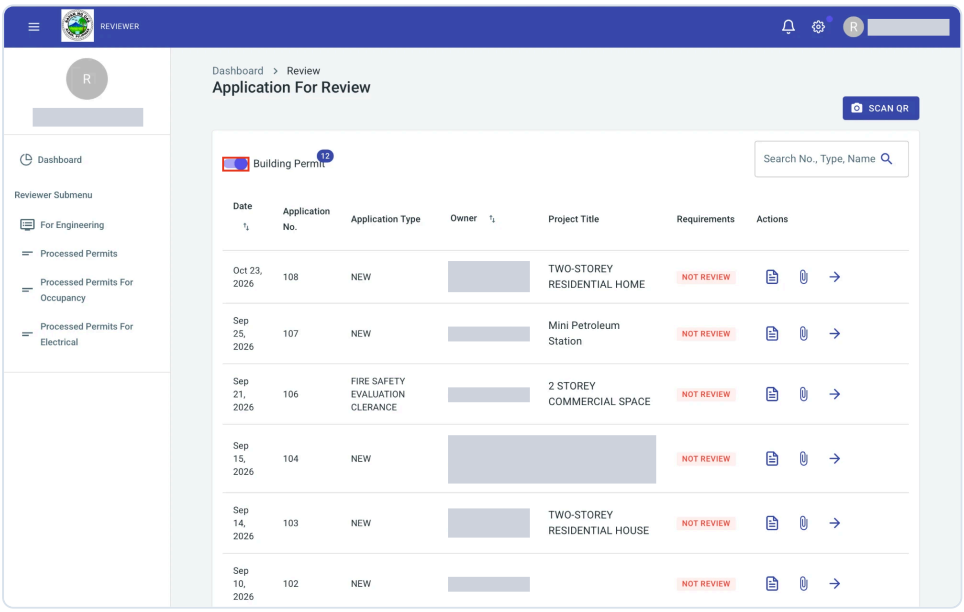

Figure 4.2. The building permit applications waiting for review.

The column **Requirements** shows whether the requirements of the application are reviewed. **NOT REVIEW** means that the review is not started yet. The column **Actions** has three icons:

- **Document icon:** opens the application form, see Section 4.3.1.
- **Paperclip icon:** opens the requirements that the applicant uploaded, see Section 4.3.2.
- **Arrow icon:** opens the remarks of the application, see Section 4.3.3.

Figure 4.3. The tag Requirements and the three icons of Actions are boxed.

Permit For Occupancy and Electrical Request List

Click the switch of **Permit For Occupancy** to show the occupancy permit requests, and the switch of **Electrical Request List** to show the electrical permit requests. A list that has nothing to show says *No record found.*

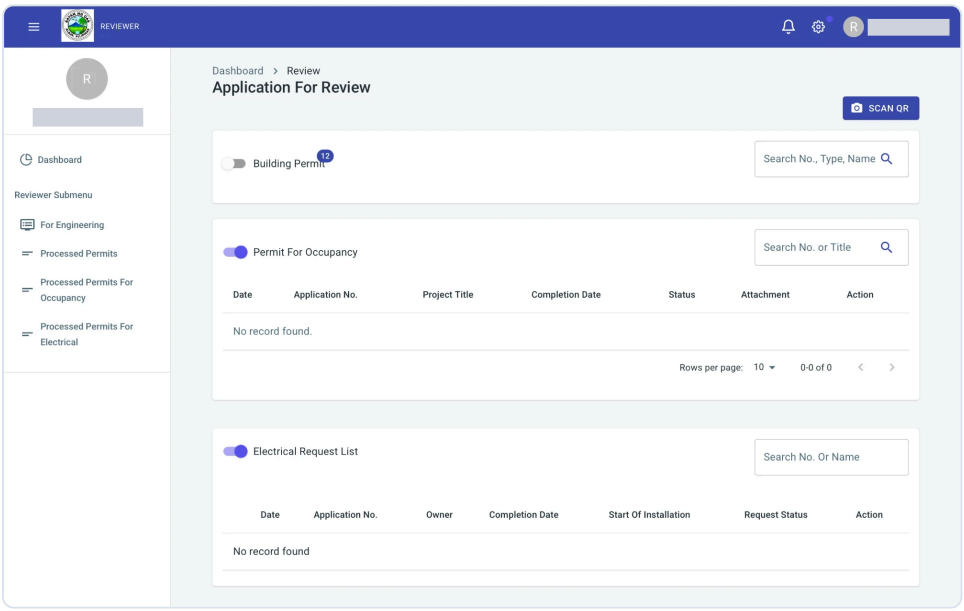

Figure 4.4. The list of Permit For Occupancy.

