   - 2.7 Online Request 169
3. Process 171
   - 3.1 Report of Collection and Deposits(RCD) Processing 171
   - 3.2 Report of Collection by Liquidating Officer(RCLO) Processing 173
4. Reports 175
   - 4.1 Accountable Forms: Report of Accountability for Accountable Forms 175
   - 4.2 Accountable Forms: Consolidated Report of Accountability for Accountable Forms 177
   - 4.3 Collection: Abstract of Collection 179
   - 4.4 Report of Collection and Deposit(RCD) 182
   - 4.5 Report of Collection by Liquidating Officer(RCLO) 186
5. What limits a cashier 191

SECTION 1

Admin

The Admin menu is where the administrator of TIS manages the people who use the system. It has two pages: **Users** and **Roles**. This section explains each page and each button on it.

> **Who can use this section.** The Admin menu appears for an account whose role is **Admin**. The other roles (Cashier, AF Issuer, Brgy Treasurer and Disbursing Officer) see their own menus and do not see Admin.

In this section

1.1 The Admin menu

1.2 Users

- 1.2.1 Finding a user
- 1.2.2 Adding a user
- 1.2.3 Closing a window without saving
- 1.2.4 Editing a user
- 1.2.5 Assigning RPT users
- 1.2.6 Assigning personnel

1.3 Roles

- 1.3.1 Adding a role
- 1.3.2 Editing a role

1.1 The Admin menu

After you sign in as Admin, the page title at the top left reads **Admin**. Click the menu icon (three lines) beside it to open the sidebar. The sidebar shows your name and email, and these groups: **Transaction**, **Referential**, **Process**, **Reports** and **Admin**. **Exit** at the bottom signs you out.

Click **Admin** to open its pages:

- **Users:** the accounts of the people who sign in. See Section 1.2.
- **Roles:** the list of roles that an account can have. See Section 1.3.

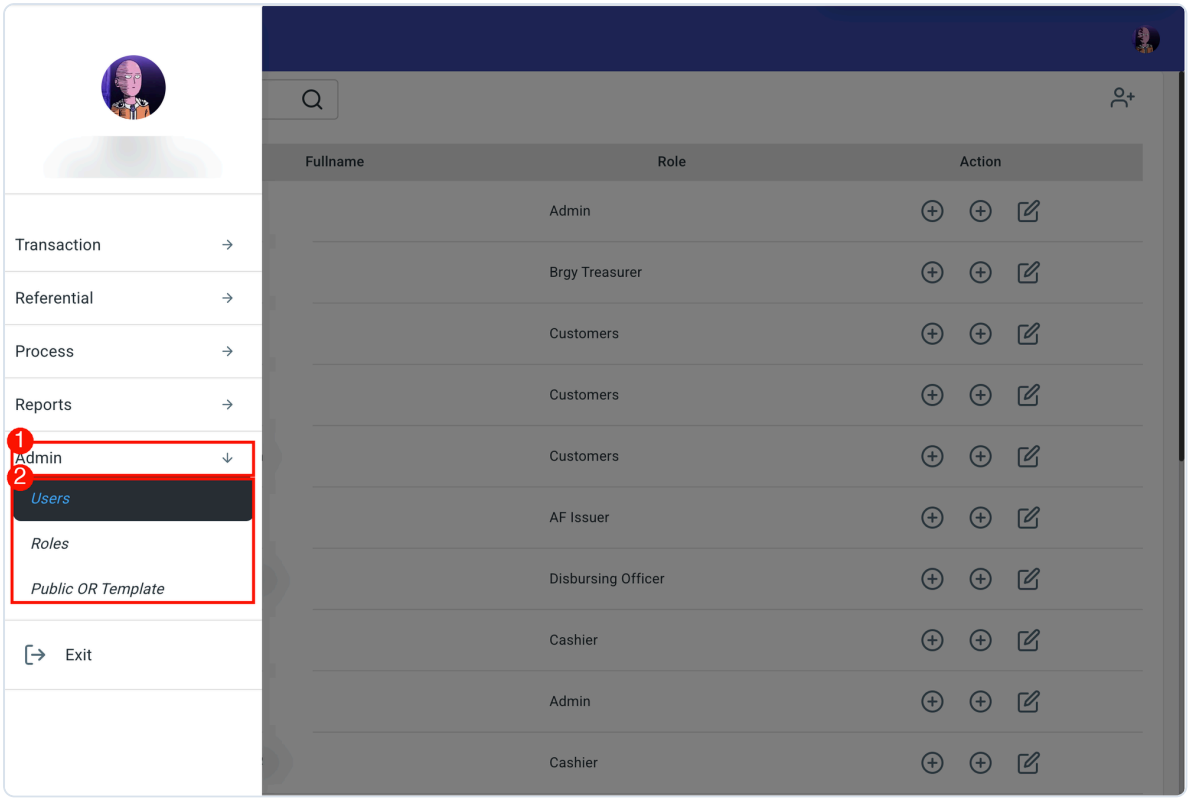

Figure 1.1. The sidebar with the Admin group open. 1 Admin group · 2 The pages under Admin. The name and email are covered.

1.2 Users

Click **Users** to see every account in TIS. The table shows the number, the **Fullname** (last name, then first name), the **Role** and the **Action** icons of each user.

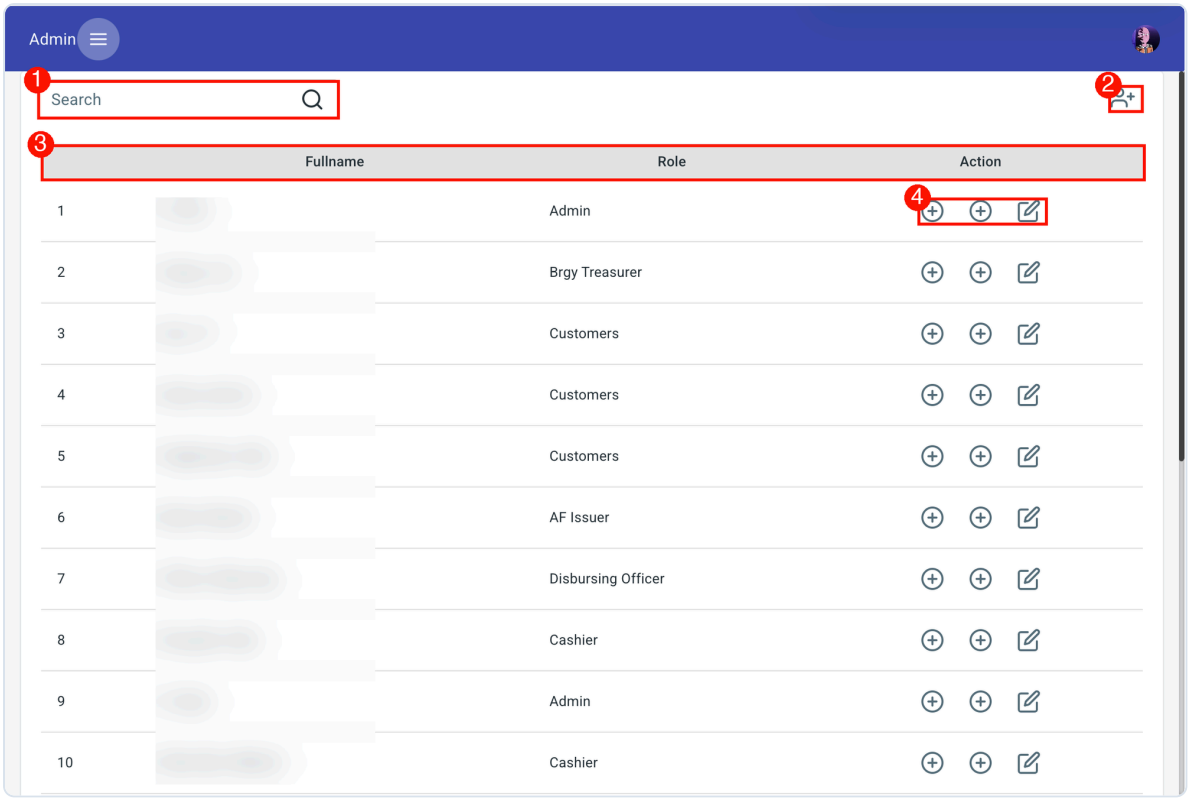

Figure 1.2. The Users page. 1 Search box · 2 Add User · 3 Table headings · 4 Action icons of a user. The names are covered.

1. **Search:** type a name to find a user. See Section 1.2.1.
2. **Add User** (the person icon with a plus sign): opens the form for a new user. See Section 1.2.2.
3. The table headings are **Fullname**, **Role** and **Action**.
4. The three **Action** icons of a user, from left to right: **Assigned RPT** (circle with a plus sign), **Assigned Personnel** (circle with a plus sign) and **Edit** (the pencil). Point to an icon to see its name. See Sections 1.2.4 to 1.2.6.

1.2.1 Finding a user

Type part of the first name or the last name in the **Search** box. The table shows only the users that match. Type the name in small letters. Clear the box to see all users again.

The table lists all the users in one long list. Scroll down to see the end of the list. The paging line below the table (**List** 10, **1-10 of 19**) shows the number of users in the system.

The **List** box beside it is a drop-down. Click it to choose how many rows the paging line counts: **10**, **20** or **50**.

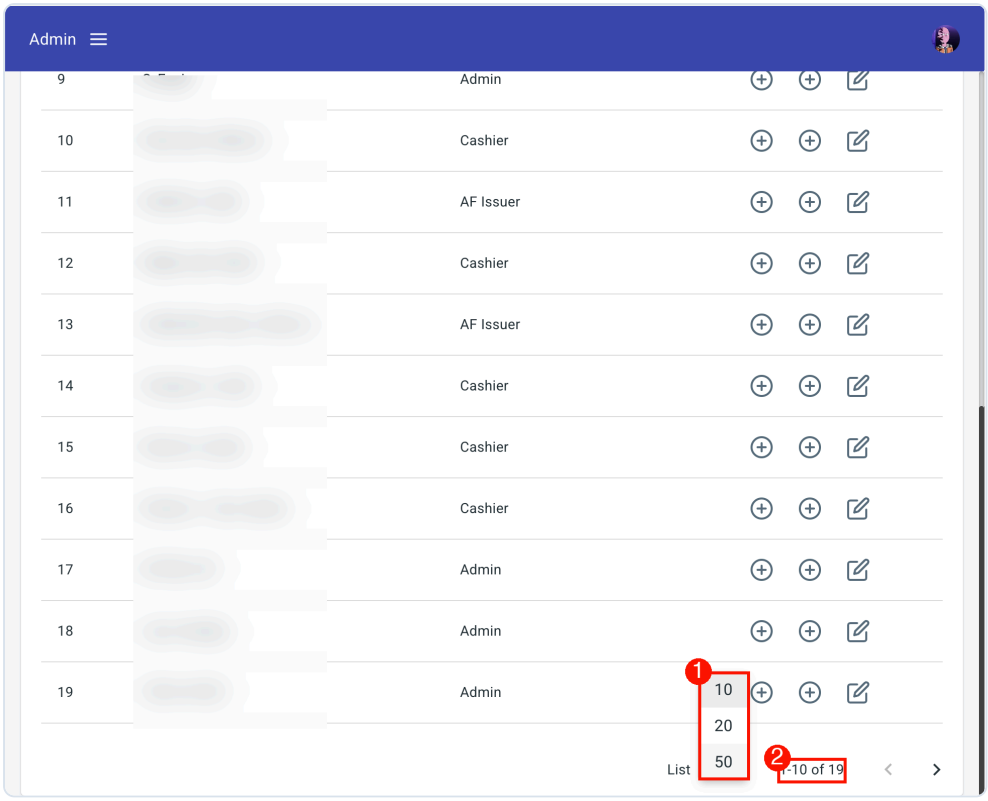

Figure 1.3. The List drop-down with its three choices. 1 The choices 10, 20 and 50 · 2 The count of users. The names are covered.

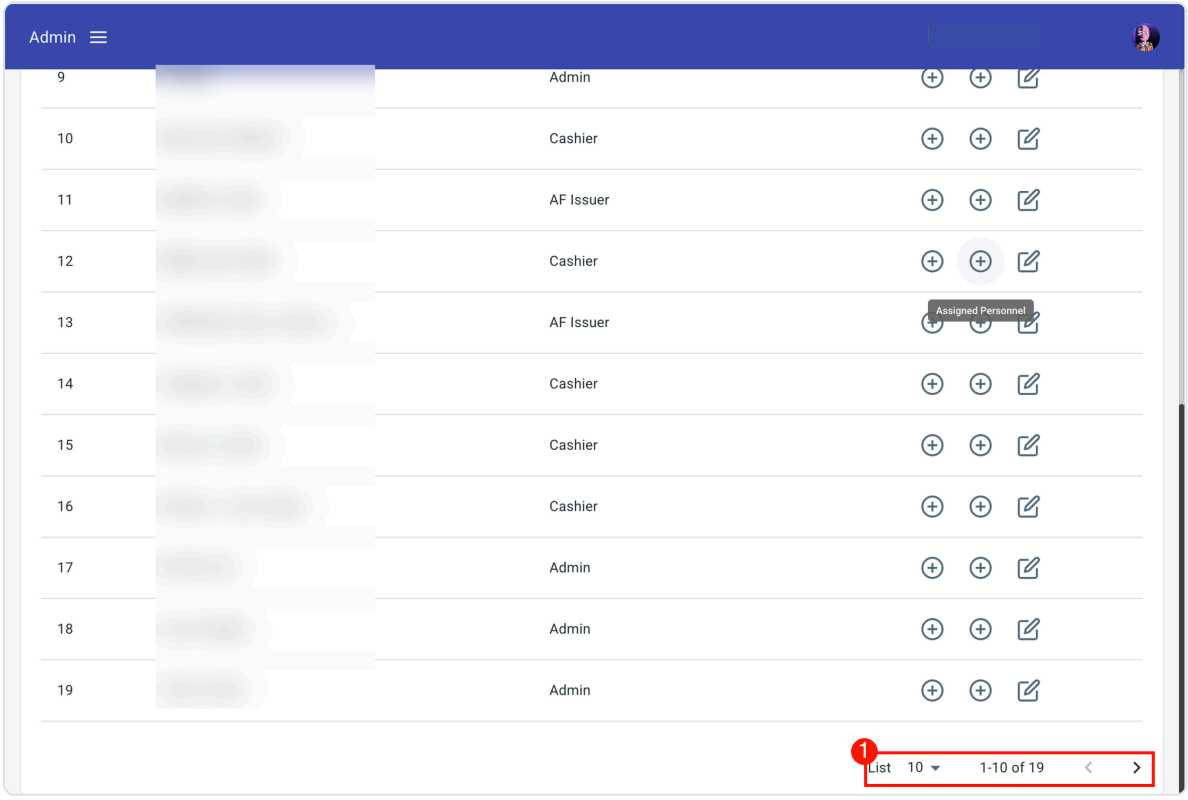

Figure 1.4. The end of the Users list. 1 The paging line with the total number of users. The names are covered.

1.2.2 Adding a user

1. On the Users page, click **Add User** (the person icon at the top right).
2. In the window **USER INFORMATION**, fill in **Firstname**, **Lastname**, **Contact Number**, **Email** and **Password**.
3. Select the **Role** of the user from the list.
4. Click **Create**.

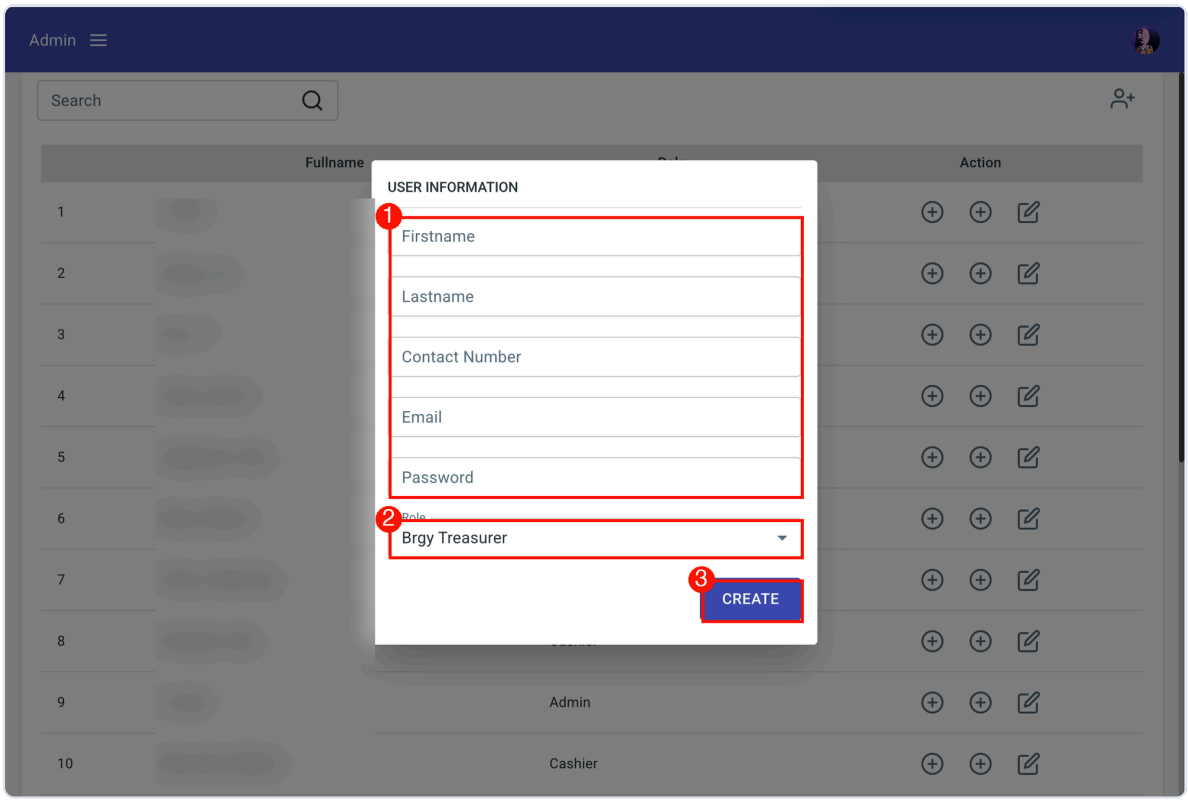

Figure 1.5. The Add User window. 1 The user's details · 2 Role · 3 Create.

Click the **Role** box to open its drop-down list. The choices are **Brgy Treasurer**, **Cashier**, **Admin**, **Customers**, **Disbursing Officer** and **AF Issuer**. The same list appears when you edit a user.

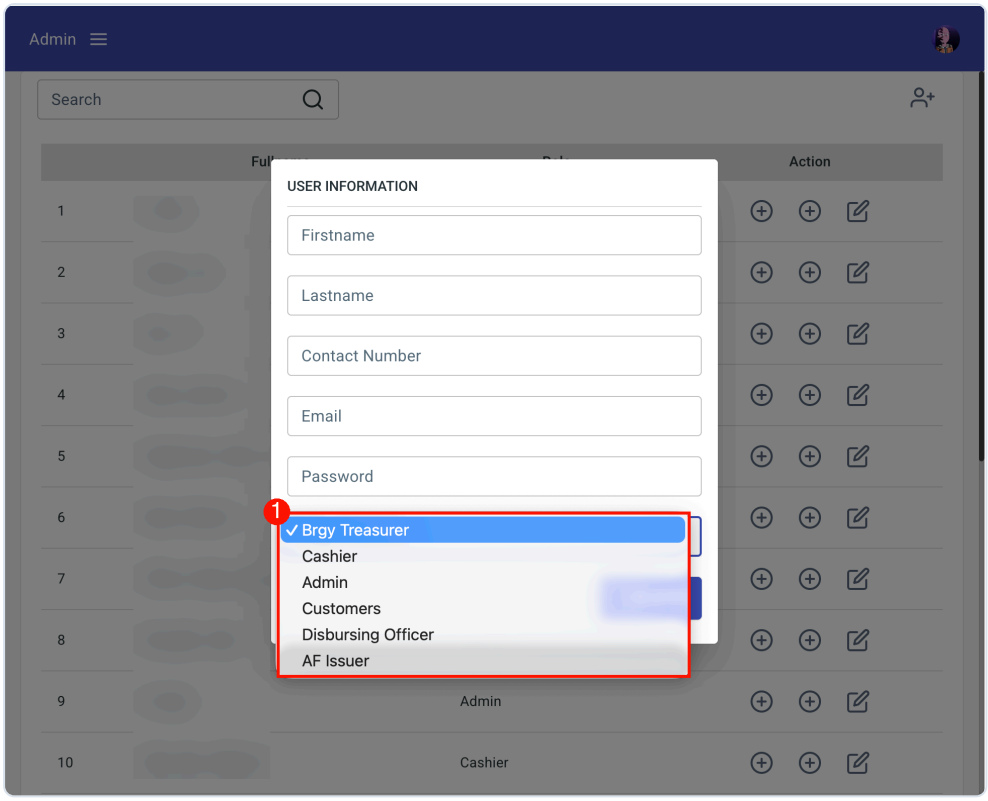

Figure 1.6. The Role drop-down list of the Add User window. 1 The six roles. The names in the table behind are covered.

When you leave a required box empty, its border turns red and the word *Required* appears below it. Fill in the box to clear the message. You cannot save the user until every required box is filled in.

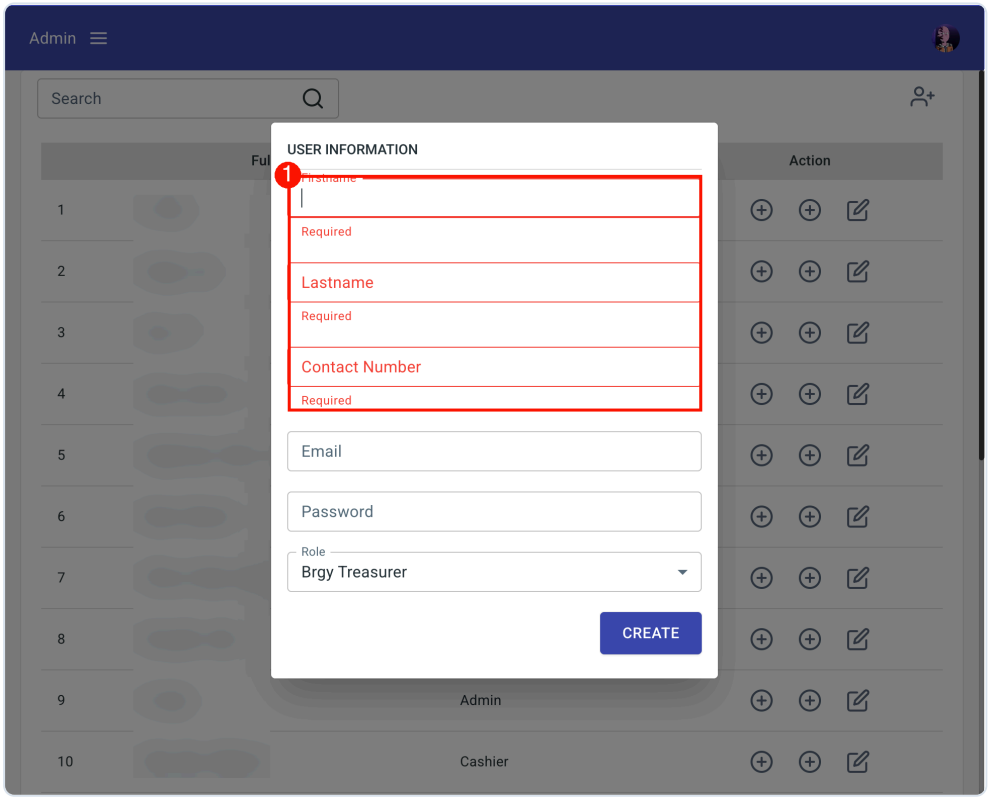

Figure 1.7. The Required messages of the Add User window. 1 The boxes that were left empty. The names in the table behind are covered.

- Every box is required. A box that you leave empty shows *Required*.
- The **Email** must be a valid email address. The user signs in with this email.
- The **Password** box shows the letters as you type them. Make sure that nobody is watching, and give the password to the user in private.
- The **Role** decides which menu the user sees after signing in. See Section 1.3.

> After you click **Create**, the message *User created successfully* appears and the new user is in the list.

1.2.3 Closing a window without saving

Press the **Esc** key or click the gray area outside a window to close it. Nothing is saved until you click **Create**, **Update** or **Add** in that window.

1.2.4 Editing a user

1. On the Users page, click the **Edit** icon (the pencil) of the user.
2. The window **Editing** and the name of the user opens with the current details. Change **Firstname**, **Lastname**, **Contact Number**, **Email** or **Role**.
3. To give the user a new password, type it in the **Password** box under **User Credentials**. To keep the present password, leave the box empty.
4. Click **Update**.

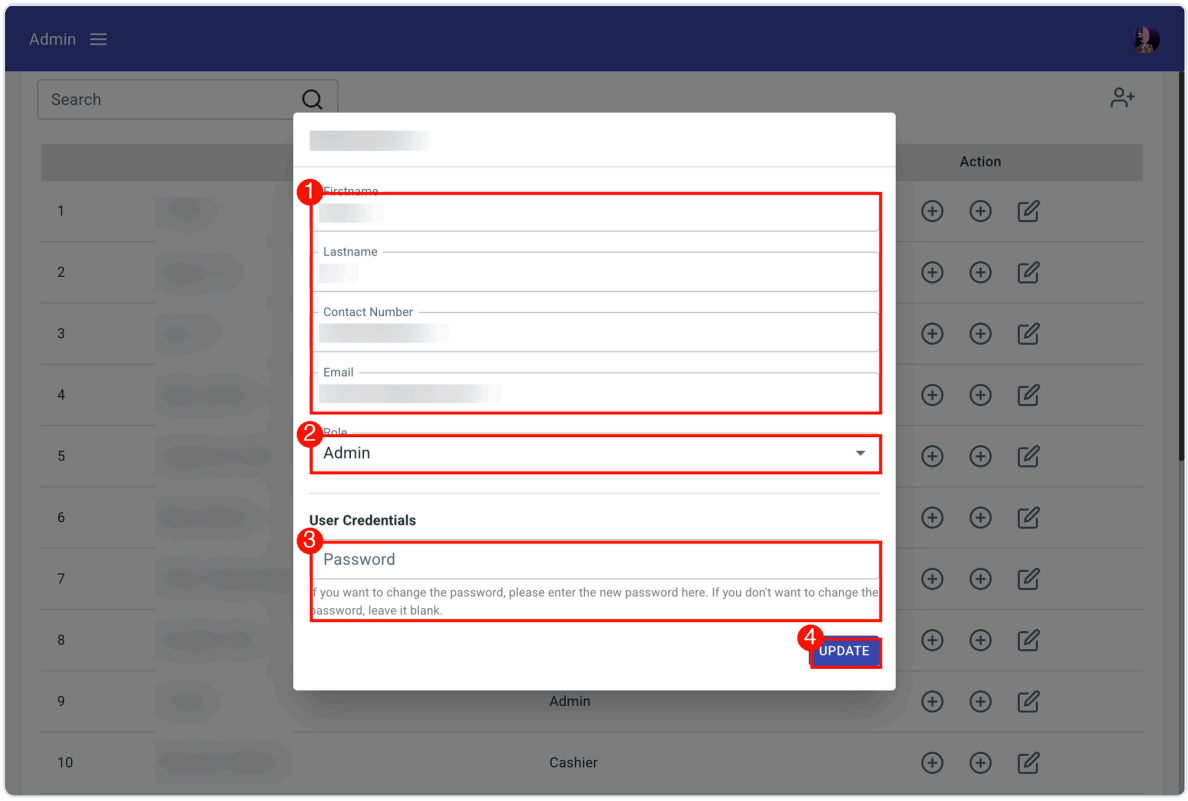

Figure 1.8. The Edit User window. 1 The user's details · 2 Role · 3 Password and its note · 4 Update. The details are covered.

> After you click **Update**, the message *User updated successfully* appears. If you changed the role, the user sees the menu of the new role the next time the user signs in.

1.2.5 Assigning RPT users

Click the first circle icon, **Assigned RPT**, to see the RPT users that are linked to this TIS user. Each row shows the code and the name of an RPT user. These links decide which RPT users the TIS user can choose in the filter of the **Report of Collection and Deposits (RCD)**.

How assigned RPT users relate to users.

A user of TIS *(the row you clicked in the Users list)*	→	**Assigned RPT** ***(the link)***	→	An RPT user *(a code and a name from the RPT payment system)*

- **One user, many RPT users.** A user can have several assigned RPT users. The same RPT user can be assigned to more than one user. The RPT users are not TIS users. They come from the RPT payment system, so you cannot add or change them here, only link them.
- **The link belongs to the user.** Adding or removing a link changes only that user. It does not change the RPT user or the other users.
- **What it controls.** In **Reports**, **Report of Collection and Deposits (RCD)**, the window that imports real property tax receipts has the boxes **Date From**, **Date To** and **Encoded By**. The **Encoded By** list shows only the RPT users that are assigned to the signed-in user. TIS then brings in the RPT receipts that the chosen RPT user encoded in those dates.
- **With no link.** A user with no assigned RPT user sees *No assigned RPT users* in the Encoded By list and cannot import RPT receipts.

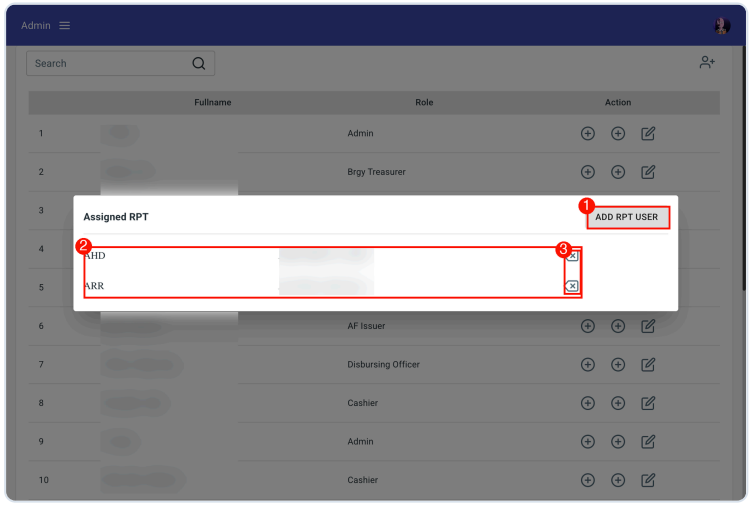

Figure 1.9. The Assigned RPT window. 1 Add RPT User · 2 The RPT users that are assigned · 3 Remove icon. The names in the table behind and the RPT names are covered.

1. Click **Add RPT User**.
2. In the window **Assign RPT User**, select the **RPT User** from the list. The list shows the code and the name of each RPT user.
3. Click **Add**.

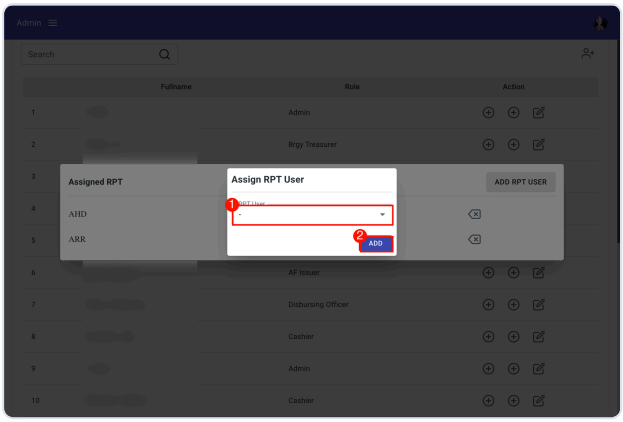

Figure 1.10. The Assign RPT User window. 1 The RPT User list · 2 Add.

Click the **RPT User** box to open its drop-down list. It starts with a dash (**-**), which means that nobody is chosen, and then shows every RPT user as the code, a dash and the name. Choose one, then click **Add**.

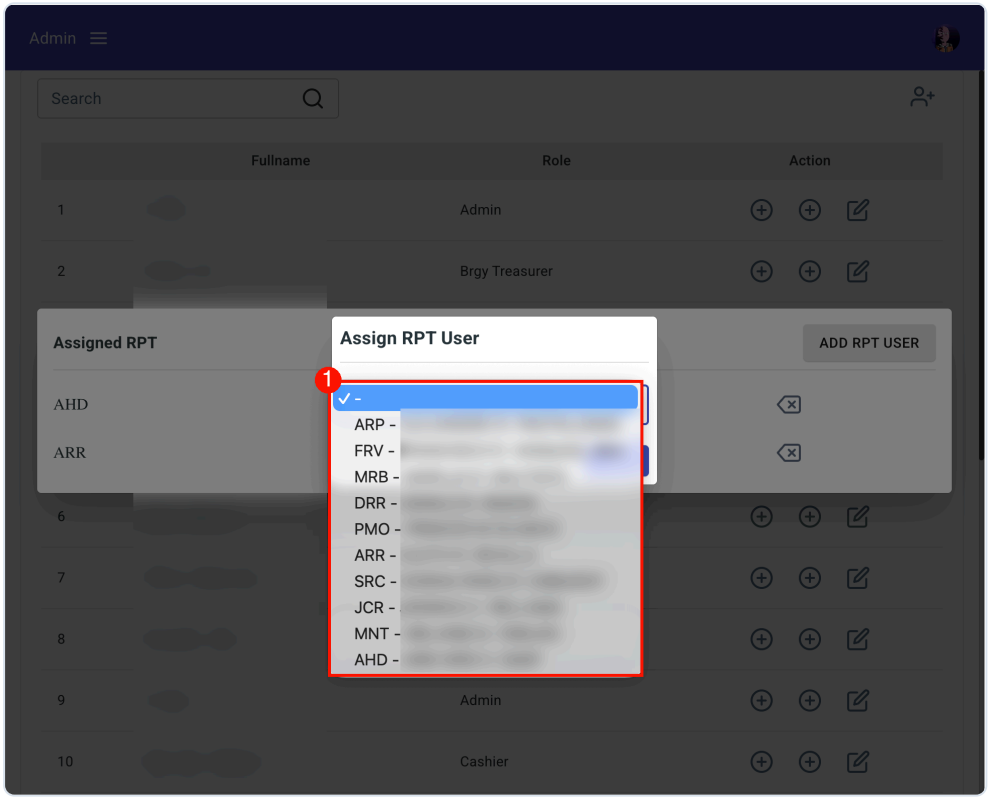

Figure 1.11. The RPT User drop-down list. 1 The RPT users, each shown as code - name. The names are covered.

