PART 1

Report Analyst (Assessor) User Manual

For the Report Analyst of the Municipal Assessor’s Office. Covers the Reports Graph of the assessment roll of the Municipality of Oas.

SECTION 1

Getting Started

This section explains what the eRPT Reports Graph is for, how a Report Analyst opens eRPT, and how the screen is laid out.

In this section

1.1 About eRPT

1.2 Opening eRPT

1.3 The Report Analyst screen

1.4 Header and side menu

1.1 About eRPT

eRPT is the Real Property Tax system of the Municipality of Oas. It holds the Real Property Tax Information System (RPTIS) records: property records, tax assessments and billing information. The **Reports Graph** turns these records into charts so the Assessor's Office can study the assessment roll at a glance.

As a **Report Analyst** you can:

- see how the total assessed value is shared among property classifications;
- see how many properties (RPUs) each barangay has, by classification;
- follow the number of tax declarations (TDs) recorded each year;
- rank barangays by assessed value;
- compare fair market value with assessed value per barangay; and
- filter, zoom into and print each report.

> **IMPORTANT Figures change.** The amounts and counts in this manual were taken from the live system on 27 October 2026. They will change as records are updated. Account names and peso amounts in the screenshots are blurred.

1.2 Opening eRPT

1. Open a web browser and go to **rptpayment.oas.lguapp.com**.
2. The eRPT home page opens (Figure 1.1).
3. Sign in with the Report Analyst account given to you by the system administrator.
4. After signing in, the **Reports Graph** opens (Dashboard › Reports Graph). See Section 2.

SECTION 2

Reports Graph

The Reports Graph shows five reports on one page. Each report has its own tab, filters and PRINT button.

In this section

2.1 The Reports Graph page

2.2 Switching between reports

2.3 Reading values and printing

2.1 The Reports Graph page

About this report

The Reports Graph gathers the assessment records of the whole municipality into five charts. Together they answer the questions the Assessor's Office is asked most often: how much property is on the roll, where it is, what kind it is, how fast new tax declarations are being made, and how assessed values compare with market values. Each chart is drawn from the live records, so it always reflects the latest assessments.

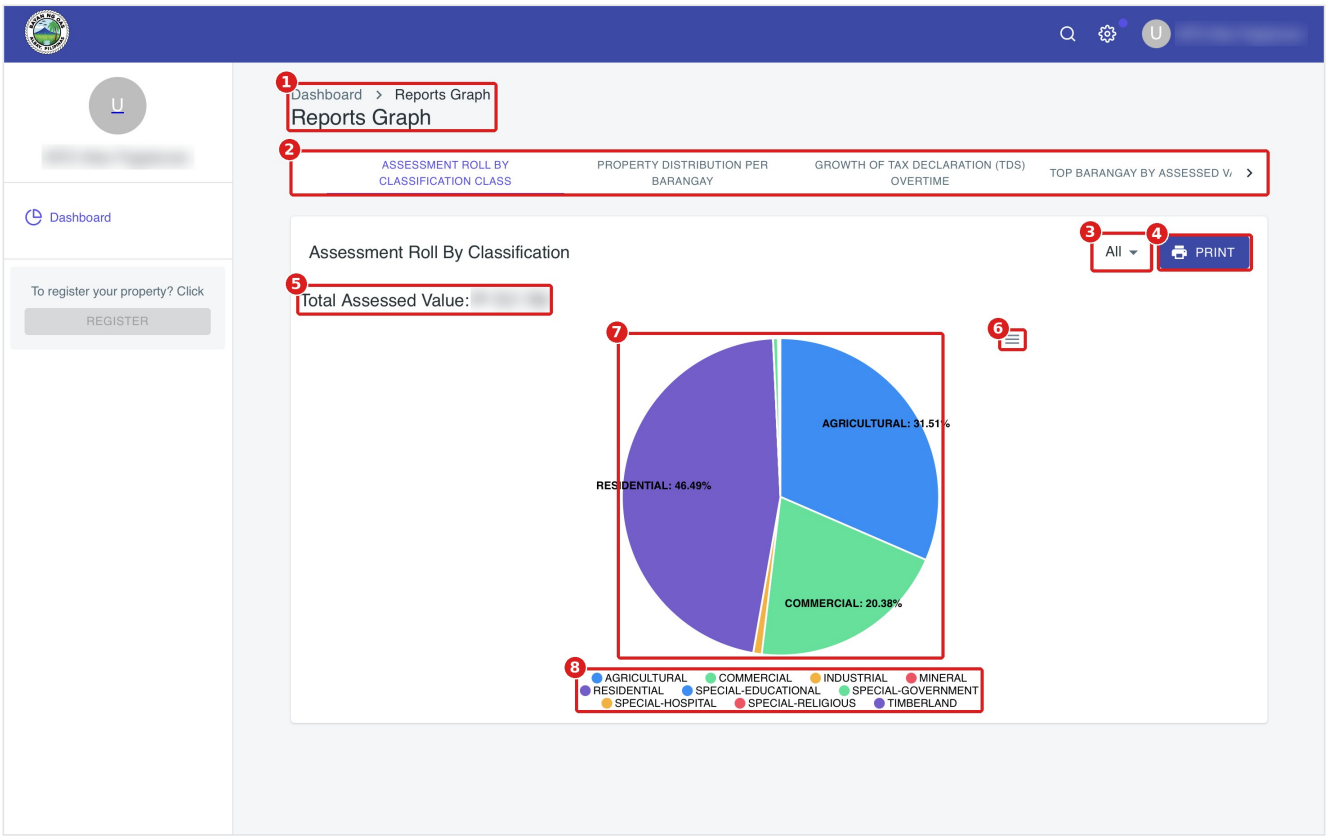

Figure 2.1. The Reports Graph page, showing the first report.

1 Breadcrumb 2 Report tabs 3 Filter 4 PRINT 5 Summary figure 6 Chart menu 7 Chart 8 Legend

Part	What it does
1 Breadcrumb	**Dashboard › Reports Graph**. Click **Dashboard** to go back.
2 Report tabs	The five reports. The open tab is shown in blue and underlined (2.2).
3 Filter	Narrows the report, for example to one year. Each report has its own filters.
4 PRINT	Prints the report shown.
5 Summary figure	Headline total for the report, e.g. **Total Assessed Value**.
6 Chart menu (three-line icon)	Chart options, such as downloading the chart.
7 Chart	The report itself. Point to any part to see its exact value.
8 Legend	Colour key of the chart.

2.2 Switching between reports

Click a tab to open that report. The tab bar is wider than the screen, so use the arrows at its ends:

- click **›** at the right end to see the last tabs (Top Barangay, FMV vs. Assessed Value);
- click **‹** at the left end to go back to the first tabs.

Tab	What it shows	See
Assessment Roll by Classification Class	Share of the total assessed value per classification (pie)	Section 3
Property Distribution per Barangay	Number of RPUs per barangay, by classification (stacked bars)	Section 4
Growth of Tax Declaration (TDs) Overtime	Number of TDs per year (line)	Section 5
Top Barangay by Assessed Value	Barangays ranked by assessed value (bars)	Section 6
FMV vs. Assessed Value per Barangay	Fair market value beside assessed value (paired bars)	Section 7

2.3 Reading values and printing

1. Point to a slice, bar or point of a chart. A box (tooltip) shows its name and exact value.
2. Set the filters you need. The chart updates at once.
3. Click **PRINT** to print the report shown.

> **NOTE** The labels on the charts are rounded or shortened. Use the tooltip when you need the exact figure.

SECTION 3

Assessment Roll by Classification Class

This report shows how the total assessed value of the municipality is shared among property classifications.

In this section

3.1 Reading the chart

3.2 Filtering by year

3.3 Seeing exact amounts

3.1 Reading the chart

> **About this report**
> The assessment roll is the official list of all taxable real property in Oas with its assessed value. This pie chart splits the total assessed value of the roll by **classification**, the actual use of the property (residential, agricultural, commercial and so on). It shows which kinds of property carry most of the tax base. In Oas, residential and agricultural property together make up more than three-quarters of the assessed value, so changes in these two classes have the largest effect on real property tax income. Use the year filter to compare the mix from year to year.

Click the **ASSESSMENT ROLL BY CLASSIFICATION CLASS** tab. It is the first tab and opens by default.

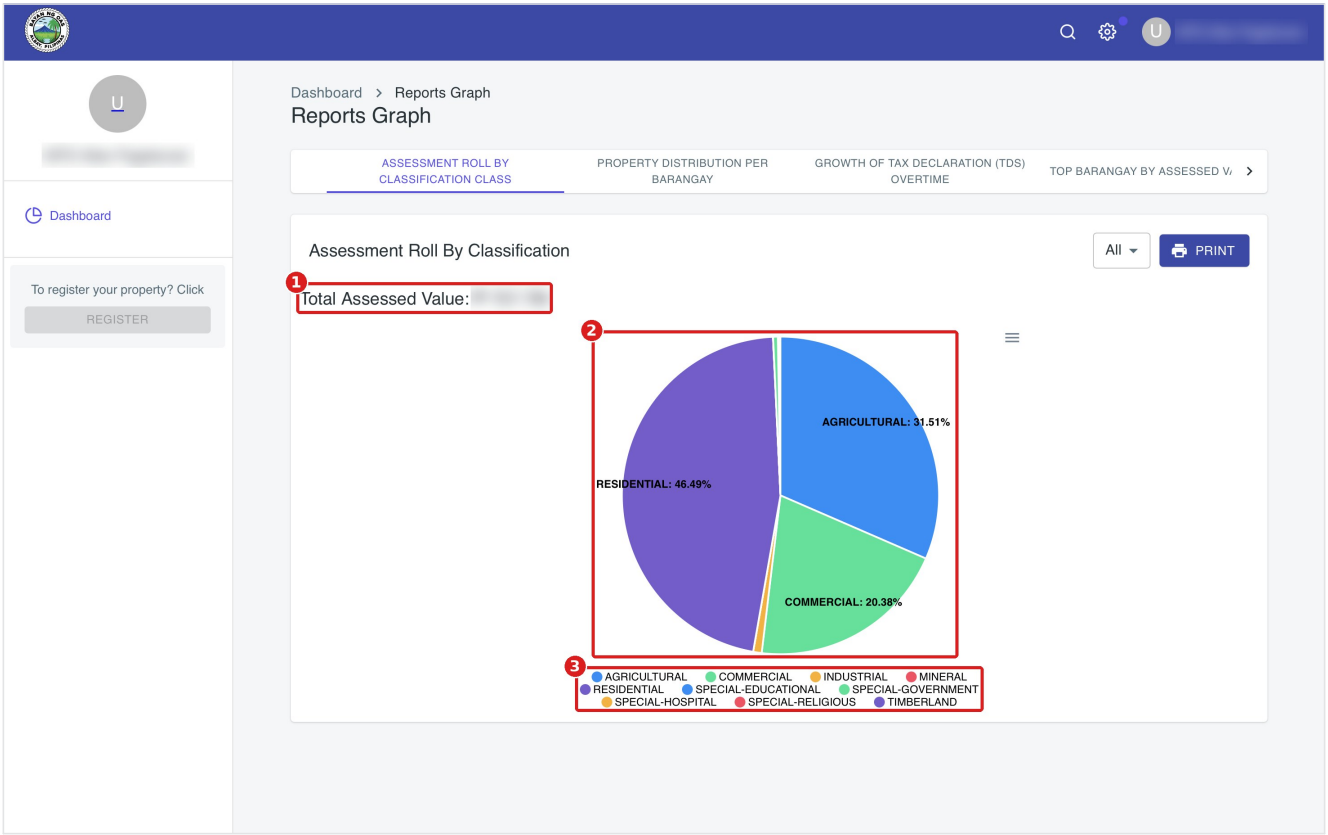

Figure 3.1. The Assessment Roll by Classification chart (all years).

1 Total Assessed Value 2 Pie chart 3 Legend

Part	What it does
1 Total Assessed Value	Sum of the assessed value for the selected year, or for all years when the filter is set to All.
2 Pie chart	One slice per classification. Labels show the share: Residential 46.49%, Agricultural 31.51%, Commercial 20.38%. The thin slices are the other classifications.
3 Legend	Agricultural, Commercial, Industrial, Mineral, Residential, Special-Educational, Special-Government, Special-Hospital, Special-Religious and Timberland.

3.2 Filtering by year

1. Click the filter box at the top right (it shows **All**).
2. Click a year from **2018** to **2026** (Figure 3.2), or **All** for every year combined.
3. The pie and the Total Assessed Value update.

1 Year list

3.3 Seeing exact amounts

Point to a slice. The slice turns lighter and a tooltip shows the classification and its assessed value in pesos (Figure 3.3).