4.2 The sidebar

The sidebar has the **Dashboard** and, under **Reviewer Submenu**, four pages. Click an item to open its page.

For Engineering

The page **Building Permit For Engineering** lists the applications that are with the engineering office. It has a search box and the columns **Date**, **Application No.**, **Application Type**, **Application Status**, **Owner** and **Actions**.

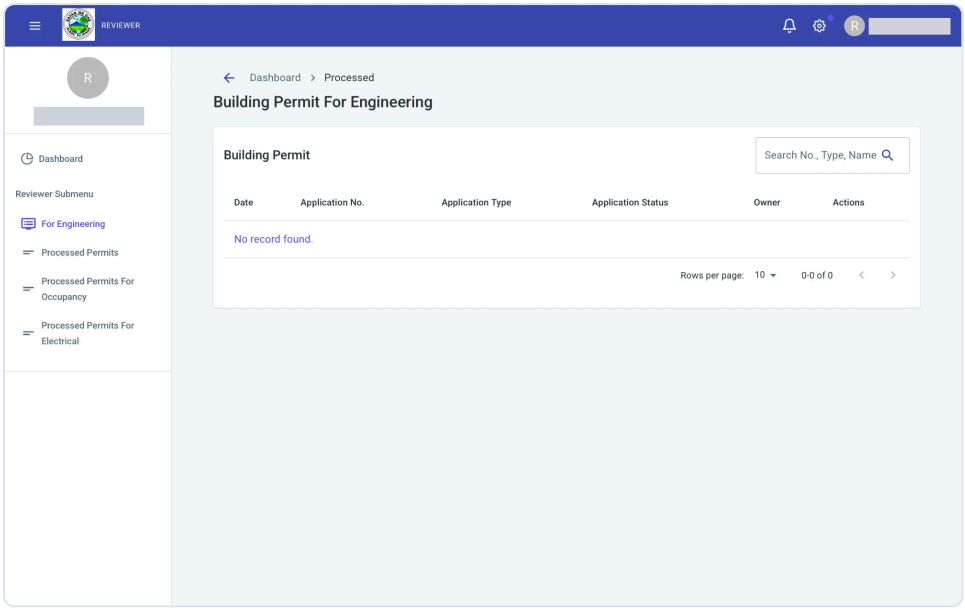

Figure 4.5. The page For Engineering.

Processed Permits

The page **Processed Building Permit** lists the applications that you already processed. Its icons open the same pages as the icons of the Dashboard. Type a number or a name in the search box to find one.