The message *RPT user assigned successfully* appears. To remove a link, click the remove icon at the end of its row. A question asks *Are you sure to delete this assigned RPT user?* Click **Yes** to remove it or **No** to keep it. A list with no row says *No record found!*

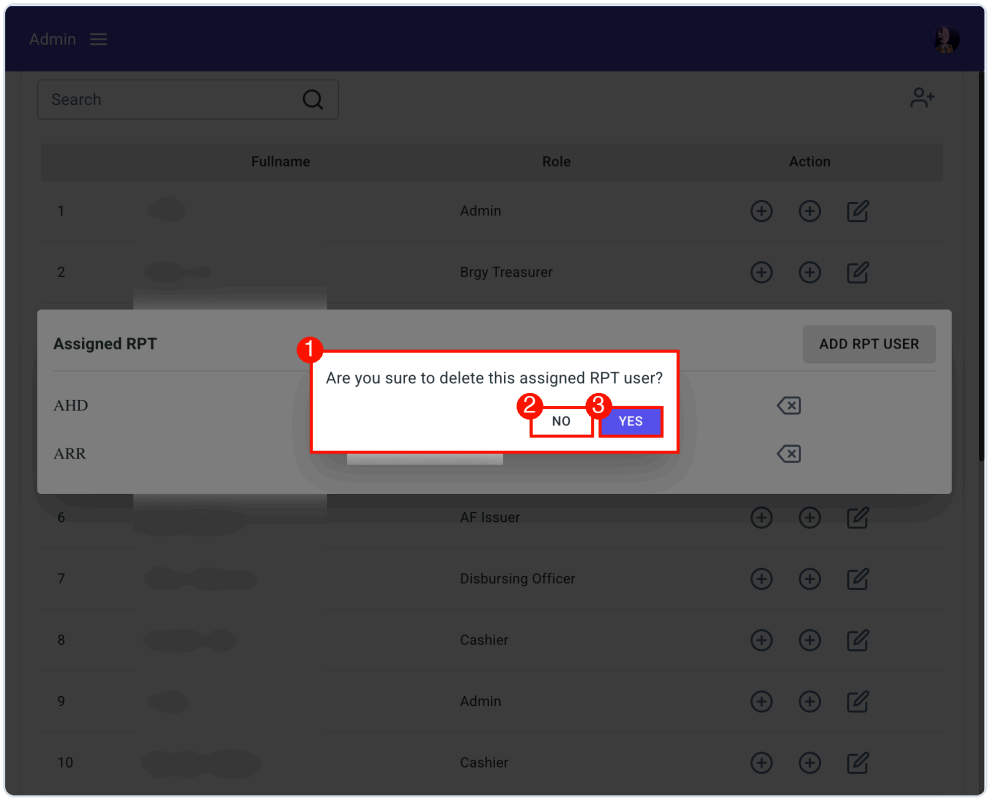

Figure 1.12. The question before an assigned RPT user is removed. 1 The question · 2 No keeps the link · 3 Yes removes it. The names are covered.

1.2.6 Assigning personnel

Click the second circle icon, **Assigned Personnel**, to see the officers that are linked to this user. Each row shows the **name**, the **code** and the **type** of the officer, such as *Accountable Officer*, *Collector* or *Liquidating Officer*. These links decide which receipts the user may process and which collectors the user can choose. The block below explains how. The officers themselves come from the Referential page **Liq. Disb. Collector**.

How assigned personnel relate to users.

A user of TIS *(the row you clicked in the Users list)*	→	**Assigned Personnel** ***(the link)***	→	An officer *(a name, a code and a type from the LiqDisb Collector page)*

- **One user, many officers.** A user can have several assigned officers, for example a collector and the accountable officer. The same officer can be assigned to more than one user. The officers are kept on the Referential page **LiqDisb Collector** (Section 2.6.6). Here you only link them.
- **The link belongs to the user.** Adding or removing a link changes only that user. It does not change the officer or the other users.
- **What it controls on the receipt pages.** On the permit receipt pages (for example Business Permit, Building Permit and Burial Permit), the user enters a receipt number. TIS accepts the receipt only when its collector is one of the user's assigned personnel. For any other receipt, the window *You are not allowed to proccess this personnel.* appears (the system spells it this way).
- **What it controls in RCD Processing.** The **Collector** list offers only the assigned personnel whose type is **Collector**, each shown as the name and the code.
- **With no link.** A user with no assigned personnel has no collector to choose and is not allowed to process a receipt on these pages.

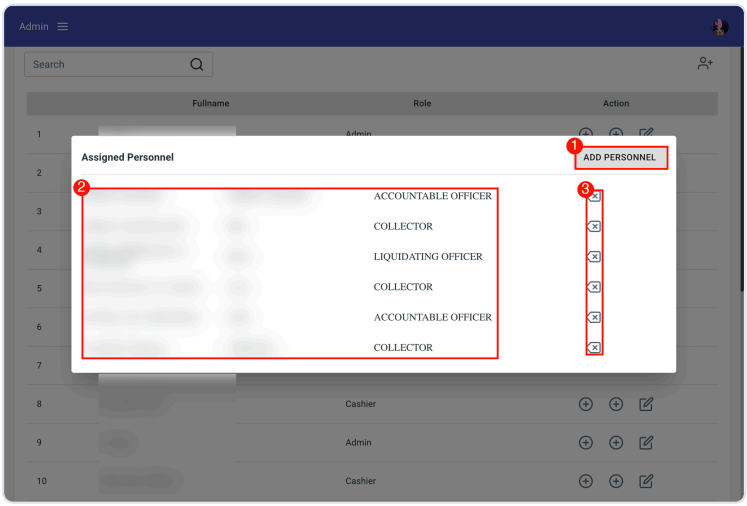

Figure 1.13. The Assigned Personnel window. 1 Add Personnel · 2 The name, the code and the type of each officer · 3 Remove icon. The names and codes are covered.

1. Click **Add Personnel**.
2. In the window **Assign Personnel**, select the **Personnel Officer** from the list.

3. Click **Add**.

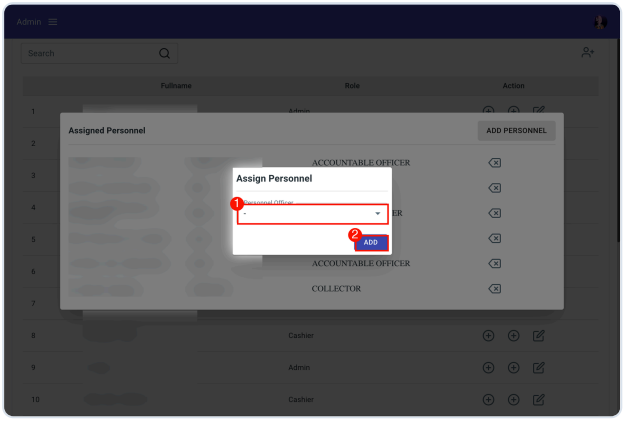

Figure 1.14. The Assign Personnel window. 1 The Personnel Officer list · 2 Add. The names behind the window are covered.

Click the **Personnel Officer** box to open its drop-down list. It starts with a dash (**-**) and then shows the name of every officer in the Liq. Disb. Collector list. Choose one, then click **Add**.

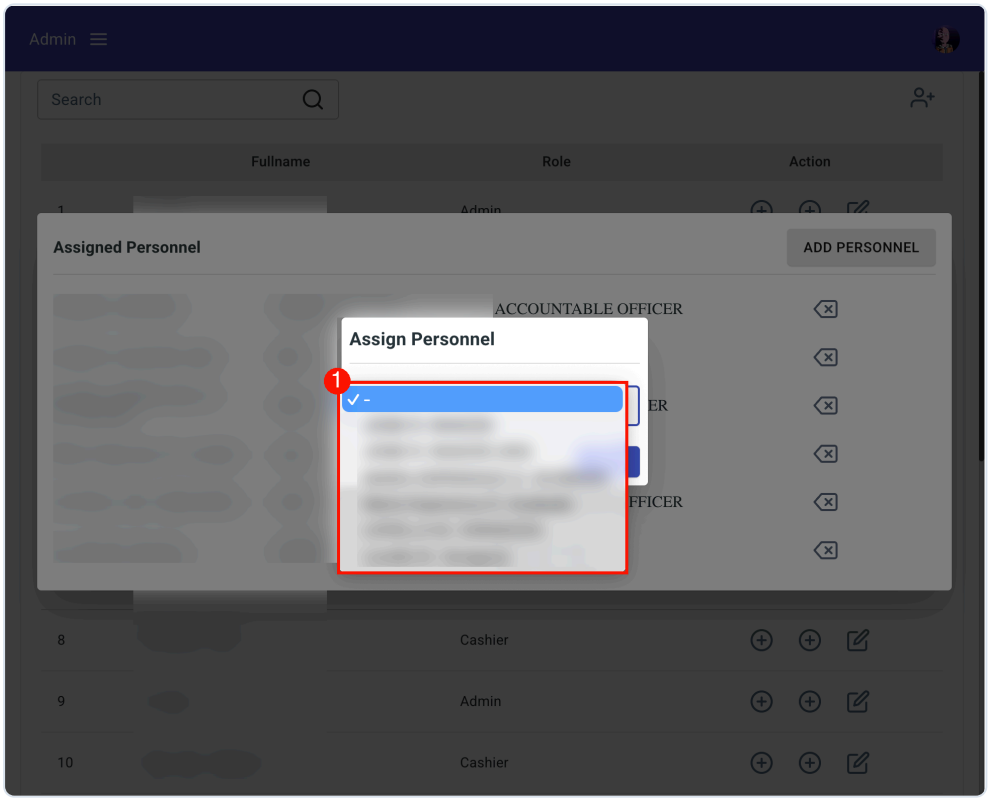

Figure 1.15. The Personnel Officer drop-down list. 1 The officers that can be assigned. The names are covered.

The message *Personnel added successfully* appears. To remove an officer, click the remove icon at the end of its row. A question asks *Are you sure to delete this personnel?* Click **Yes** to remove the officer or **No** to keep it. The message *Personnel deleted successfully* confirms it.

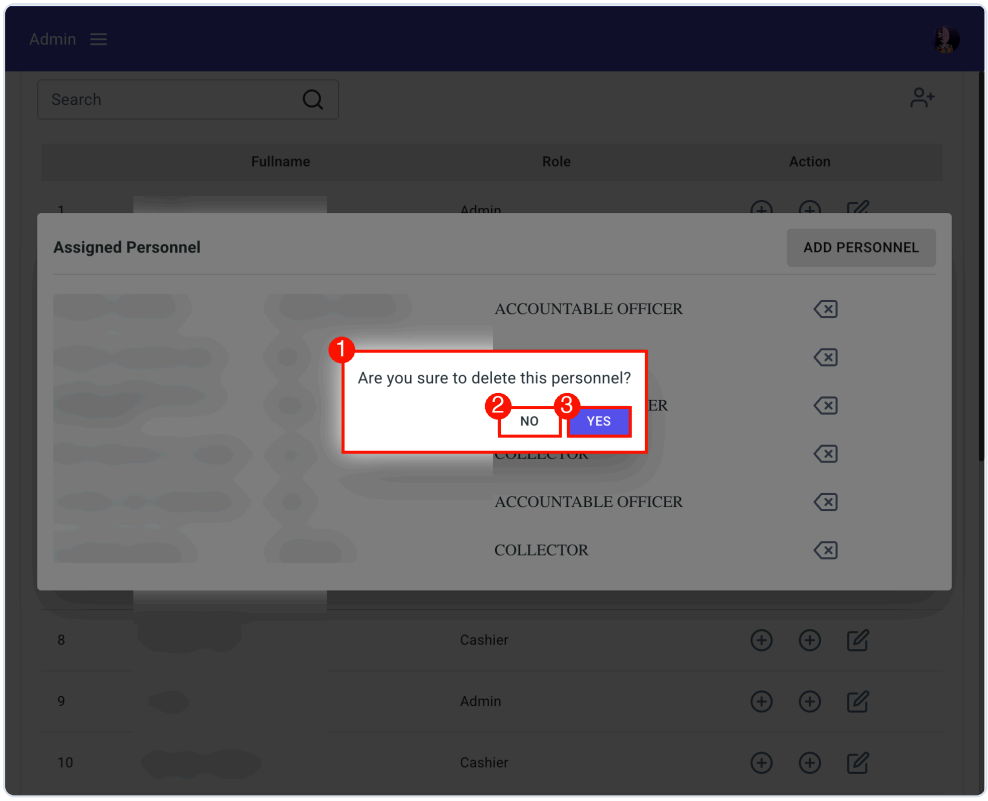

Figure 1.16. The question before an assigned personnel is removed. 1 The question · 2 No keeps the officer · 3 Yes removes it. The names are covered.

> The assigned officers are loaded when the user signs in. If you change them for a user who is signed in, ask the user to sign out and sign in again.

1.3 Roles

Click **Roles** to see the roles that an account can have. The table shows the number and the name of each **Role**, and an **Edit** icon in the **Action** column. The roles in the system are Brgy Treasurer, Cashier, Admin, Customers, Disbursing Officer and AF Issuer.

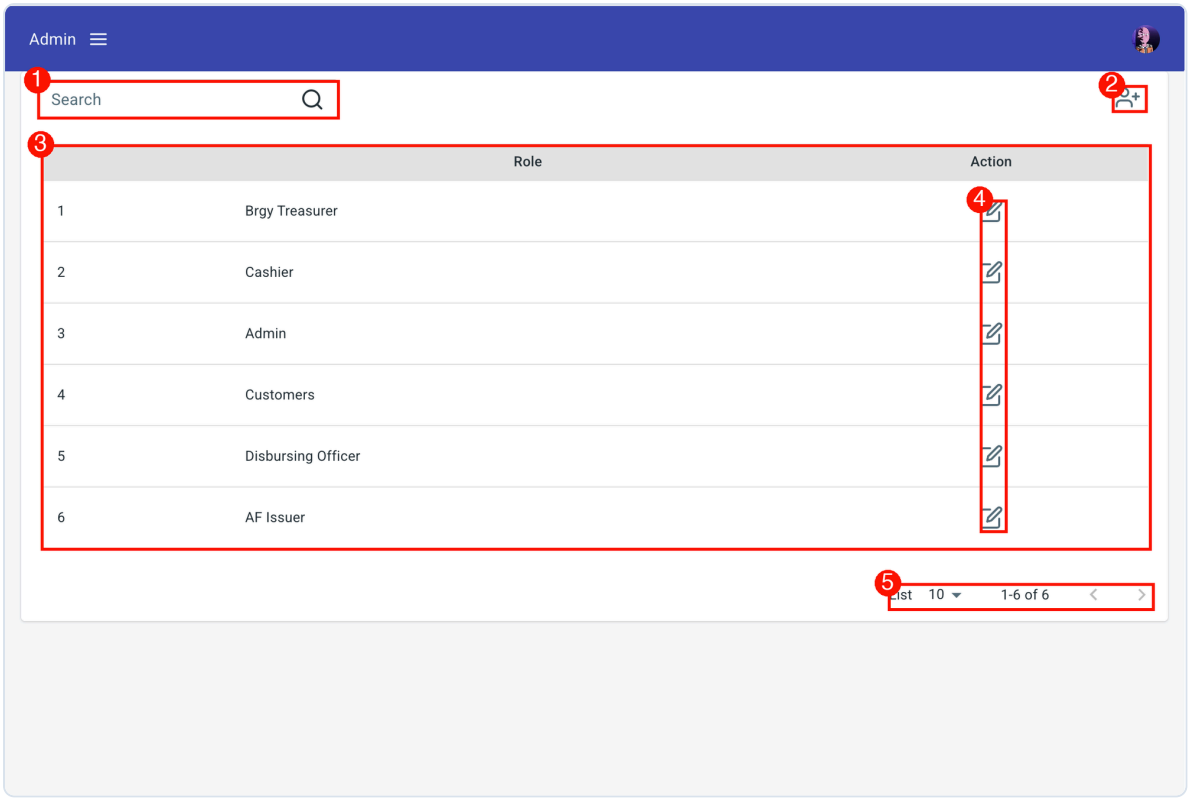

Figure 1.17. The Roles page. 1 Search box · 2 Add Role · 3 The roles · 4 Edit icons · 5 The paging line.

> **IMPORTANT.** The sidebar of a user is chosen by the exact name of the role. Cashier, AF Issuer, Brgy Treasurer, Disbursing Officer and Admin each have their own menu. If you rename one of these roles, the users of that role no longer get their menu. Do not rename a role that users already have. The page has no Delete icon.

The **List** box under the table works as it does on the Users page. It offers 10, 20 or 50.

1.3.1 Adding a role

1. Click **Add** (the person icon at the top right of the Roles page).
2. In the window **ROLE INFORMATION**, type the **Name** of the role. It is required.
3. Click **Create**.

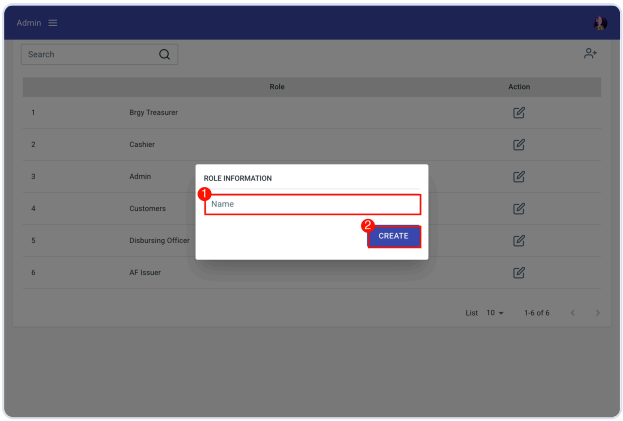

Figure 1.18. The Add Role window. 1 Name · 2 Create.

The message *Role created successfully* appears. The new role is then in the **Role** list of the Add User and Edit User windows. A new name does not have its own menu yet. A user with a new role signs in but sees no menu until the system is set up for that role.

1.3.2 Editing a role

1. Click the **Edit** icon of the role.
2. In the window **Editing** and the role name, change the **Name**.
3. Click **Update**. The message *Role updated successfully* appears.

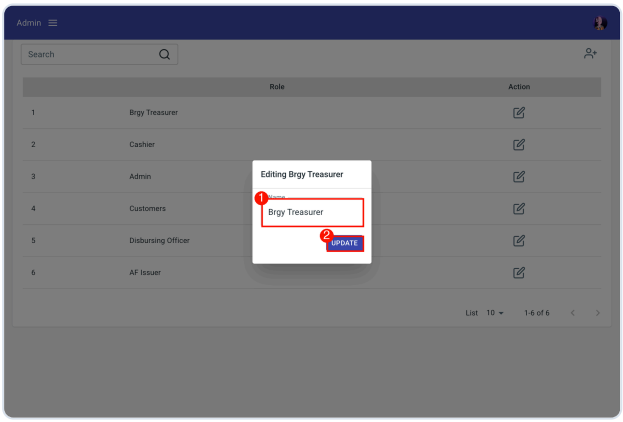

Figure 1.19. The Edit Role window. 1 Name · 2 Update.

SECTION 2

Referential

The Referential menu holds the reference lists that the rest of TIS depends on: funds, allotments, the chart of accounts, accountable forms, officers, cost centers, official receipt templates and similar tables. This section explains each page, each window and each dropdown list.

> **Who can use this section.** The Referential menu appears for an account whose role is **Admin**. These lists feed the other menus, so a change here changes what cashiers, issuers and other users see. Add, edit and delete only when you are sure.

In this section

2.1 How the Referential pages work

- 2.1.1 The list page
- 2.1.2 Adding a record
- 2.1.3 Editing a record
- 2.1.4 Deleting a record

2.2 Fund

- 2.2.1 Fund Group
- 2.2.2 Fund Code

2.3 Allotment

- 2.3.1 Allotment Code
- 2.3.2 Allotment Class

2.4 FPP

- 2.4.1 Function Code
- 2.4.2 Program Code
- 2.4.3 FPP Code

2.5 Chart of Accounts

- 2.5.1 Account Code
- 2.5.2 Object Code

- 2.6.11 Accountant
- 2.6.12 Treasurer
- 2.6.13 Mayor

2.7 Collection Type

2.8 Cemetery

2.1 How the Referential pages work

Open the sidebar with the menu icon (three lines) at the top left and click **Referential**. It opens seven choices: **Fund**, **Allotment**, **FPP**, **Chart Of Accounts**, **Accountability**, **Collection Type** and **Cemetery**. Fund, Allotment, FPP, Chart Of Accounts and Accountability open into smaller lists. Collection Type and Cemetery open their page directly.

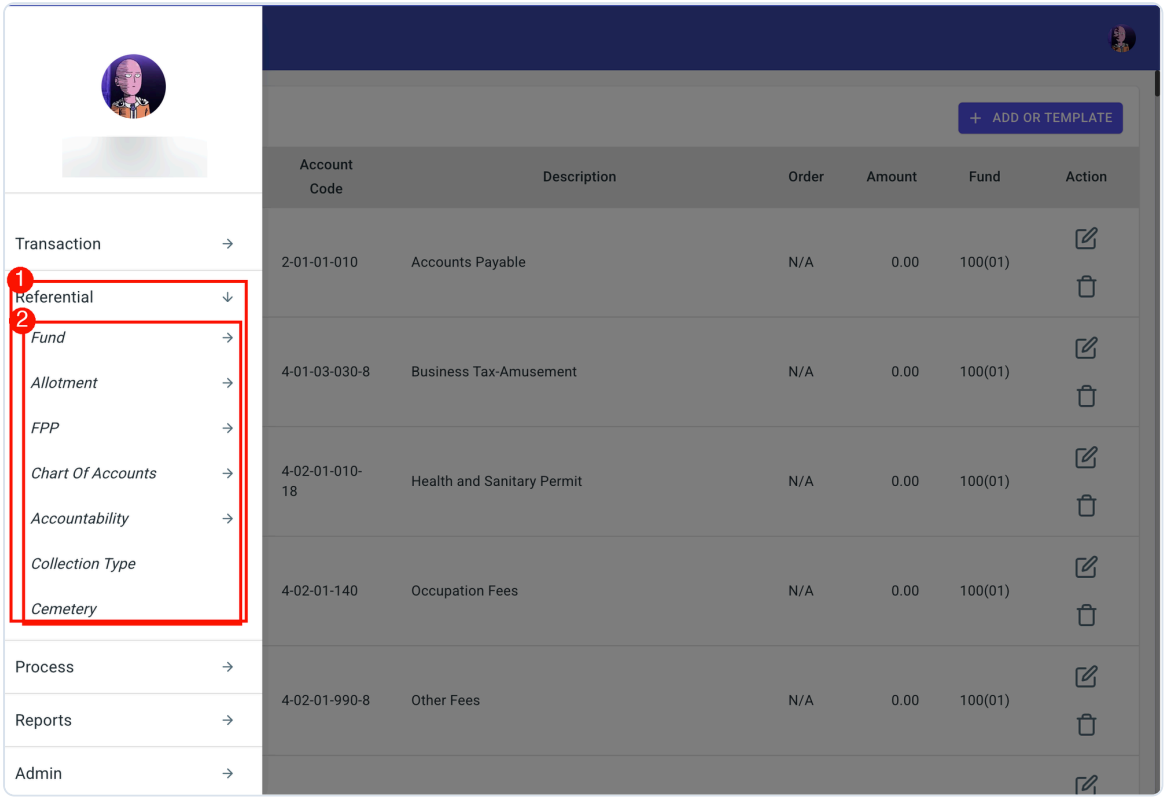

Figure 2.1. The sidebar with Referential open. 1 Referential · 2 The seven choices. The name and email are blurred.

Accountability has twelve pages: **Accountable Forms**, **Check Booklets**, **Bank Depository**, **Form Code**, **Officer Type**, **LiqDisb Collector**, **Cost Center**, **Creditor/Payee**, **OR Template**, **Accountant**, **Treasurer** and **Mayor**. Scroll the sidebar to see all of them.

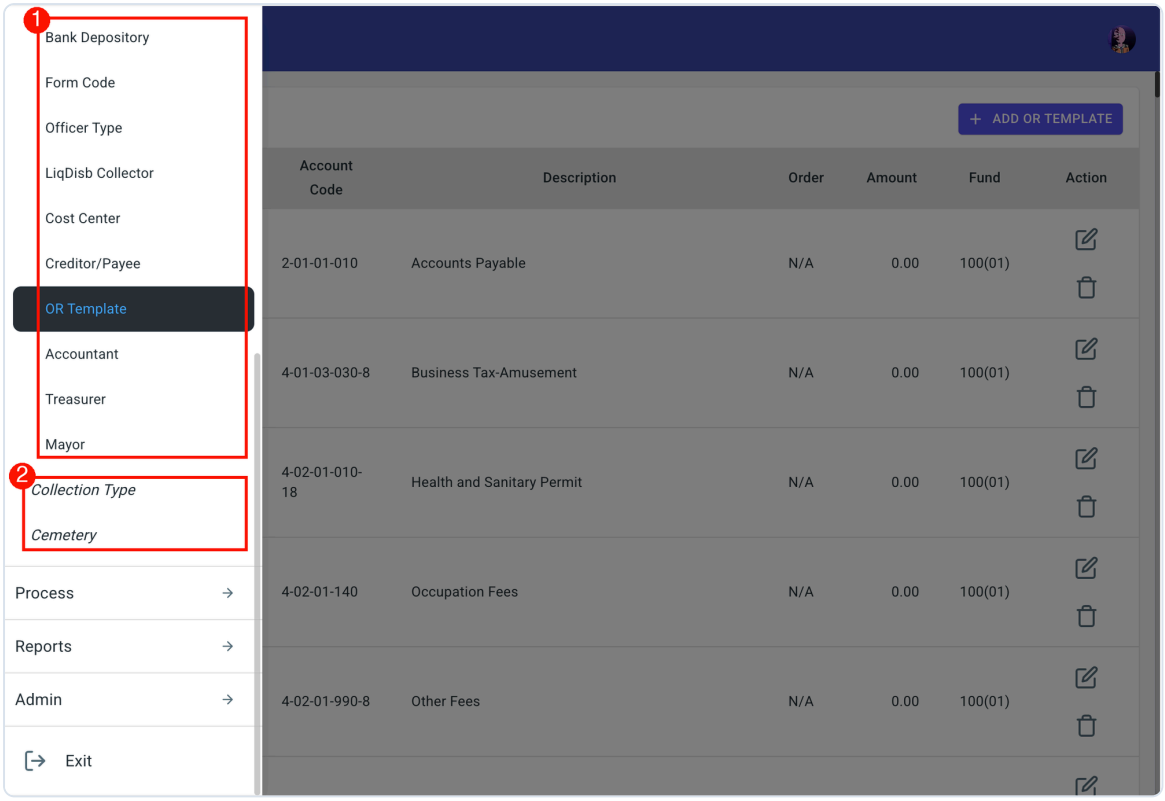

Figure 2.2. The sidebar scrolled to the Accountability pages. 1 The pages of Accountability · 2 Collection Type and Cemetery.

Almost every page works the same way. Section 2.1 explains the common parts once. The pages that differ say so in their own sections.

How messages are shown in this manual. The questions and messages that TIS shows in its windows are written in a colored box. The color tells you what kind of message it is:

- `Are you sure to delete this group?` **Gray:** a question or a notice. A question waits for your answer.
- `Fund code deleted successfully` **Green:** success. The action worked: a record was created, updated or deleted.
- `Required` **Red:** an error. Something is wrong and the action did not happen until you correct it.
- `An active record already exists. New record will be saved as inactive.` **Yellow:** a warning. The action can continue, but be careful.

2.1.1 The list page

1. **Search:** type part of a code or a description to find a record. The list shows only the records that match.
2. **Add button** (blue, at the top right): opens the window for a new record. Its label names the record, for example **ADD CODE** or **ADD GROUP**.

3. **Table headings:** the columns of the list.
4. **Action icons:** the pencil (**EDIT**) opens the record for changes. The trash can (**DELETE**) removes the record after you confirm. Point to an icon to see its name.

A list that has nothing to show says `No record found.`

2.1.2 Adding a record

1. Click the blue Add button.
2. Fill in the boxes of the window. A drop-down box opens a list: click it and click your choice. A dash (**-**) at the top of a list means that nothing is chosen.
3. Click **Create**. The message `... created successfully` appears and the new record is in the list.

When you leave a required box empty, its border turns red and the word `Required` appears under it. You cannot save the record until every required box is filled in. Press the **Esc** key or click the gray area outside the window to close it without saving.

2.1.3 Editing a record

1. Click the pencil of the record. The window **Editing** and the name of the record opens with the present values.
2. Change the boxes that need a change.
3. Click **Update**. The message `... updated successfully` appears.

2.1.4 Deleting a record

Click the trash can of the record. A small window asks a question such as `Are you sure to delete this group?` Click **No** to keep the record. Click **Yes** to remove it. After **Yes**, the message `... deleted successfully` appears.

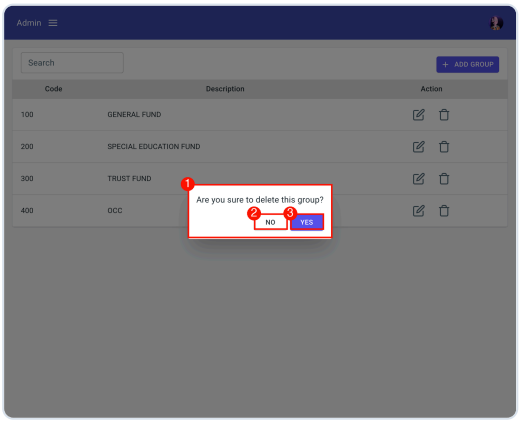

Figure 2.3. The question before a record is deleted (Fund Group is shown). 1 The question · 2 No keeps the record · 3 Yes removes it.

> **BE CAREFUL WITH YES.** Other pages and receipts use these records. Delete a record only when you are sure that nothing depends on it.

The question always names the kind of record, for example `Are you sure to delete this code?`, `this group?`, `this payee?` or `this cost center?`. After **Yes**, a message tells you that the record was deleted, such as `Fund code deleted successfully`. In the same way, a new record shows a `... created successfully` message and a changed record shows an `... updated successfully` message.

A few pages differ. On the Accountant, Treasurer and Mayor pages the question reads `Are you sure you want to delete (the name)?` and the buttons are **Cancel** and **Yes**. On the Accountable Forms page the **Delete** icon appears only for a record from which no receipt has been issued yet. The Check Booklets page has no Edit or Delete icon.

2.2 Fund

2.2.1 Fund Group

Fund Group lists the main groups of funds. The columns are **Code** and **Description**. The system has four groups: 100 GENERAL FUND, 200 SPECIAL EDUCATION FUND, 300 TRUST FUND and 400 OCC.

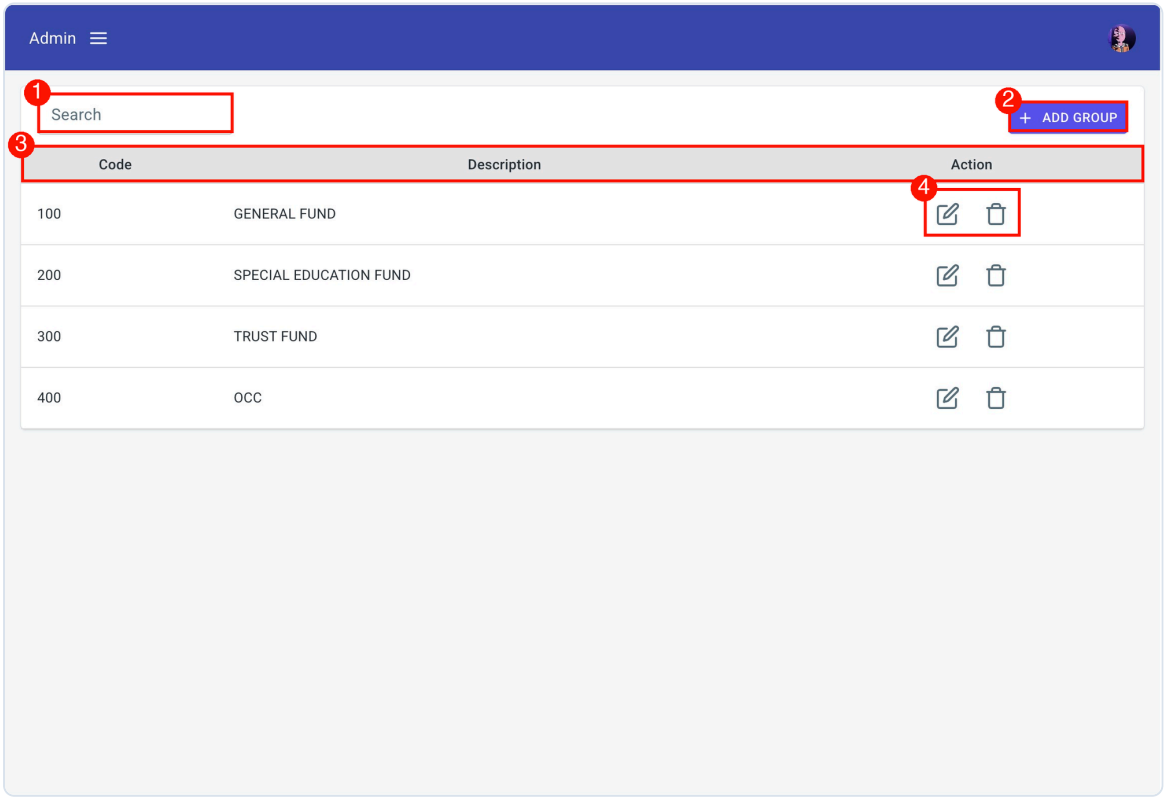

Figure 2.4. The Fund Group page. 1 Search box · 2 Add button · 3 Table headings · 4 Action icons (Edit, Delete)

To add a group, click **ADD GROUP**. In the window **Add Fund Group**, type the **Code** and the **Description**. Both are required. Click **Create**. To change a group, click its pencil, change the boxes and click **Update**.