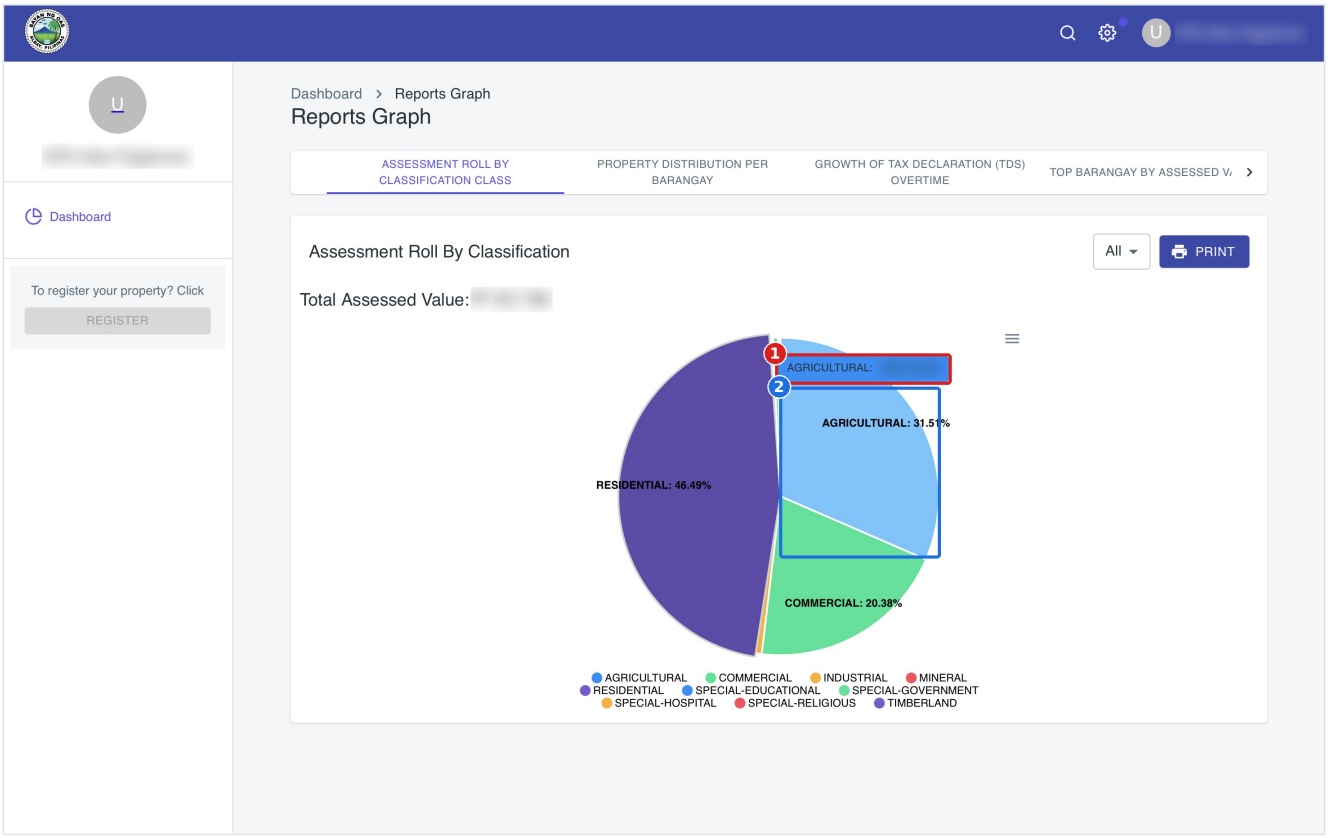

Figure 3.3. Pointing to the Agricultural slice.

1 Tooltip 2 Highlighted slice

Figure 3.4. Tooltips of the three largest classifications (all years).

1 Agricultural 2 Commercial 3 Residential

SECTION 4

Property Distribution per Barangay

This report counts the Real Property Units (RPUs) in each barangay and splits each count by classification.

In this section

4.1 Reading the chart

4.2 Reading a barangay's count

4.1 Reading the chart

About this report

A Real Property Unit (RPU) is one parcel of land, building or machinery with its own tax declaration. This stacked bar chart counts the RPUs in each barangay and colours each bar by classification. It shows **where** the properties are and what they are used for: tall bars mark barangays with many properties, and the colours show whether a barangay is mostly agricultural or residential. Use it to plan field appraisal work, general revisions and barangay-level information drives.

Click the **PROPERTY DISTRIBUTION PER BARANGAY** tab. This report has no filter.

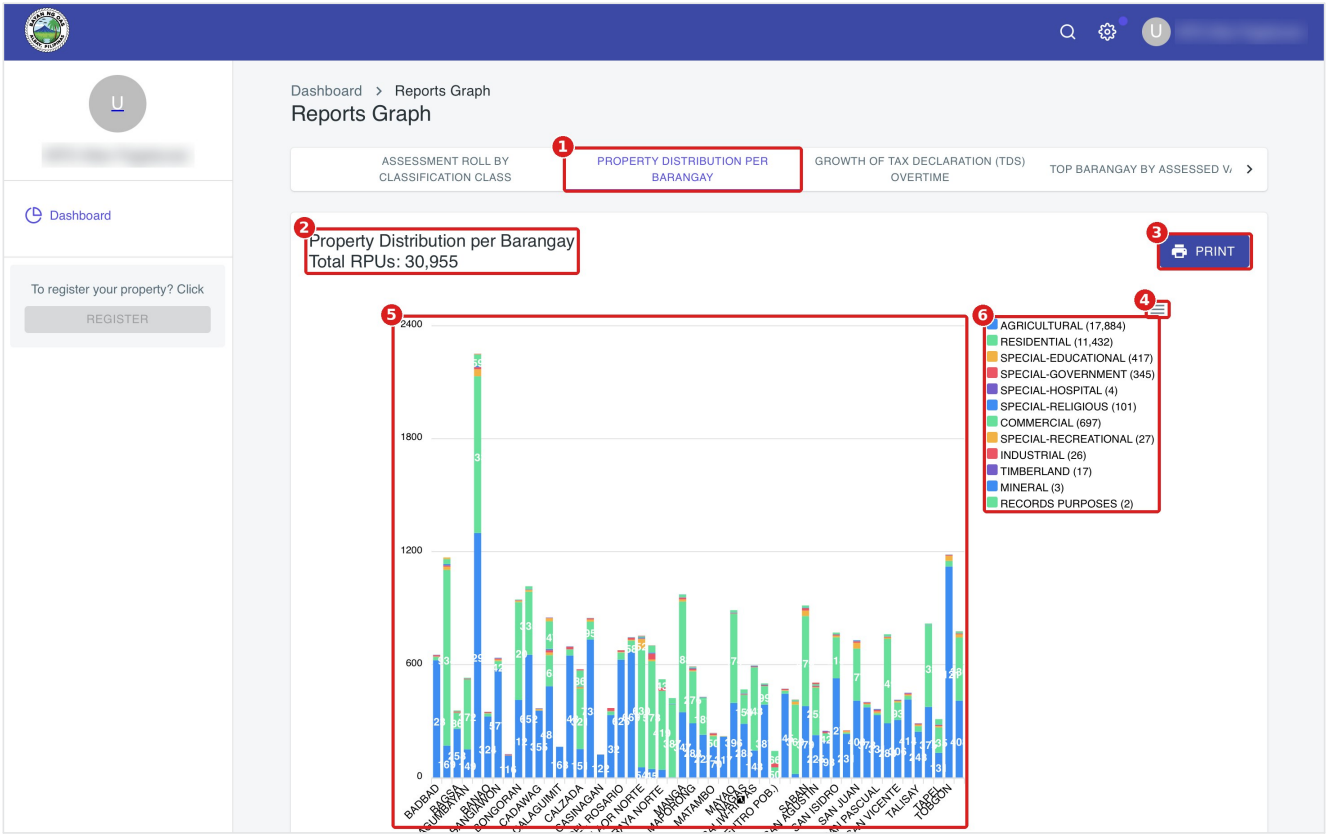

Figure 4.1. The Property Distribution per Barangay chart.

1 Tab 2 Title and Total RPUs 3 PRINT 4 Chart menu 5 Stacked bars 6 Legend

Part	What it does
1 Tab	The open report, shown in blue.

Part	What it does
2 Title and Total RPUs	Number of Real Property Units in the municipality: **30,955**.
3 PRINT	Prints the chart.
4 Chart menu (three-line icon)	Chart options, such as downloading.
5 Stacked bars	One bar per barangay. Bar height is the number of RPUs; each colour is a classification.
6 Legend	Each classification with its municipal total, e.g. Agricultural (17,884), Residential (11,432), Commercial (697), Special-Educational (417), Special-Government (345).

4.2 Reading a barangay's count

1. Find the barangay name under the bars. Scroll down if the names are cut off.
2. Point to a coloured part of its bar.
3. The tooltip shows the barangay, the classification with its municipal total, and the count (Figure 4.3).

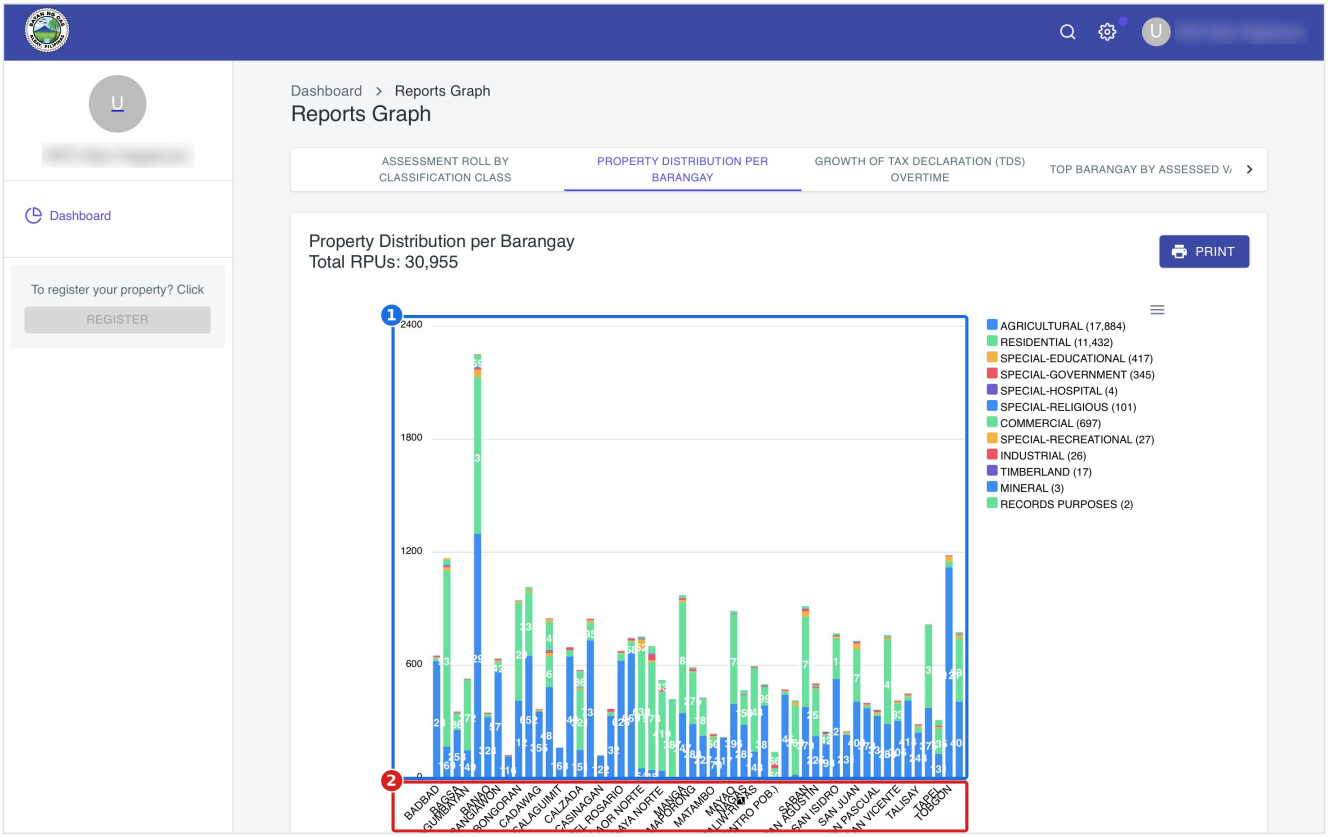

Figure 4.2. Point to a coloured part of a bar to read it.

1 Bars 2 Barangay names

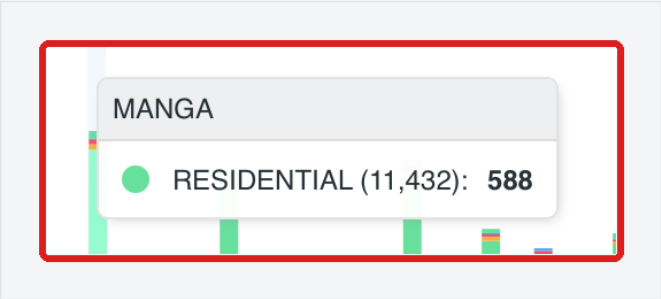

Figure 4.3. Tooltip for Barangay Manga.

> **NOTE** **RESIDENTIAL (11,432): 588** means Manga has 588 residential RPUs, out of 11,432 residential RPUs in the whole municipality.