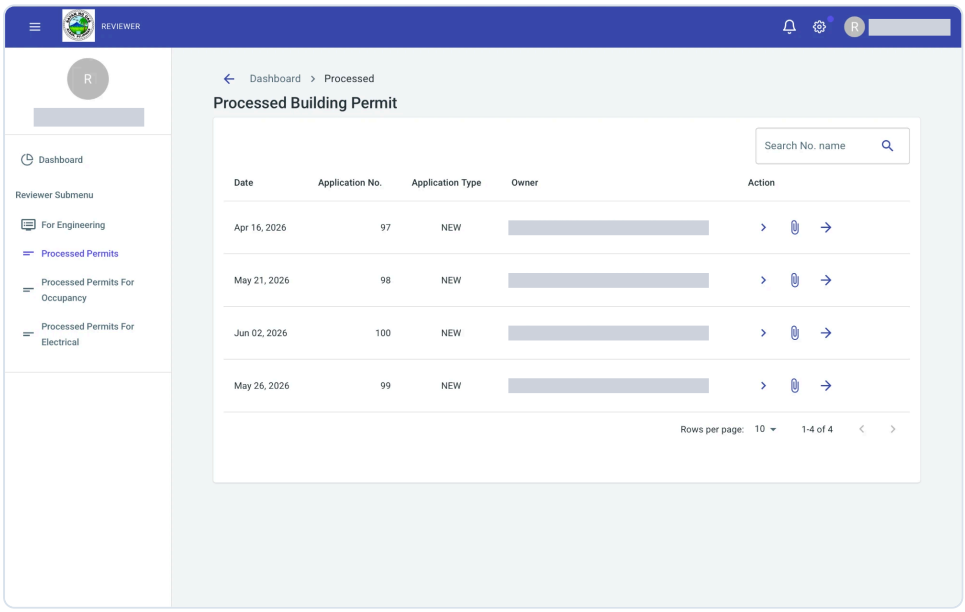

Figure 4.6. The page Processed Permits.

Processed Permits For Occupancy

The page **Processed Permit For Occupancy** lists the occupancy permit requests that you processed. The columns are **Date**, **Application No.**, **Permit Status**, **Owner** and **Action**.

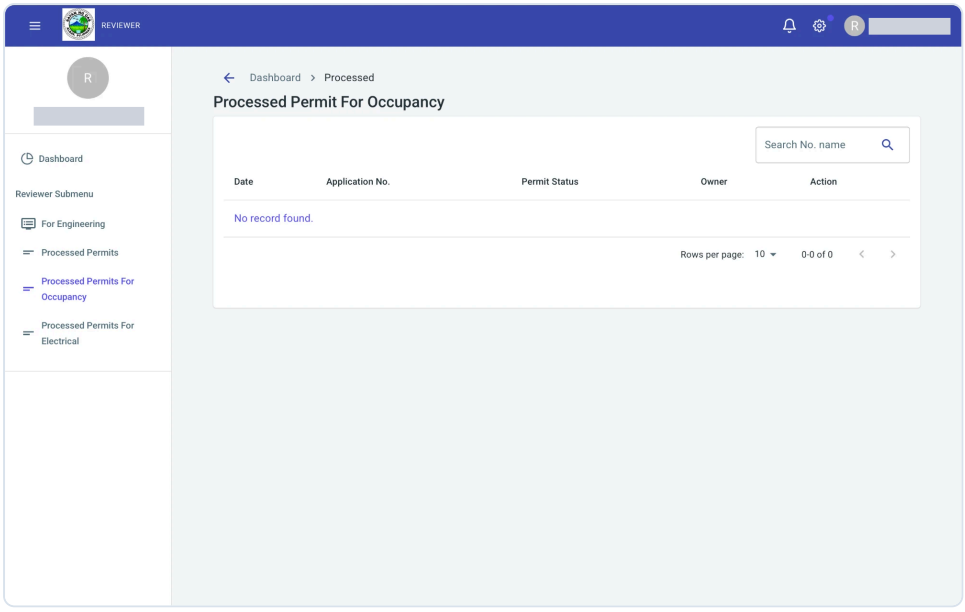

Figure 4.7. The page Processed Permits For Occupancy.

Processed Permits For Electrical

The page **Completed Electrical Permit List** lists the electrical permit requests that were completed. The columns are **Date**, **Application No.**, **Owner**, **Completion Date**, **Start Of Installation**, **Request Status** and **Action**.