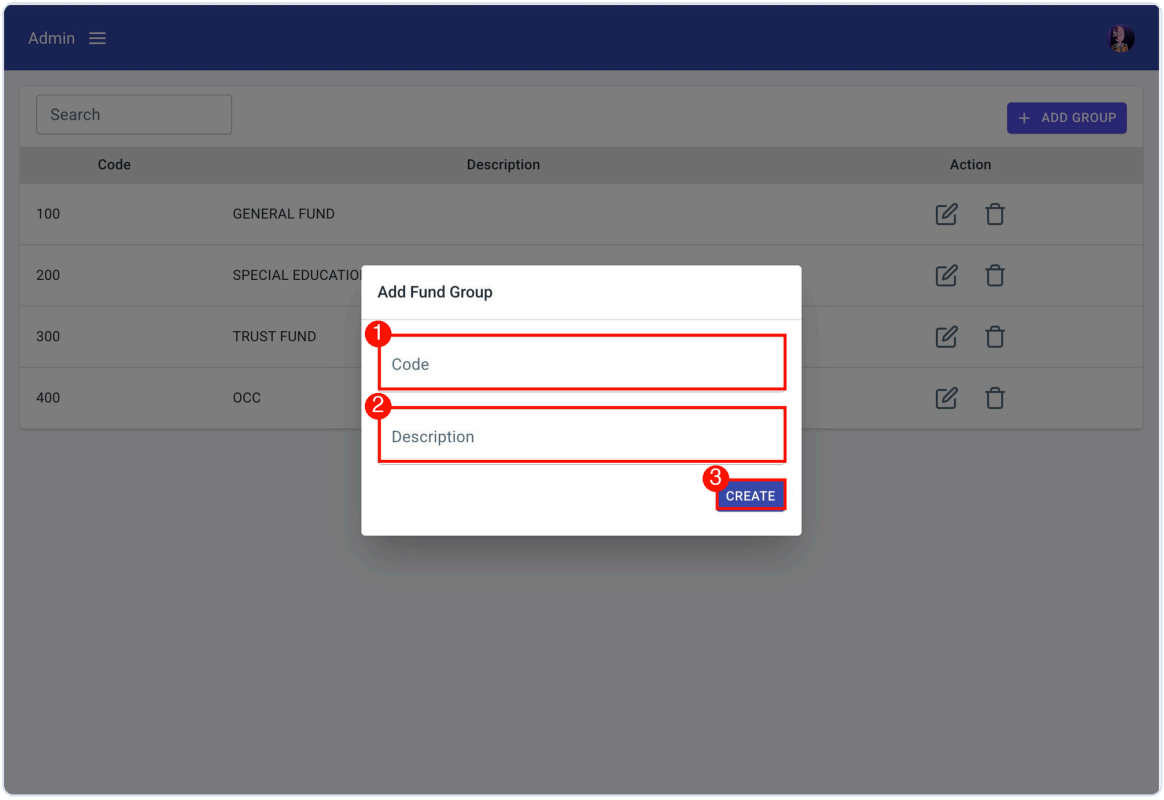

Figure 2.5. The window to add a record in Fund Group. 1 Code · 2 Description · 3 Create

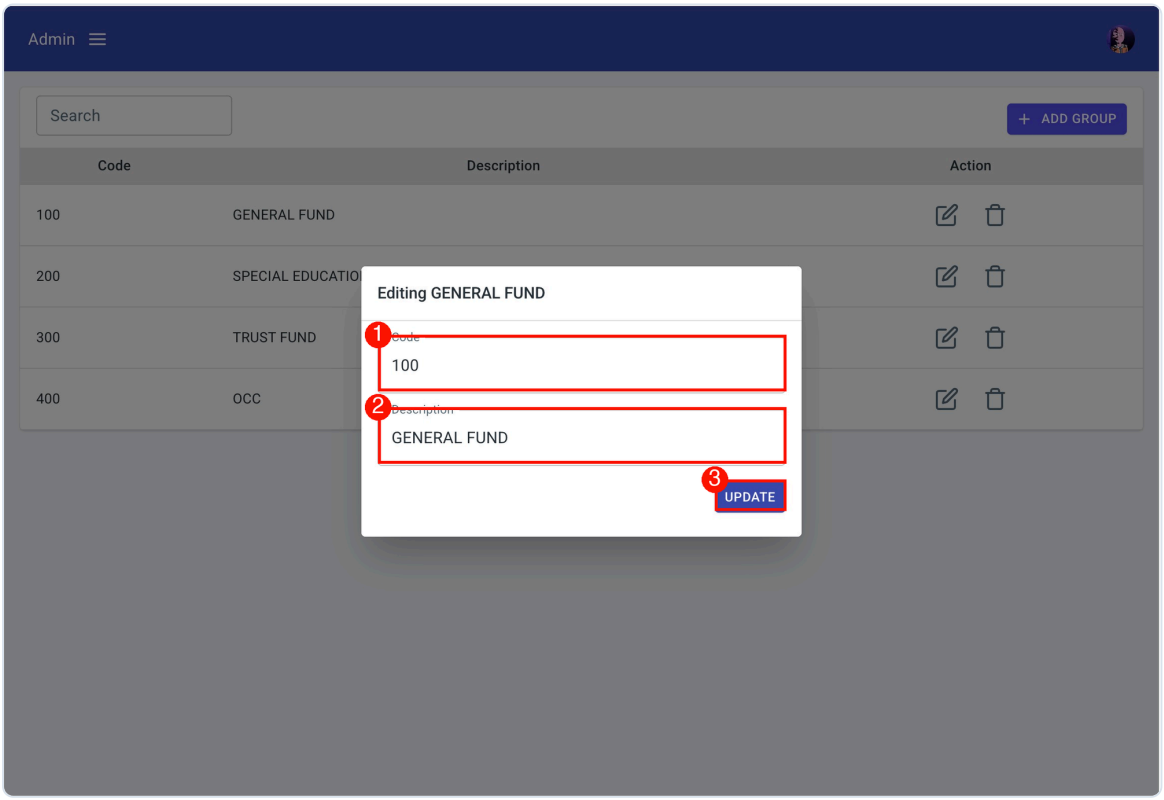

Figure 2.6. The window to edit a record in Fund Group. 1 Code · 2 Description · 3 Update

2.2.2 Fund Code

Fund Code lists the funds. The columns are **Code**, **Fund Group** and **Description**. A fund code such as *100(01)* belongs to a fund group such as *100*.

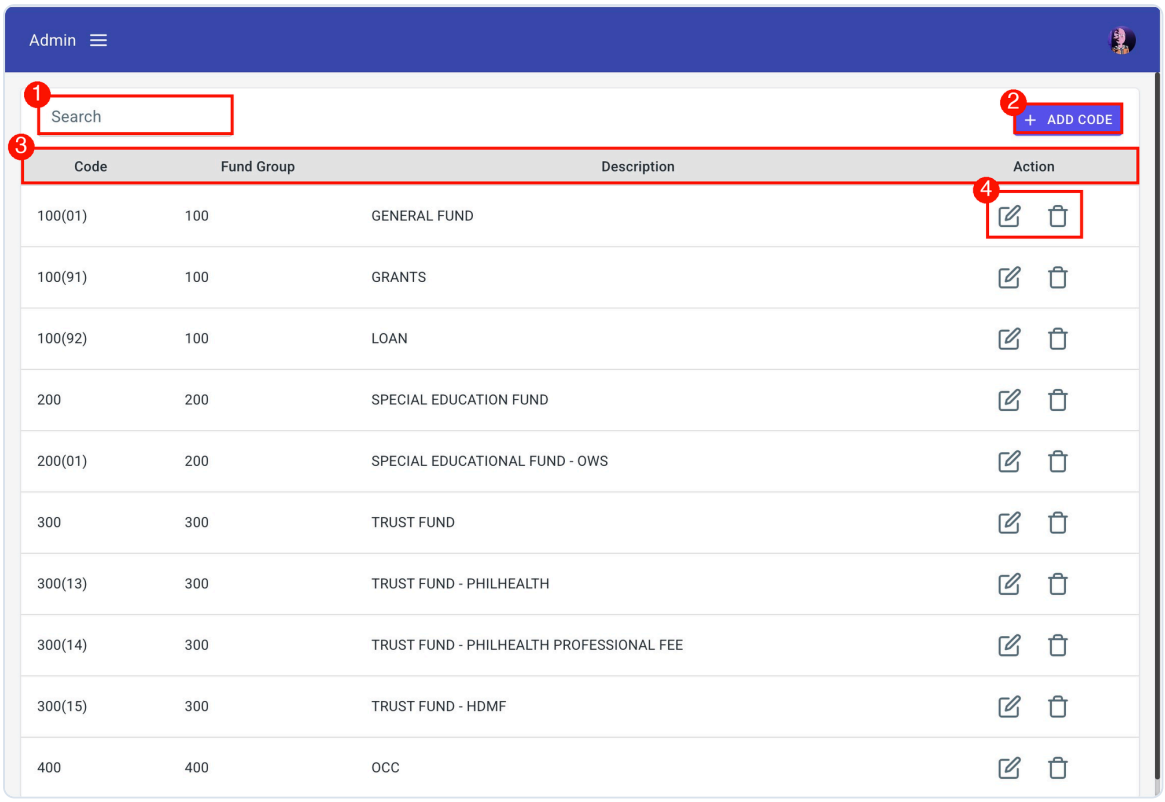

Figure 2.7. The Fund Code page. 1 Search box · 2 Add button · 3 Table headings · 4 Action icons (Edit, Delete)

In the window **Add Fund Code**, type the **Code** and the **Description**, then choose the **Main Fund**. All three are required. The Main Fund list has four choices: **GENERAL FUND**, **SPECIAL EDUCATION FUND**, **TRUST FUND** and **OCC**. When you edit a fund code, the window also shows the **Fund Group** code of the Main Fund that you chose.

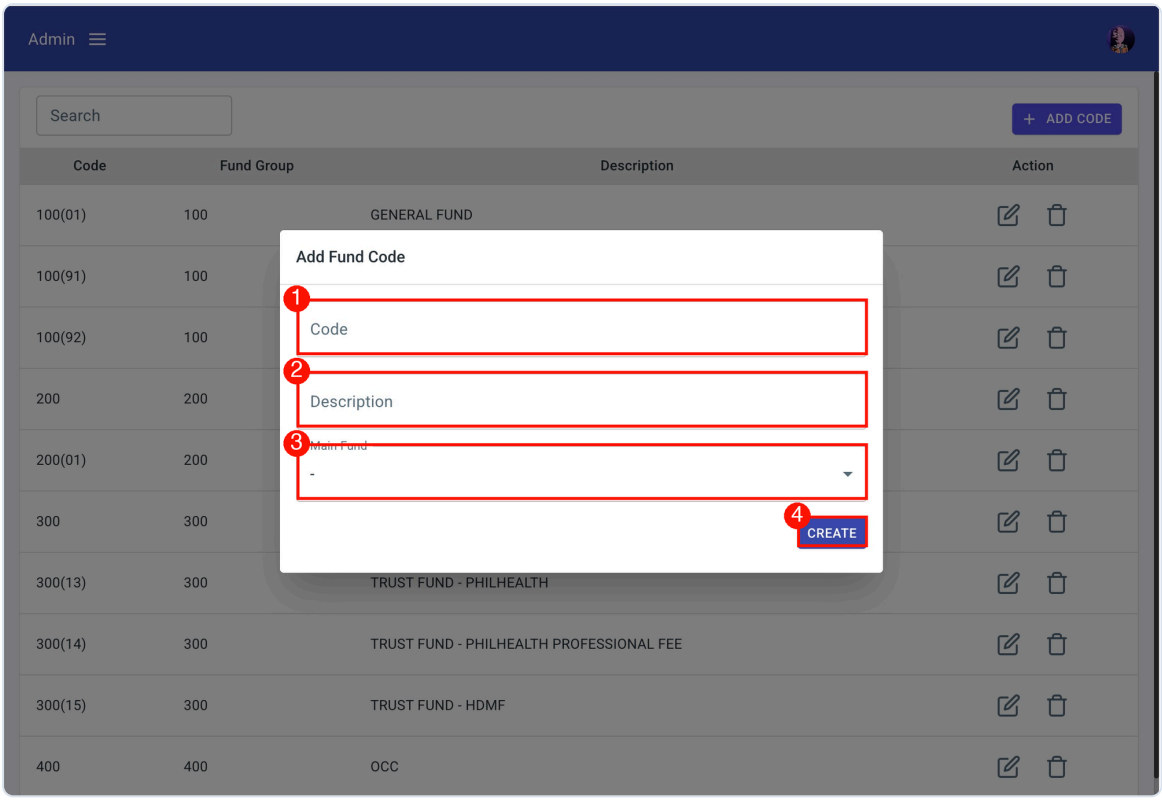

Figure 2.8. The window to add a record in Fund Code. 1 Code · 2 Description · 3 Main Fund · 4 Create

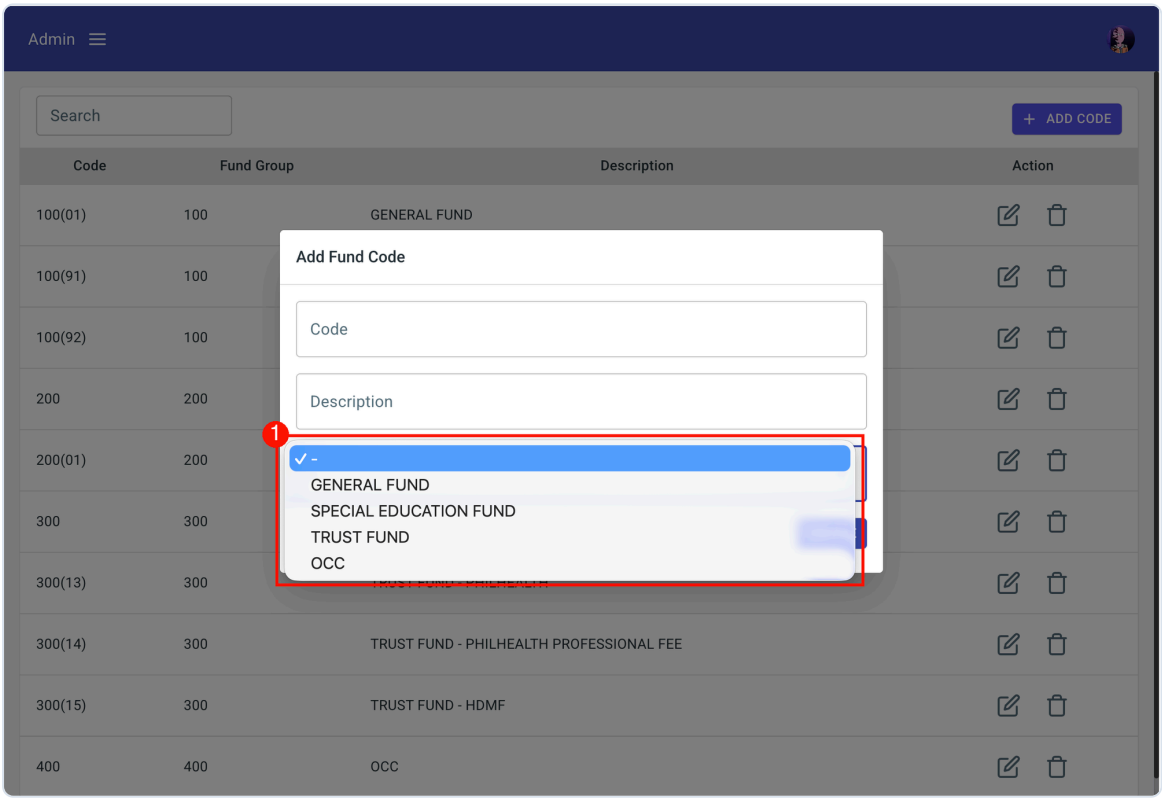

Figure 2.9. The Main Fund drop-down list. 1 The four choices and the dash.

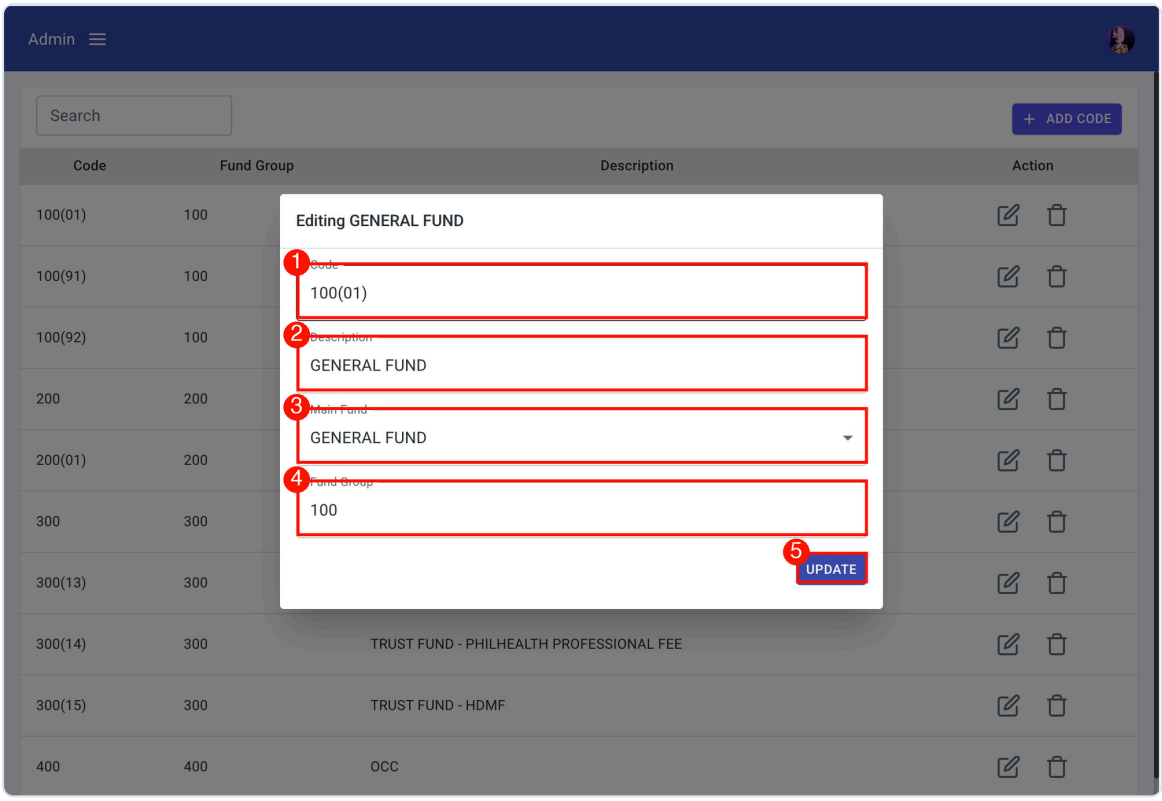

Figure 2.10. The window to edit a record in Fund Code. 1 Code · 2 Description · 3 Main Fund · 4 Fund Group · 5 Update

2.3 Allotment

2.3.1 Allotment Code

Allotment Code lists the classes of allotment. The columns are **Code** and **Description**. The eight records are PERSONAL SERVICES, MAINTENANCE AND OTHER OPERATING EXPENSES, CAPITAL OUTLAYS, INTERSPECIAL ACCOUNT TRANSFERS, INTERFUND TRANSFER, INTERLOCAL GOVERNMENT UNIT TRANSFER, INTERSPECIAL ACCOUNT TRANSFER and LIABILITIES.

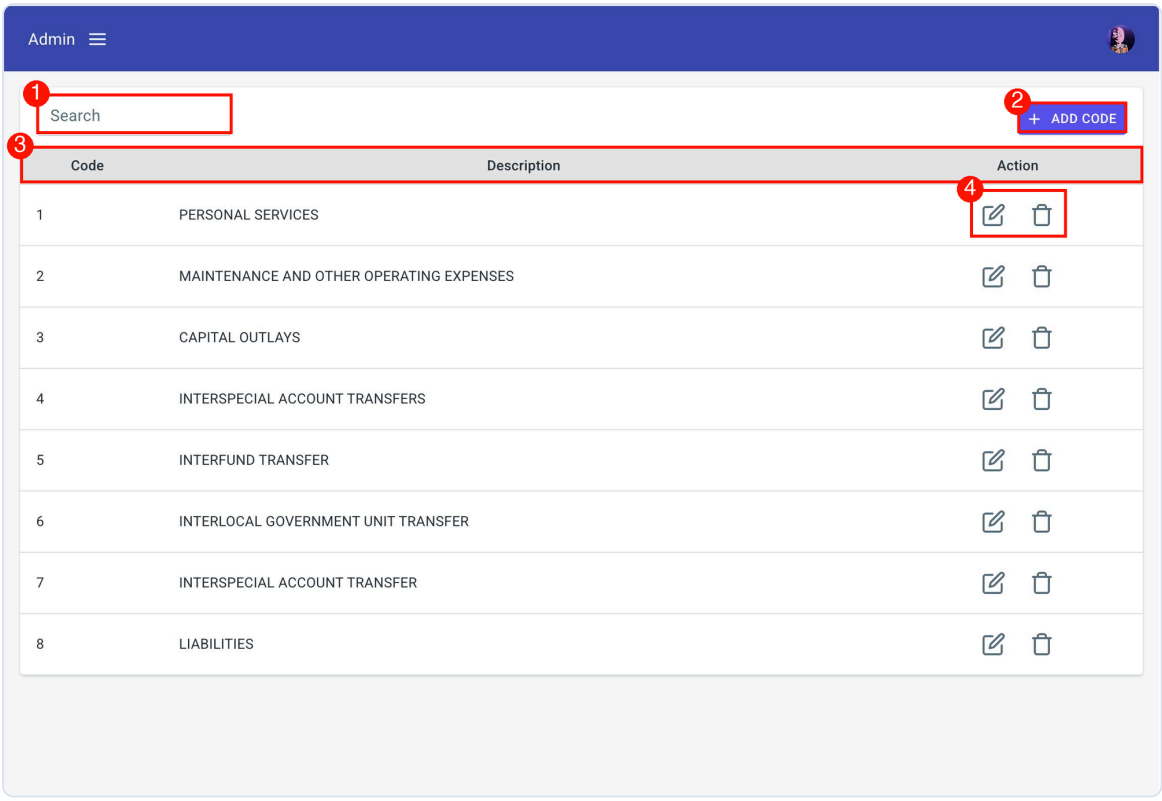

Figure 2.11. The Allotment Code page. 1 Search box · 2 Add button · 3 Table headings · 4 Action icons (Edit, Delete)

In the window **Add Allotment Code**, type the **Code** and the **Description**. Both are required. Click **Create**.

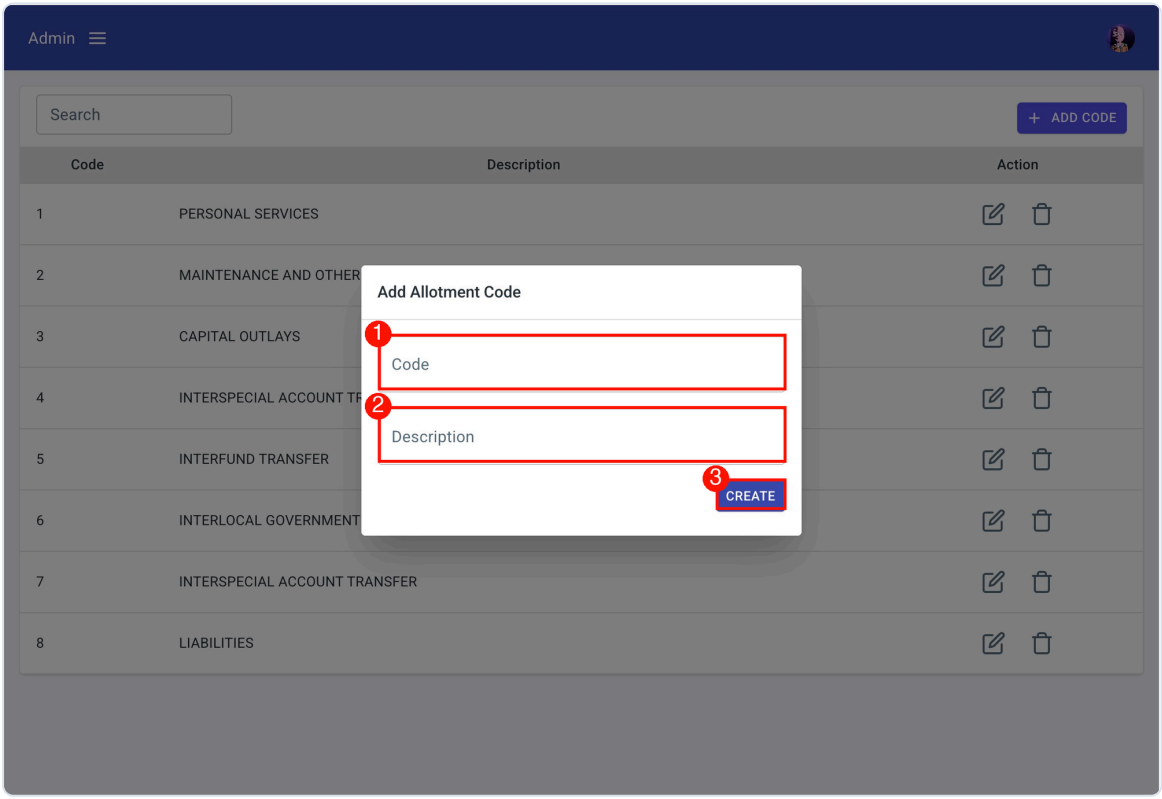

Figure 2.12. The window to add a record in Allotment Code. 1 Code · 2 Description · 3 Create

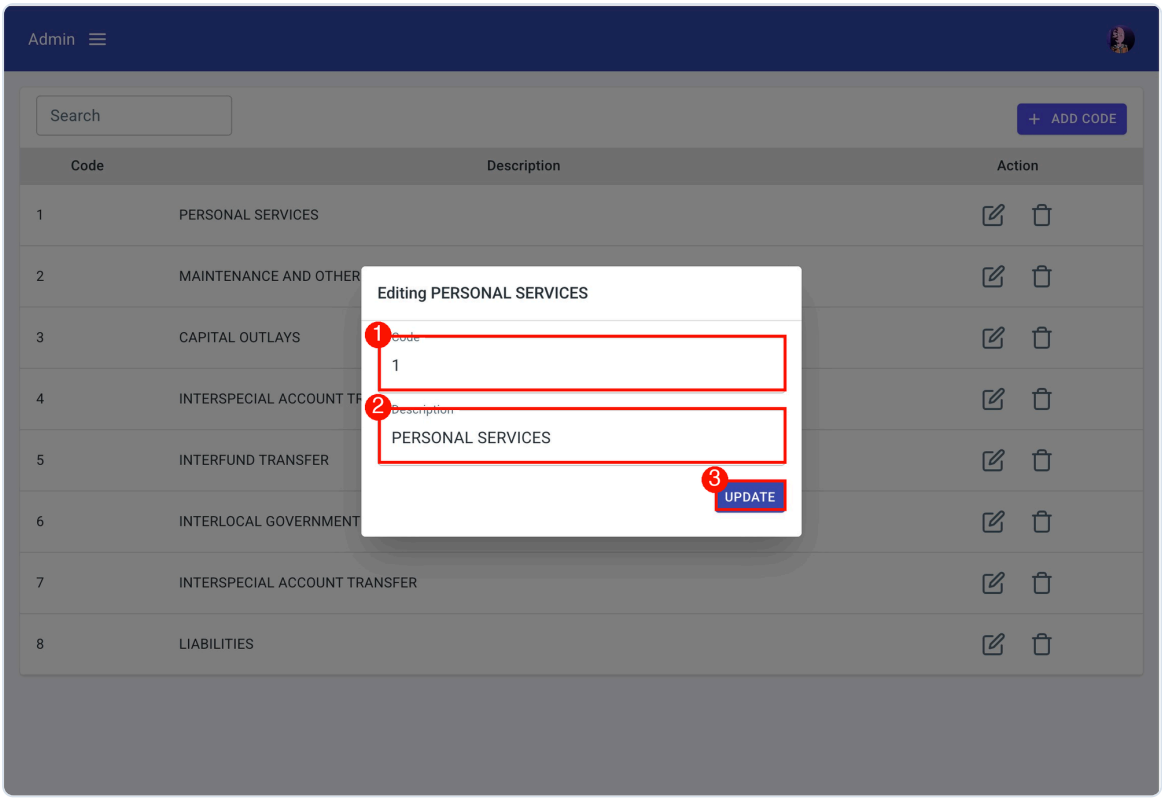

Figure 2.13. The window to edit a record in Allotment Code. 1 Code · 2 Description · 3 Update

2.3.2 Allotment Class

Allotment Class links an allotment code to an object code. The columns are the first (unnamed) column, **Code**, **Allotment Code**, **Object Code** and **Description**.

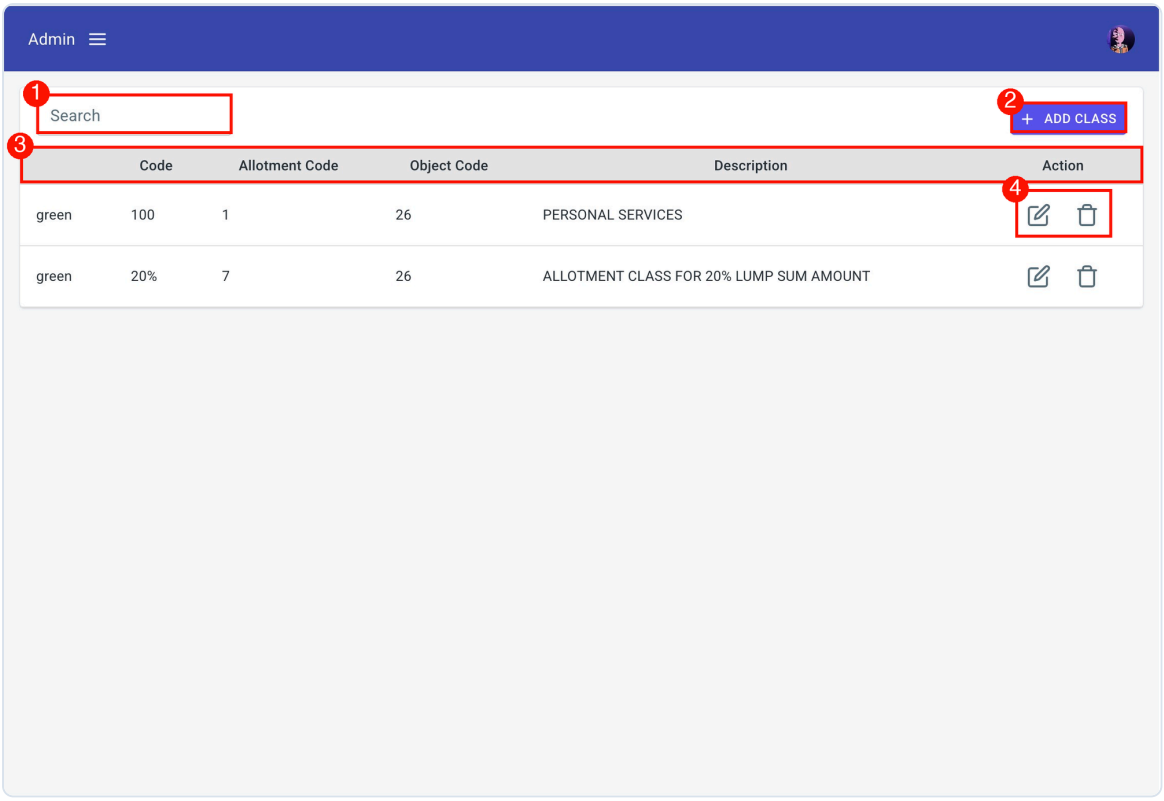

Figure 2.14. The Allotment Class page. 1 Search box · 2 Add button · 3 Table headings · 4 Action icons (Edit, Delete)

In the window **Add Allotment Class**, fill in:

- **Code** (required).
- **Allotment Description** (required): choose from the list of allotment codes. The window then shows the code of your choice.
- **Object Description** (required): choose from the list of object codes. The window then shows the code of your choice.
- **Description** (required).
- **Post to JAO** (check box): tick it when the class posts to JAO.