SECTION 5

Growth of Tax Declarations (TDs) Overtime

This report shows how many tax declarations were recorded each year, with filters for year and taxable or exempt status.

In this section

5.1 Reading the chart

5.2 Using the filters

5.3 Zooming into the chart

5.1 Reading the chart

About this report

Every time a property is declared, transferred, subdivided or revised, a tax declaration (TD) is recorded. This line chart counts the TDs recorded each year, from 2018 to the current year. It shows the workload of the Assessor's Office over time and how active the property market has been. A rising line means more declarations and transactions; a falling line means fewer. The current year is still running, so its point will keep rising until the year ends. Use the Taxable/Exempt filter to follow the two groups separately.

Click the **GROWTH OF TAX DECLARATION (TDS) OVERTIME** tab.

Figure 5.1. The Growth of Tax Declarations chart.

1 Tab 2 Year filter 3 Taxable/Exempt filter 4 PRINT 5 Zoom tools 6 Line chart 7 Tooltip

Part	What it does
1 Tab	The open report, shown in blue.
2 Year filter	**All** or a single year from 2018 to 2026.
3 Taxable/Exempt filter	**All**, **Taxable** or **Exempt** properties.
4 PRINT	Prints the chart.
5 Zoom tools	Zoom in, zoom out, zoom to an area, pan, reset and chart menu (5.3).
6 Line chart	Number of transactions (TDs) per year, from 2018 at the left to 2026 at the right.
7 Tooltip	Point to the line to see a year and its count, e.g. **2026 — Transactions: 2,735**.

5.2 Using the filters

1. Click the second box and choose **All**, **Taxable** or **Exempt**.
2. Click the first box and choose **All** or a year from **2018** to **2026**.
3. The chart updates. Click **PRINT** to print it.

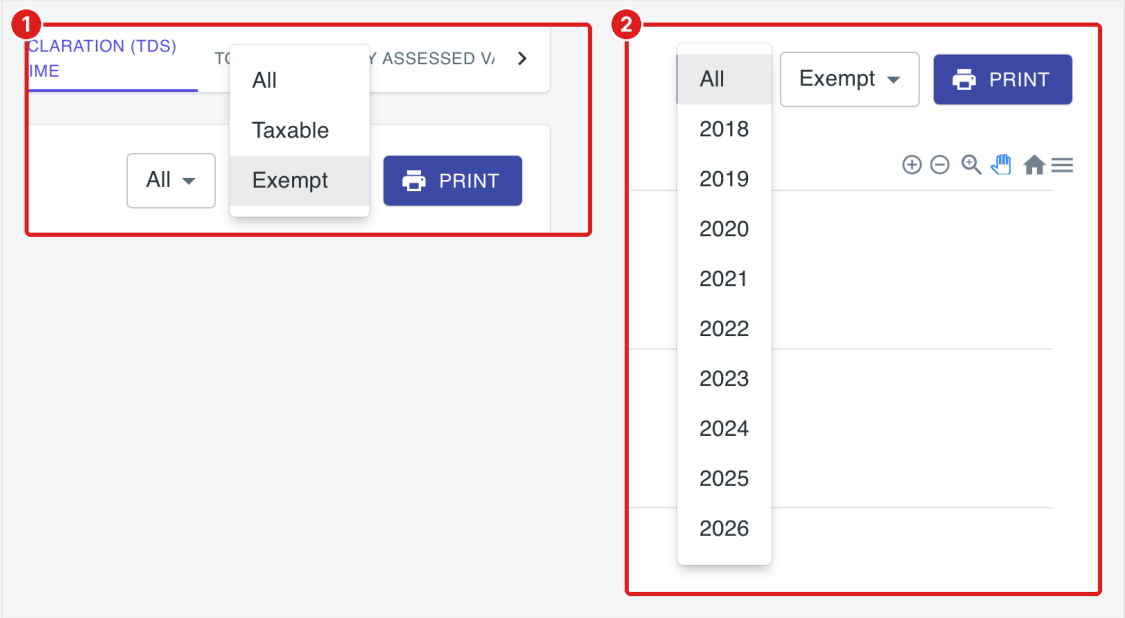

Figure 5.2. The two filters of the report.

1 Taxable/Exempt filter 2 Year filter

> **NOTE** The two filters work together. For example, **Exempt** and **2024** show only exempt tax declarations for 2024.

5.3 Zooming into the chart

⊕ Zoom in	Makes the chart larger around its centre.
⊖ Zoom out	Makes the chart smaller.
Magnifier	Drag across the chart to zoom into that area.
Hand	Drag the chart left or right (pan).
Home	Returns the chart to its normal view.
Menu (three lines)	Chart options, such as downloading.

Top Barangay by Assessed Value

This report ranks the barangays by their total assessed value.

In this section

6.1 Top 5 and Top 10

6.2 Showing all barangays

6.1 Top 5 and Top 10

About this report

This horizontal bar chart ranks the barangays by the total assessed value of all property in them. It shows where the real property tax base is concentrated. In Oas, Ilaor Sur holds far more assessed value than any other barangay, so assessments and collections there have the biggest effect on the municipal total. Use Top 5 or Top 10 for briefings, and All for a full ranking.

Click **›** at the end of the tab bar if needed, then click the **TOP BARANGAY BY ASSESSED VALUE** tab.

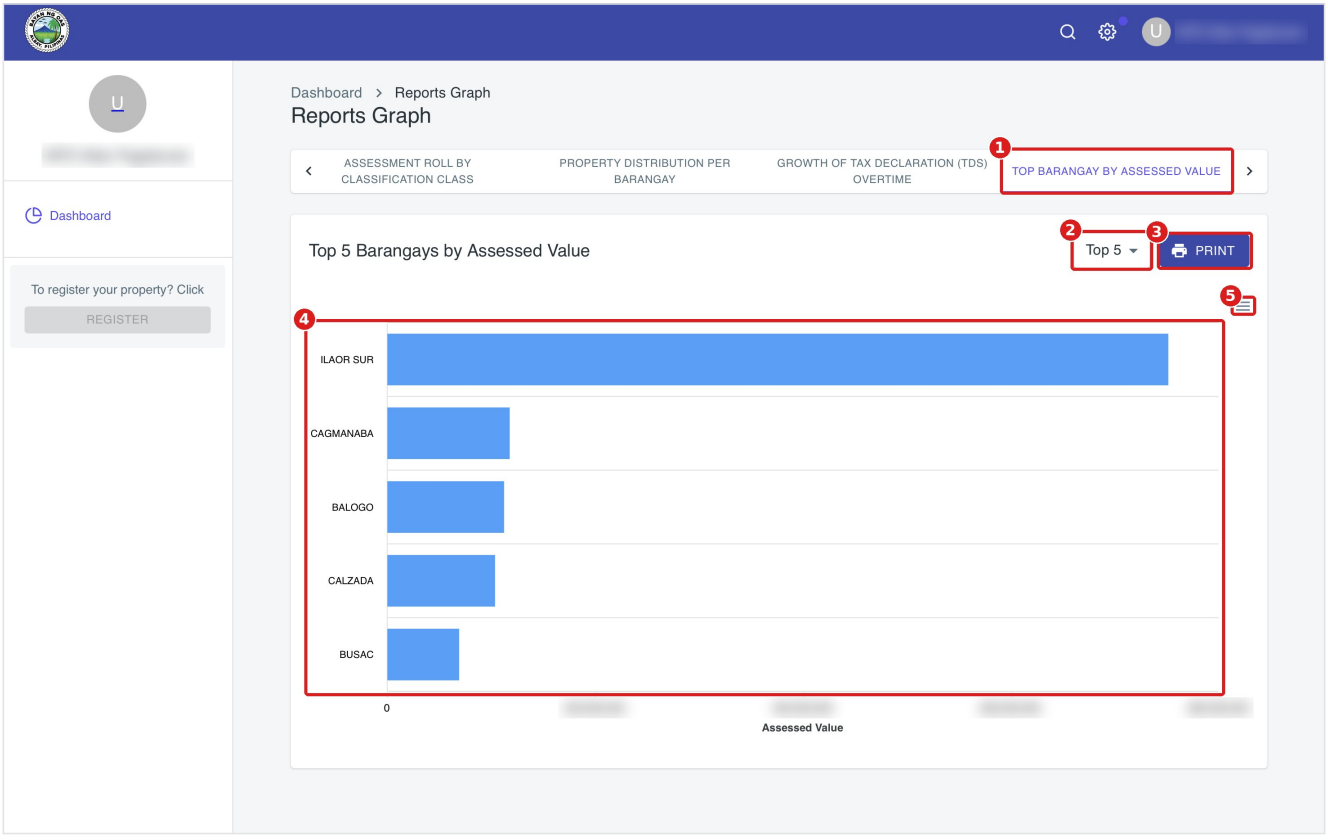

Figure 6.1. The Top 5 Barangays by Assessed Value.

SECTION 7

FMV vs. Assessed Value per Barangay

This report places the fair market value (FMV) of each barangay beside its assessed value.

In this section

7.1 Reading the chart

7.1 Reading the chart

About this report

The fair market value (FMV) is what a property would sell for in the open market, based on the schedule of market values. The assessed value is the part of the FMV that is taxed, found by applying the assessment level for the property's classification. This chart places the two values side by side for each barangay. The gap between them shows how much of the market value is taxed; a barangay with a wide gap usually has more property in classes with low assessment levels, such as agricultural land.

Click **›** at the end of the tab bar, then click the **FMV VS. ASSESSED VALUE PER BARANGAY** tab. This report has no filter.

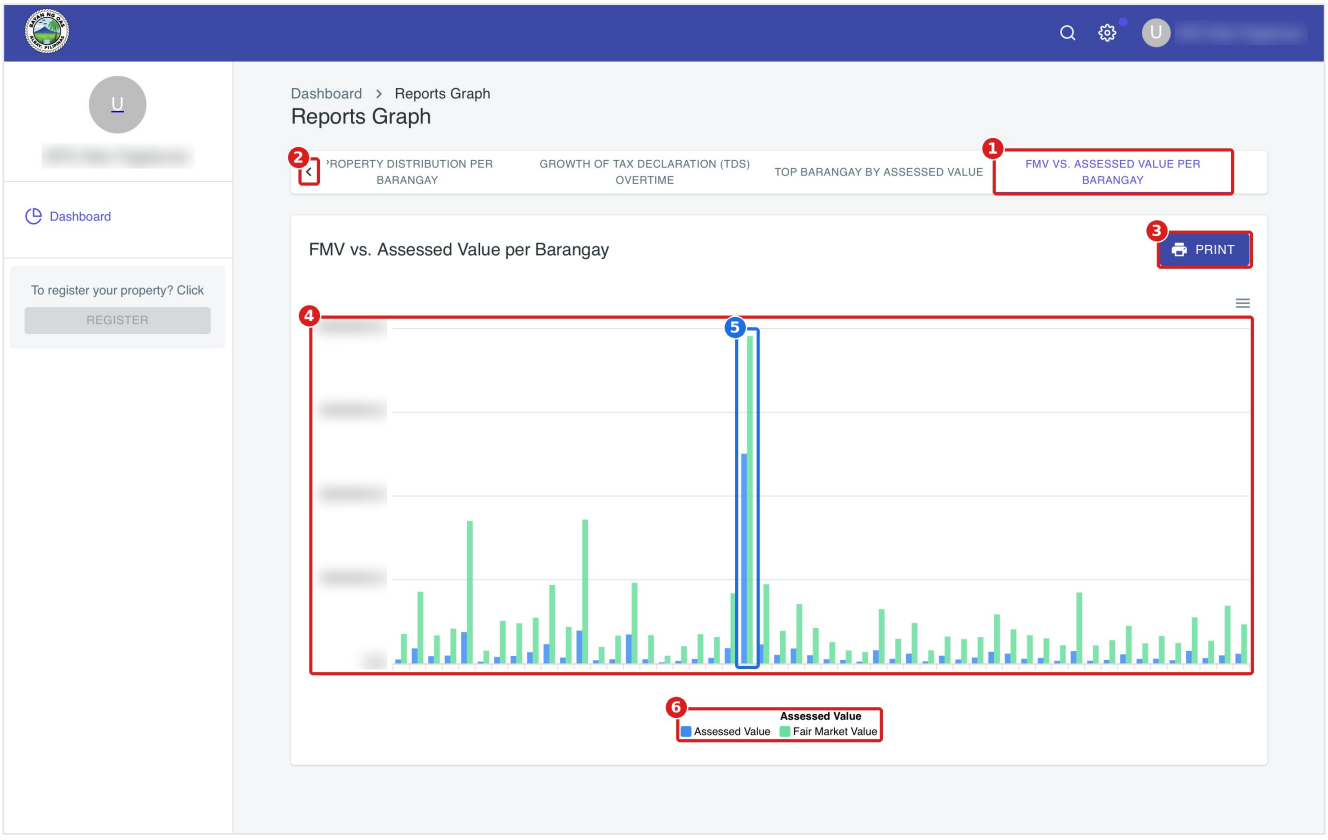

Figure 7.1. FMV vs. Assessed Value per Barangay.