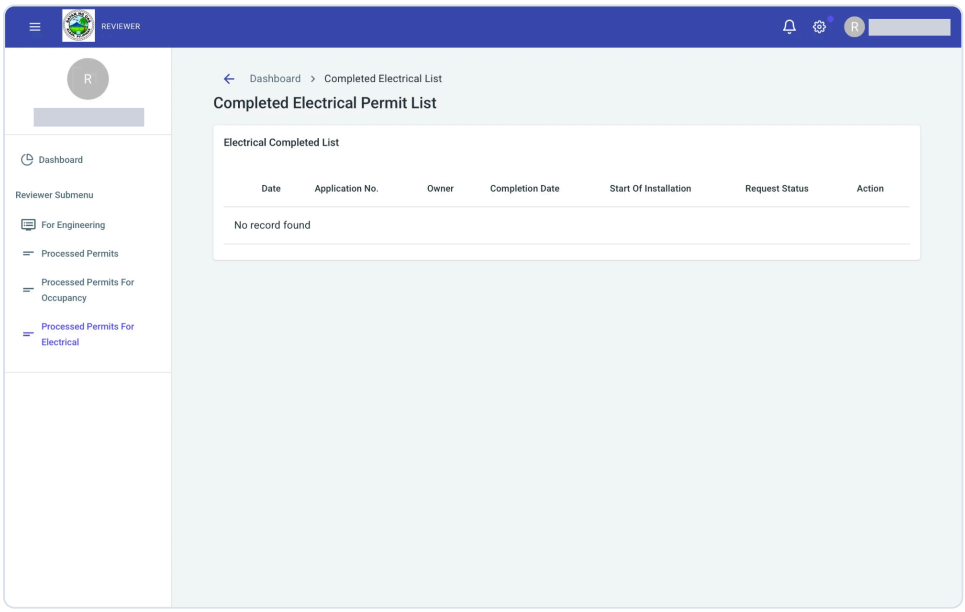

Figure 4.8. The page Processed Permits For Electrical.

4.3 Reviewing an application

The application form

Click the document icon of an application to read it. The page shows the **Unified Application Form for Building Permit** exactly as the applicant filled it in: the type of application, the owner, the location, the scope of work, the use of the building, the size and the costs, the full time inspector, and the notary section. Box 6 is for the fees. It says *No assessment found.* until the fees are assessed.

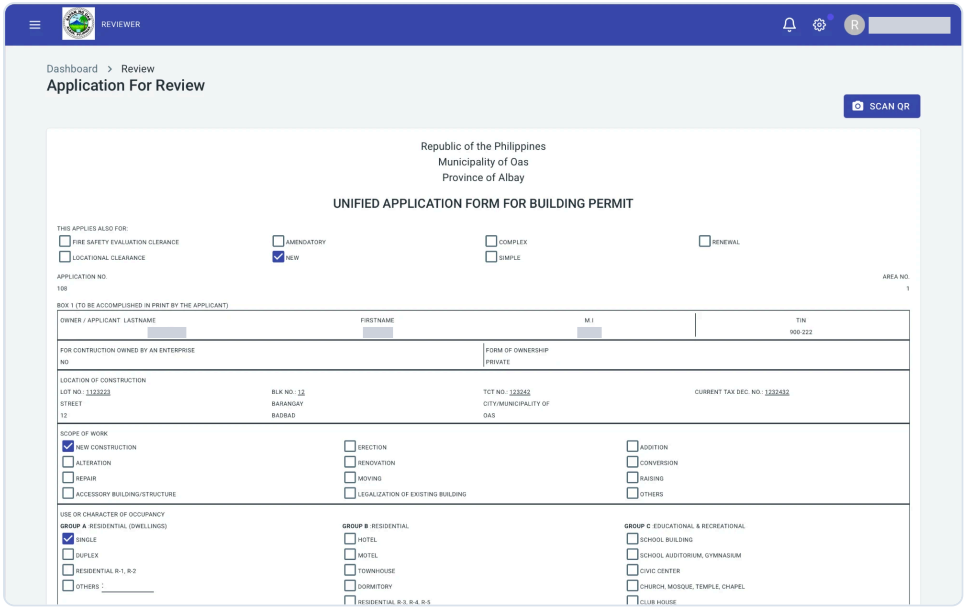

Figure 4.9. The top of the application form.