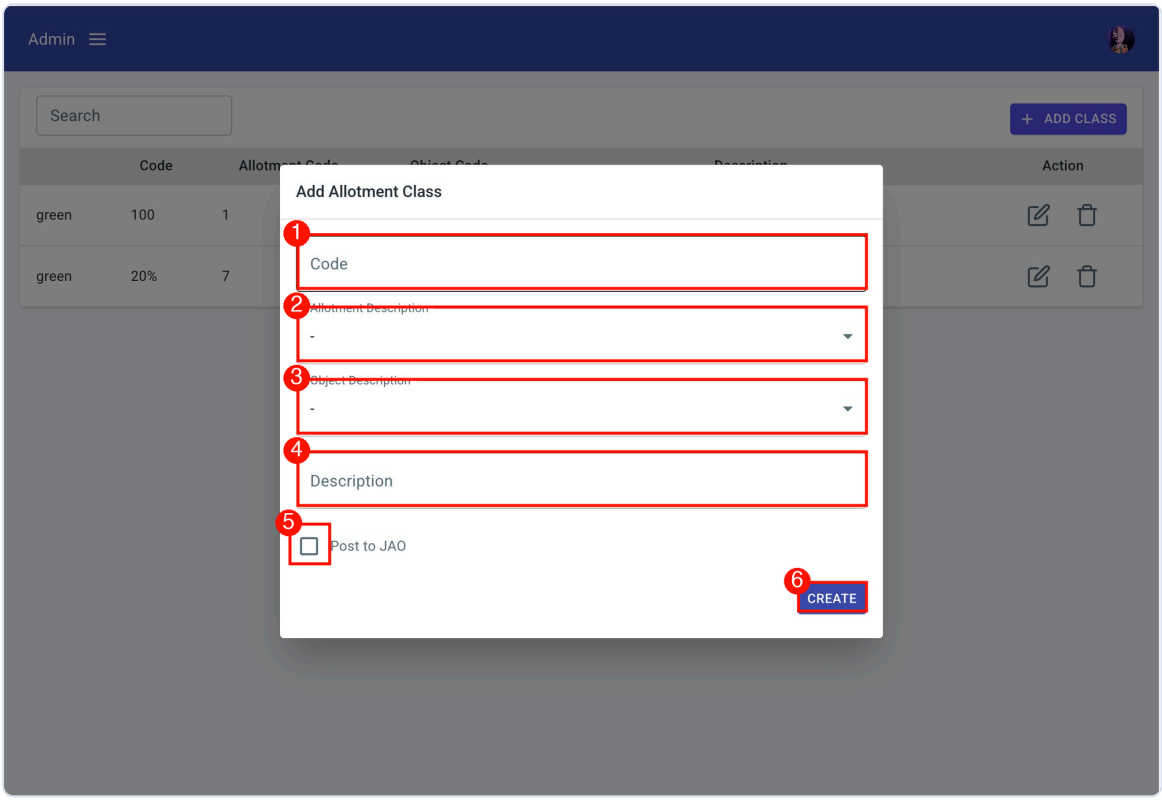

Figure 2.15. The window to add a record in Allotment Class. 1 Code · 2 Allotment Description · 3 Object Description · 4 Description · 5 Check box · 6 Create

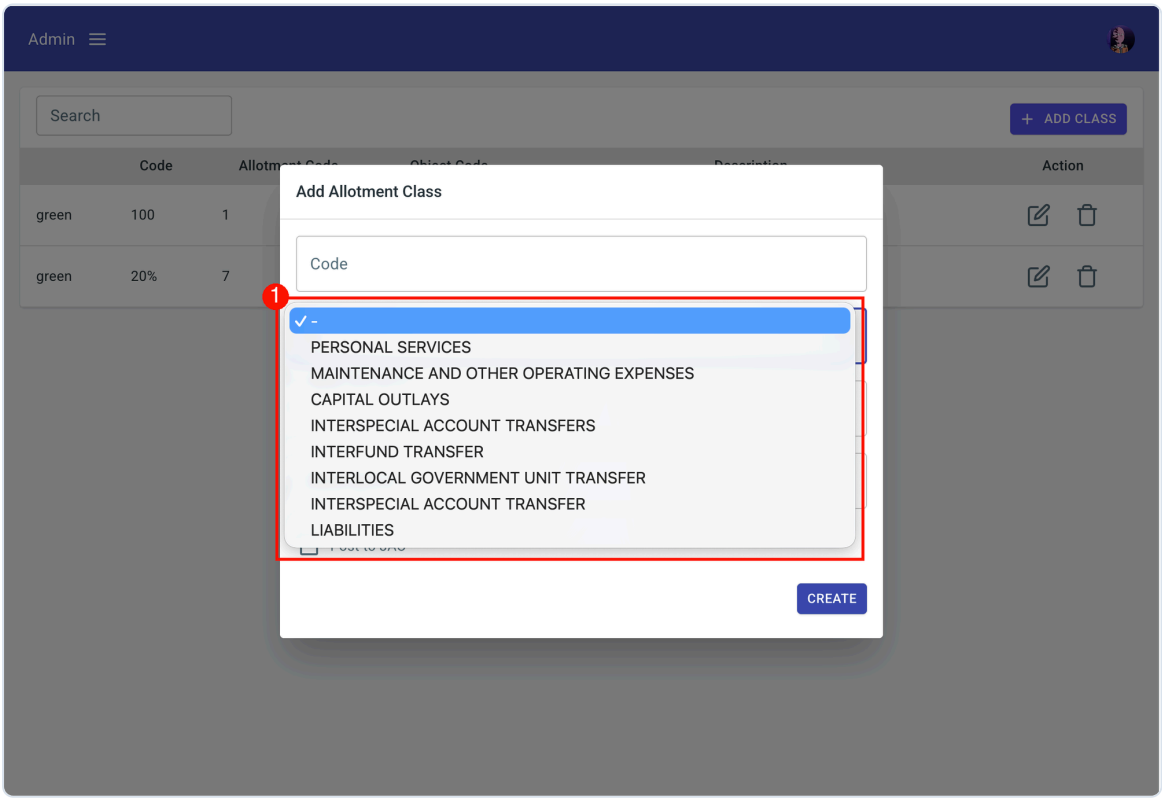

Figure 2.16. The Allotment Description drop-down list. 1 The eight allotment descriptions and the dash.

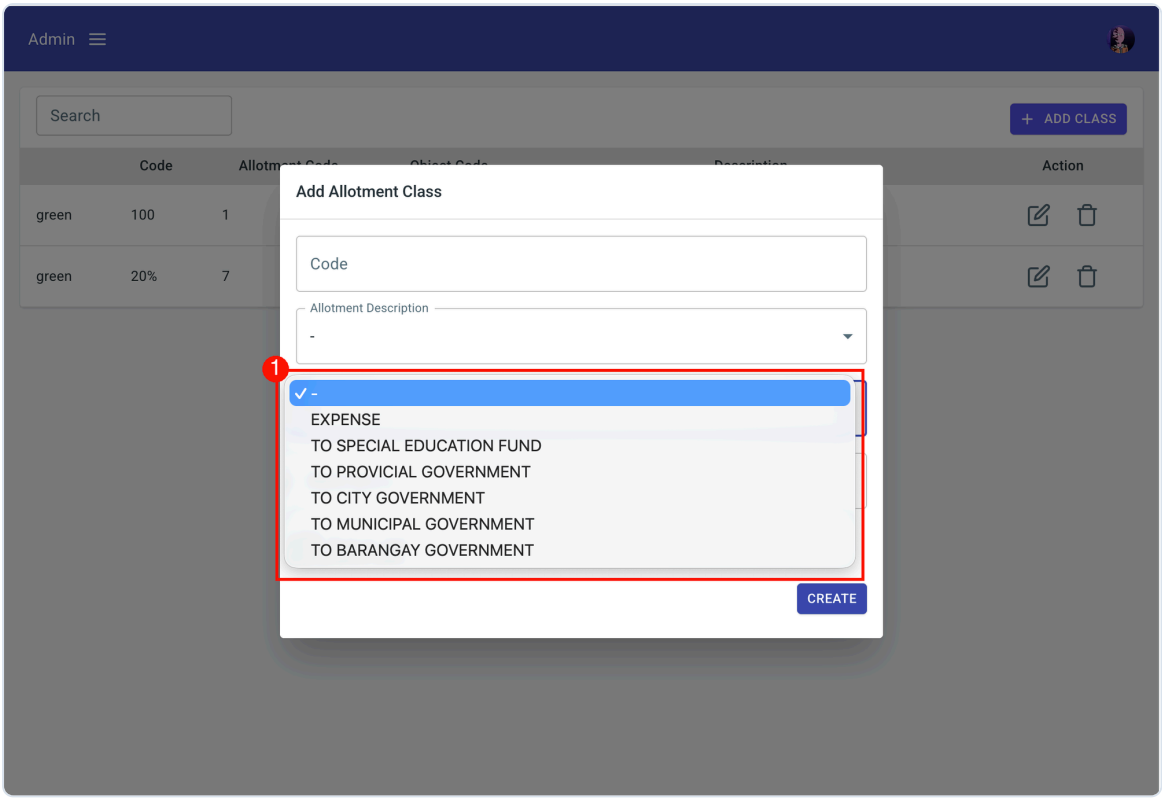

Figure 2.17. The Object Description drop-down list. 1 The object descriptions: EXPENSE, TO SPECIAL EDUCATION FUND, TO PROVICIAL GOVERNMENT, TO CITY GOVERNMENT, TO MUNICIPAL GOVERNMENT and TO BARANGAY GOVERNMENT, as the system spells them.

When you edit a class, the window also shows the **Allotment Code** and the **Object Code** beside their descriptions.

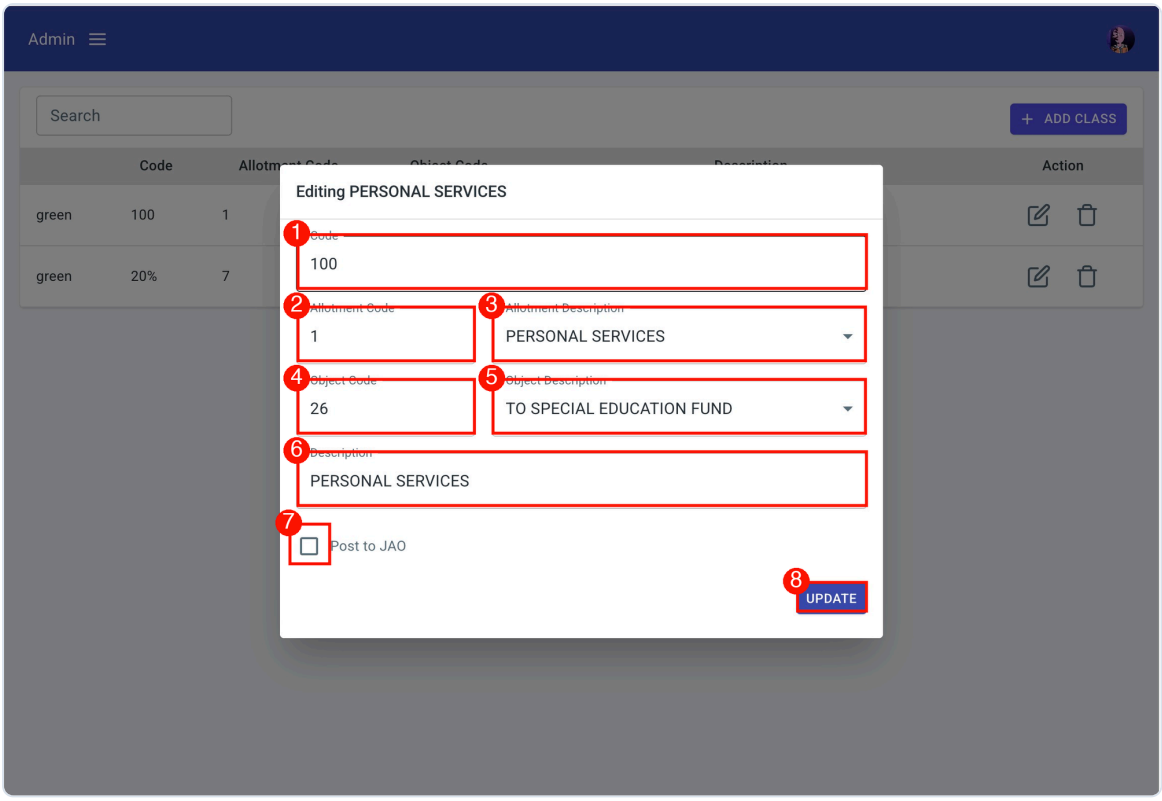

Figure 2.18. The window to edit a record in Allotment Class. 1 Code · 2 Allotment Code · 3 Allotment Description · 4 Object Code · 5 Object Description · 6 Description · 7 Check box · 8 Update

2.4 FPP

2.4.1 Function Code

Function Code lists the function codes. The columns are **Code** and **Description**. In the window **Add Function Code**, type the **Code** and the **Description**. Both are required.

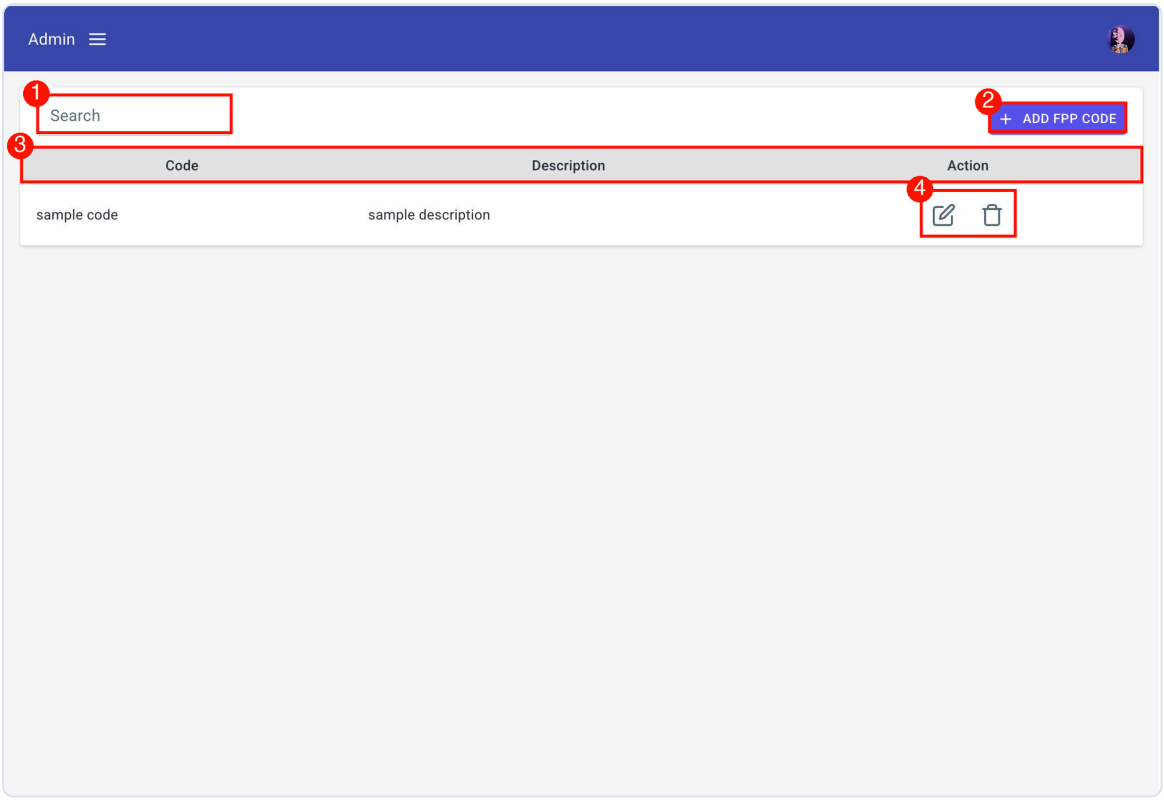

Figure 2.19. The Function Code page. 1 Search box · 2 Add button · 3 Table headings · 4 Action icons (Edit, Delete)

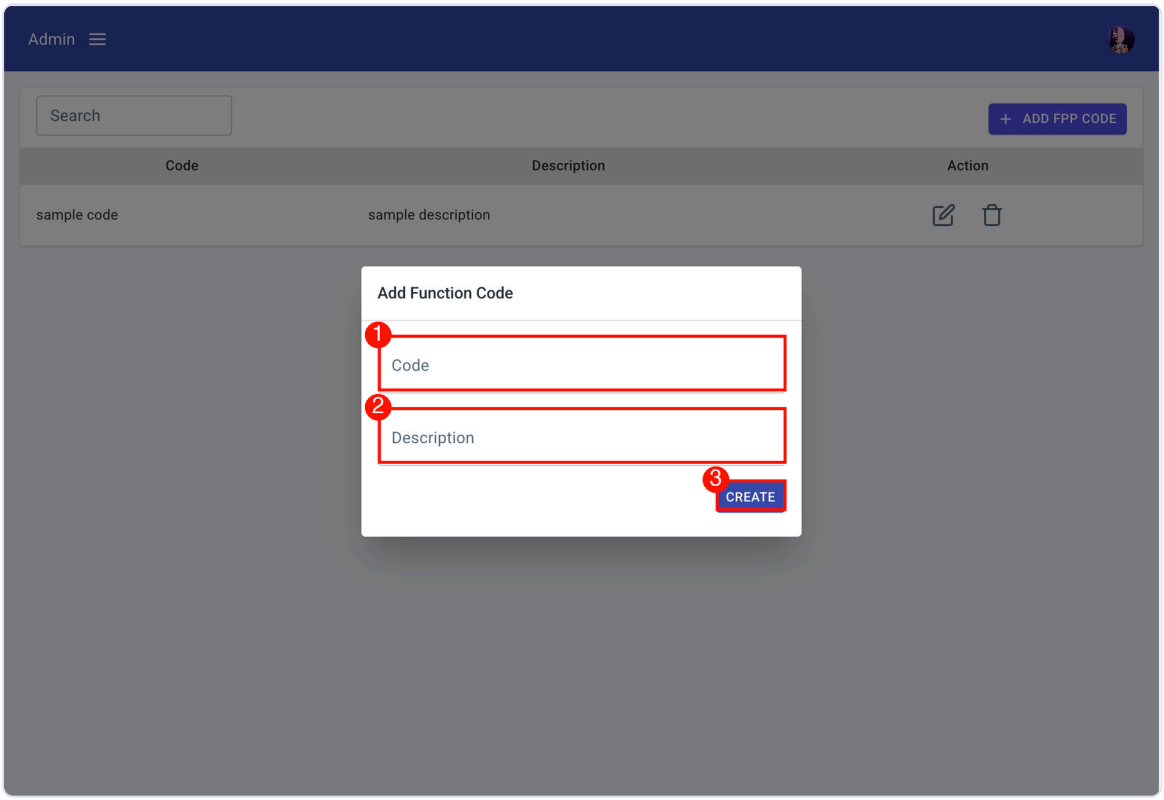

Figure 2.20. The window to add a record in Function Code. 1 Code · 2 Description · 3 Create

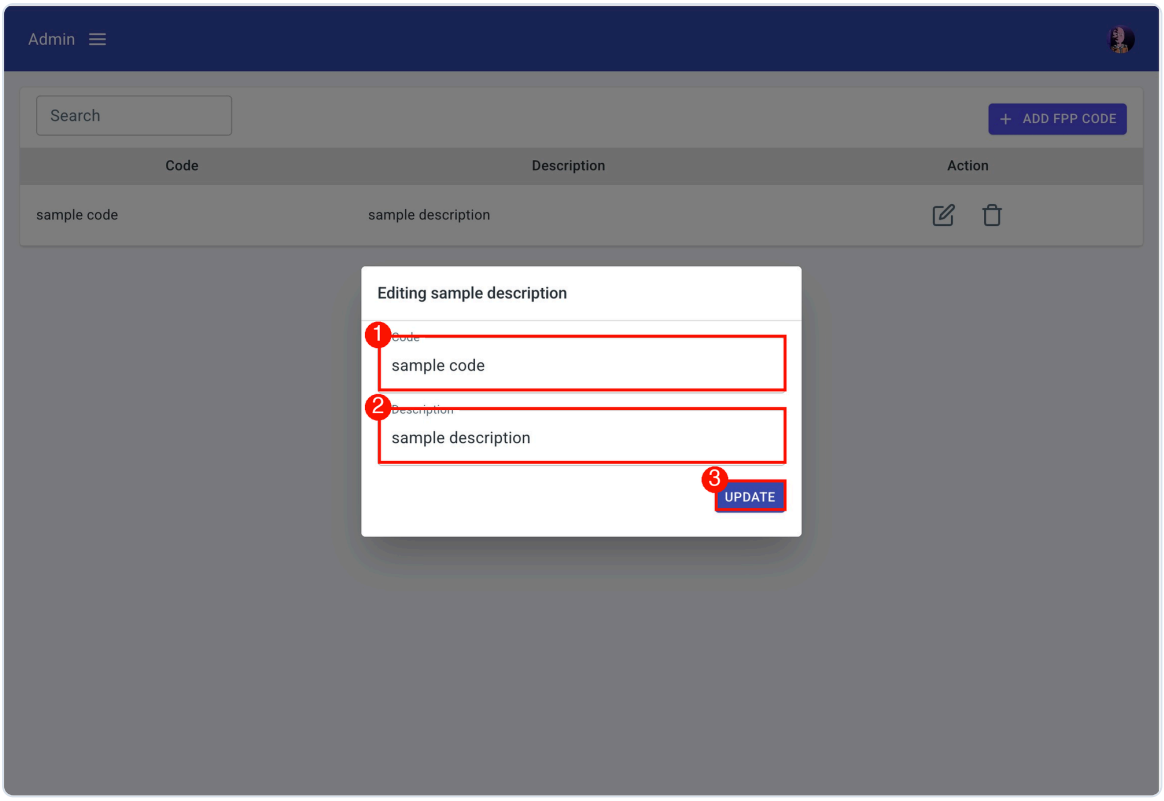

Figure 2.21. The window to edit a record in Function Code. 1 Code · 2 Description · 3 Update

2.4.2 Program Code

Program Code lists the program codes. The columns are **Code**, **Description** and **Program Code**. The page has no record yet, so it says `No record found.`

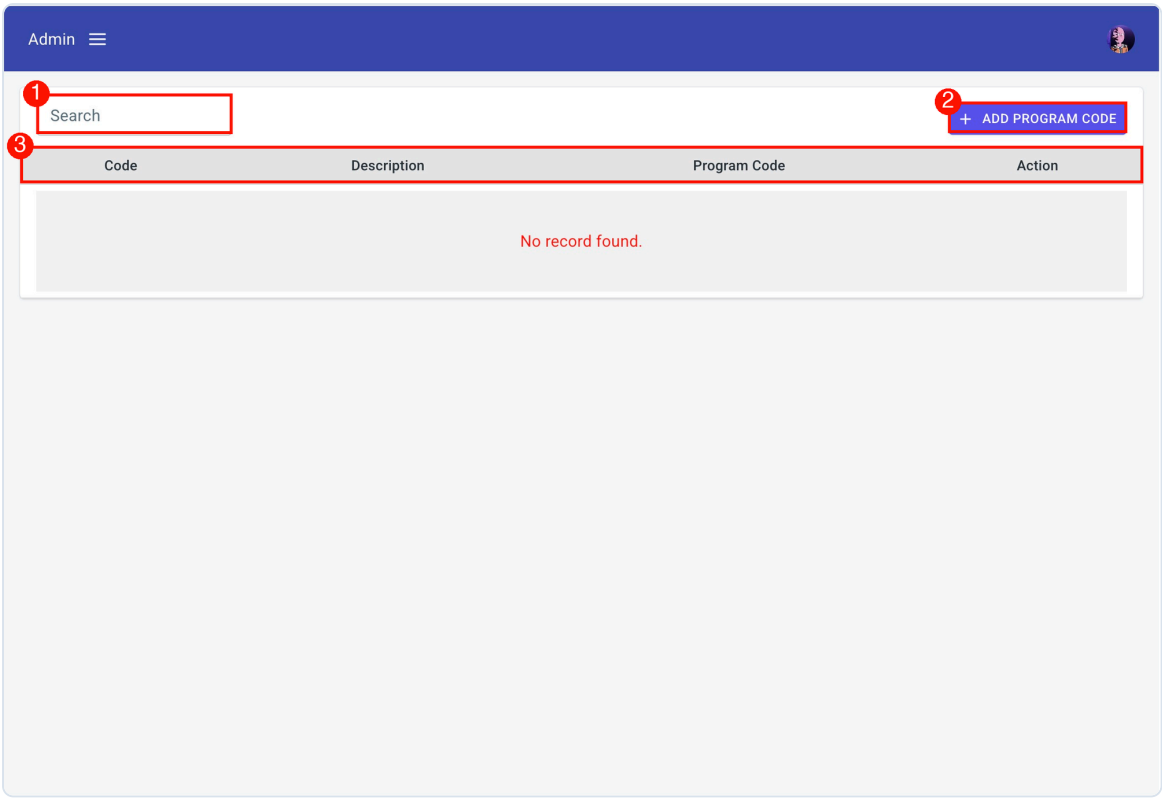

Figure 2.22. The Program Code page. 1 Search box · 2 Add button · 3 Table headings

In the window **Add Program Code**, type the **Code** and the **Description** and choose the **Function Code**. All three are required. The window then shows the description of the function code that you chose.

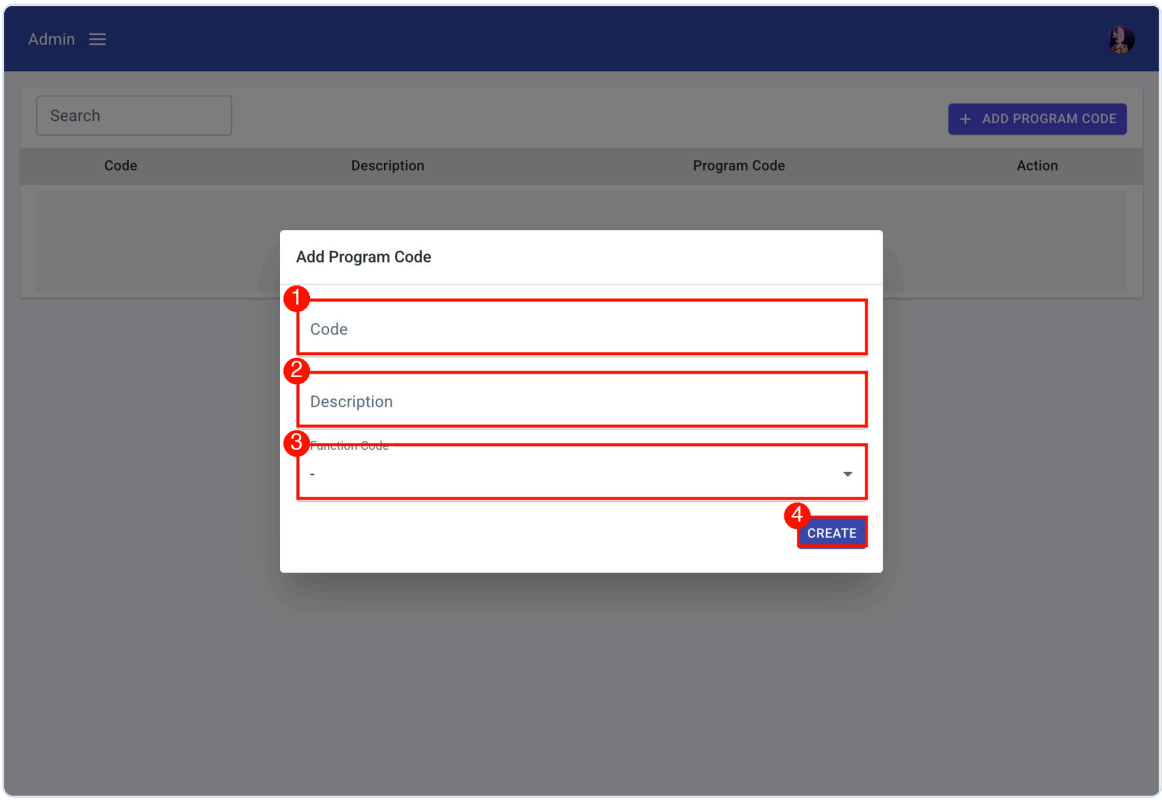

Figure 2.23. The window to add a record in Program Code. 1 Code · 2 Description · 3 Function Code · 4 Create

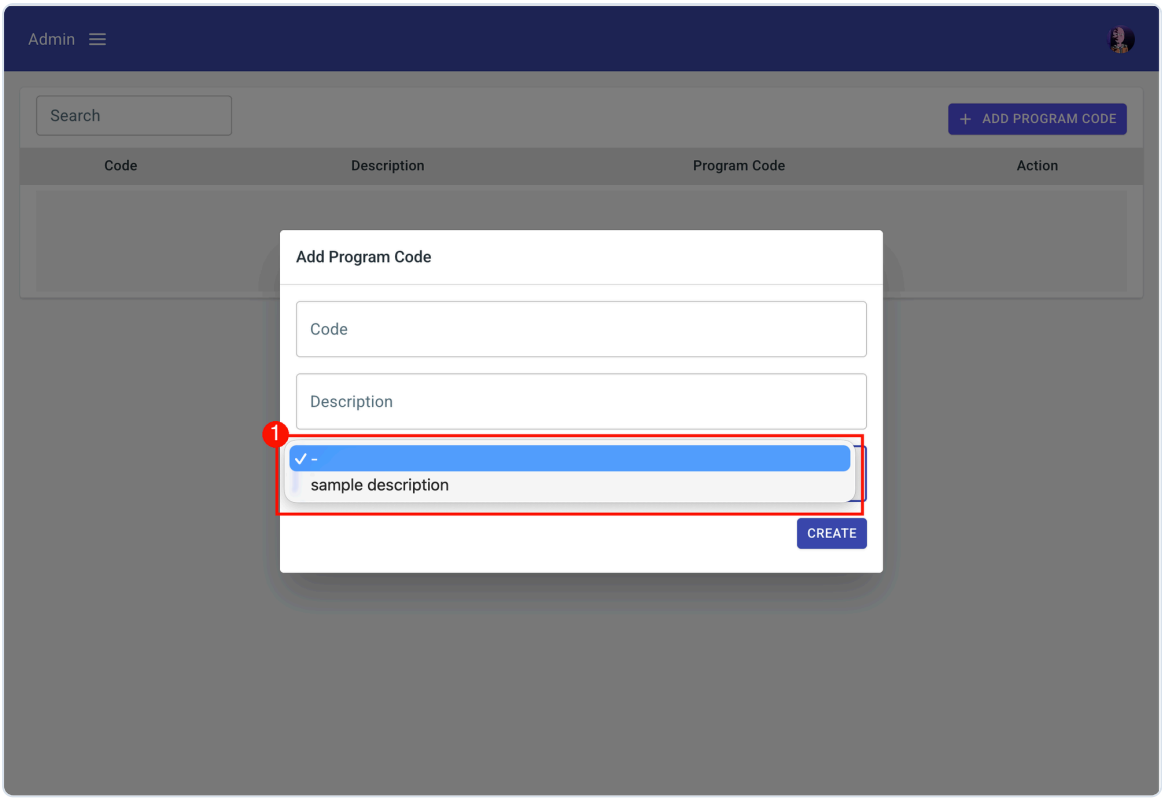

Figure 2.24. The Function Code drop-down list. 1 The function codes (here one) and the dash.

2.4.3 FPP Code

FPP Code lists the combined function, program and project codes. The columns are **Code** and **Description**. The system has two records, 1011 MAYOR and 1016 VICE MAYOR.

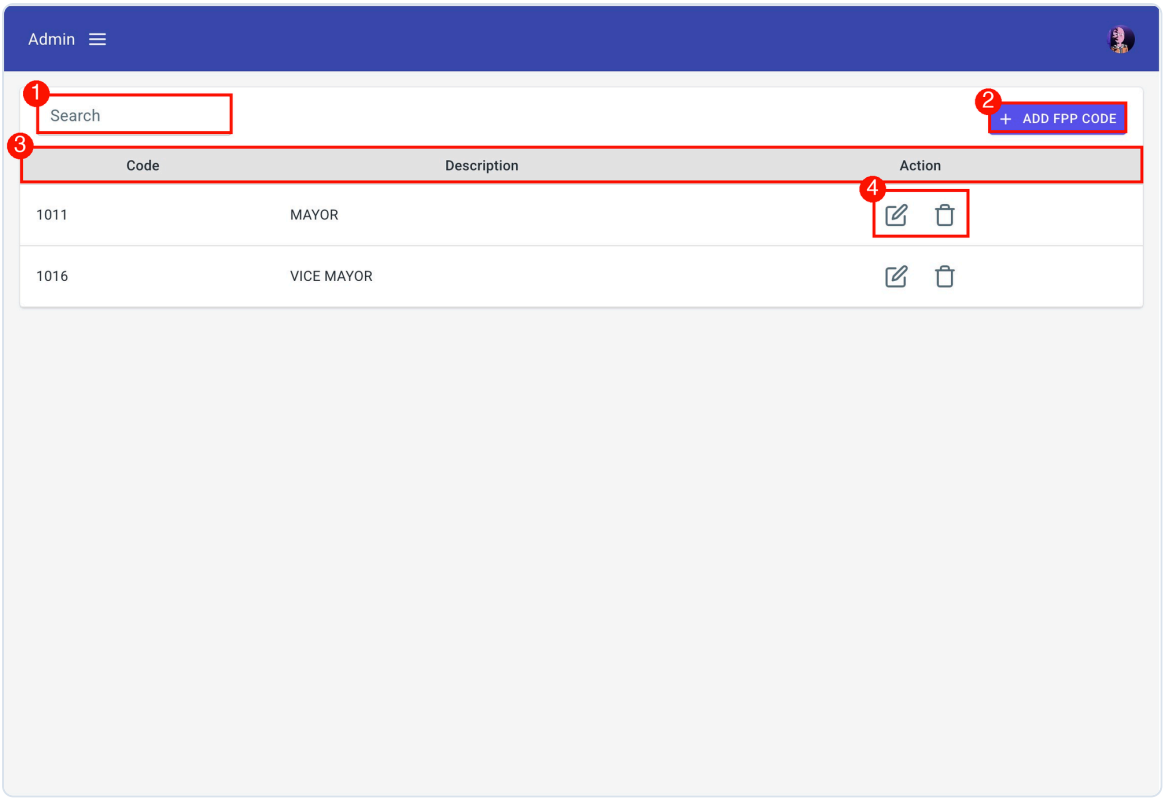

Figure 2.25. The FPP Code page. 1 Search box · 2 Add button · 3 Table headings · 4 Action icons (Edit, Delete)

The window **Add FPP Code** has these boxes: **Code** (required), **Function Code**, **Program Code** and **Project Code** (each with a list and a box that shows its description), **Description** (required), **Income Type** (a list), the check box **Based on individual income**, **Signatory** and **Designation**. The four lists show only the dash at present, because they have no other choices yet.