PART 2

MTO Report Analyst (Treasurer) User Manual

For the Report Analyst of the Municipal Treasurer’s Office. Covers RPT, delinquent, business and general collection reports.

SECTION 1

Getting Started

This section explains what the Treasurer's reports are for, how the MTO Report Analyst opens eRPT, and how the screen is laid out.

In this section

1.1 About eRPT for the Treasurer's Office

1.2 Opening eRPT

1.3 The MTO Report Analyst screen

1.4 Header and side menu

1.5 Controls common to all reports

1.1 About eRPT for the Treasurer's Office

eRPT is the Real Property Tax system of the Municipality of Oas. For the Municipal Treasurer's Office (MTO) it brings together real property tax (RPT) collections, delinquent accounts, business permits and the general collections of the municipality, and shows them as charts that can be filtered and printed.

As an **MTO Report Analyst** you can:

- see how RPT collections are shared among the province, the municipality and the barangays;
- compare collection efficiency across barangays and follow RPT collections over the years;
- rank the top real property taxpayers;
- study delinquent tax by barangay, by property class and by taxpayer, and how much of it is penalty;
- count registered, new, renewed and closed businesses, and business collections per barangay;
- see the municipality's collections by revenue source; and
- filter, zoom into and print each report.

> **IMPORTANT Figures change.** The amounts in this manual were taken from the live system on 27 October 2026 (year filter set to 2026). They will change as payments are posted. Taxpayer names and peso amounts are blurred in the screenshots.

1.2 Opening eRPT

1. Open a web browser and go to **rptpayment.oas.lguapp.com**.
2. The eRPT home page opens (Figure 1.1).
3. Sign in with the MTO Report Analyst account given to you by the system administrator.
4. After signing in, the **Reports Graph** of the Dashboard opens (Section 2).

Chart menu (three-line icon)	Chart options, such as downloading the chart.
Tooltip	Point to a bar, slice or point to see its exact value.
Zoom tools	On line charts: zoom in, zoom out, zoom to an area, pan and reset (home).

SECTION 2

RPT Reports (Dashboard)

The Dashboard opens the Reports Graph for real property tax collections. It has four tabs.

In this section

2.1 Distribution of RPT Shares

2.2 RPT Collection Efficiency by Barangay

2.3 RPT Collection Trends

2.4 Top Real Property Taxpayers

2.1 Distribution of RPT Shares

About this report

Real property tax collected in Oas does not stay with the municipality alone. Under the Local Government Code, the basic RPT collected by a municipality is shared with the province and the barangays. This pie chart takes the total RPT collected in the selected year and shows how it is divided among the **Province**, the **Municipal** government and the **Barangays**. It tells the Treasurer how much of each year's collection is due to be remitted or released to the province and to the barangays.

Click **Dashboard** in the side menu. The **DISTRIBUTION OF RPT SHARES** tab opens first.

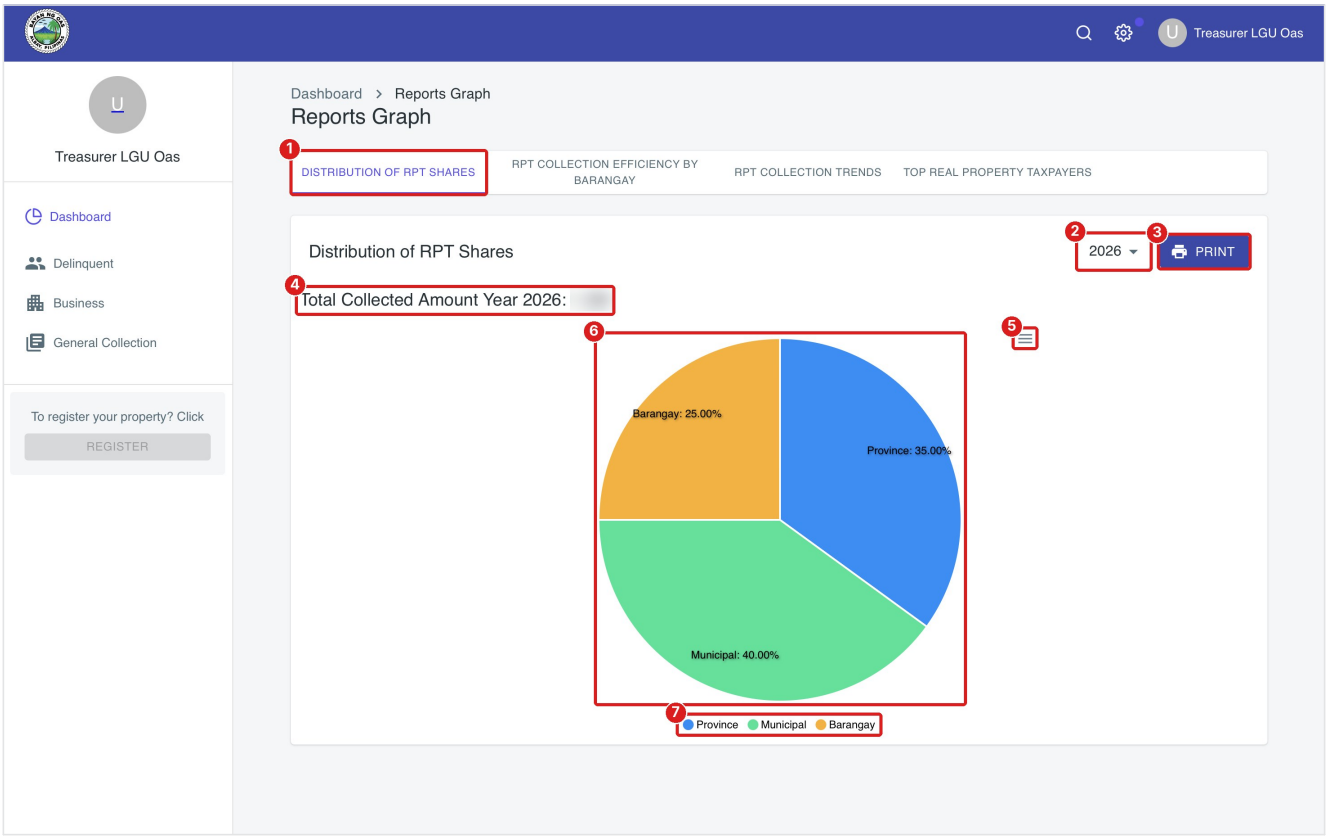

Figure 2.1. Distribution of RPT Shares for 2026.

1 Tab 2 Year filter 3 PRINT 4 Total collected 5 Chart menu 6 Pie chart 7 Legend

Part	What it does
1 Tab	Distribution of RPT Shares.
2 Year filter	Year of the collections shown.
3 PRINT	Prints the chart.
4 Total collected	Total RPT collected in the selected year (**Total Collected Amount Year 2026**).
5 Chart menu (three-line icon)	Chart options, such as downloading.
6 Pie chart	Share of each level: **Municipal 40%**, **Province 35%**, **Barangay 25%**.
7 Legend	Province (blue), Municipal (green), Barangay (orange).

> **NOTE** The percentages are fixed sharing rates, so they stay the same each year. Point to a slice to see its peso amount.

2.2 RPT Collection Efficiency by Barangay

> **About this report**
> Collection efficiency measures how much of the real property tax due in a barangay has actually been collected, shown as a percentage. This bar chart gives one bar per barangay for the selected year. Tall bars mark barangays where most of the tax due has been paid; short or missing bars mark barangays where collection is low. Use it to decide where to send collection notices, hold tax campaigns or ask barangay officials for help.

Click the **RPT COLLECTION EFFICIENCY BY BARANGAY** tab.

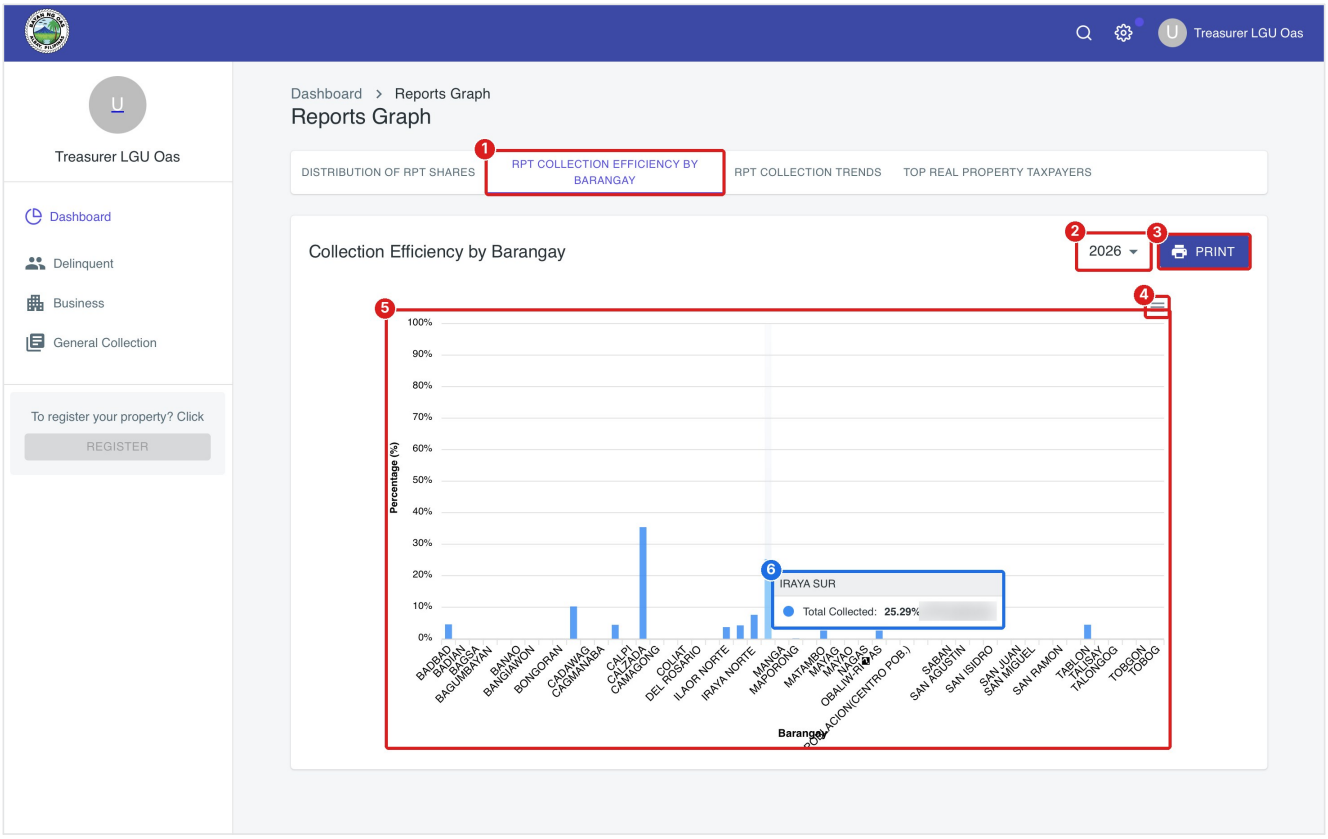

Figure 2.2. Collection Efficiency by Barangay for 2026, pointing to Iraya Sur.

1 Tab 2 Year filter 3 PRINT 4 Chart menu 5 Bar chart 6 Tooltip

Part	What it does
1 Tab	RPT Collection Efficiency by Barangay.
2 Year filter	Year of the collections shown.
3 PRINT	Prints the chart.
4 Chart menu (three-line icon)	Chart options, such as downloading.
5 Bar chart	One bar per barangay; height is the percentage collected (0–100%). Barangay names are under the bars.
6 Tooltip	Point to a bar to see the barangay, the percentage and the peso amount collected, e.g. **IRAYA SUR — 25.29%** of the tax due.

NOTE In 2026 most barangays are below 40%. The year is still running, so the bars will rise as more payments are posted.

2.3 RPT Collection Trends

> **About this report**
> This line chart shows the total real property tax collected in each tax year, so you can see whether collections are rising or falling over time. Choose the last year with the first filter and how many years to show with the second (5, 10, 15 or 20 years). A falling line is a signal to look at delinquency (Section 3) and collection efficiency (2.2). The point for the current year is not final until the year ends.

Click the **RPT COLLECTION TRENDS** tab.

SECTION 3

Delinquent Reports

Click **Delinquent** in the side menu to open the Delinquent Reports Graph. It shows unpaid real property tax in four ways.

In this section

3.1 Delinquent Tax per Barangay

3.2 Composition of Delinquent Tax

3.3 Delinquency by Property Class

3.4 Top Delinquent Taxpayers

3.1 Delinquent Tax per Barangay

About this report

A real property tax becomes delinquent when it is not paid on time. This horizontal bar chart adds up the unpaid tax due, including penalties, for every barangay. It shows where the unpaid tax is concentrated, so collection efforts can start with the barangays that owe the most. The report covers all delinquent accounts and has no year filter.