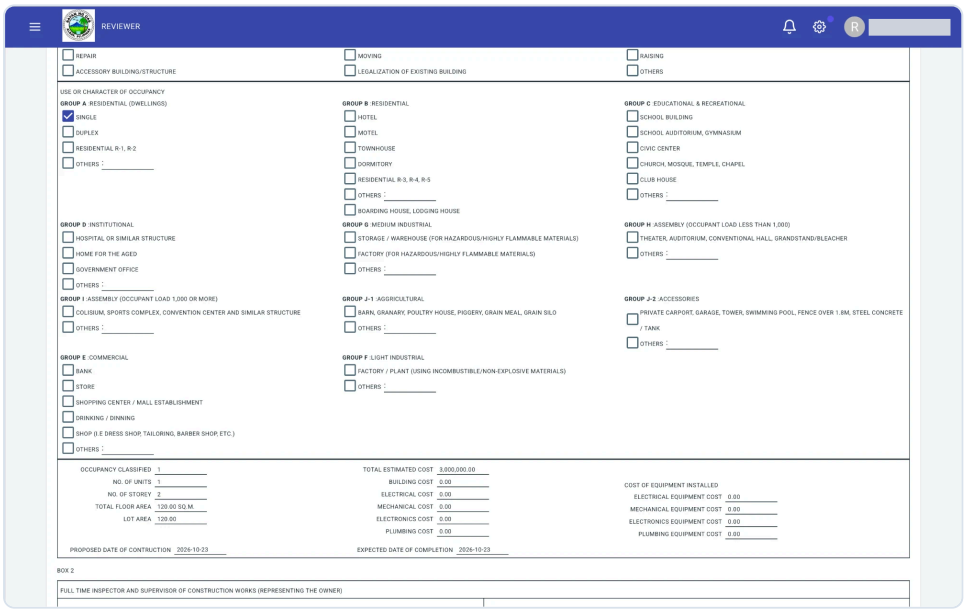

Figure 4.10. The use of the building, the size and the costs.

At the bottom of the form are three buttons:

- **Assessment:** opens the assessment of the application.
- **View Requirements:** opens the requirements, see the next section.
- **Print:** prints the form.

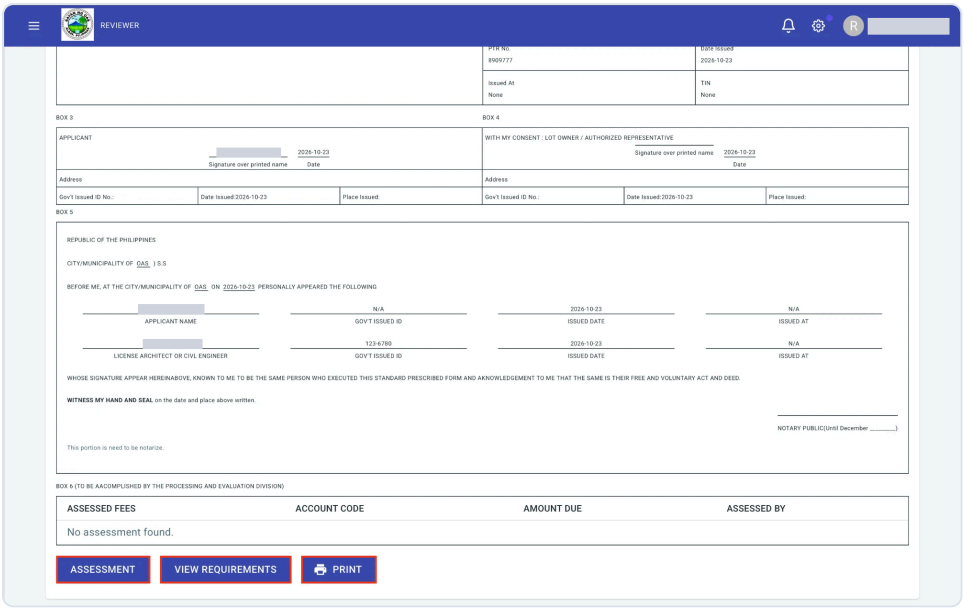

Figure 4.11. The buttons Assessment, View Requirements and Print are boxed.

The requirements and setting the review as started

> **Important.** The Reviewer starts the review of an application with the button **Set as review started**. Do this when you begin to check the requirements.

Click the paperclip icon of an application, or **View Requirements** on the form, to open the page **Application Requirements**. It has the same six groups as the requirements of the applicant: Forms, Plans, Technical Documents, PRC IDs & PTRs, Personal Documents and Certifications. Click a group to show its requirements. The green tag **1 FILES UPLOADED** shows how many files the applicant uploaded. The button **View Files** opens them. A requirement with no file shows **NO FILES** and its button is dimmed. At the top right are two buttons:

- **Set As Review Started:** tells the system and the applicant that the review of the application started.
- **View Reviews:** shows the reviews of the offices. It is dimmed until a review exists.