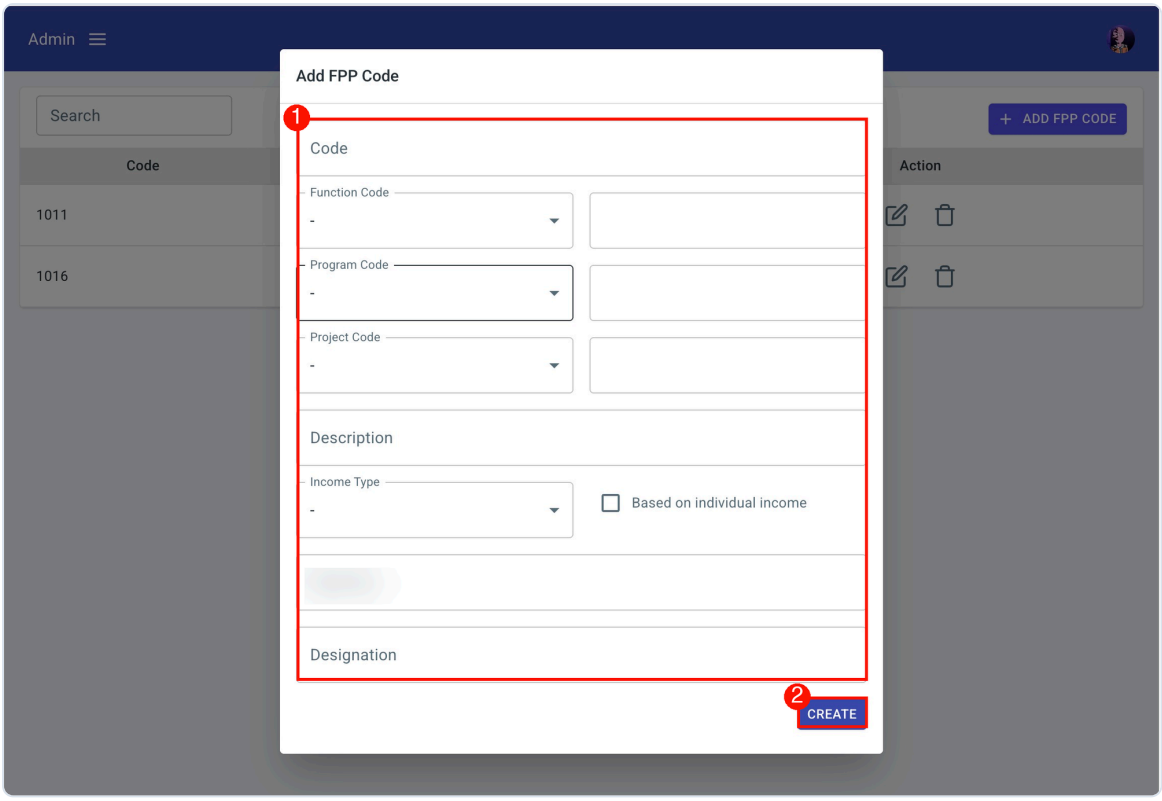

Figure 2.26. The window to add a record in FPP Code. 1 The boxes of the form · 2 Create

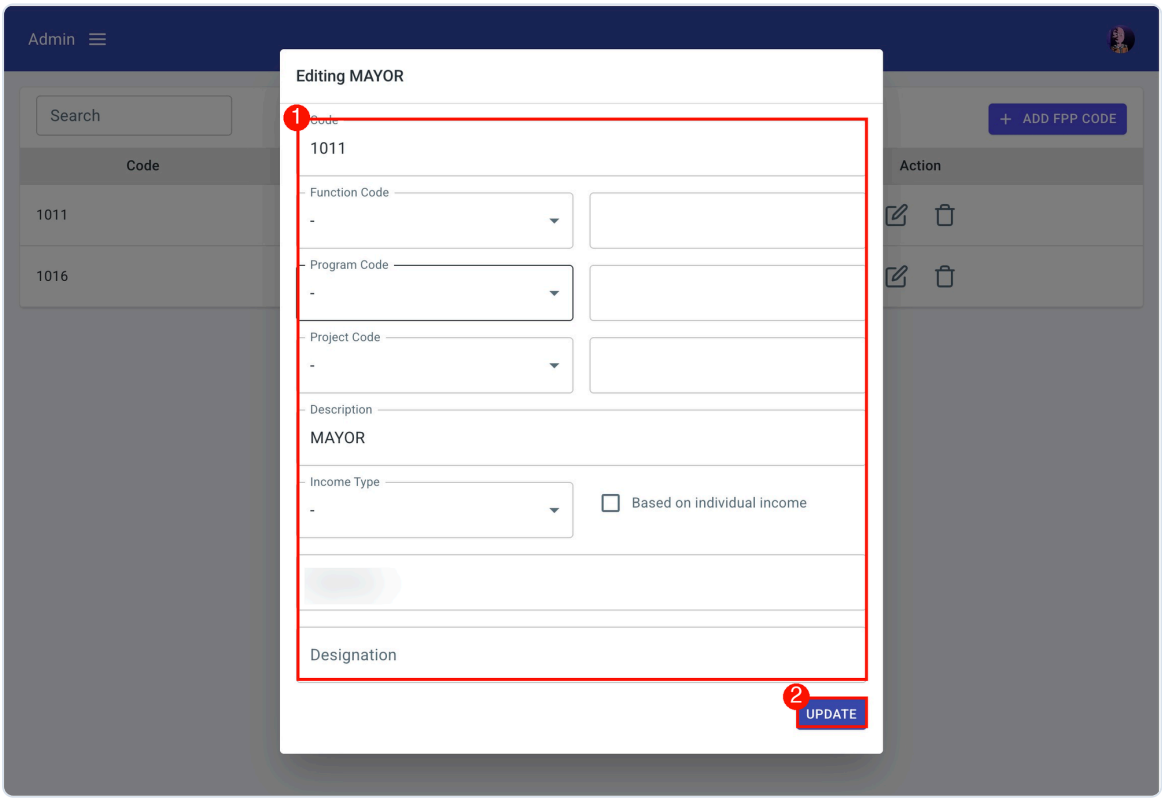

Figure 2.27. The window to edit a record in FPP Code. 1 The boxes of the form · 2 Update

2.5 Chart of Accounts

2.5.1 Account Code

Account Code is the chart of accounts. The columns are **Code**, **Description**, **GL Account Code** and **Order**. The list is long (283 accounts), so use the **Search** box to find one, for example *Building Permit*.

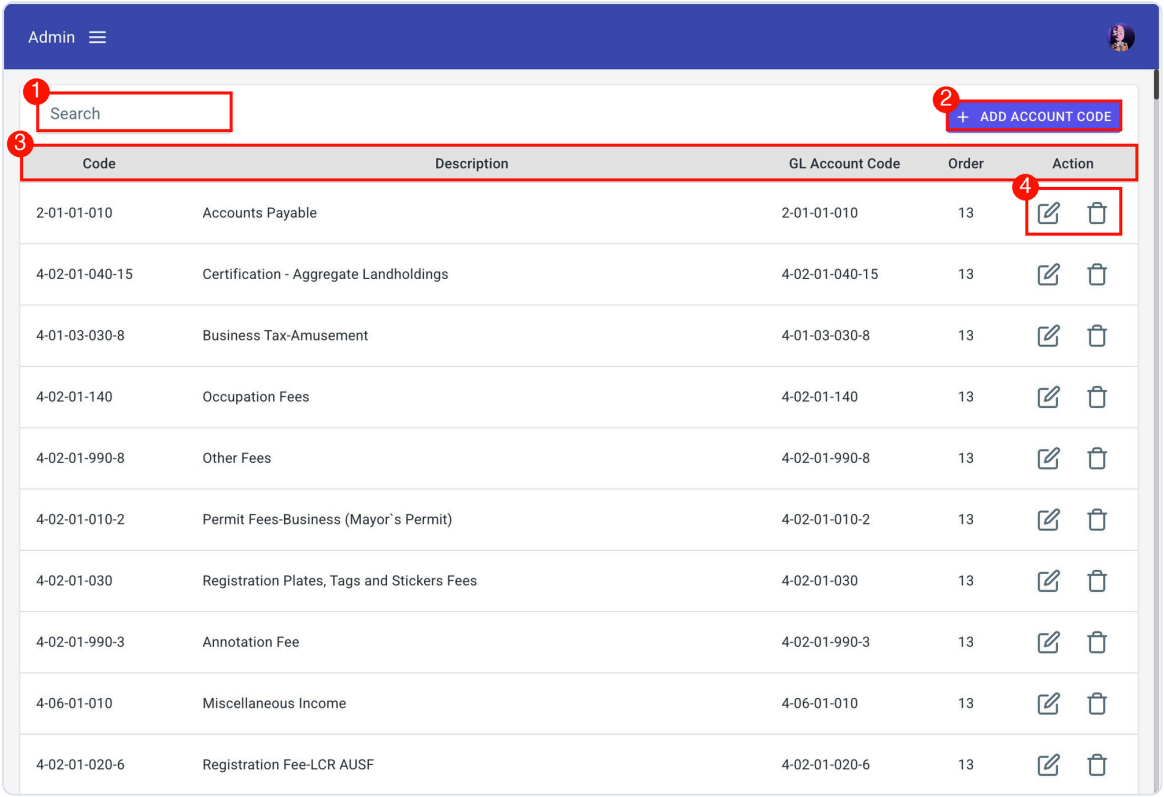

Figure 2.28. The Account Code page. 1 Search box · 2 Add button · 3 Table headings · 4 Action icons (Edit, Delete)

Adding an account code takes two steps. In the window **Add Account Code**, type the **Account Code** and click **Check**. The system looks for the same code. When the code is new, the message `Account code is available` appears and the rest of the form opens.

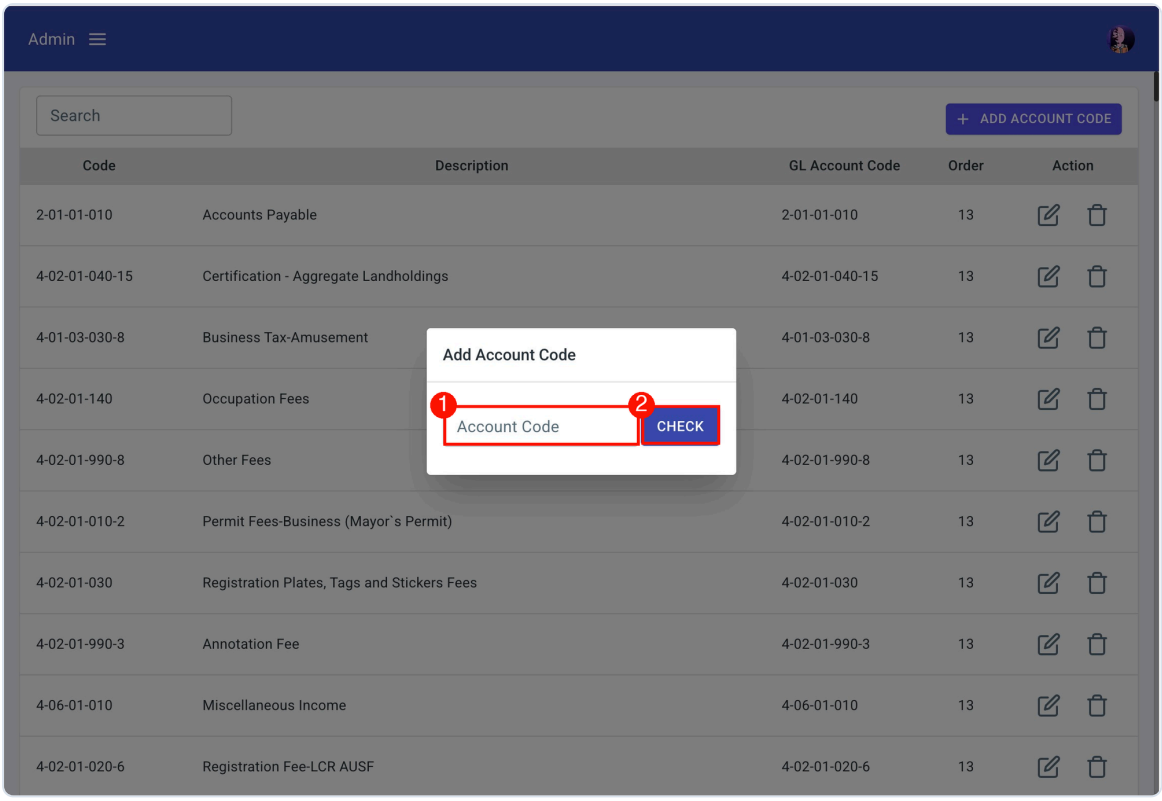

Figure 2.29. The window to add a record in Account Code. 1 Account Code · 2 Check

The full form (the same one that opens when you edit) has these boxes:

- **Account Code** and **Description** (both required).
- **Seq Code**, **Sub Seq Code**, **Group Code** and **Sub Group Code**: lists. They show only the dash at present.
- **GL Code**.
- **Fpp Code**: a list with **MAYOR** and **VICE MAYOR**. The box **FPP Description** shows the description of your choice.
- **Order By Account Code**: a number. The default is 13. A lower number appears first on the printed official receipt.
- Five check boxes: **Post to RSL when JV**, **Post to RSL when DV**, **Post to Surplus when JV**, **Post to Surplus when DV** and **Post to Cash Book when JV**.

The window is taller than a small screen. Scroll inside the window to reach the check boxes and the **Update** button.

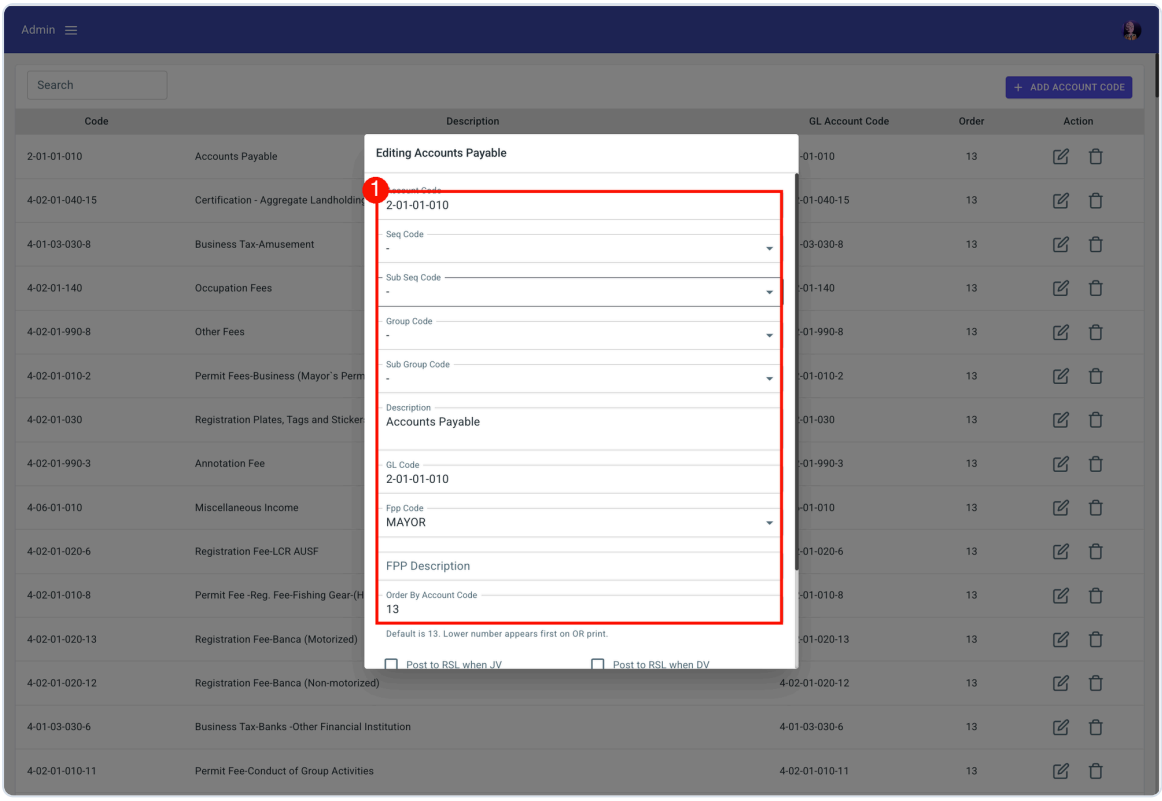

Figure 2.30. The top of the window to edit an account code. 1 The boxes of the account.

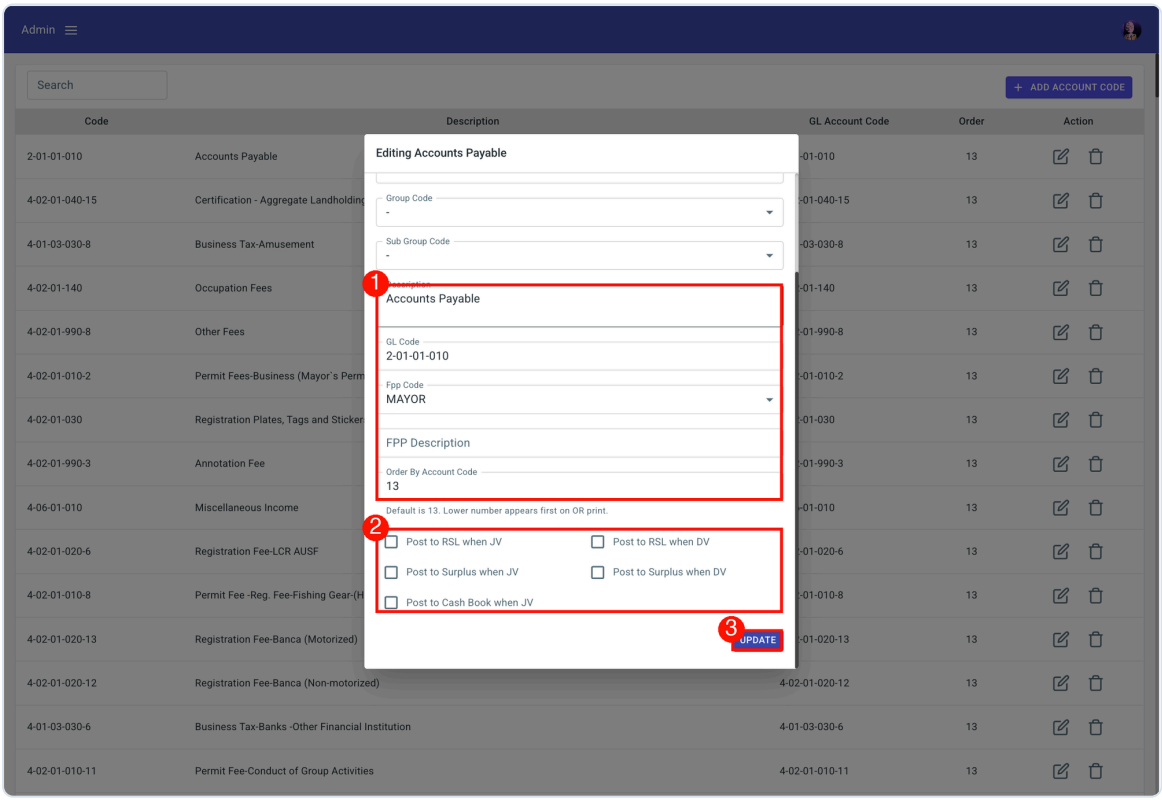

Figure 2.31. The window scrolled down. 1 Description, GL Code, Fpp Code and Order · 2 The five posting check boxes · 3 Update.

2.5.2 Object Code

Object Code lists the object codes. The columns are **Code** and **Description**. In the window **Add Object Code**, type the **Code** and the **Description**. Both are required.

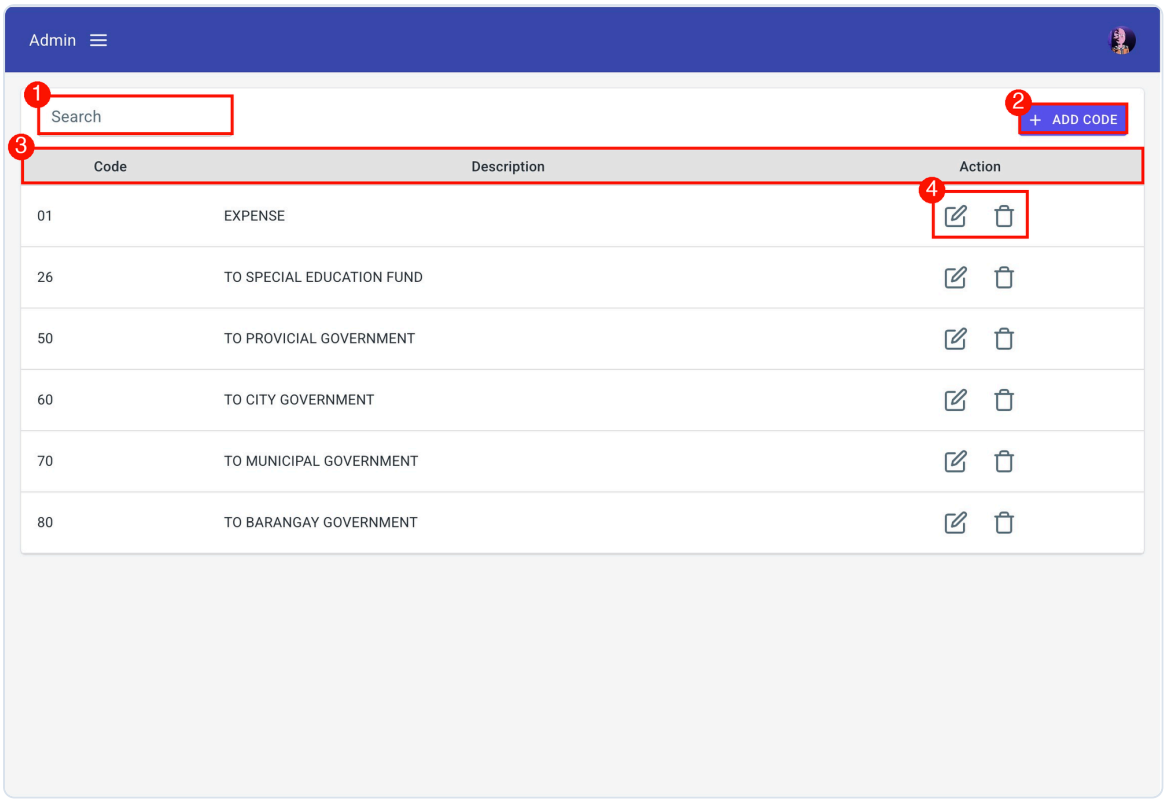

Figure 2.32. The Object Code page. 1 Search box · 2 Add button · 3 Table headings · 4 Action icons (Edit, Delete)

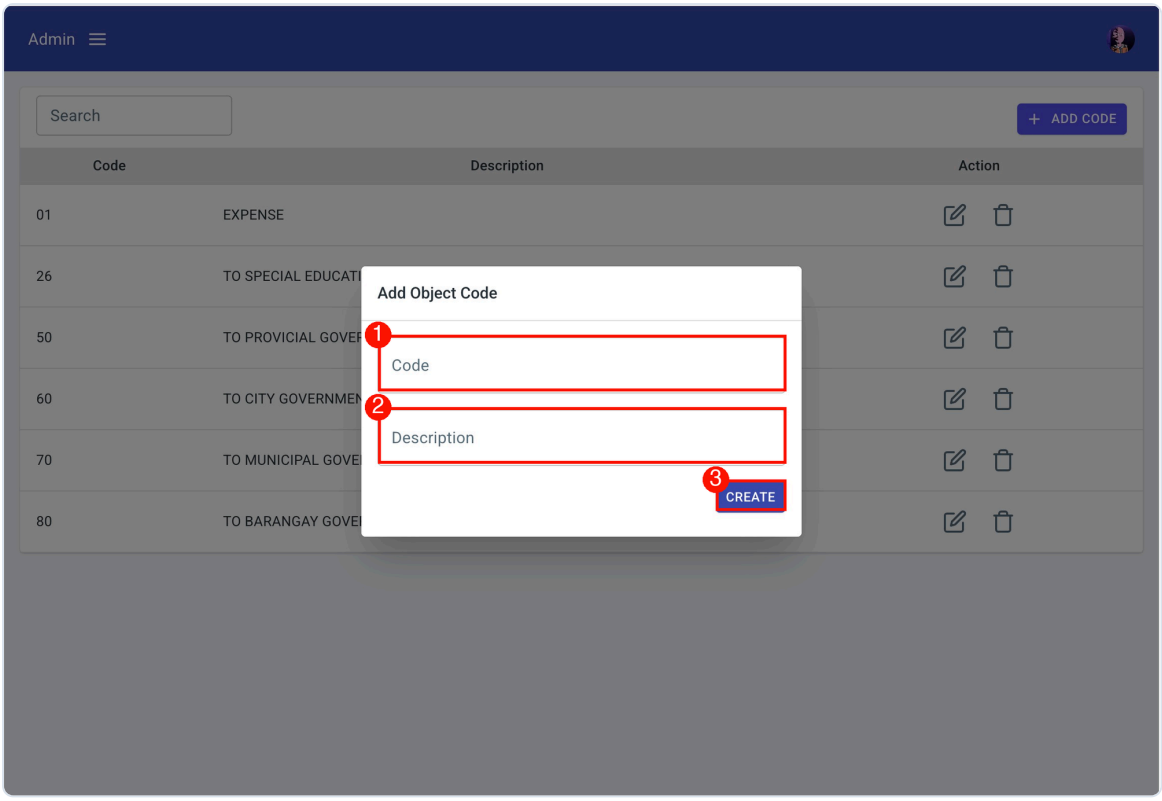

Figure 2.33. The window to add a record in Object Code. 1 Code · 2 Description · 3 Create

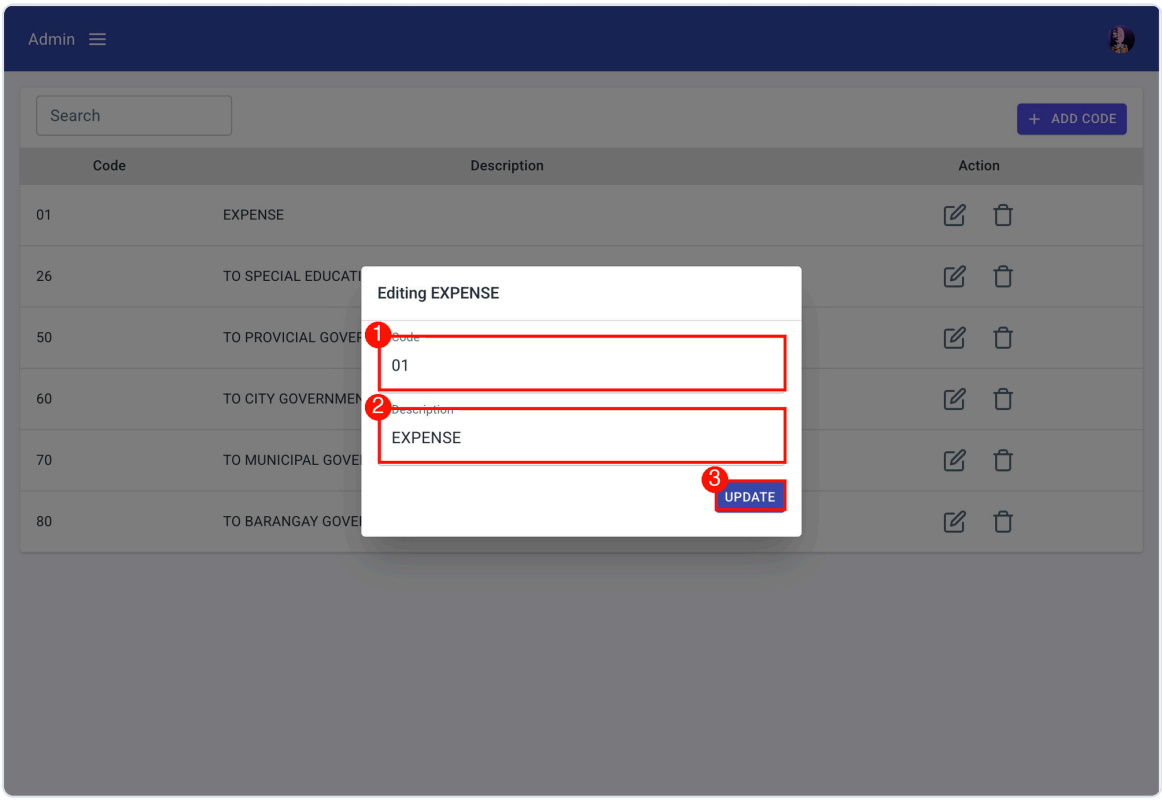

Figure 2.34. The window to edit a record in Object Code. 1 Code · 2 Description · 3 Update

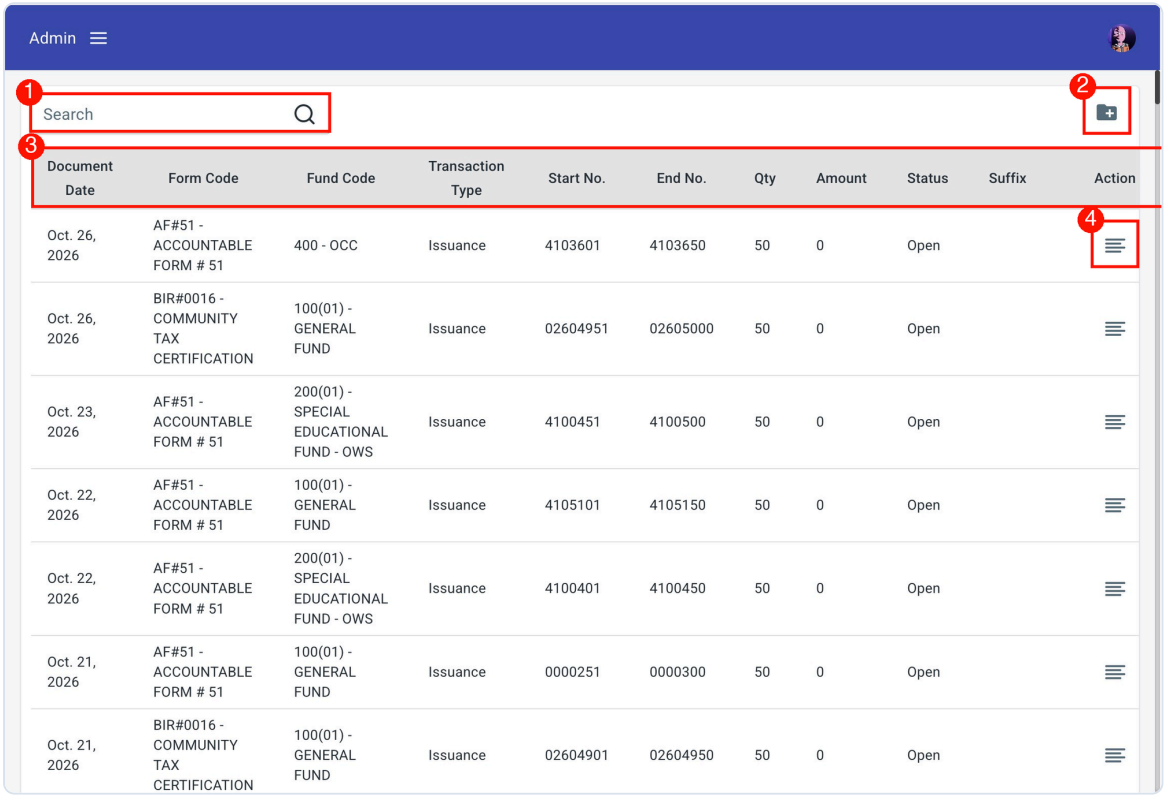
2.6 Accountability

2.6.1 Accountable Forms

Accountable Forms records the booklets of official receipts and other accountable forms that are given to a collector. The columns are **Document Date**, **Form Code**, **Fund Code**, **Transaction Type**, **Start No.**, **End No.**, **Qty**, **Amount**, **Status**, **Suffix** and **Action**. The page has a paging line at the bottom. The icon at the top right adds a record: see the next paragraph. The icon in the **Action** column (named **Details**) opens the record. The **Delete** icon appears only for a record from which no receipt has been issued yet.



Document Date	Form Code	Fund Code	Transaction Type	Start No.	End No.	Qty	Amount	Status	Suffix	Action
Oct. 26, 2026	AF#51 - ACCOUNTABLE FORM # 51	400 - OCC	Issuance	4103601	4103650	50	0	Open		
Oct. 26, 2026	BIR#0016 - COMMUNITY TAX CERTIFICATION	100(01) - GENERAL FUND	Issuance	02604951	02605000	50	0	Open		
Oct. 23, 2026	AF#51 - ACCOUNTABLE FORM # 51	200(01) - SPECIAL EDUCATIONAL FUND - OWS	Issuance	4100451	4100500	50	0	Open		
Oct. 22, 2026	AF#51 - ACCOUNTABLE FORM # 51	100(01) - GENERAL FUND	Issuance	4105101	4105150	50	0	Open		
Oct. 22, 2026	AF#51 - ACCOUNTABLE FORM # 51	200(01) - SPECIAL EDUCATIONAL FUND - OWS	Issuance	4100401	4100450	50	0	Open		
Oct. 21, 2026	AF#51 - ACCOUNTABLE FORM # 51	100(01) - GENERAL FUND	Issuance	0000251	0000300	50	0	Open		
Oct. 21, 2026	BIR#0016 - COMMUNITY TAX CERTIFICATION	100(01) - GENERAL FUND	Issuance	02604901	02604950	50	0	Open		

Figure 2.35. The Accountable Forms page. 1 Search box · 2 Create button (the folder icon) · 3 Table headings · 4 Action icons (Details)

> **The button that creates an accountable form.** This page has no blue Add button. To create an accountable form, click this icon, a folder with a plus sign: It is at the top right of the table, on the same line as the Search box. Point to it and TIS shows its name, **CREATE ACCOUNTABLE FORM**. Clicking it opens the window of the same name, which is explained below.

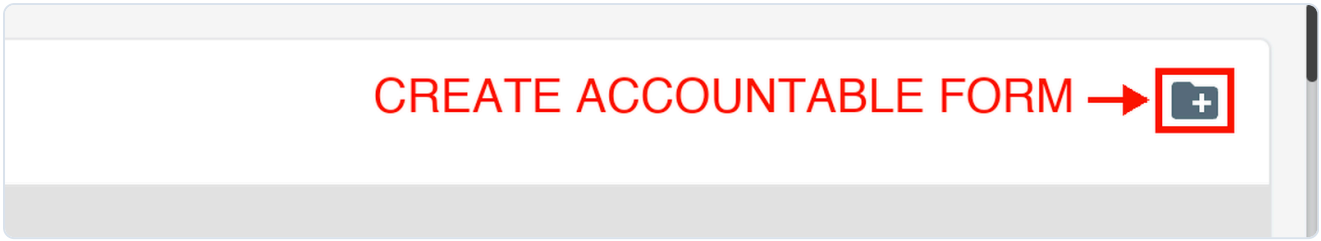


Figure 2.36. The button that creates an accountable form: the folder icon with a plus sign at the top right of the Accountable Forms page. Its name is CREATE ACCOUNTABLE FORM.