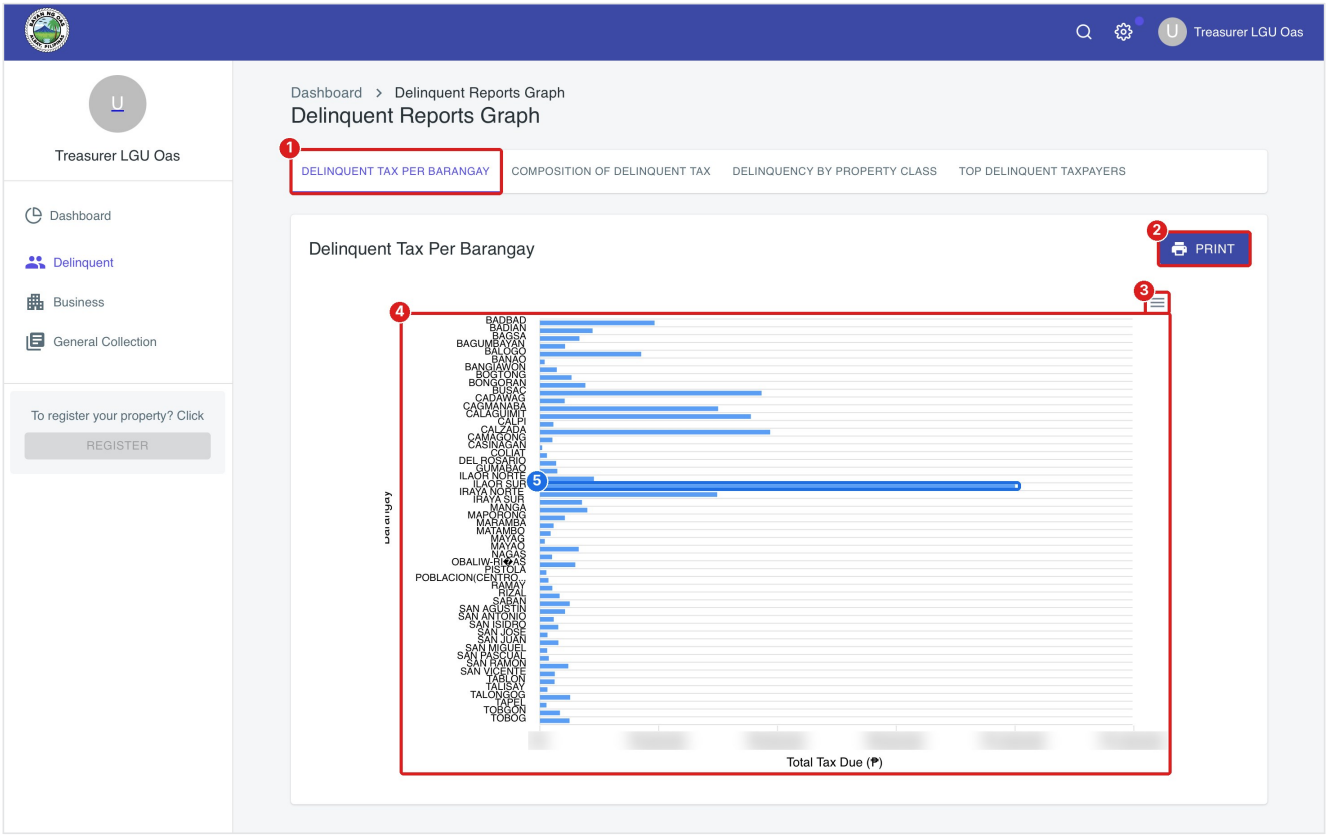

Figure 3.1. Delinquent Tax per Barangay.

4 Bar chart	Barangays from Badbad (top) to Tobog (bottom). Bar length is the total tax due.
5 Highest barangay	Ilaor Sur owes the most by far. Calzada, Busac and Calaguimit follow.

NOTE The barangay names are packed closely. Point to a bar to read the barangay name and its exact amount.

3.2 Composition of Delinquent Tax

About this report

Delinquent tax is made up of the **principal**, the unpaid tax itself, and the **penalty**, the interest added for each month of delay. This pie chart shows how much of all delinquent tax is principal and how much is penalty. A large penalty share means many accounts have been unpaid for a long time, and that settling them early saves taxpayers money.

PART 3

Provincial Treasurer Analyst User Manual

For the analyst of the Provincial Treasurer’s Office. Covers the Treasurer’s reports for each municipality of Albay, with the Municipality selector.

SECTION 1

Getting Started

This section explains what the Provincial Treasurer’s reports are for, how the Provincial Treasurer Analyst opens eRPT, how the screen is laid out and how to choose a municipality.

In this section

1.1 About eRPT for the Provincial Treasurer’s Office

1.2 Opening eRPT

1.3 The Provincial Treasurer Analyst screen

1.4 Header and side menu

1.5 Choosing a municipality

1.6 Controls common to all reports

1.1 About eRPT for the Provincial Treasurer’s Office

eRPT is the Real Property Tax system used by the municipalities of Albay. The Provincial Treasurer’s Office uses it to look at the real property tax (RPT) collections, delinquent accounts, business permits and general collections of **each municipality** in the province, shown as charts that can be filtered and printed. The account works like the Municipal Treasurer’s reports, with one addition: a **Municipality** selector that switches every report to another municipality.

As a **Provincial Treasurer Analyst** you can:

- choose any of the 15 municipalities of Albay and view its reports;
- see how RPT collections are shared among the province, the municipality and the barangays;
- compare collection efficiency across barangays and follow RPT collections over the years;
- rank the top real property taxpayers;
- study delinquent tax by barangay, by property class and by taxpayer, and how much of it is penalty;
- count registered, new, renewed and closed businesses, and business collections per barangay;
- see each municipality’s collections by revenue source; and
- filter, zoom into and print each report.

> **IMPORTANT Figures change.** The screenshots were taken from the live system on 27 October 2026 (Municipality of Oas, year 2026). Taxpayer names and peso amounts are blurred.

1.2 Opening eRPT

1. Open a web browser and go to **rptpayment.oas.lguapp.com**.
2. The eRPT home page opens (Figure 1.1).
3. Sign in with the Provincial Treasurer Analyst account given to you by the system administrator.
4. After signing in, the **Reports Graph** of the Dashboard opens (Section 2).

10 Municipality	Shows the municipality whose data you are viewing. Click it to choose another (1.5).

1.5 Choosing a municipality

> **About this report**
> The Provincial Treasurer oversees the real property tax of all the municipalities of Albay. The Municipality selector at the top right of every report page decides which municipality's records the charts are drawn from. Changing it lets you compare, for example, the collection efficiency of Oas with that of Bacacay, or check the delinquent accounts of one municipality before a provincial meeting.

1. Click the Municipality button at the top right of the page (it shows, for example, **MUNICIPALITY OF OAS**).
2. A list of municipalities opens (Figure 1.4). Click the one you need.
3. The button shows the new name, and the report updates (Figure 1.5).
4. The choice stays as you move between tabs and menus. Check the button before you print.

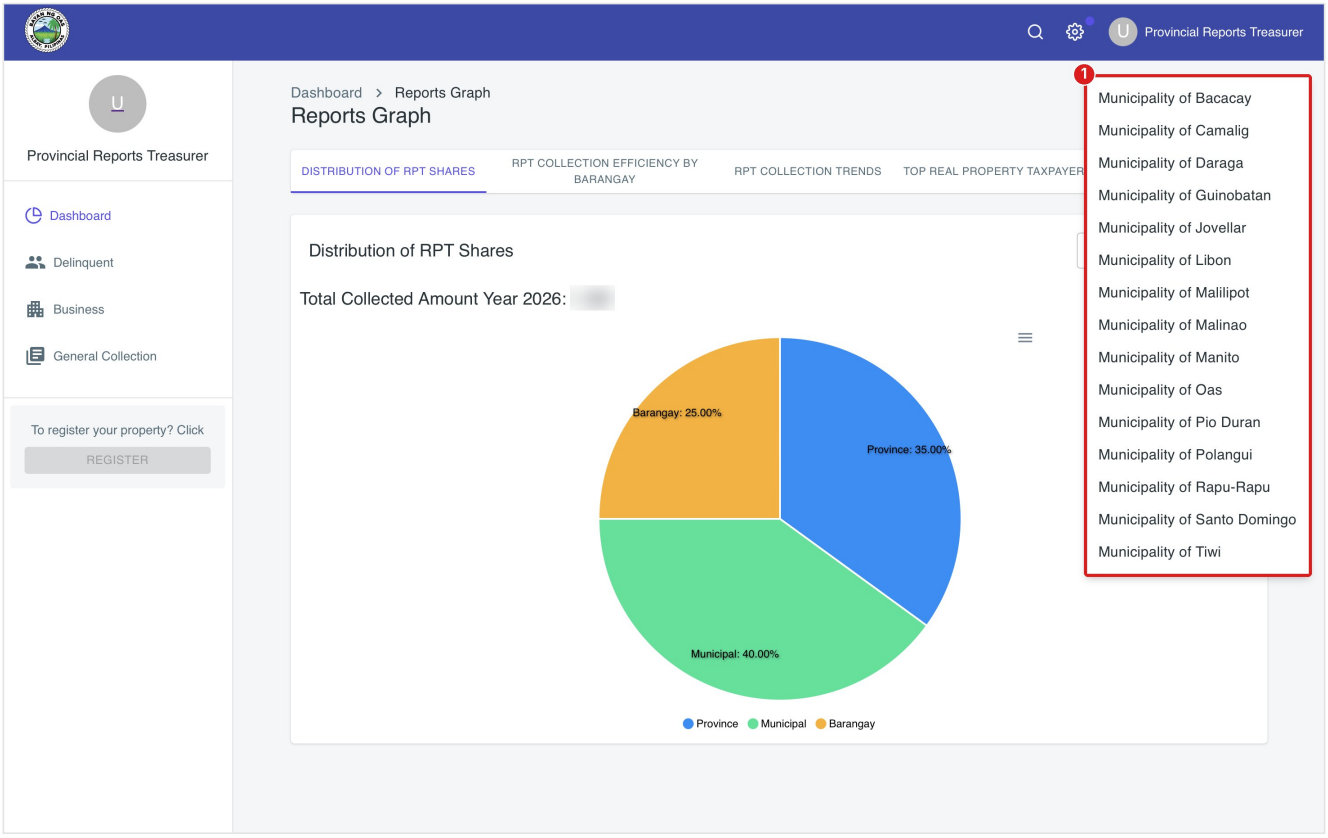

Figure 1.4. The list of municipalities.

1 Municipality list

The list has the 15 municipalities of Albay: Bacacay, Camalig, Daraga, Guinobatan, Jovellar, Libon, Malilipot, Malinao, Manito, Oas, Pio Duran, Polangui, Rapu-Rapu, Santo Domingo and Tiwi.

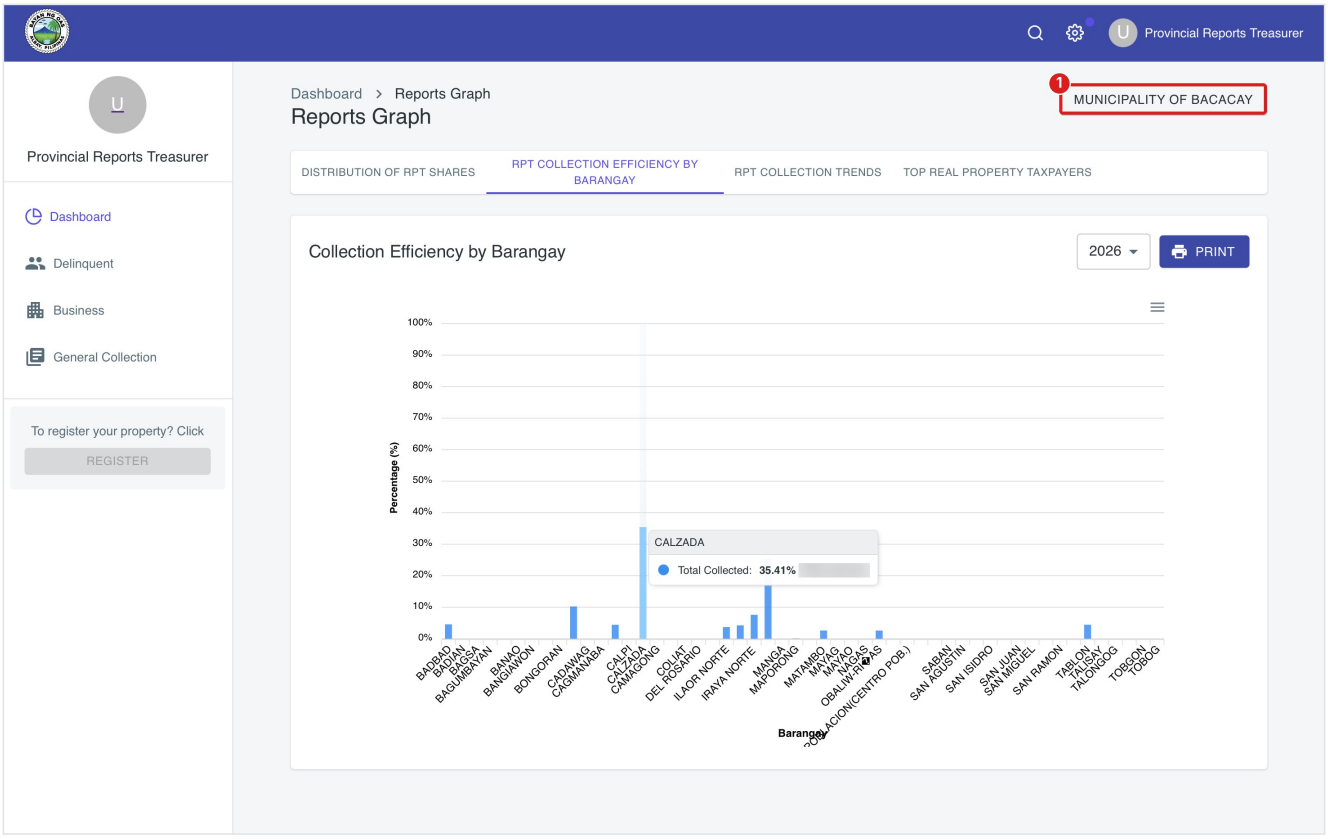

Figure 1.5. The Collection Efficiency report after choosing the Municipality of Bacacay.