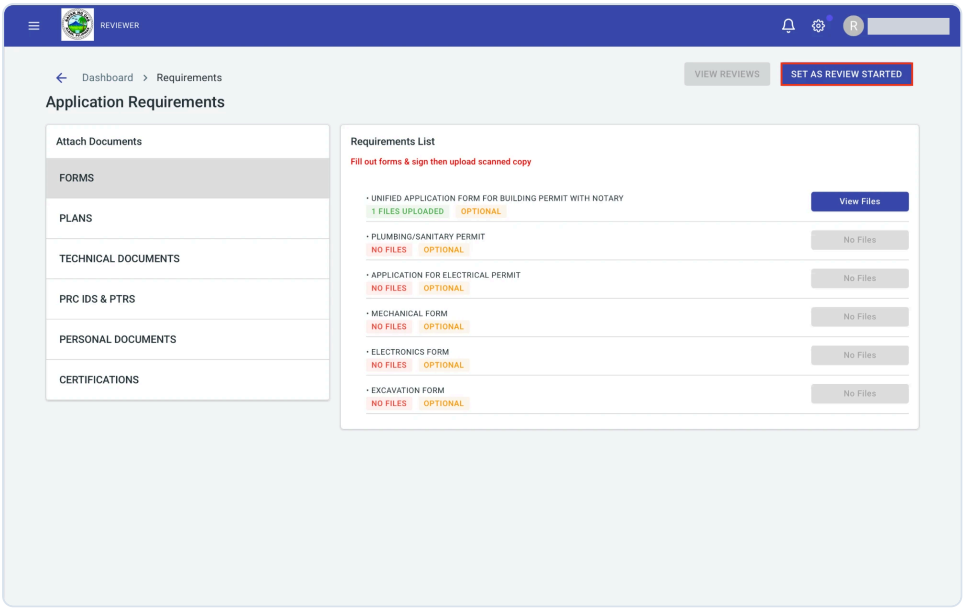

Figure 4.12. The Application Requirements before the review is started. Set As Review Started is boxed.

Click **View Files** to open the files of a requirement. Click the name of a file to open it.

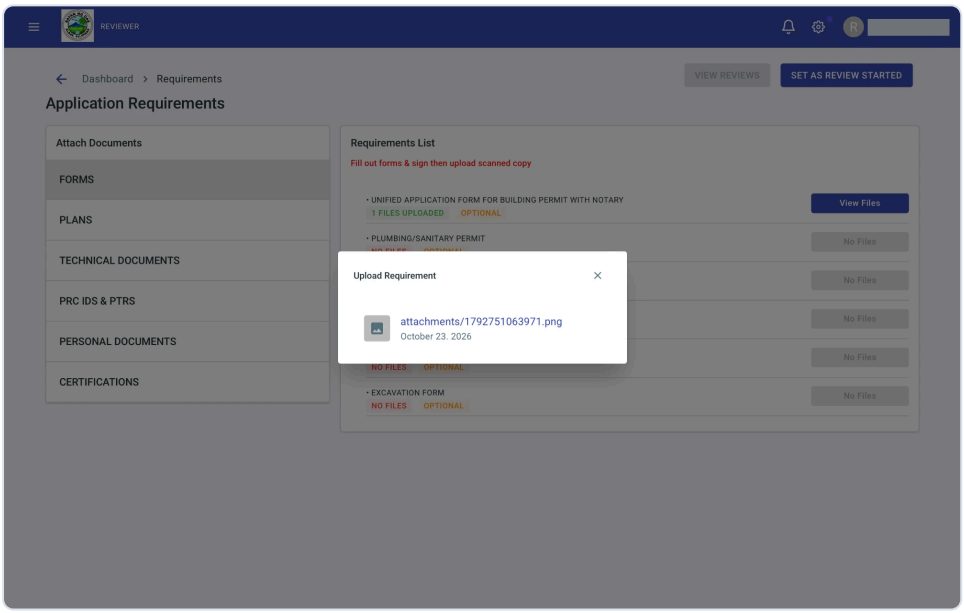

Figure 4.13. The files of a requirement.

Click **Set As Review Started**. The message *Application status successfully set to review started.* appears. Both buttons are then dimmed, so the review cannot be started twice. The status of the application becomes under review.