In the window **CREATE ACCOUNTABLE FORM**:

- **Liquidating Officer**, **Collector**, **Cost Center**, **Form Type** and **Fund** are required lists.
- **Document Date** starts as today's date. **Trans Type** is *Issuance* and cannot be changed.
- **OR Suffix** is optional.
- Type the **Start No.** of the booklet. The system fills in the **End No.** (the start number plus 49, with the same number of digits) and sets **Quantity** and **Balance** to 50. Every booklet has 50 receipts, so keep the End No. that the system fills in.
- Type the **Unit Value**. The **Amount** is the unit value multiplied by the quantity.
- **Status** starts as *Open*.

If the receipt numbers already exist in the system, the message `O.R already exist in the system` appears and the record is not saved.

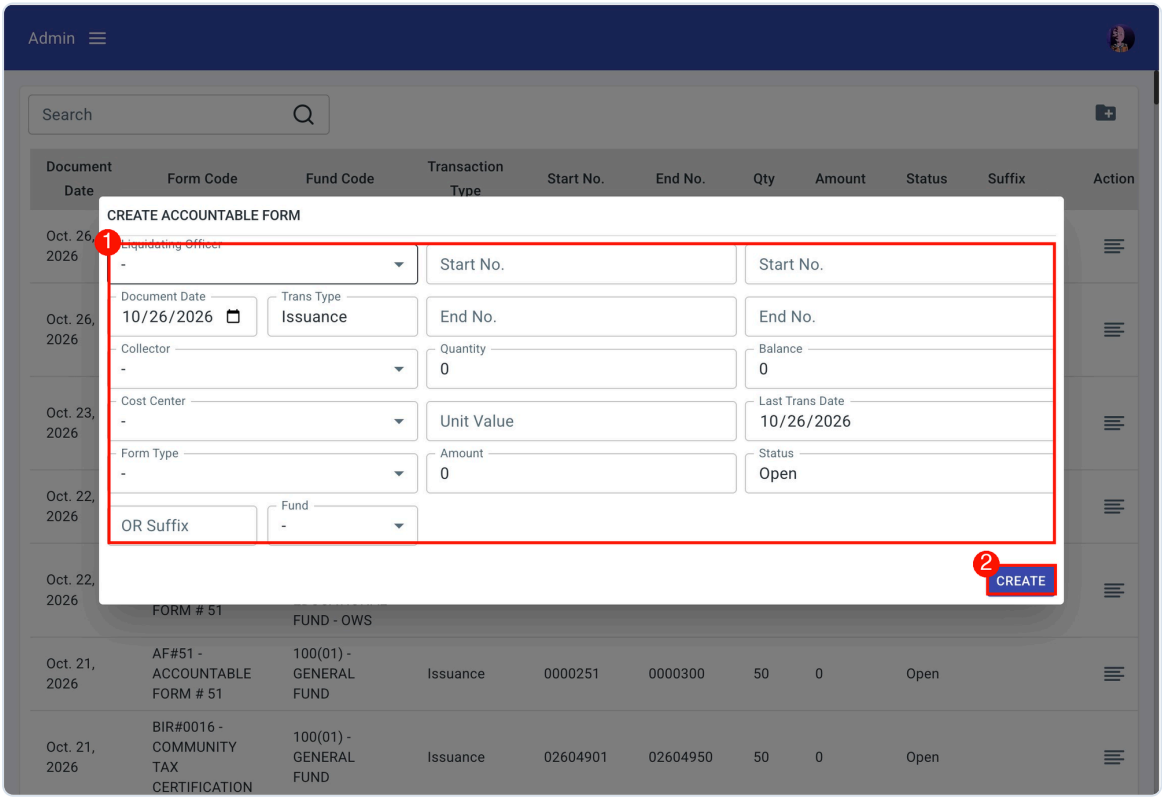

Figure 2.37. The window to add a record in Accountable Forms. 1 The boxes of the form · 2 Create

The lists of the window offer these choices:

- **Liquidating Officer**: the liquidating officers. **Collector**: the collectors, three at present. Both come from the LiqDisb Collector page (Section 2.6.6).
- **Cost Center**: ACCOUTANTABLE OFFICER (spelled this way in the system) and OAS MUNICIPAL HALL.
- **Form Type**: the forms of the Form Code page (Section 2.6.4), such as CASH TICKET AT P 1.00 EACH or COMMUNITY TAX CERTIFICATION.
- **Fund**: the fund codes, from 100(01) GENERAL FUND to 400 OCC.

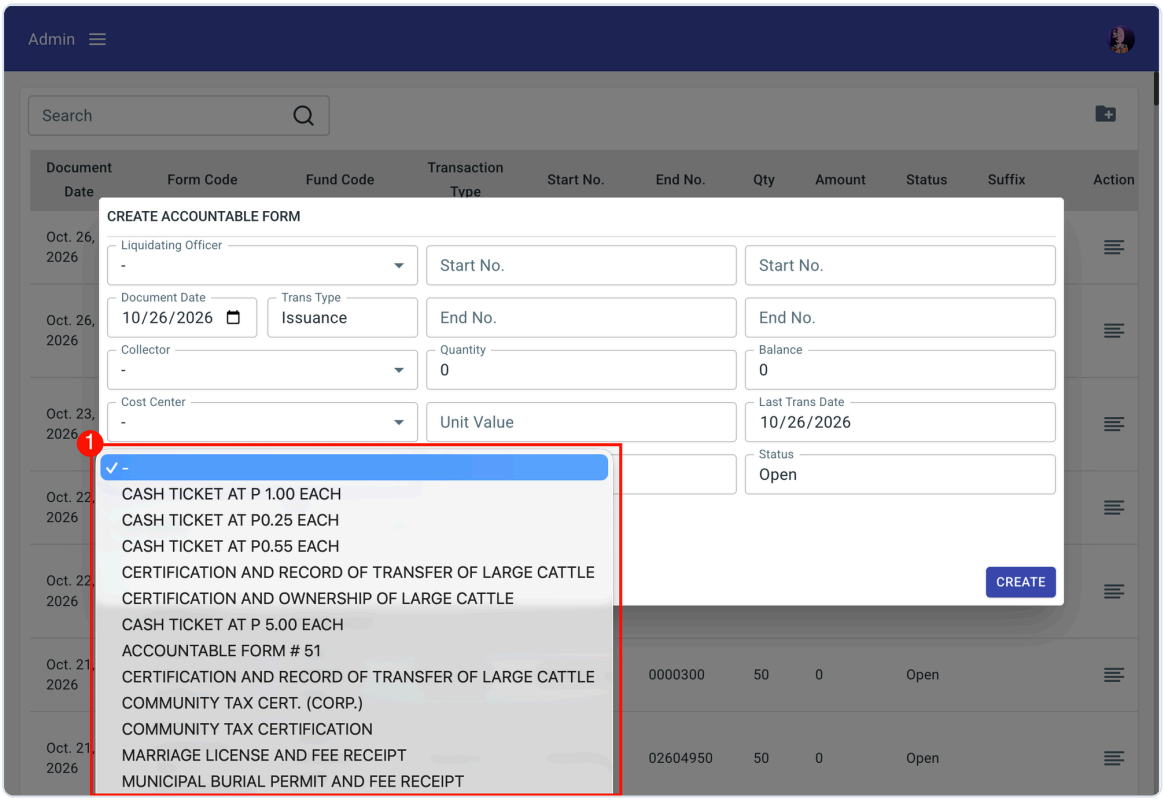

Figure 2.38. The Form Type drop-down list. 1 The forms that can be chosen.

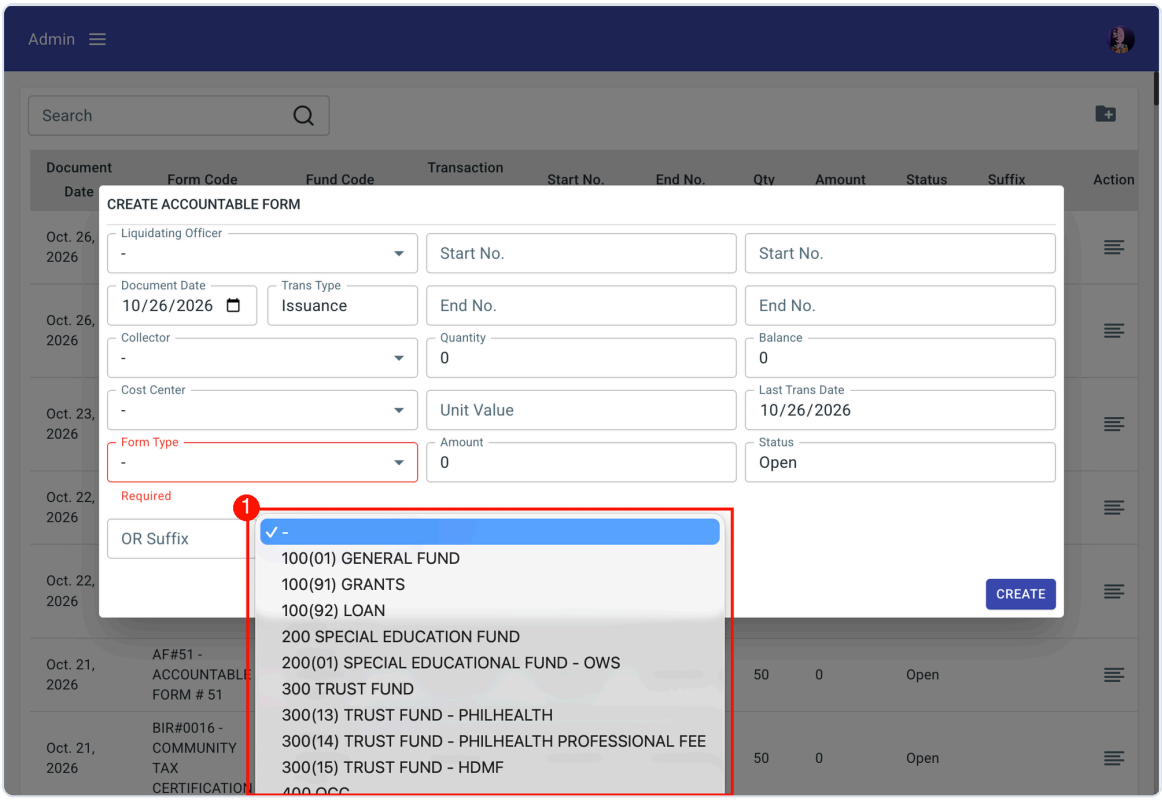

Figure 2.39. The Fund drop-down list. 1 The fund codes.

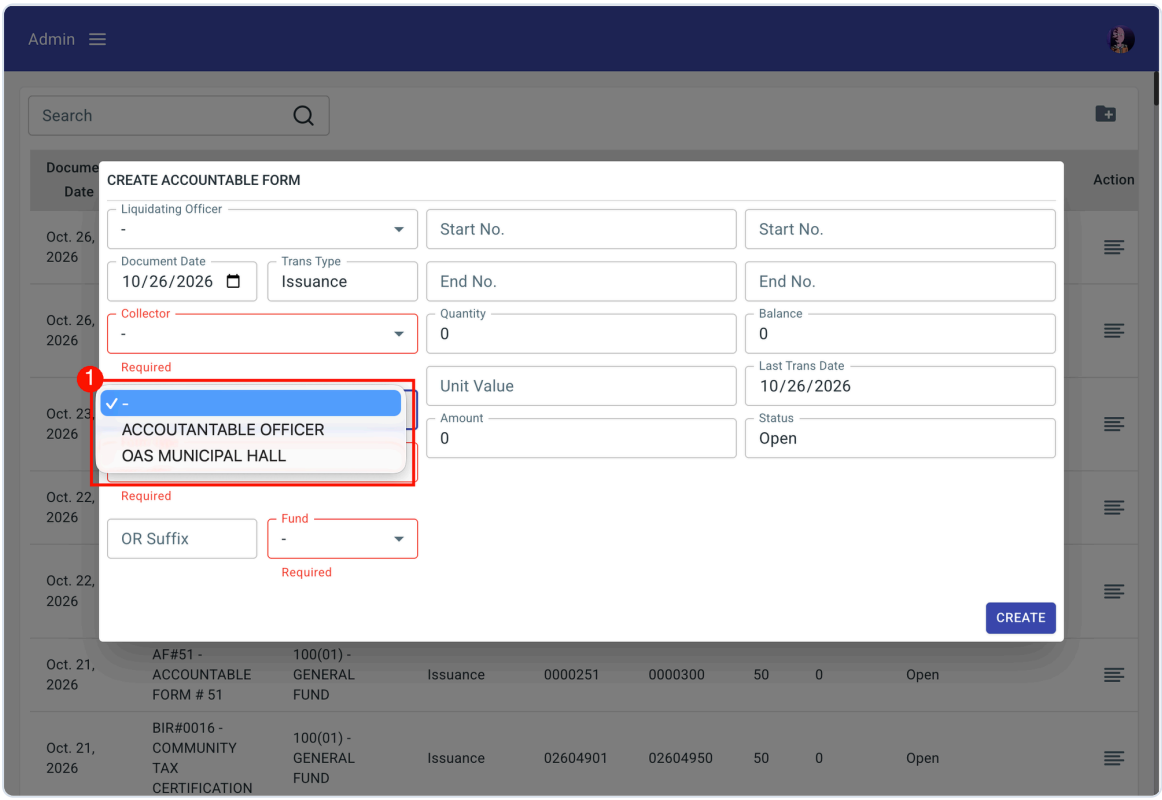

Figure 2.40. The Cost Center drop-down list. 1 The two cost centers.

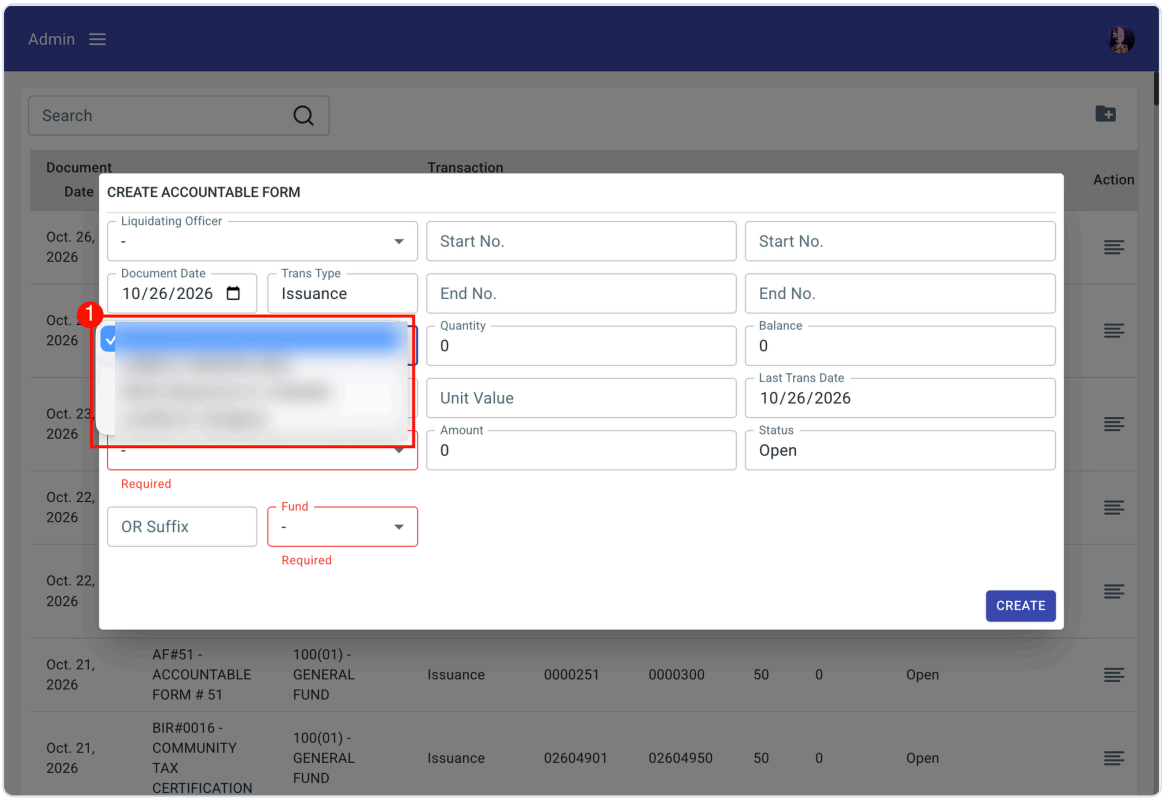

Figure 2.41. The Collector drop-down list. 1 The collectors. The names are blurred.

To view the Accountable Form Details, click the Details button. In the **Action** column, each row has an icon of three short lines: ≡ This is the **Details** button. Click the one in the row of the accountable form that you want to read. The window **Accountable Form Details** opens.

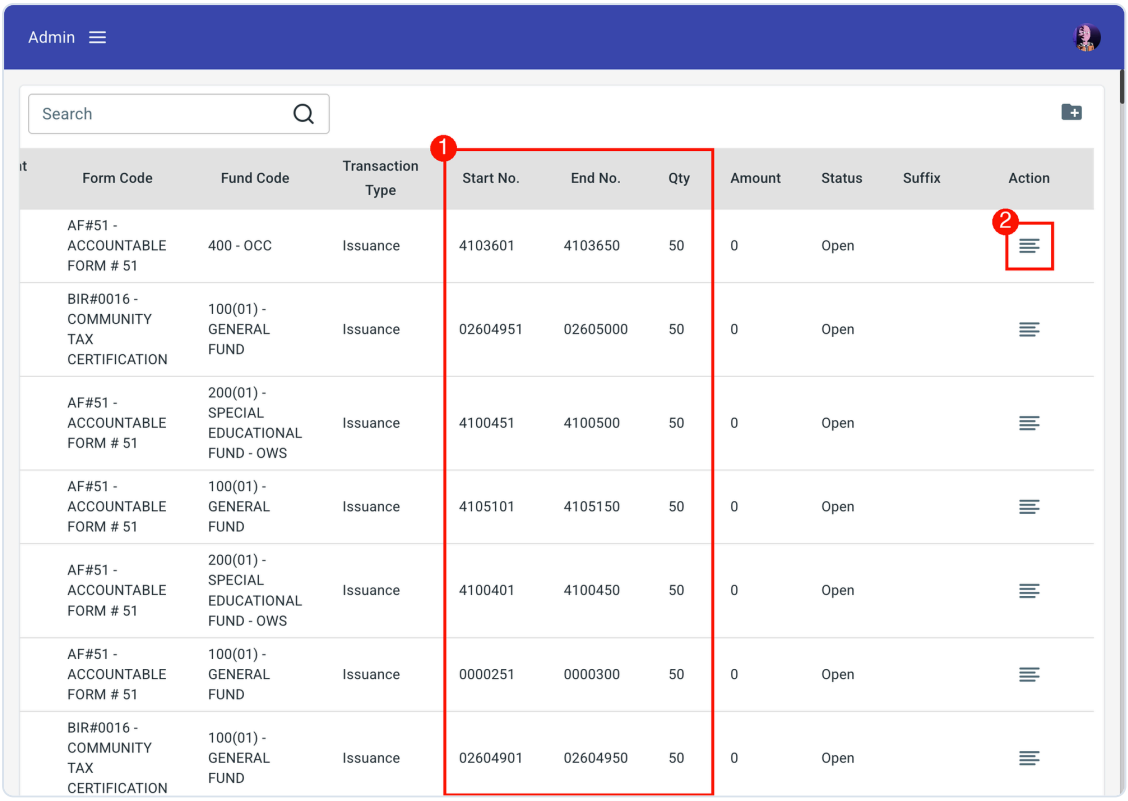

Figure 2.42. The Details button (2) is in the Action column of every row. The columns Start No., End No. and Qty (1) show the range of each form: every range has 50 numbers.

The window **Accountable Form Details** shows **Basic Information** (the document date, the status, the transaction type, the OR suffix and the two officers), **Form, Fund, and Cost Center Information**, the **OR Number Range** (start number, end number and quantity) and **Financial Information** (unit value and total value). Scroll inside the window to read all of it. Click **Close** or the X when you finish.

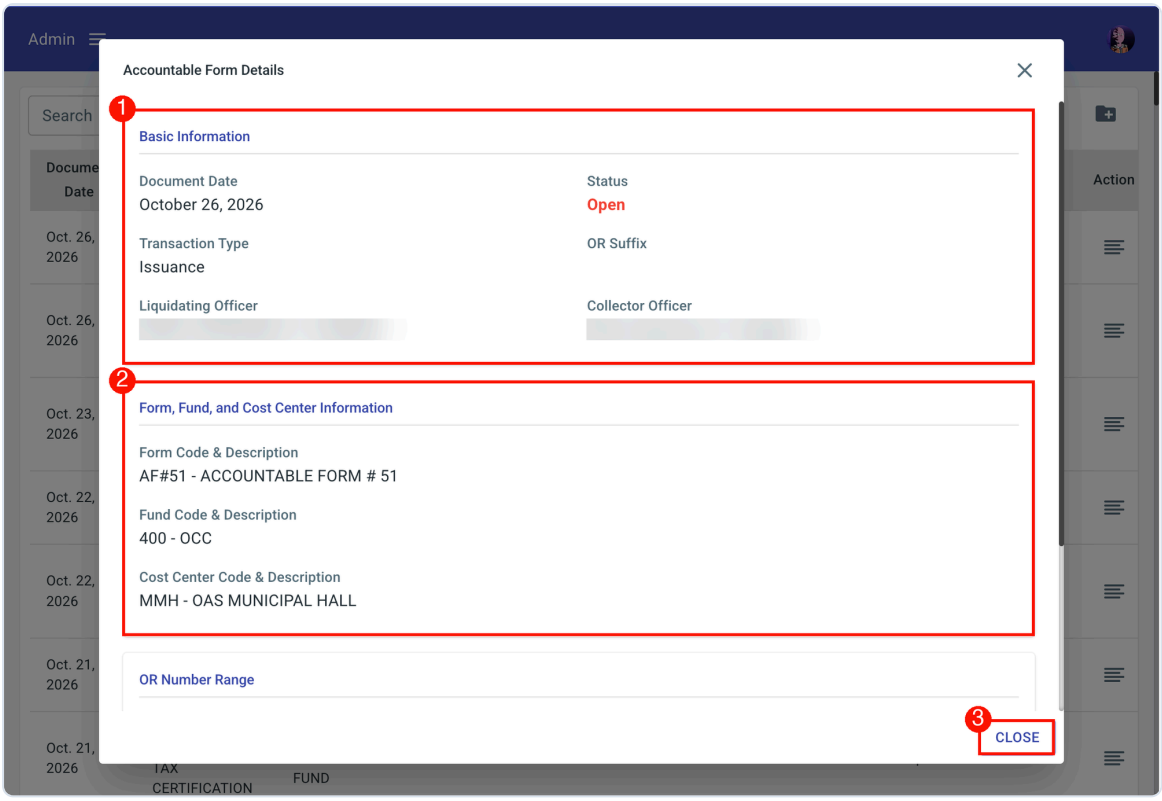

Figure 2.43. The Accountable Form Details window. 1 Basic Information · 2 Form, Fund, and Cost Center Information · 3 Close. The officer names are blurred.

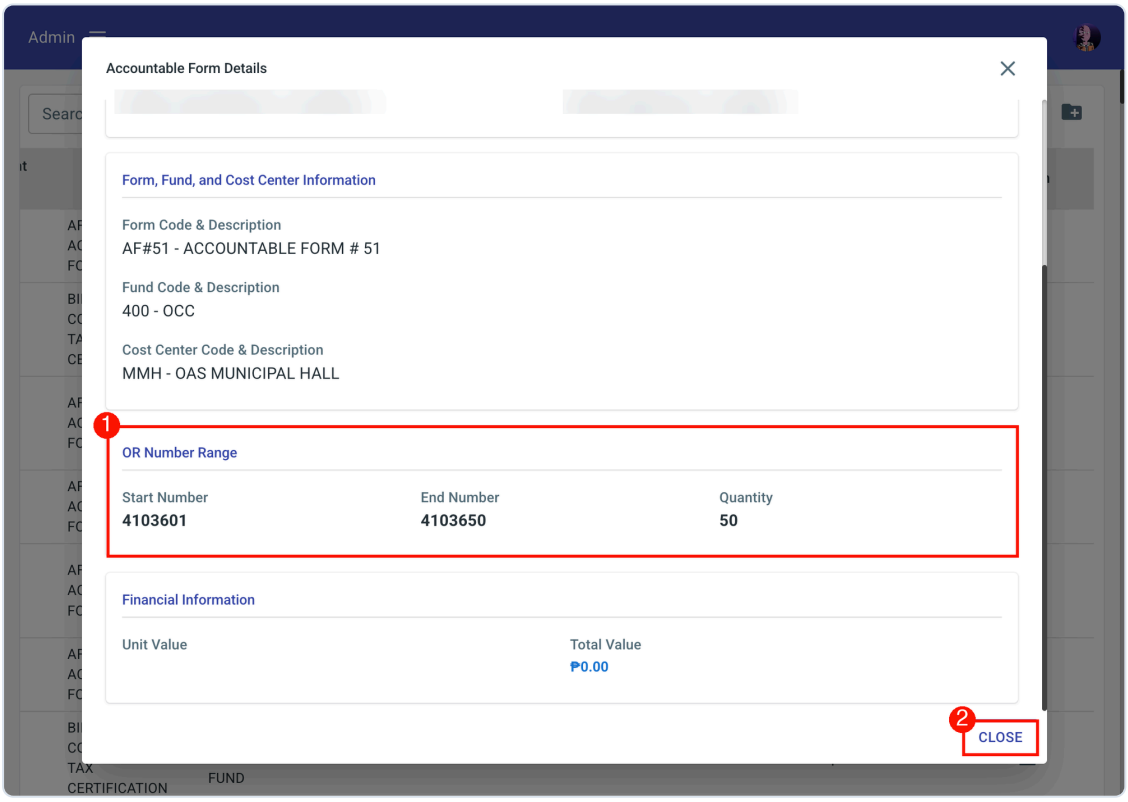

Figure 2.44. The same window scrolled down. 1 The OR Number Range: Start Number 4103601, End Number 4103650, Quantity 50 · 2 Close. The officer names at the top are blurred.

> **The OR number range is always 50.** Each accountable form is a booklet of 50 official receipts, so the **Quantity** is always 50 and the range always runs in steps of 50: for example 1 to 50, then 51 to 100, then 101 to 150, and so on. The real forms of the list follow the same rule. One booklet runs from 4103601 to 4103650, another from 4100401 to 4100450, and the next from 4100451 to 4100500. Each has a Quantity of 50.

2.6.2 Check Booklets

Check Booklets records the booklets of checks that are given to a disbursing officer. The columns are **Document Date**, **Transaction Type**, **Check No.**, **Amount**, **Qty**, **Check Date**, **Refno DV No.**, **Start No.**, **End No.**, **Qty** and **Status**. The page has a paging line. The page has one record at present: a booklet distributed on July 24, 2024, with the check numbers 810 to 820 (a quantity of 11) and the status *Open*. The page has no Edit or Delete icon. The icon at the top right adds a record: see the next paragraph.

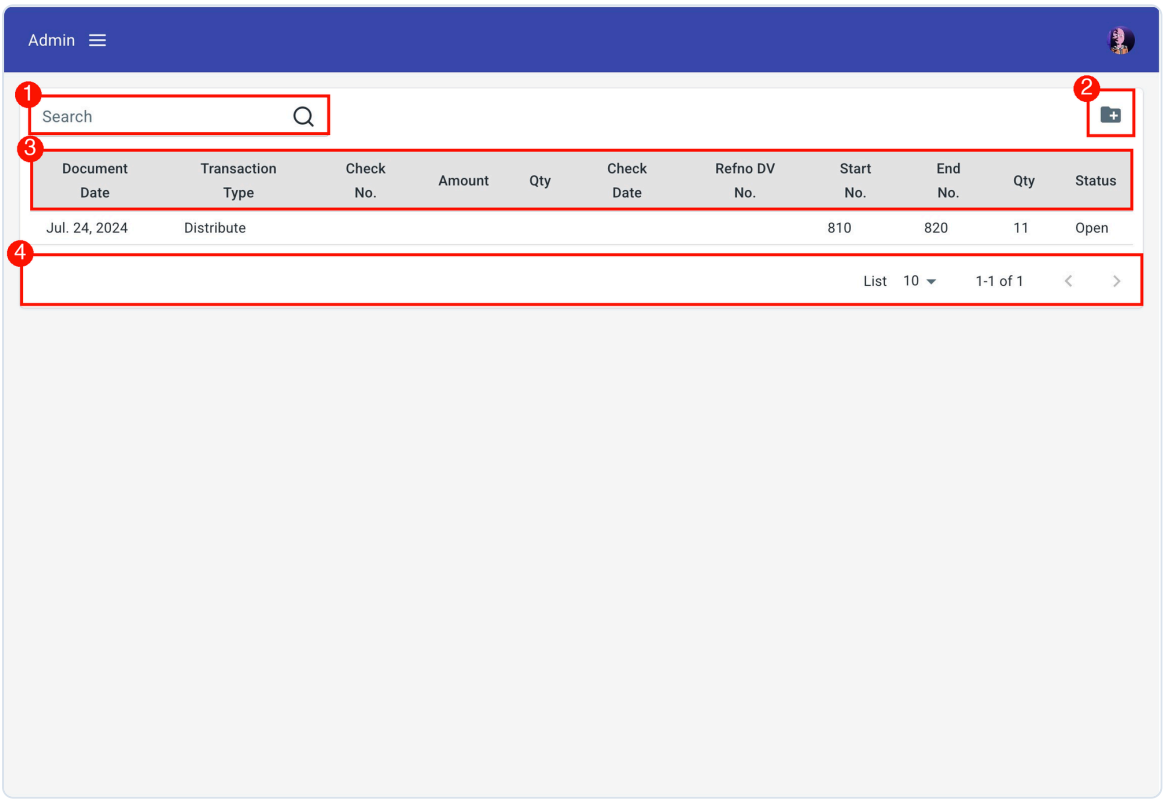

Figure 2.45. The Check Booklets page. 1 Search box · 2 Create button (the folder icon) · 3 Table headings · 4 Paging line

> **The button that creates a check booklet.** Like Accountable Forms, this page has no blue Add button. To create a check booklet, click this icon, a folder with a plus sign: It is at the top right of the table, on the same line as the Search box. Point to it and TIS shows its name, **CREATE CHECK BOOKLET**. Clicking it opens the window of the same name, which is explained below.

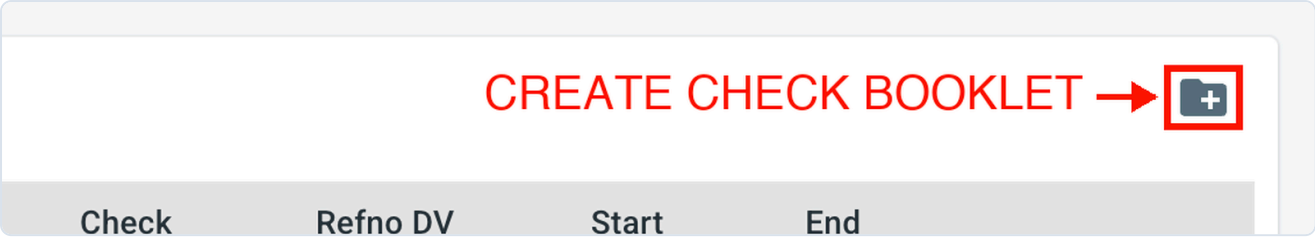

Figure 2.46. The button that creates a check booklet: the folder icon with a plus sign at the top right of the Check Booklets page. Its name is CREATE CHECK BOOKLET.

The window **CREATE CHECK BOOKLET** shows **Transaction: Distribute**. Fill in:

- **Releasing Officer** and **Disbursing Officer** (lists of the officers), **Document Date**, **Cost Center** and **Bank** (all required).
- **Start No.**, **End No.** and **Quantity** of the checks (all required).
- The right column (**Start No.**, **End No.**, **Balance**, **Last Trans Date** and **Status**) shows the position of the booklet. The status starts as *Open*.