1 Selected municipality

> **IMPORTANT** **Always check the municipality.** Printed reports do not change by themselves. Make sure the button shows the right municipality before you read or print a report.

1.6 Controls common to all reports

Each report page has a row of tabs, and each tab shows one chart. The same controls appear on most charts:

Control	What it does
Municipality	Chooses the municipality whose data is shown (1.5).
Tabs	Switch between the reports of the page. The open tab is blue and underlined. A **›** at the end of the tab bar means there are more tabs.
Year filter	Shows the report for one year (e.g. **2026**).
Top / Years filter	Chooses how many taxpayers or years to show.
PRINT	Prints the report shown.
Chart menu (three-line icon)	Chart options, such as downloading the chart.
Tooltip	Point to a bar, slice or point to see its exact value.
Zoom tools	On line charts: zoom in, zoom out, zoom to an area, pan and reset (home).

SECTION 2

RPT Reports (Dashboard)

The Dashboard opens the Reports Graph for real property tax collections of the selected municipality. It has four tabs.

In this section

2.1 Distribution of RPT Shares

2.2 RPT Collection Efficiency by Barangay

2.3 RPT Collection Trends

2.4 Top Real Property Taxpayers

2.1 Distribution of RPT Shares

About this report

Real property tax collected by a municipality is shared with the province and the barangays, as set by the Local Government Code. This pie chart takes the total RPT collected by the selected municipality in the chosen year and shows how it is divided among the **Province**, the **Municipal** government and the **Barangays**. For the Provincial Treasurer it shows how much of each municipality's collection is the province's share, so remittances can be checked against it.

Click **Dashboard** in the side menu. The **DISTRIBUTION OF RPT SHARES** tab opens first.

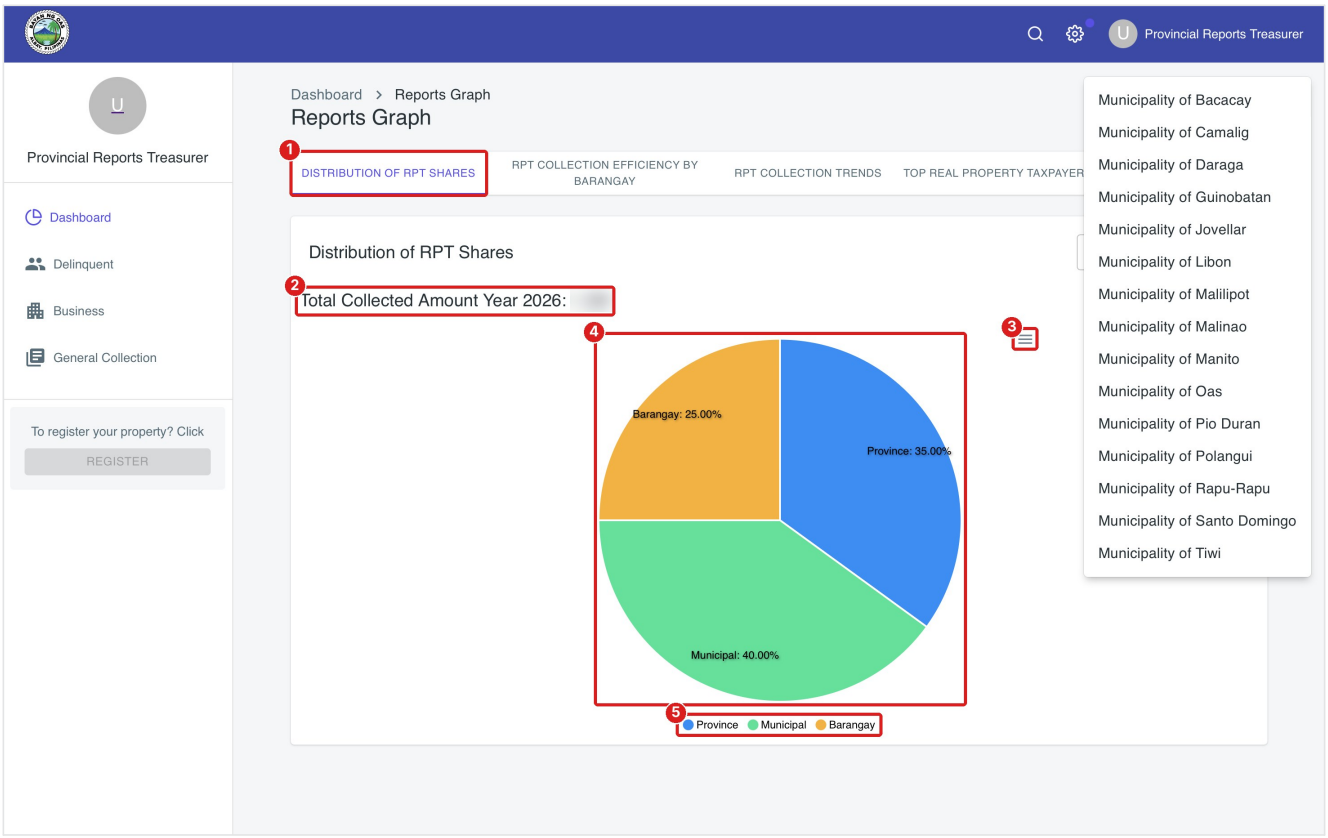

Figure 2.1. Distribution of RPT Shares for 2026 (Municipality list open).

1 Tab 2 Total collected 3 Chart menu 4 Pie chart 5 Legend

Part	What it does

2 Total collected	RPT collected by the municipality in the selected year (**Total Collected Amount Year 2026**).
3 Chart menu (three-line icon)	Chart options, such as downloading.
4 Pie chart	Share of each level: **Municipal 40%**, **Province 35%**, **Barangay 25%**.
5 Legend	Province (blue), Municipal (green), Barangay (orange).

> **NOTE** The Year filter and PRINT button sit at the top right of the chart, behind the open Municipality list in Figure 2.1. The percentages are fixed sharing rates; point to a slice to see its amount.

2.2 RPT Collection Efficiency by Barangay

> **About this report**
> Collection efficiency measures how much of the real property tax due in a barangay has actually been collected, shown as a percentage. This bar chart gives one bar per barangay of the selected municipality. Tall bars mark barangays where most of the tax due has been paid; short or missing bars mark barangays where collection is low. Comparing the chart across municipalities shows which local governments need support in their collection drives.

Click the **RPT COLLECTION EFFICIENCY BY BARANGAY** tab.

SECTION 5

General Collection Report

Click **General Collection** in the side menu to open the General Collection Report. It shows all collections of the selected municipality, not only RPT.

In this section

5.1 Collection by Revenue Source

5.2 Other tabs

5.1 Collection by Revenue Source

About this report

A municipality collects money from many sources besides real property tax: permits and licenses, certificates, community tax, market and stall fees, school documents, water fees and more. This horizontal bar chart lists every revenue source of the selected municipality and the total collected from it in the chosen year. It shows which sources bring in the most income and which bring in little or nothing.

PART 4

Provincial Assessor Analyst User Manual

For the analyst of the Provincial Assessor’s Office. Covers RPUs per municipality and the assessment reports of each municipality.

SECTION 1

Getting Started

This section explains what the Provincial Assessor's reports are for, how the Provincial Assessor Analyst opens eRPT, how the screen is laid out and how to choose a municipality.

In this section

1.1 About eRPT for the Provincial Assessor's Office

1.2 Opening eRPT

1.3 The Provincial Assessor Analyst screen

1.4 Header and side menu

1.5 Choosing a municipality

1.6 Controls common to all reports

1.1 About eRPT for the Provincial Assessor's Office

eRPT is the Real Property Tax system used by the municipalities of Albay. It holds the Real Property Tax Information System (RPTIS) records of each municipality: property records, tax assessments and billing information. The Provincial Assessor's Office uses it to study the assessment roll of **each municipality** and to compare the number of properties **across municipalities**, shown as charts that can be filtered and printed.

As a **Provincial Assessor Analyst** you can:

- compare the number of Real Property Units (RPUs) of the municipalities, by classification;
- choose a municipality and view its five assessment reports;
- see how its total assessed value is shared among property classifications;
- see how many RPUs each barangay has, and follow the number of tax declarations per year;
- rank barangays by assessed value and compare fair market value with assessed value; and
- filter, zoom into and print each report.

> **IMPORTANT Figures change.** The screenshots were taken from the live system on 27 October 2026 (Municipality of Oas). Peso amounts are blurred in the screenshots.

1.2 Opening eRPT

1. Open a web browser and go to **rptpayment.oas.lguapp.com**.
2. The eRPT home page opens (Figure 1.1).
3. Sign in with the Provincial Assessor Analyst account given to you by the system administrator.
4. After signing in, the **Reports Graph** of the Dashboard opens (Section 3).

8 Municipality	Shows the municipality whose data you are viewing. Click it to choose another (1.5).

The menu you are in is shown in blue.

1.5 Choosing a municipality

About this report

The Provincial Assessor oversees the assessment of real property in all the municipalities of Albay. The Municipality selector at the top right of every report page decides which municipality's records the Dashboard charts are drawn from. Changing it lets you review the assessment roll of one municipality at a time, for example before a general revision or a provincial meeting.

1. Click the Municipality button at the top right of the page (it shows, for example, **MUNICIPALITY OF OAS**).
2. A list of the 15 municipalities of Albay opens: Bacacay, Camalig, Daraga, Guinobatan, Jovellar, Libon, Malilipot, Malinao, Manito, Oas, Pio Duran, Polangui, Rapu-Rapu, Santo Domingo and Tiwi.
3. Click the municipality you need. The button shows the new name and the report updates.
4. The choice stays as you move between tabs. Check the button before you print.

IMPORTANT **Always check the municipality.** Make sure the button shows the right municipality before you read or print a report.

1.6 Controls common to all reports

Each report page has a row of tabs, and each tab shows one chart. The same controls appear on most charts:

Control	What it does
Municipality	Chooses the municipality whose data is shown (1.5).
Tabs	Switch between the reports of the page. The open tab is blue and underlined. Use the ‹ › arrows at the ends of the tab bar to see hidden tabs.
Filter	Narrows the report, for example to one year or to the top barangays.
PRINT	Prints the report shown.
Chart menu (three-line icon)	Chart options, such as downloading the chart.
Tooltip	Point to a bar, slice or point to see its exact value.
Zoom tools	On line charts: zoom in, zoom out, zoom to an area, pan and reset (home).

RPUs per Municipality

Click **RPUs Municipality** in the side menu. This page compares the number of properties across municipalities.

In this section

2.1 Property Distribution per Municipality

2.1 Property Distribution per Municipality

About this report

A Real Property Unit (RPU) is one parcel of land, building or machinery with its own tax declaration. This stacked bar chart gives one bar for each municipality whose records are in eRPT. Bar height is the number of RPUs in that municipality, and each colour is a property classification. It lets the Provincial Assessor compare the size of each municipality's assessment roll and see whether it is mostly agricultural, residential or another class. Unlike the Dashboard reports, this chart covers several municipalities at once.