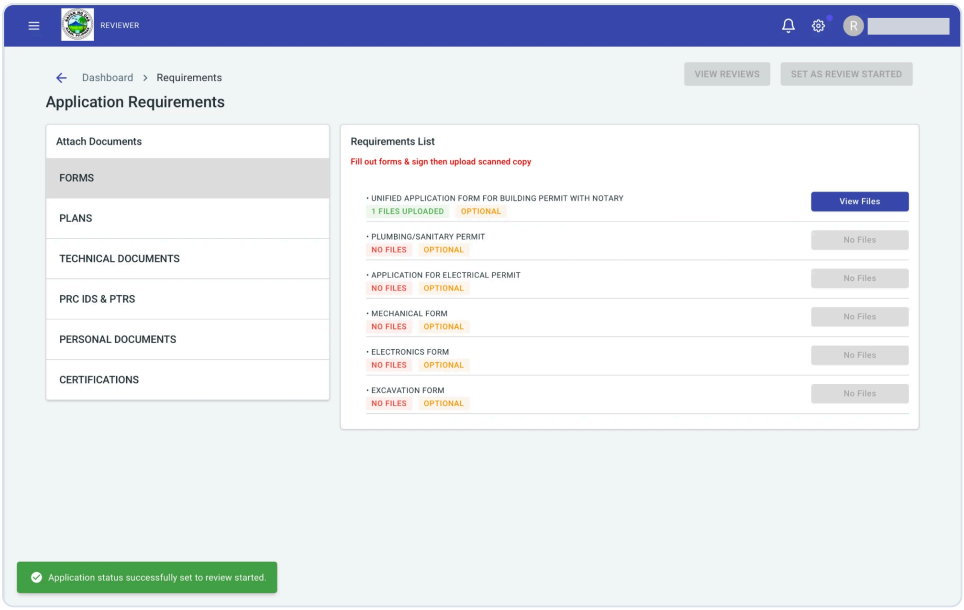

Figure 4.14. The message after the review is set as started.

The remarks

Click the arrow icon of an application to open **Building Permit Remarks**. It shows the remarks that the offices wrote about the application, with the **Date**, the office in **Process From**, the **Remarks** and the **Status**. When there is none, it says *No remarks found.* Click the X to close it.

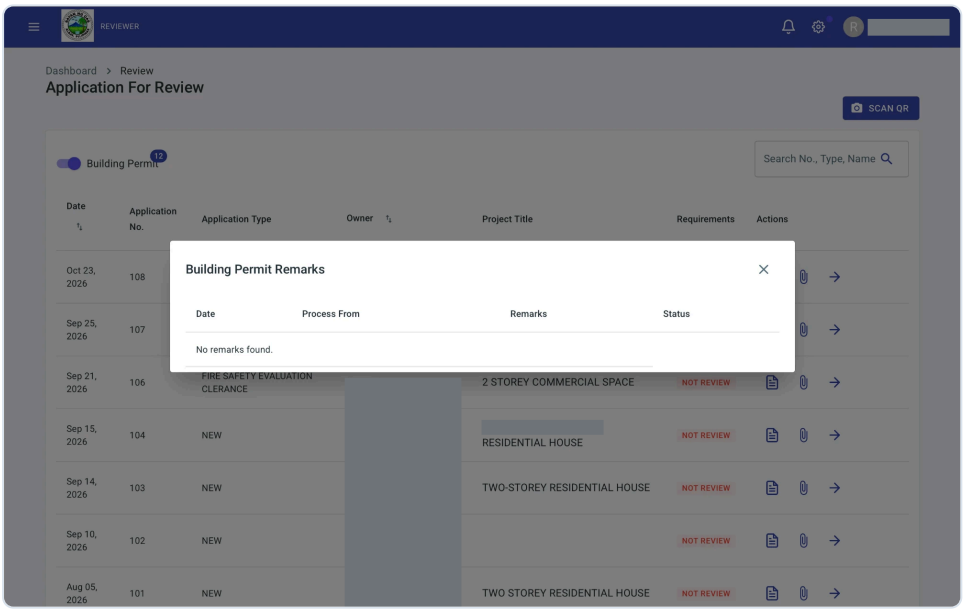

Figure 4.15. The Building Permit Remarks window.

What happens after the review is started: who reviews next, how the application reaches For Engineering, and the Assessment page.