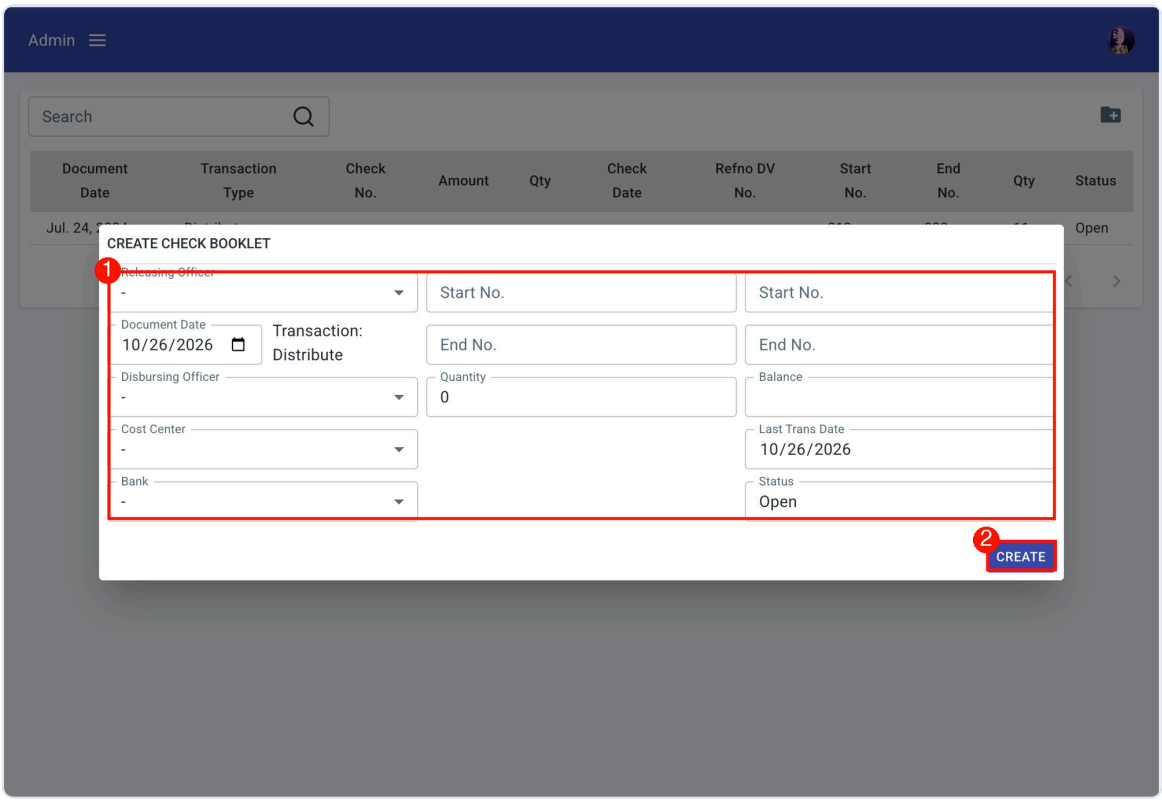

Figure 2.47. The window to add a record in Check Booklets. 1 The boxes of the form · 2 Create

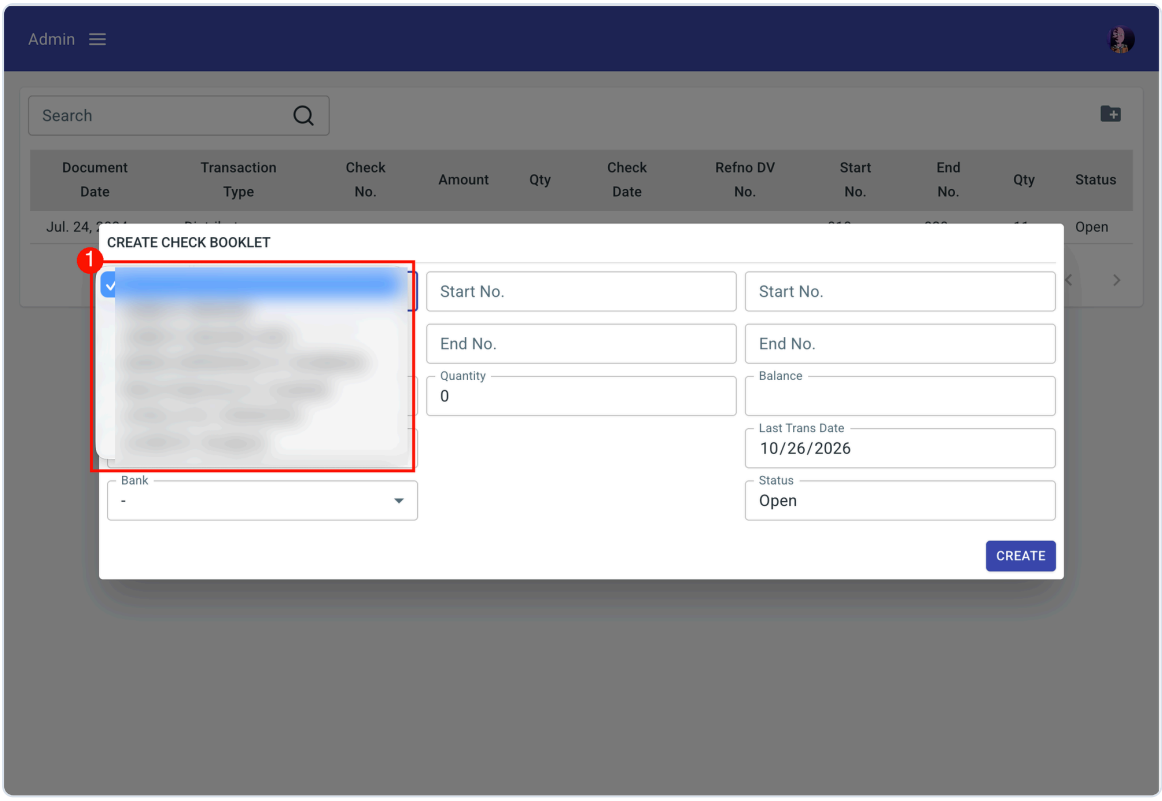

Figure 2.48. The Releasing Officer drop-down list. 1 The officers. The names are blurred. The Disbursing Officer list has the same choices.

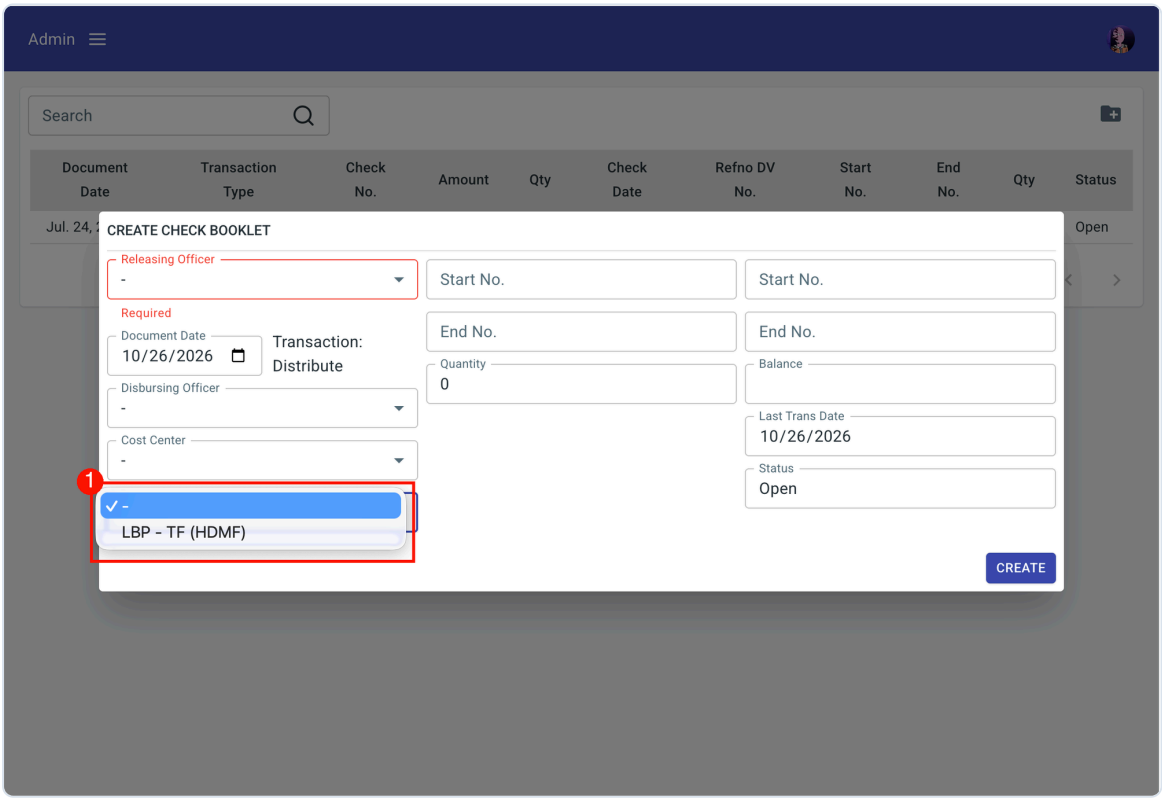

Figure 2.49. The Bank drop-down list. 1 The banks of the Bank Depository page (here LBP - TF (HDMF)).

2.6.3 Bank Depository

Bank Depository lists the bank accounts of the municipality. The columns are **Account No.**, **Bank**, **Branch**, **Fund Code**, **SL Code**, **GL Code**, **Object** and **Action**.

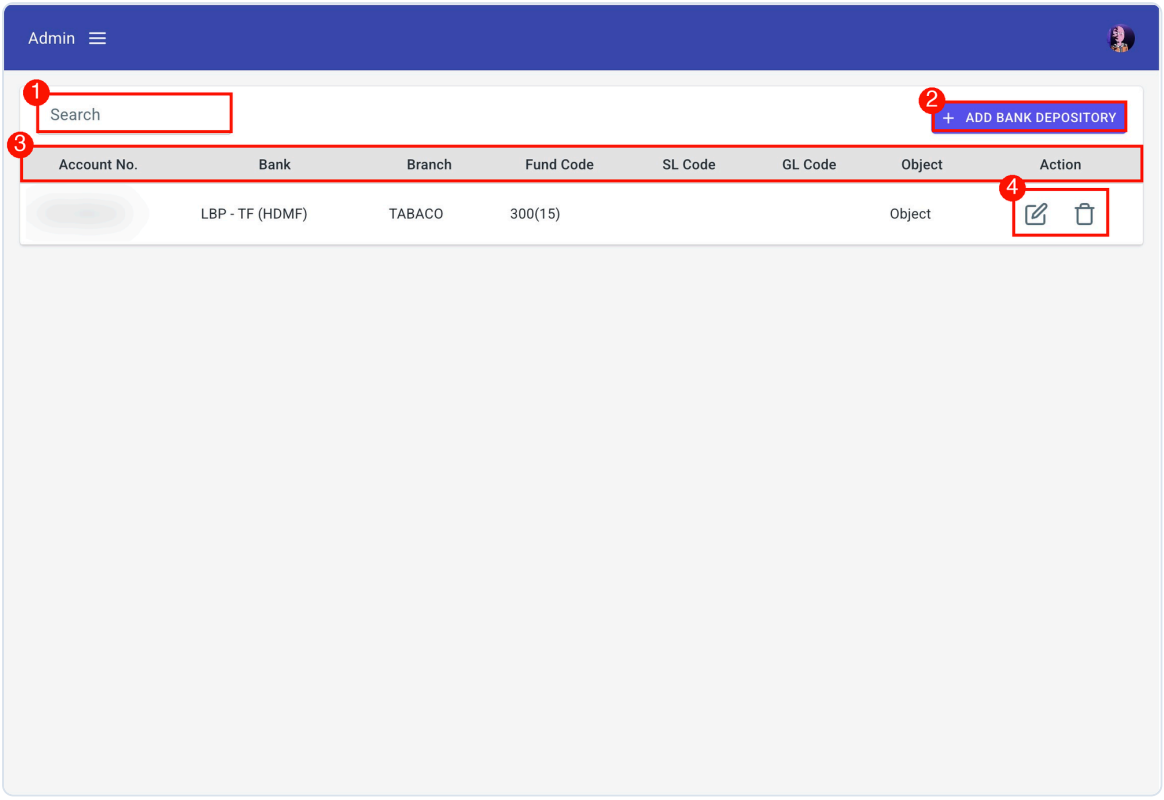

Figure 2.50. The Bank Depository page. 1 Search box · 2 Add button · 3 Table headings · 4 Action icons (Edit, Delete)

In the window **Add Bank Depository**, fill in **Account No**, **Bank**, **Branch**, **Fund Code**, **Account Code** and **Object**. All six are required. **Fund Code** is a list of the fund codes. **Account Code** is a long list of the accounts of the chart of accounts, each shown as the code, a dash and the description.

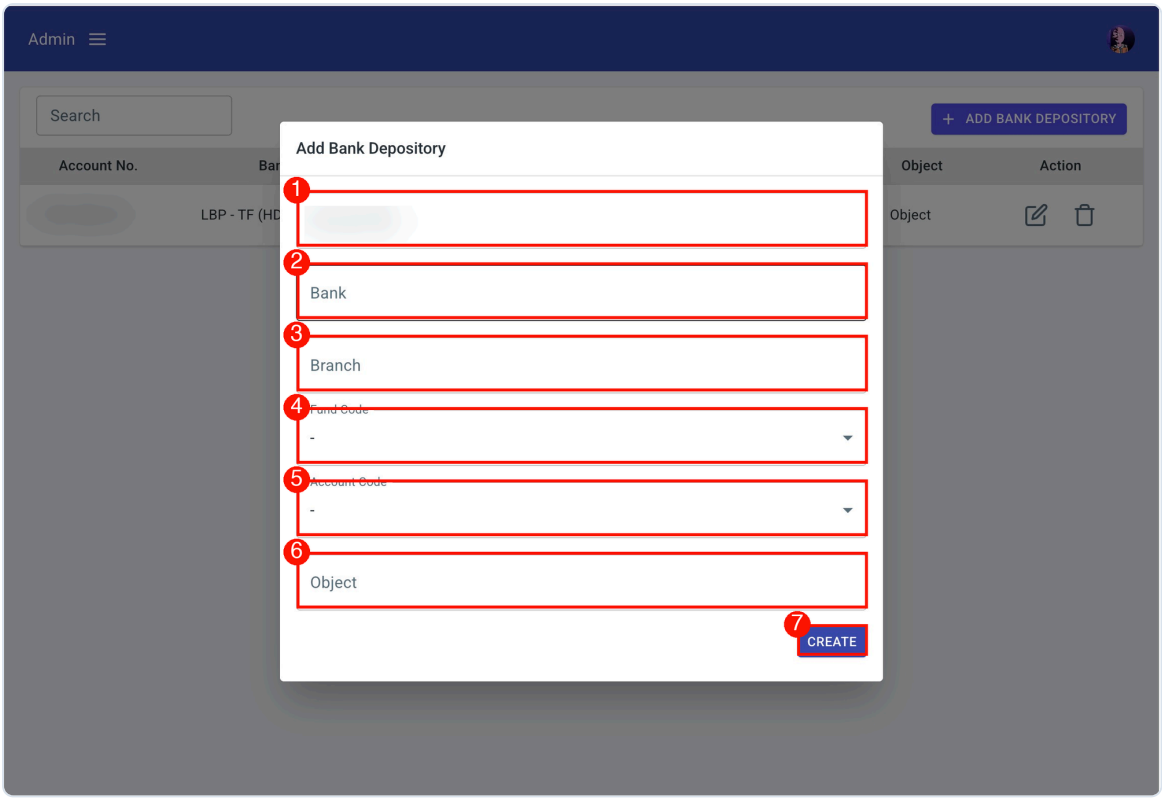

Figure 2.51. The window to add a record in Bank Depository. 1 Account No · 2 Bank · 3 Branch · 4 Fund Code · 5 Account Code · 6 Object · 7 Create

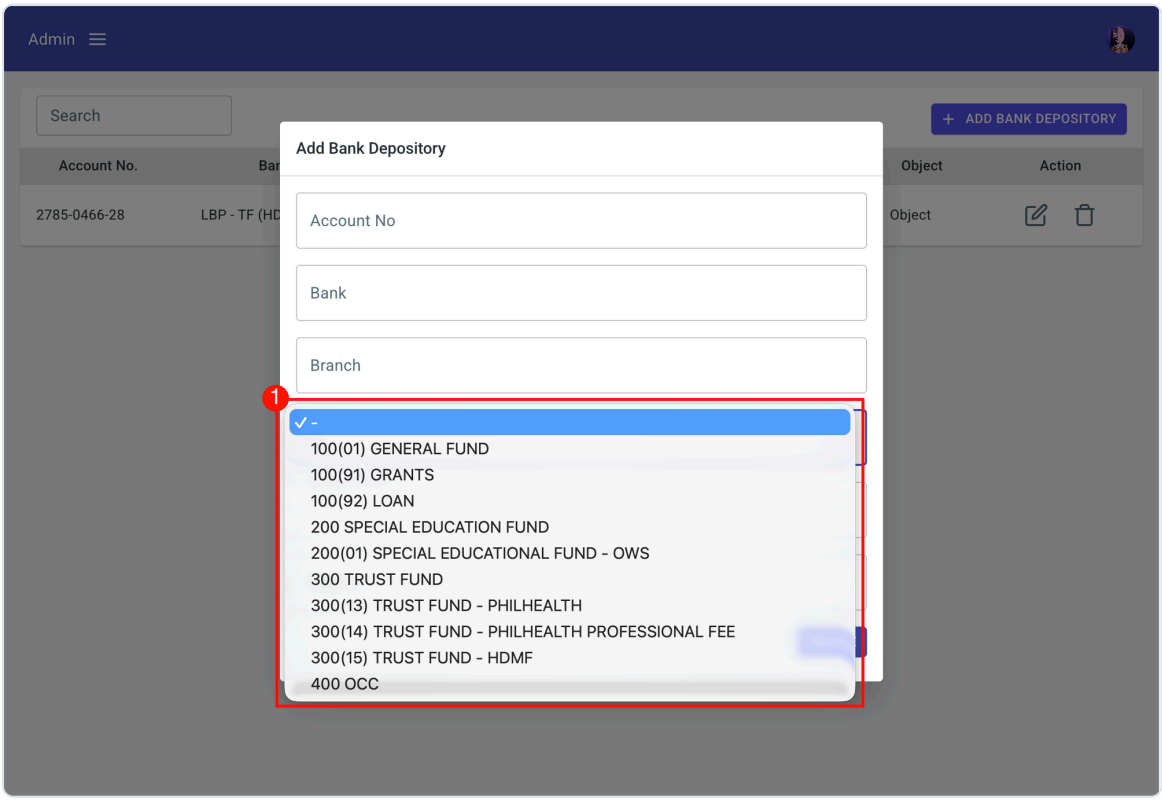

Figure 2.52. The Fund Code drop-down list. 1 The ten fund codes.

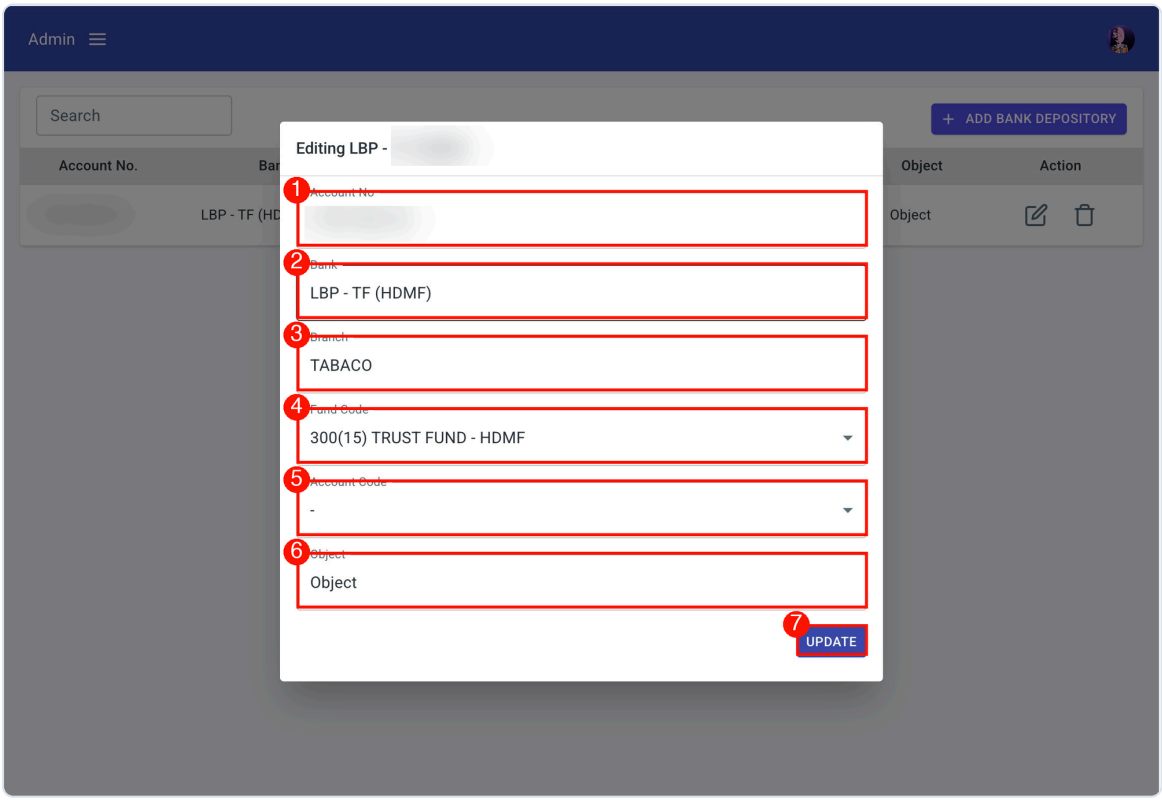

Figure 2.54. The window to edit a record in Bank Depository. 1 Account No · 2 Bank · 3 Branch · 4 Fund Code · 5 Account Code · 6 Object · 7 Update

2.6.4 Form Code

Form Code lists the accountable forms and their value. The columns are **Code**, **Description** and **Unit Value**. It includes cash tickets, accountable form #51, community tax certificates, the marriage license and fee receipt, the municipal burial permit and fee receipt, and the real property tax receipt.

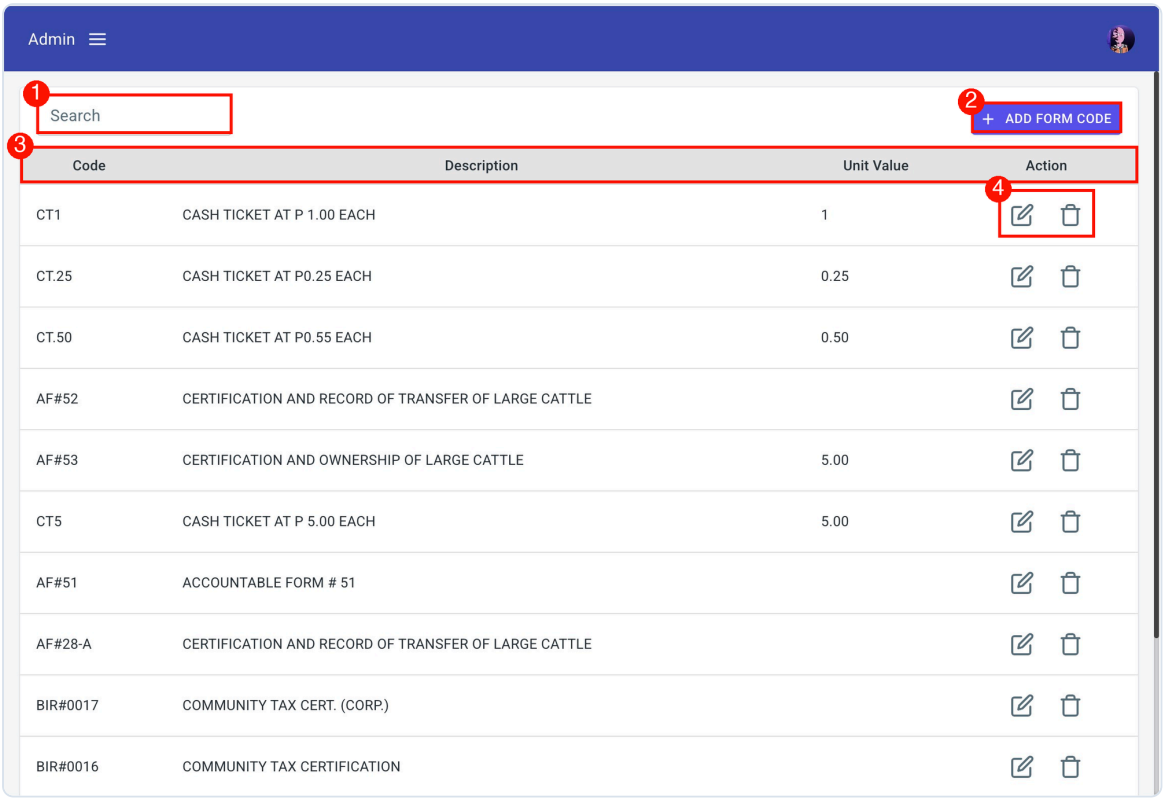

Figure 2.55. The Form Code page. 1 Search box · 2 Add button · 3 Table headings · 4 Action icons (Edit, Delete)

In the window **Add Form Code**, type the **Code** and the **Description** (both required) and, if the form has a fixed price, the **Unit Value**.

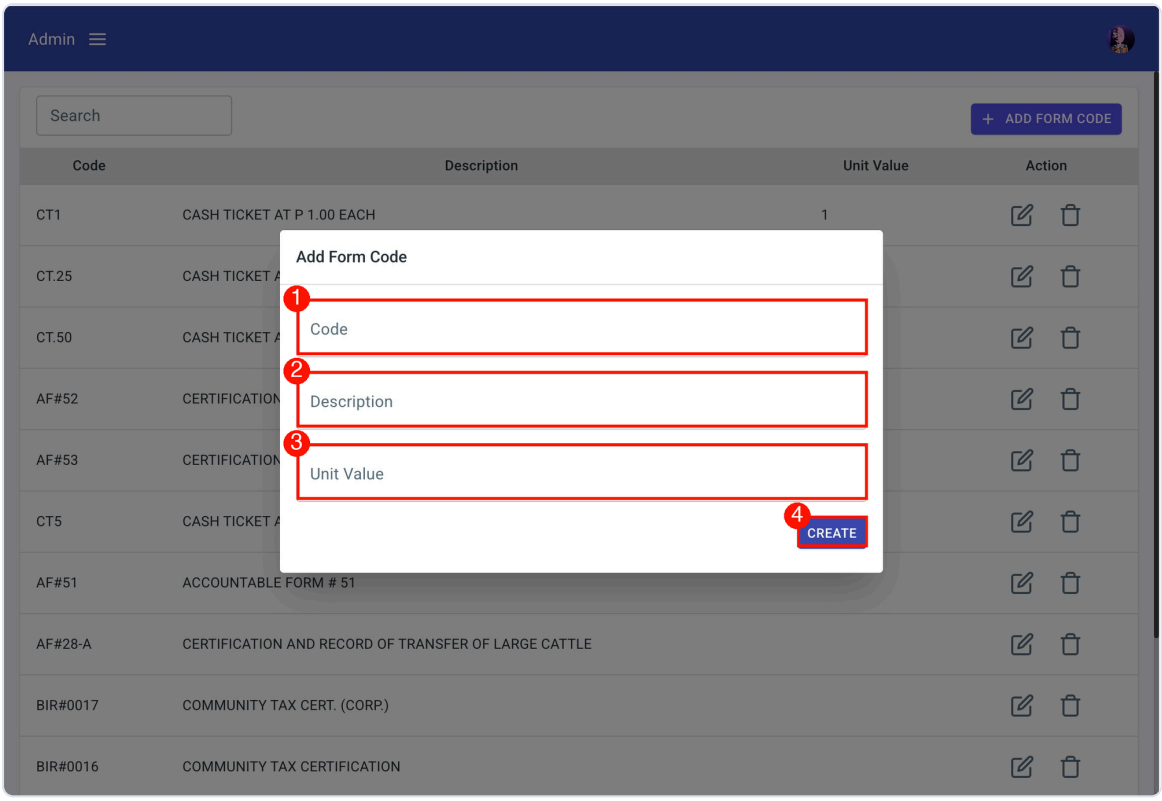

Figure 2.56. The window to add a record in Form Code. 1 Code · 2 Description · 3 Unit Value · 4 Create

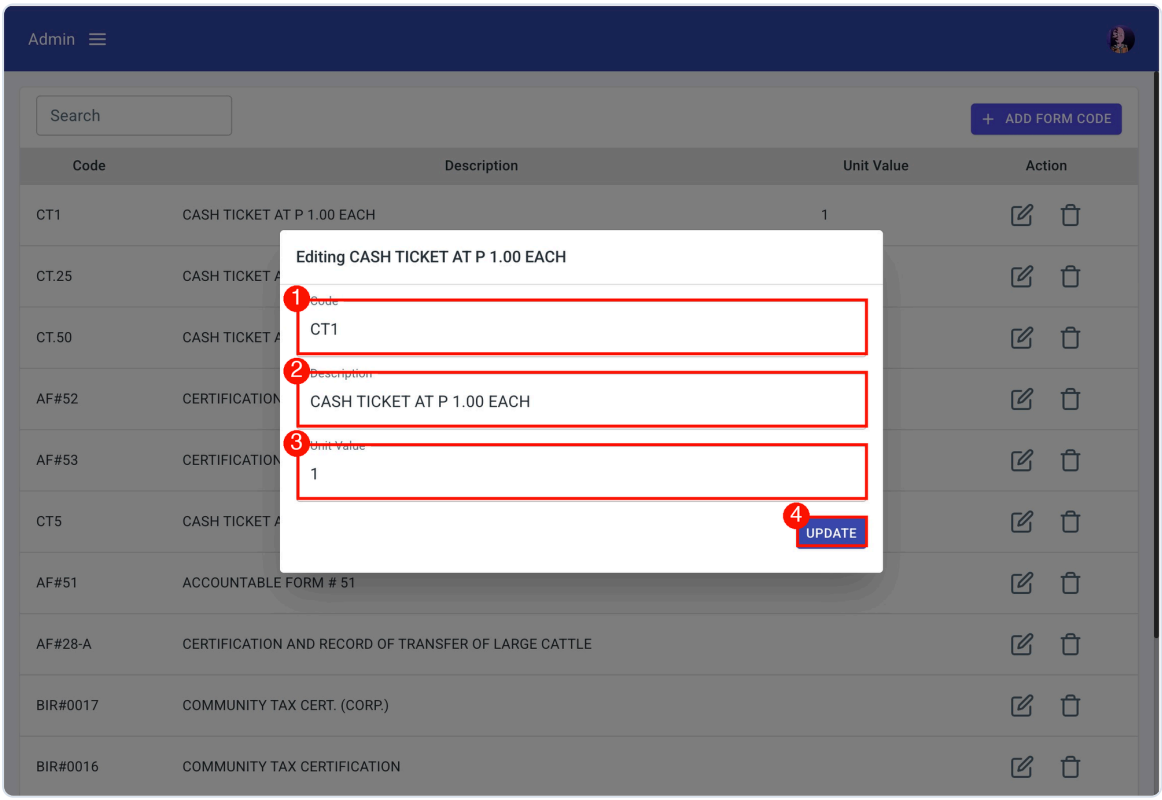

Figure 2.57. The window to edit a record in Form Code. 1 Code · 2 Description · 3 Unit Value · 4 Update

2.6.5 Officer Type

Officer Type lists the types of officer. The columns are **Code** and **Description**. The seven types are CASH, COLL, DISB, LIQ, RELO, STAFF and AO. The LiqDisb Collector page uses them as its **Office Type** list.

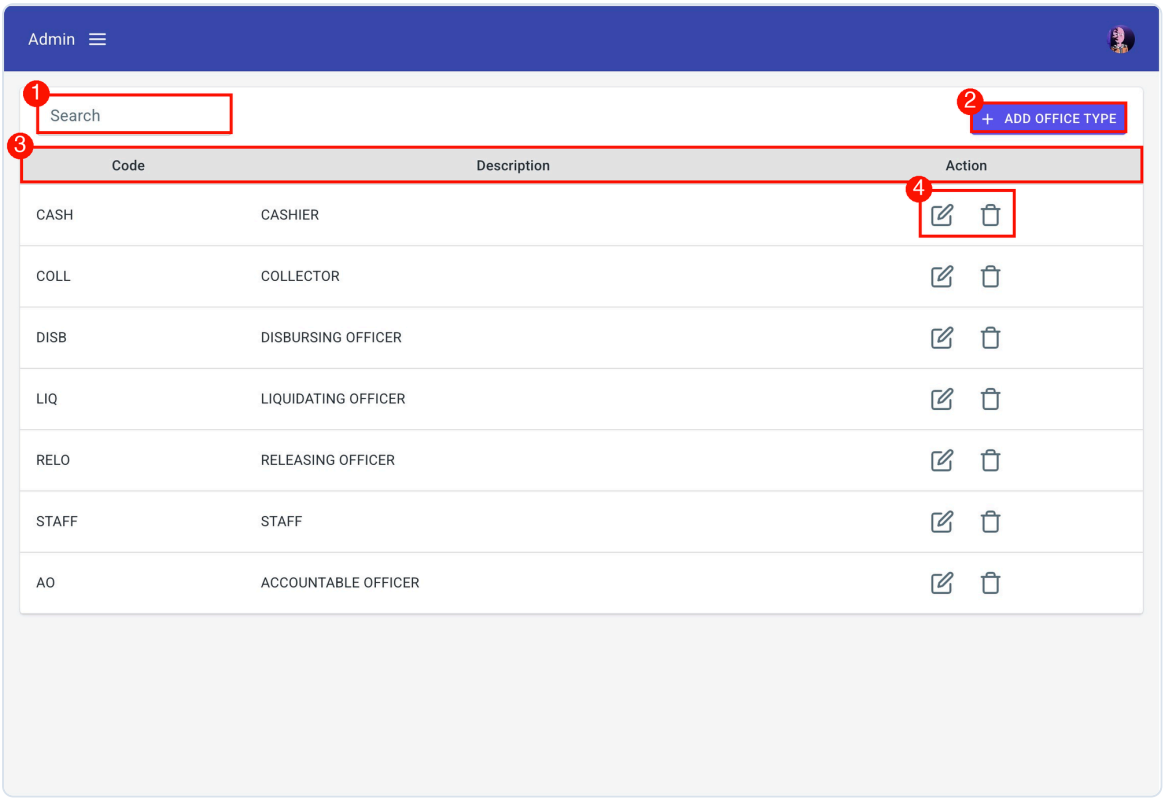

Figure 2.58. The Officer Type page. 1 Search box · 2 Add button · 3 Table headings · 4 Action icons (Edit, Delete)

In the window **Add Office Type**, type the **Code** and the **Description**. Both are required.