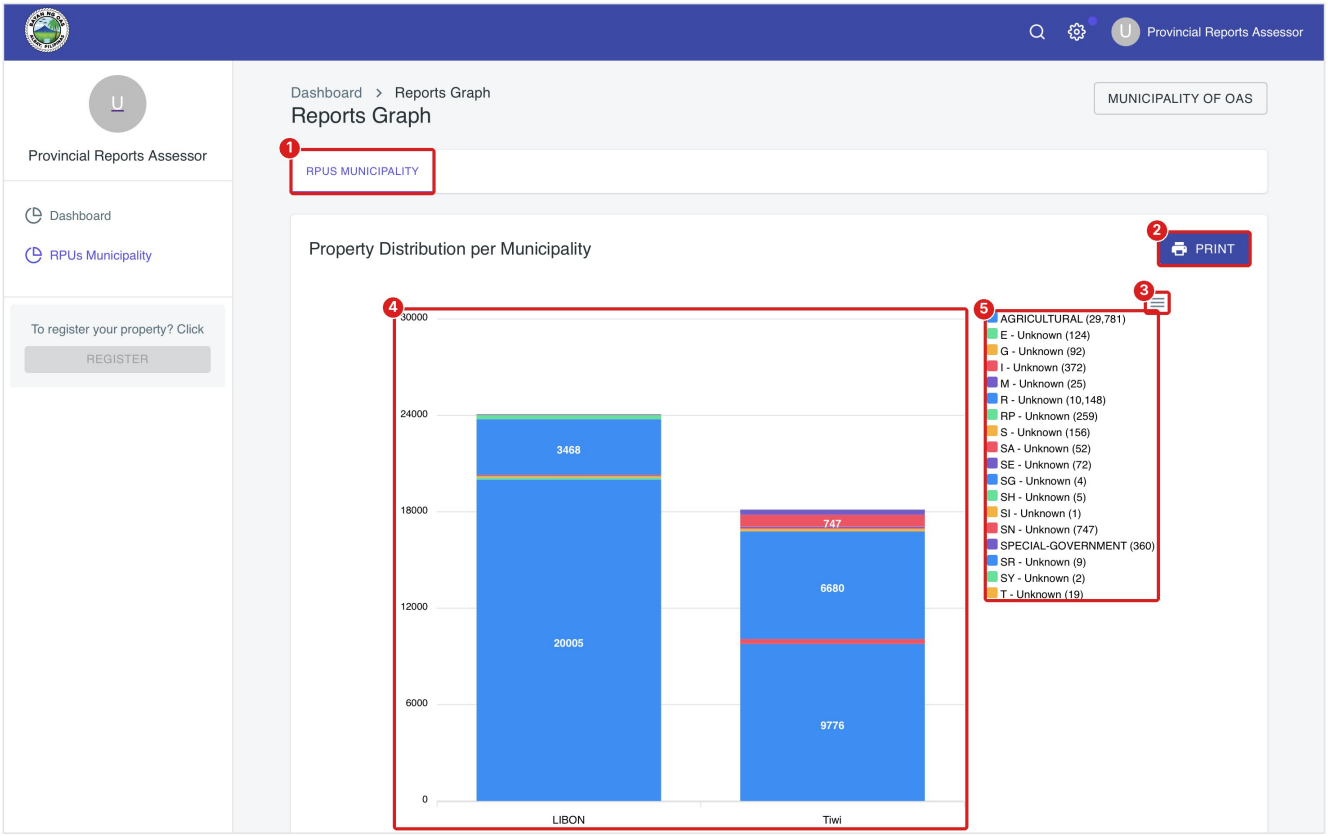

Figure 2.1. Property Distribution per Municipality.

Part	What it does
1 Tab	RPUS MUNICIPALITY.
2 PRINT	Prints the chart.

Part	What it does
3 Chart menu (three-line icon)	Chart options, such as downloading.
4 Stacked bars	One bar per municipality (here Libon and Tiwi). Numbers inside the bars are the RPU counts of the larger classes.
5 Legend	Each classification with its total for all municipalities shown, e.g. Agricultural (29,781).

> **NOTE** Some classes appear as a short code followed by **Unknown**, such as R - Unknown. These are classifications recorded in a municipality's data under a code that has no full name in eRPT yet.

SECTION 3

Assessment Roll by Classification Class

Click **Dashboard** in the side menu. The Reports Graph opens on this report, the first of five tabs.

In this section

3.1 Reading the chart

3.2 Filtering by year

3.1 Reading the chart

About this report

The assessment roll is the official list of all taxable real property in a municipality with its assessed value. This pie chart splits the total assessed value of the selected municipality's roll by **classification**, the actual use of the property (residential, agricultural, commercial and so on). It shows which kinds of property carry most of the tax base. In Oas, residential and agricultural property together make up more than three-quarters of the assessed value.

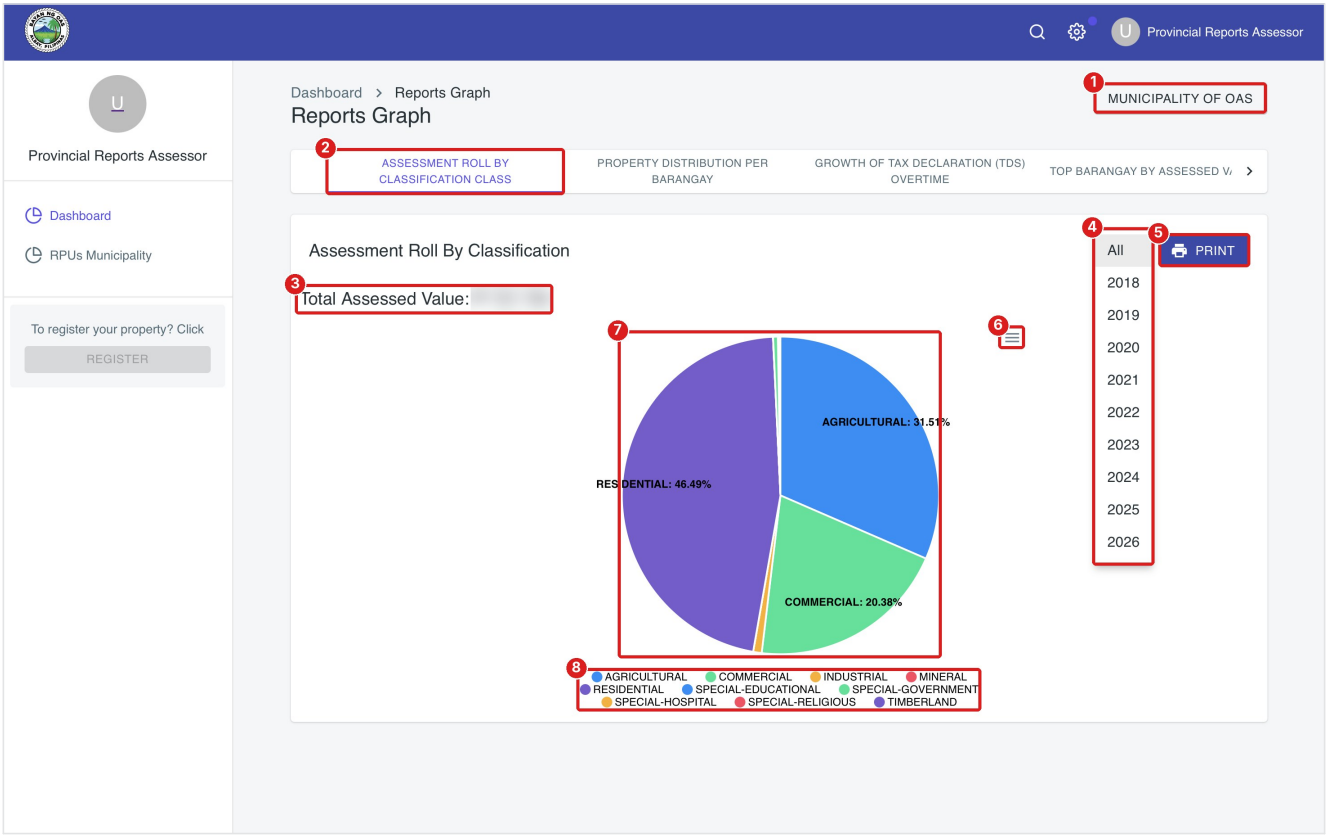

Figure 3.1. Assessment Roll by Classification, with the year list open.

7 Pie chart	One slice per classification: Residential 46.49%, Agricultural 31.51%, Commercial 20.38%; the thin slices are the other classes.
8 Legend	Agricultural, Commercial, Industrial, Mineral, Residential, Special-Educational, Special-Government, Special-Hospital, Special-Religious and Timberland.

3.2 Filtering by year

1. Click the filter box at the top right (it shows **All**).
2. Click a year from **2018** to **2026**, or **All** for every year combined.
3. The pie and the Total Assessed Value update. Point to a slice to see its assessed value.

SECTION 4

Property Distribution per Barangay

This report counts the RPUs in each barangay of the selected municipality and splits each count by classification.

In this section

4.1 Reading the chart

4.1 Reading the chart

About this report

This stacked bar chart gives one bar per barangay of the selected municipality. Bar height is the number of RPUs, and each colour is a classification. It shows **where** the properties are and what they are used for: tall bars mark barangays with many properties, and the colours show whether a barangay is mostly agricultural or residential. Use it to plan field appraisal work and general revisions.

Click the **PROPERTY DISTRIBUTION PER BARANGAY** tab. This report has no filter.

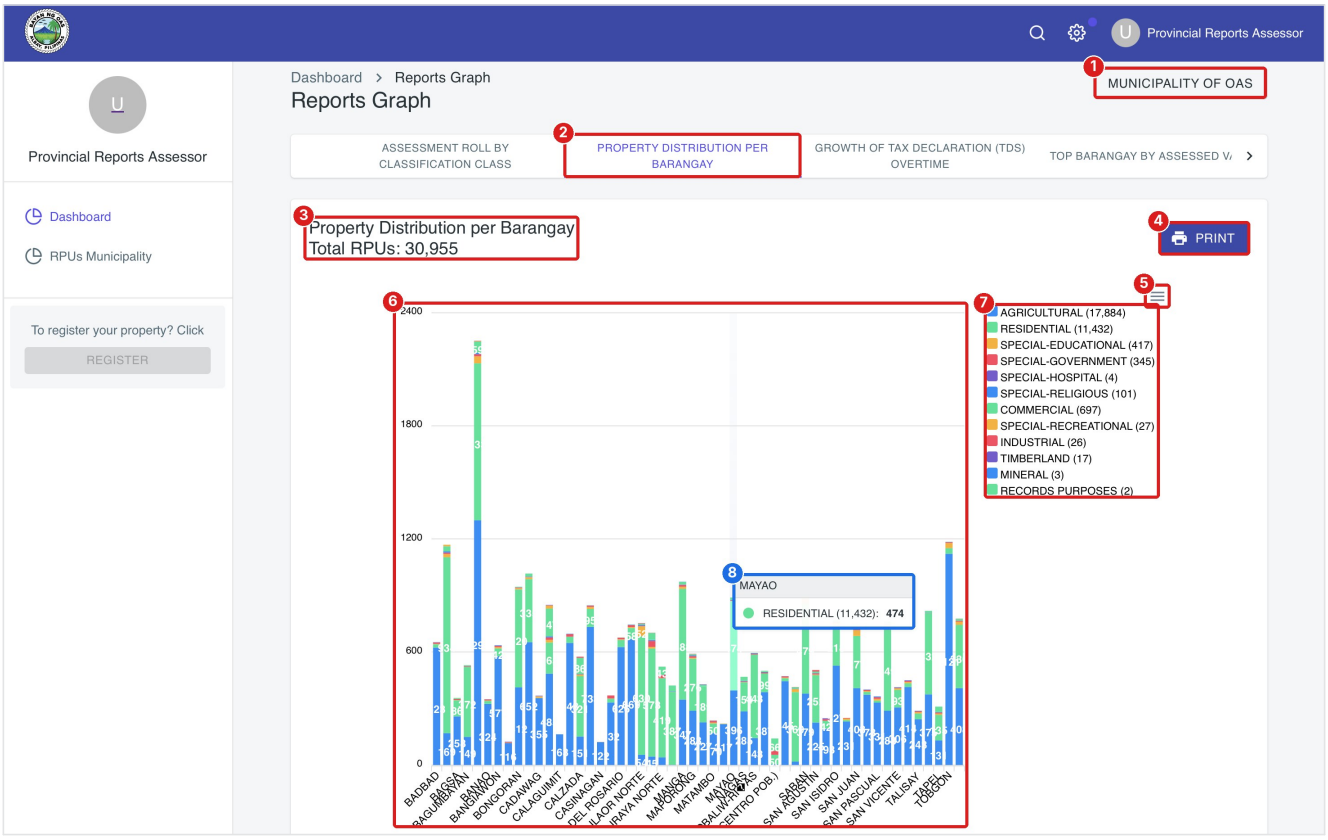

Figure 4.1. Property Distribution per Barangay, pointing to Mayao.

3 Title and Total RPUs	Number of RPUs in the municipality: **30,955** for Oas.
4 PRINT	Prints the chart.
5 Chart menu (three-line icon)	Chart options, such as downloading.
6 Stacked bars	One bar per barangay; barangay names are under the bars.
7 Legend	Classification with its municipal total, e.g. Agricultural (17,884), Residential (11,432).
8 Tooltip	Barangay, classification with municipal total, and count: **RESIDENTIAL (11,432): 474** means Mayao has 474 residential RPUs.

SECTION 5

Growth of Tax Declarations (TDs) Overtime

This report shows how many tax declarations were recorded each year in the selected municipality.

In this section

5.1 Reading the chart and filters

5.1 Reading the chart and filters

About this report

Every time a property is declared, transferred, subdivided or revised, a tax declaration (TD) is recorded. This line chart counts the TDs recorded each year from 2018 to the current year. It shows the workload of the municipal assessor over time and how active the property market has been. The current year is still running, so its point will keep rising until the year ends.

Click the **GROWTH OF TAX DECLARATION (TDS) OVERTIME** tab.

Figure 5.1. Growth of Tax Declarations, 2018 to 2026.

Part	What it does
3 Taxable/Exempt filter	**All**, **Taxable** or **Exempt** properties. Works together with the year filter.
4 PRINT	Prints the chart.
5 Zoom tools	Zoom in, zoom out, zoom to an area, pan, reset and chart menu.
6 Line chart	Number of transactions (TDs) per year. Point to the line to see a year and its count.

Top Barangay by Assessed Value

This report ranks the barangays of the selected municipality by their total assessed value.

In this section

6.1 Top 5 and Top 10

6.2 Showing all barangays

6.1 Top 5 and Top 10

About this report

This horizontal bar chart ranks the barangays by the total assessed value of all property in them. It shows where the real property tax base of the municipality is concentrated. In Oas, Ilaor Sur holds far more assessed value than any other barangay. Use Top 5 or Top 10 for briefings, and All for a full ranking.

Click **›** at the end of the tab bar if needed, then click the **TOP BARANGAY BY ASSESSED VALUE** tab.

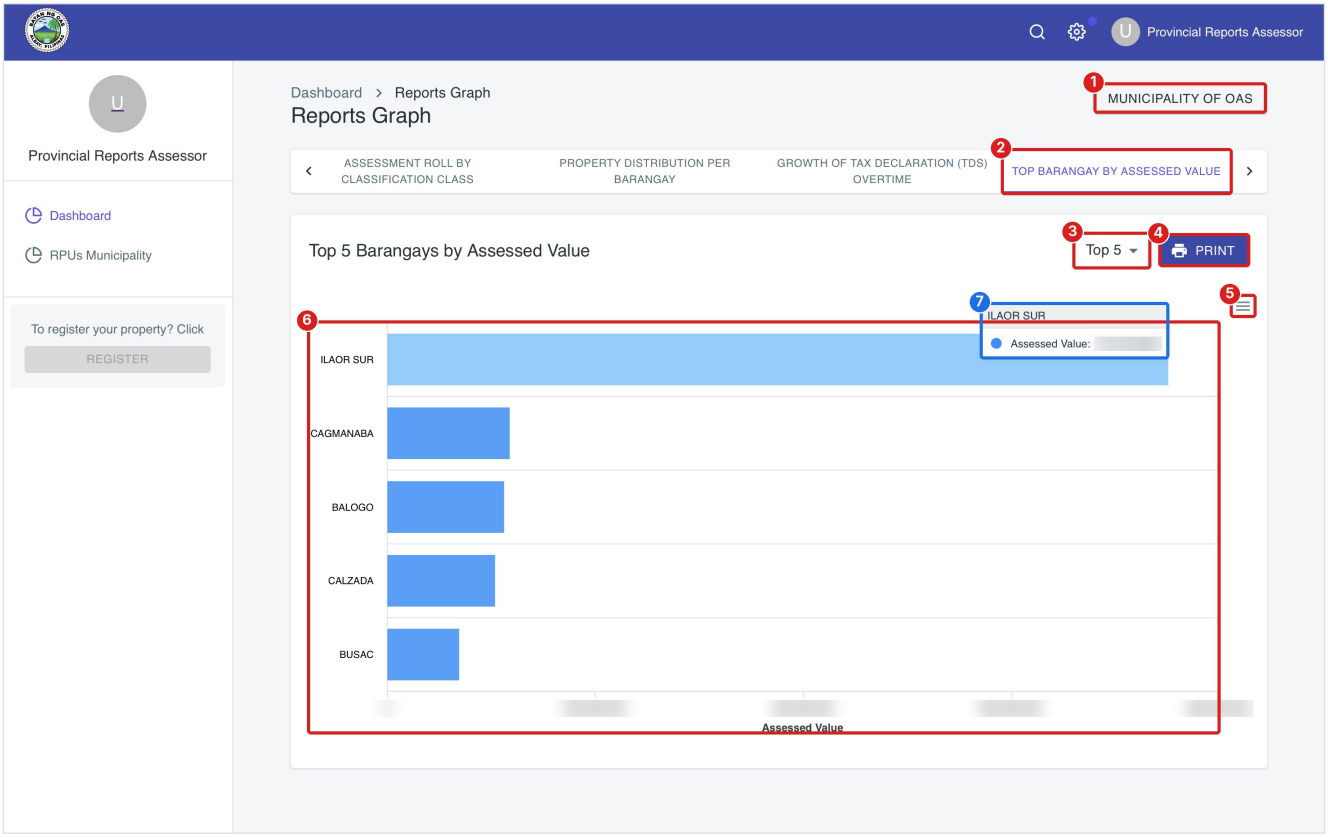

Figure 6.1. Top 5 Barangays by Assessed Value, pointing to Ilaor Sur.

7 Tooltip	Point to a bar to see the barangay and its assessed value.

6.2 Showing all barangays

Choose **All** in the Top filter to rank every barangay (Figure 6.2).

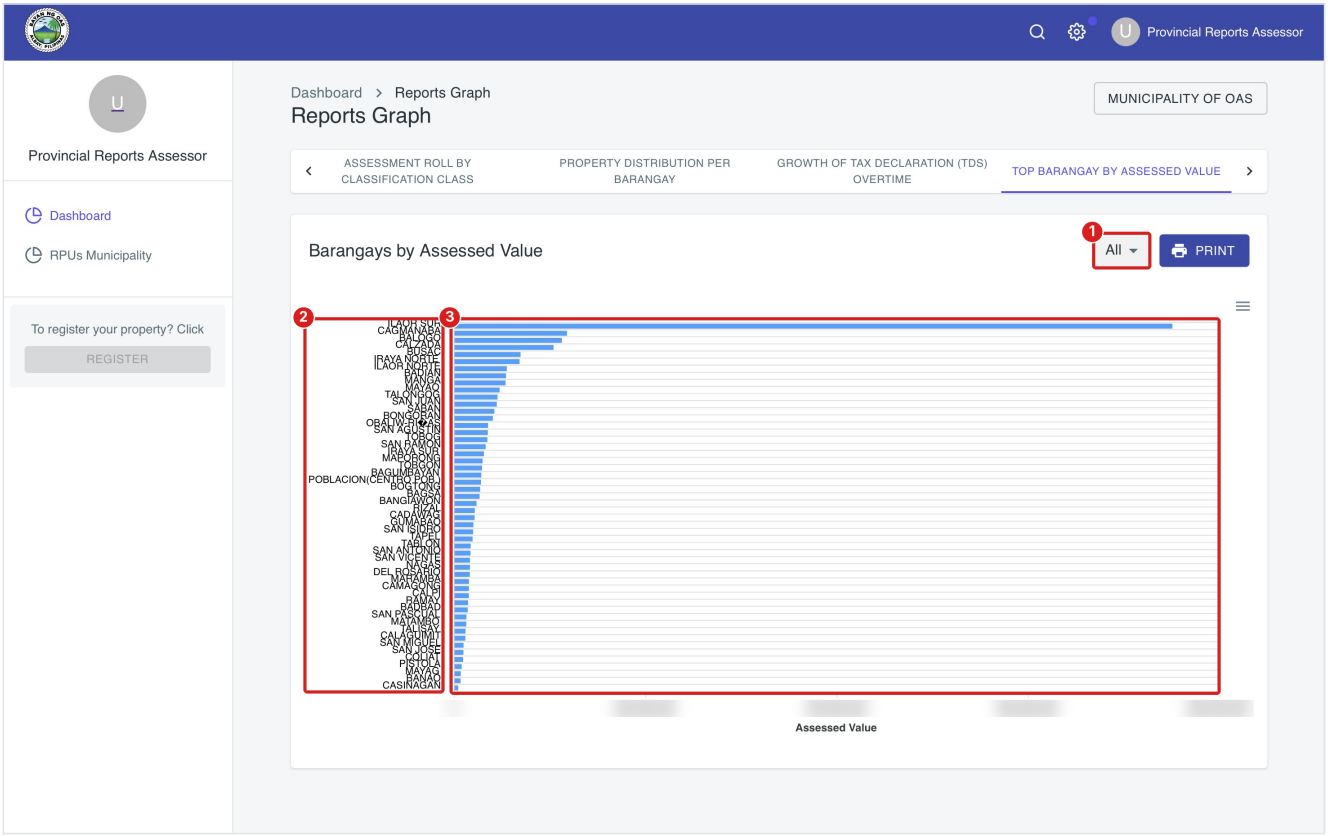

Figure 6.2. All barangays by assessed value.

1 Filter set to All 2 Barangay names 3 Bars

NOTE With all barangays shown, the names overlap. Use **Top 10** or point to a bar to read a name clearly.

FMV vs. Assessed Value per Barangay

This report places the fair market value (FMV) of each barangay beside its assessed value.

In this section

7.1 Reading the chart

7.1 Reading the chart

> **About this report**
> The fair market value (FMV) is what a property would sell for in the open market, based on the schedule of market values. The assessed value is the part of the FMV that is taxed, found by applying the assessment level for the property's classification. This chart places the two values side by side for each barangay of the selected municipality. The gap between them shows how much of the market value is taxed; a barangay with a wide gap usually has more property in classes with low assessment levels, such as agricultural land.

Click **›** at the end of the tab bar, then click the **FMV VS. ASSESSED VALUE PER BARANGAY** tab. This report has no filter.

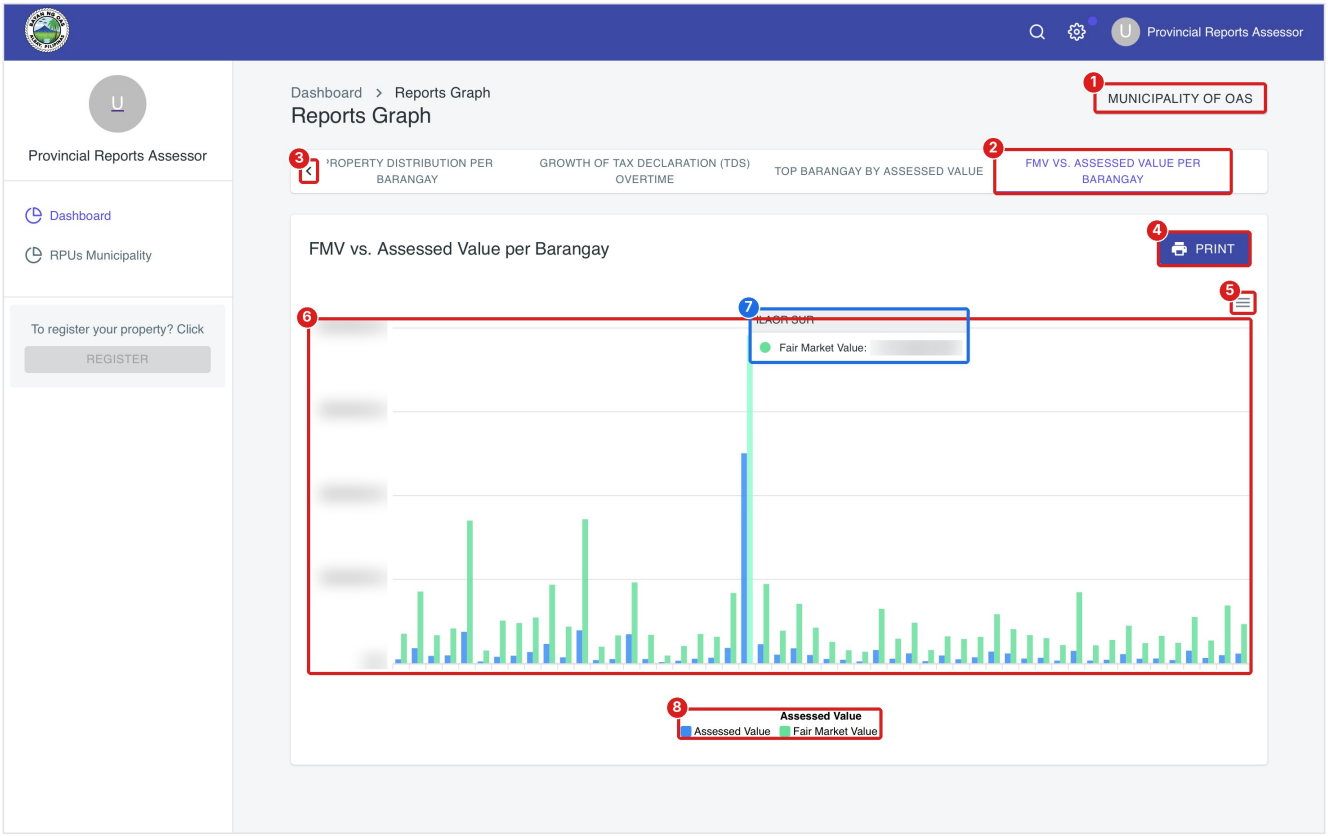

Figure 7.1. FMV vs. Assessed Value per Barangay, pointing to Ilaor Sur.