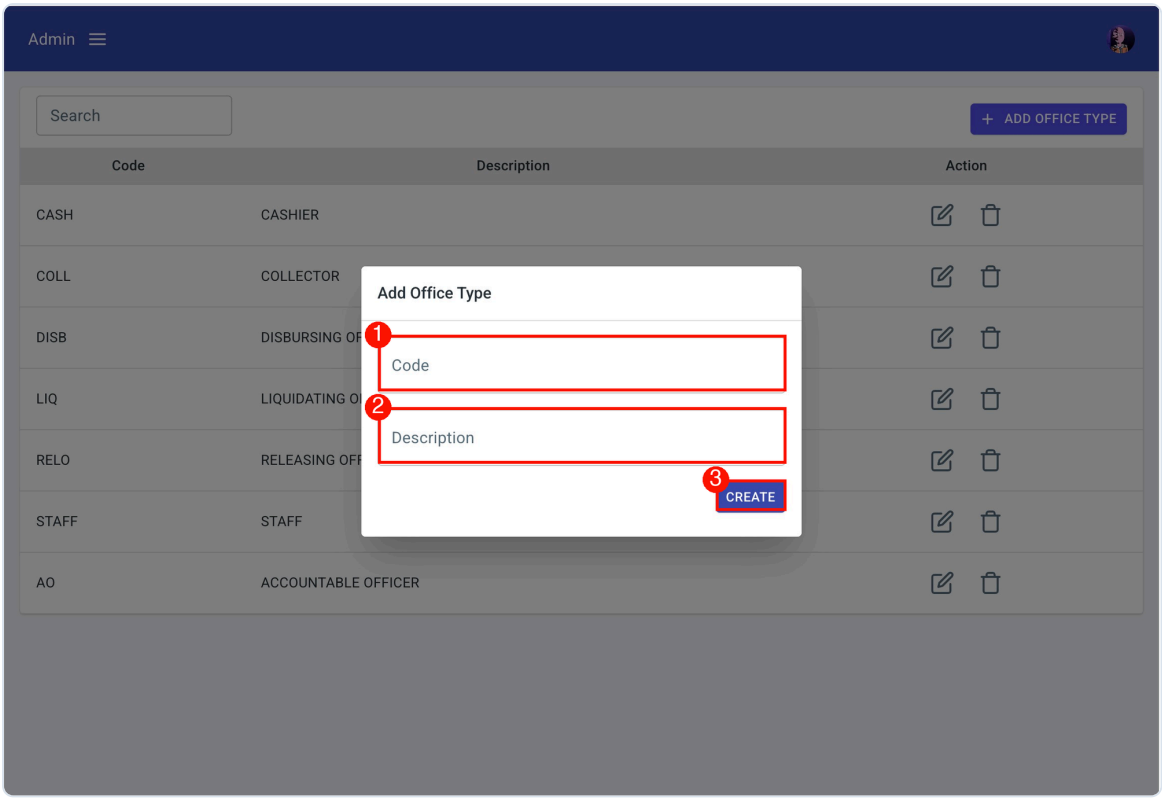

Figure 2.59. The window to add a record in Officer Type. 1 Code · 2 Description · 3 Create

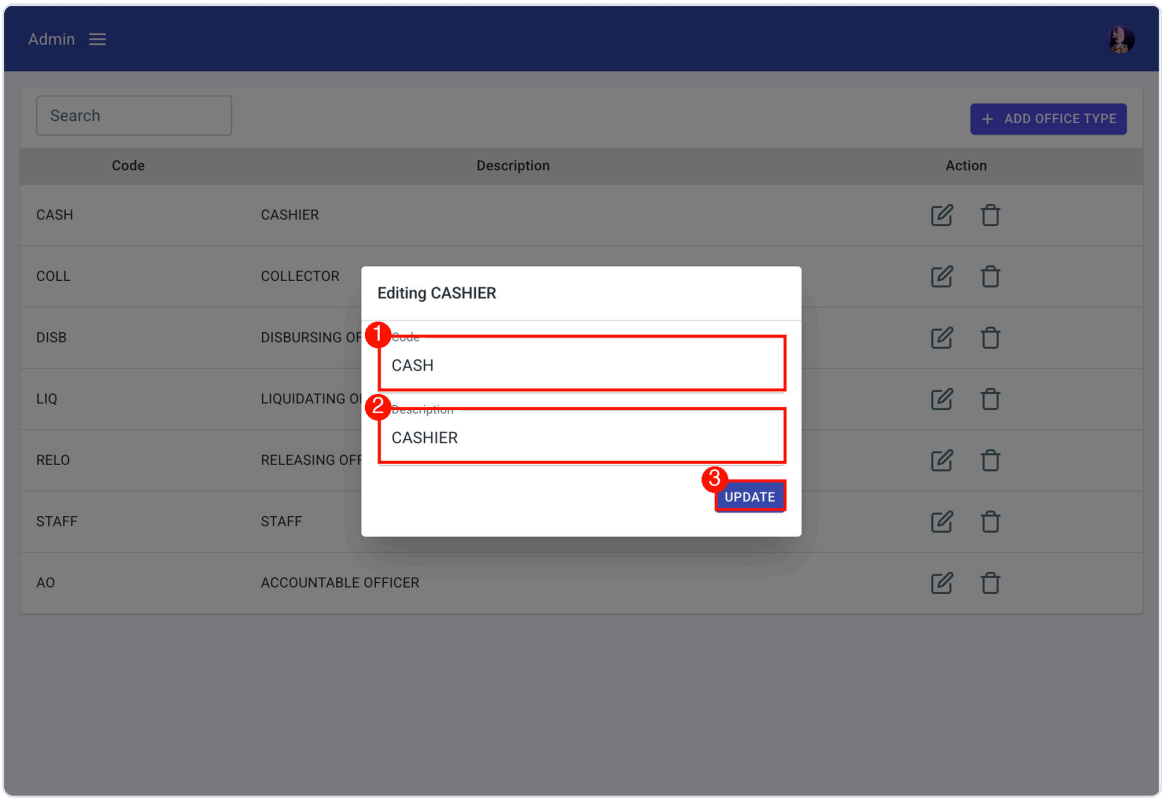

Figure 2.60. The window to edit a record in Officer Type. 1 Code · 2 Description · 3 Update

2.6.6 LiqDisb Collector

LiqDisb Collector lists the liquidating, disbursing and collecting officers. The columns are **Code**, **Description** (the name of the officer), **Type** and **Cost Center**. The Assigned Personnel window of a user (Section 1.2.6) takes its officers from this page.

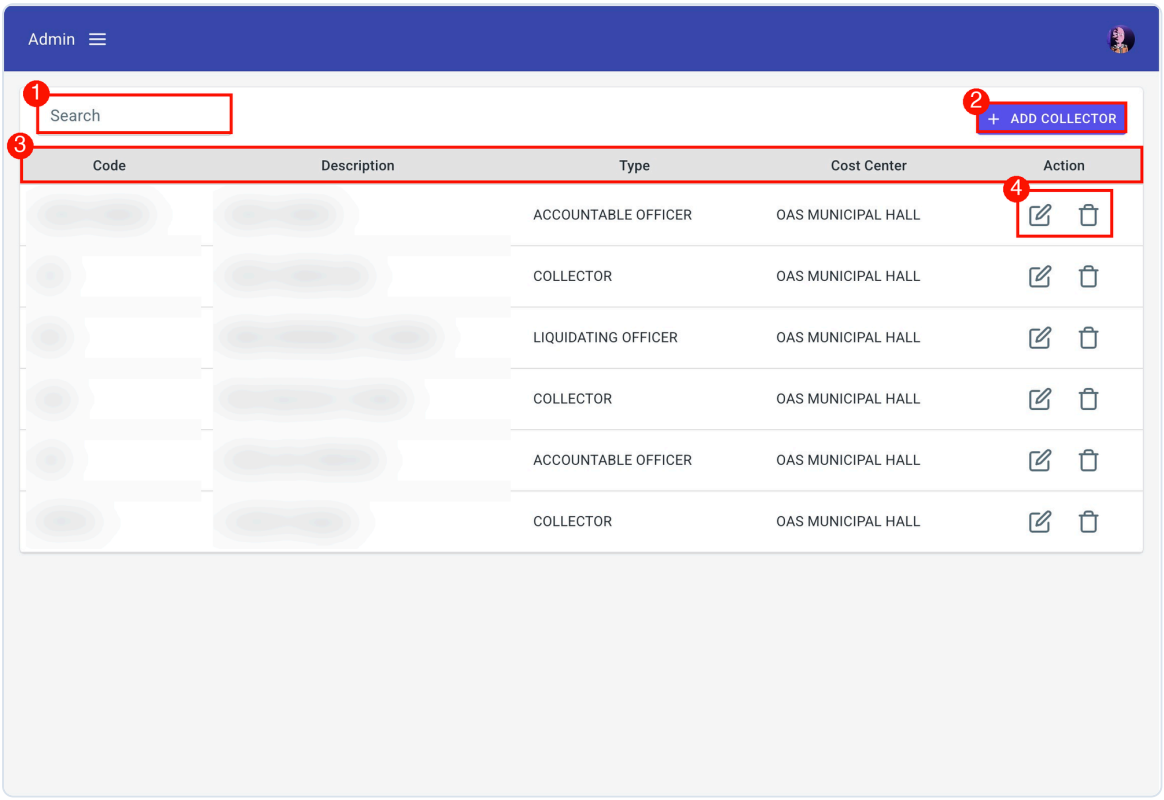

Figure 2.61. The LiqDisb Collector page. 1 Search box · 2 Add button · 3 Table headings · 4 Action icons (Edit, Delete)

In the window **Add Collector**, fill in:

- **Code** (required).
- **Office Type** (required): CASH, COLL, DISB, LIQ, RELO, STAFF or AO. The box beside it shows the description.
- **Cost Center** (required): AO or MMH. The box beside it shows the description.
- **Name** (required) and **Designation**.
- **SL Code** (required): 1011 or 1016, with its description below.
- **User**.

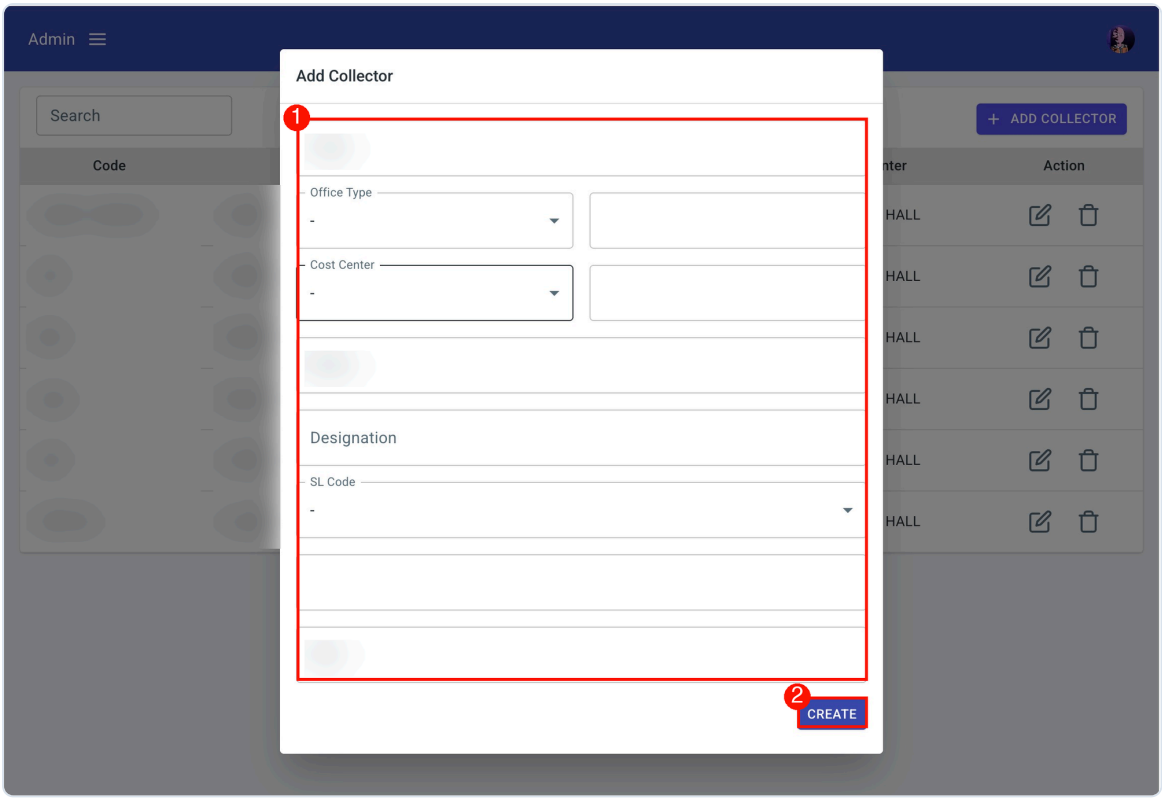

Figure 2.62. The window to add a record in LiqDisb Collector. 1 The boxes of the form · 2 Create

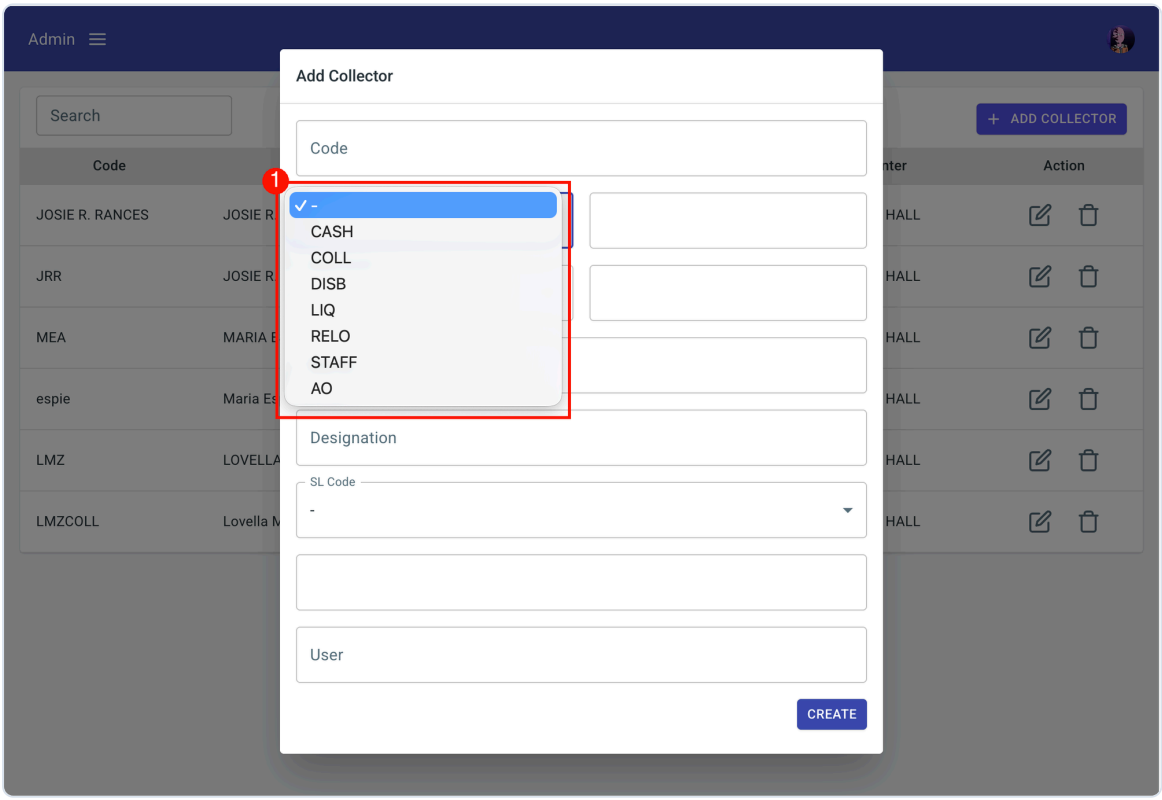

Figure 2.63. The Office Type drop-down list. 1 The seven office types.

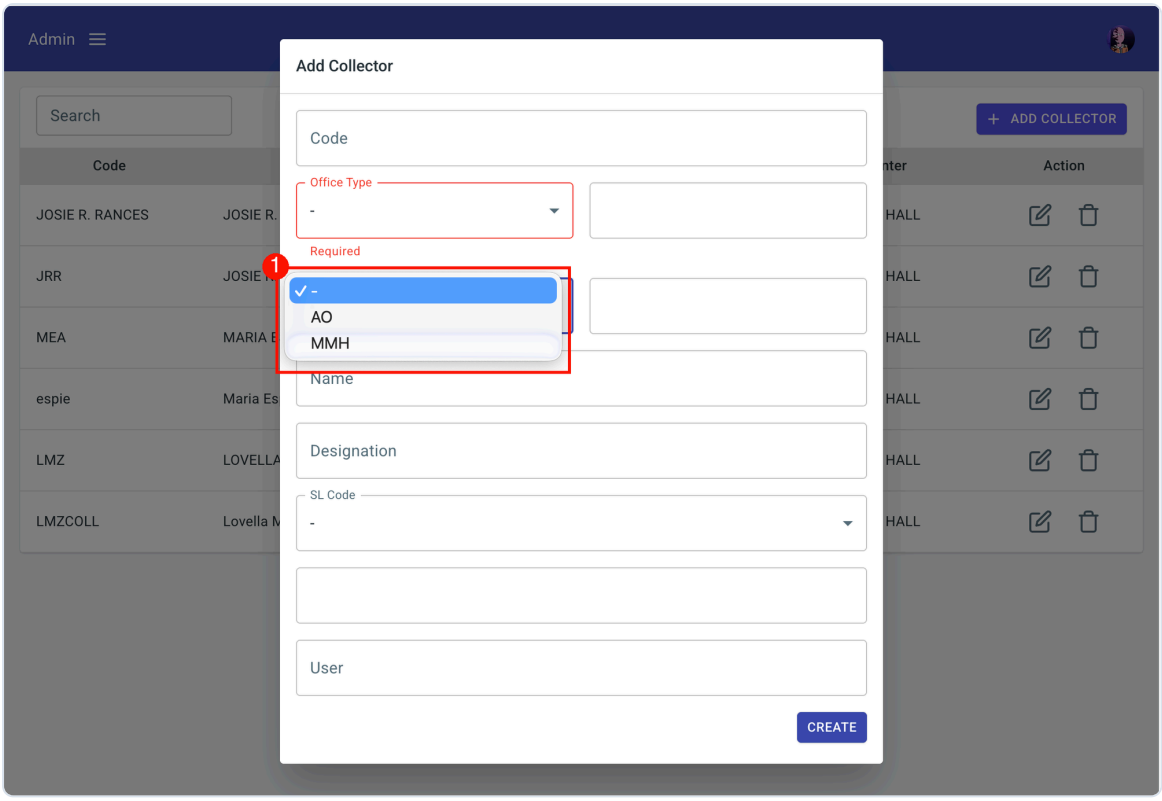

Figure 2.64. The Cost Center drop-down list. 1 The two cost centers.

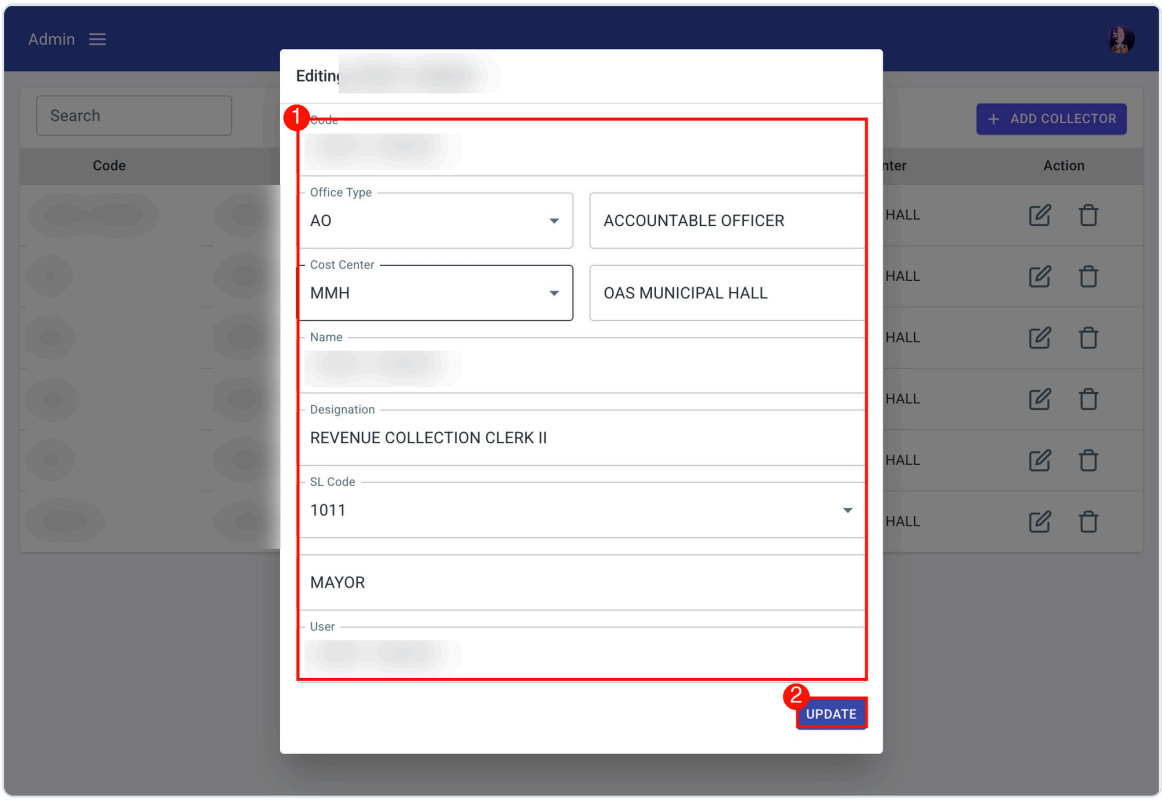

Figure 2.65. The window to edit a record in LiqDisb Collector. 1 The boxes of the form · 2 Update

2.6.7 Cost Center

Cost Center lists the offices that hold funds or forms. The columns are **Code** and **Description**. The two cost centers are AO (the accountable officer) and MMH (OAS MUNICIPAL HALL). In the window **Add Cost Center**, type the **Code** and the **Description**. Both are required.

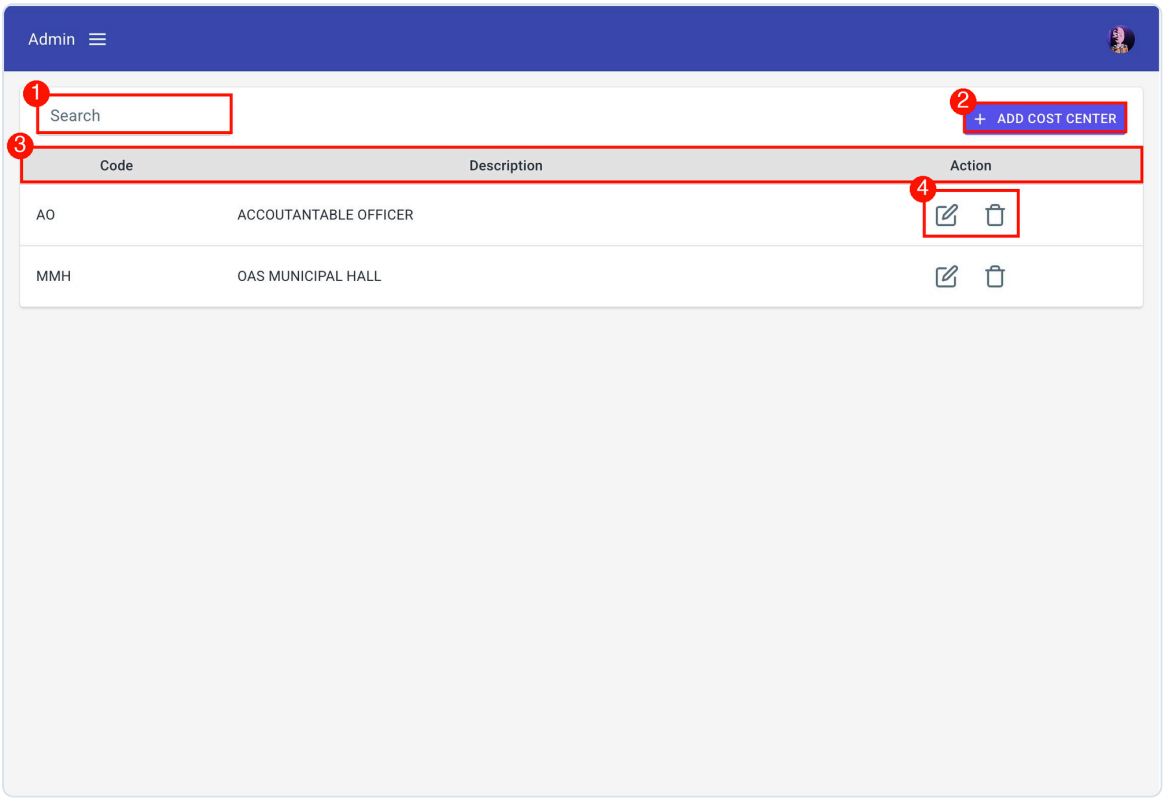

Figure 2.66. The Cost Center page. 1 Search box · 2 Add button · 3 Table headings · 4 Action icons (Edit, Delete)

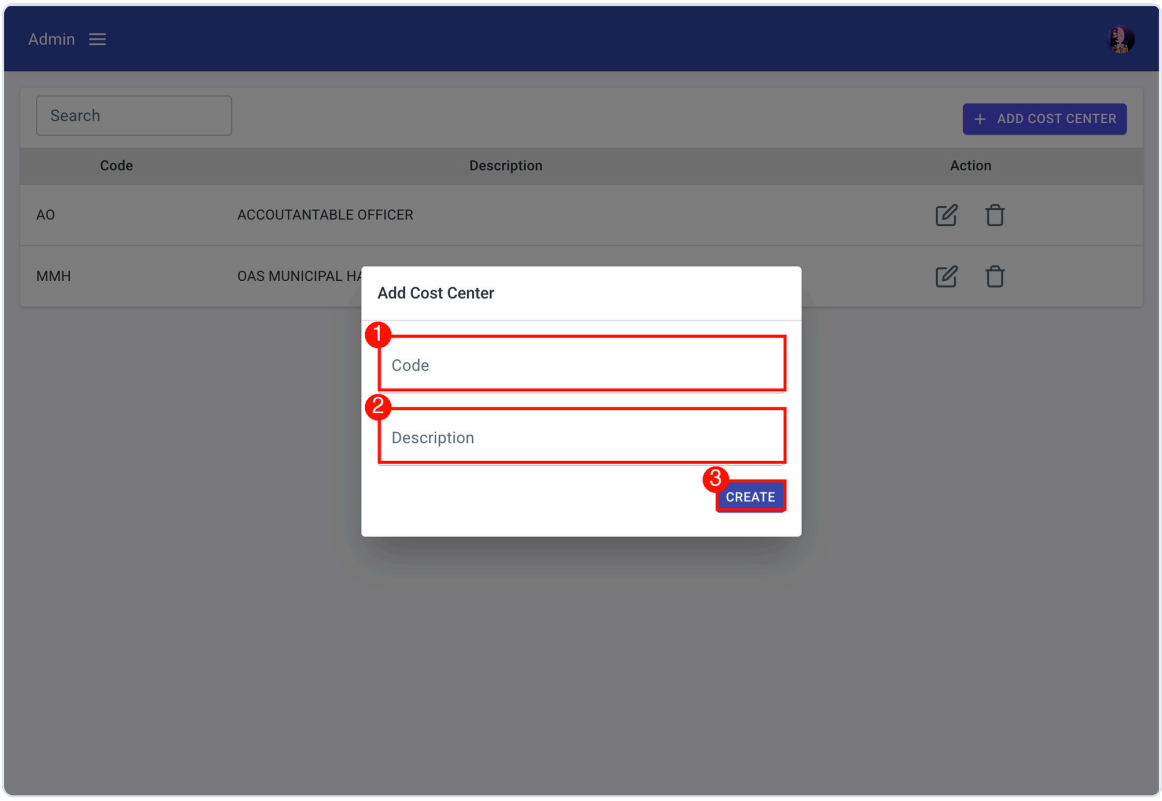

Figure 2.67. The window to add a record in Cost Center. 1 Code · 2 Description · 3 Create

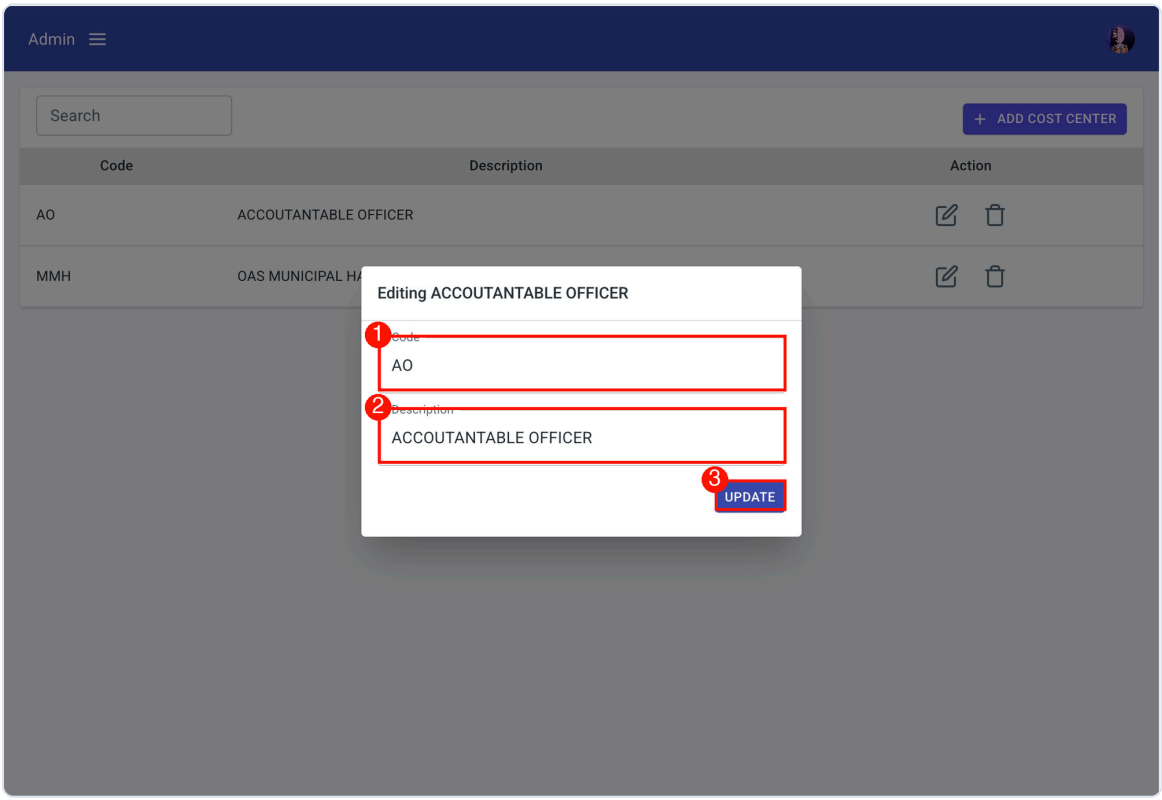

Figure 2.68. The window to edit a record in Cost Center. 1 Code · 2 Description · 3 Update

2.6.8 Creditor/Payee

Creditor/Payee lists the people and companies that the municipality pays or that pay it. The columns are **Description** (the name), **Type** and **Address**.

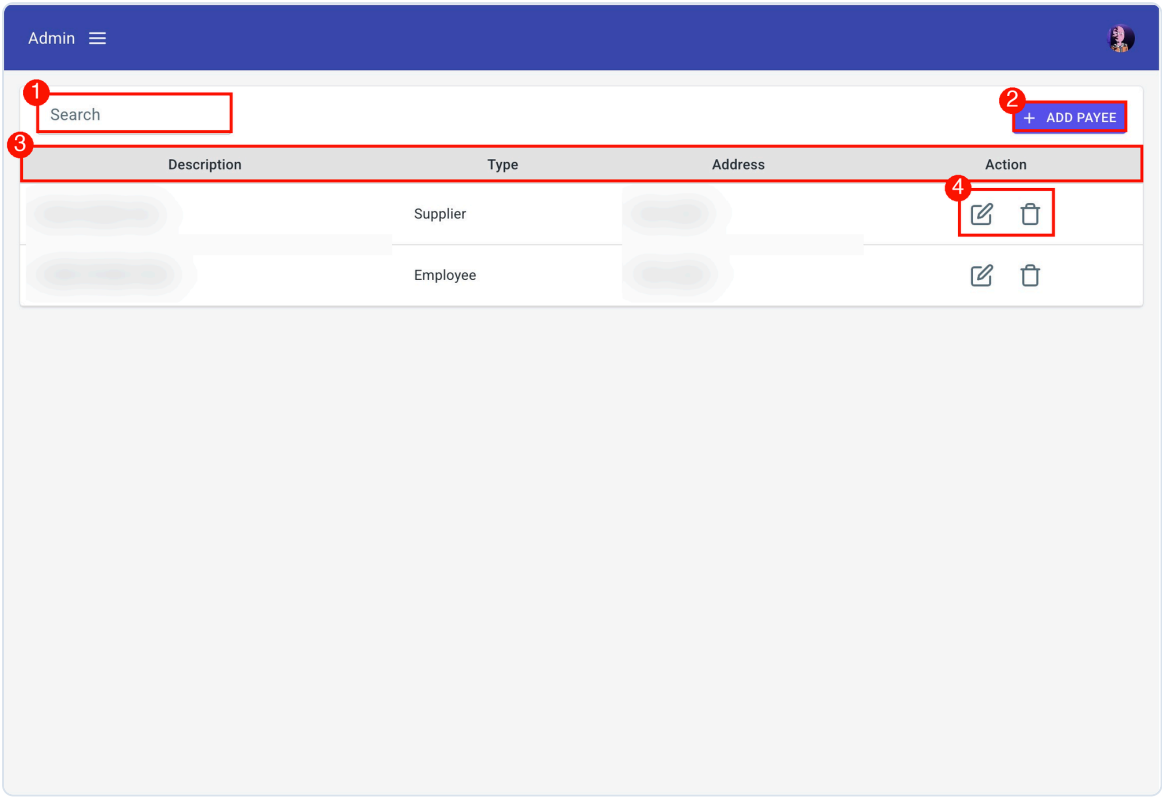

Figure 2.69. The Creditor/Payee page. 1 Search box · 2 Add button · 3 Table headings · 4 Action icons (Edit, Delete)

In the window **Add Payee**, fill in **Type**, **TIN**, **Description** (the name), **Address** and **Contact Info**. All five are required when you add a payee. **Type** is a list with seven choices: **Employee**, **Supplier**, **Contractor**, **Indigent**, **Client**, **Patient** and **Tax Payer**.

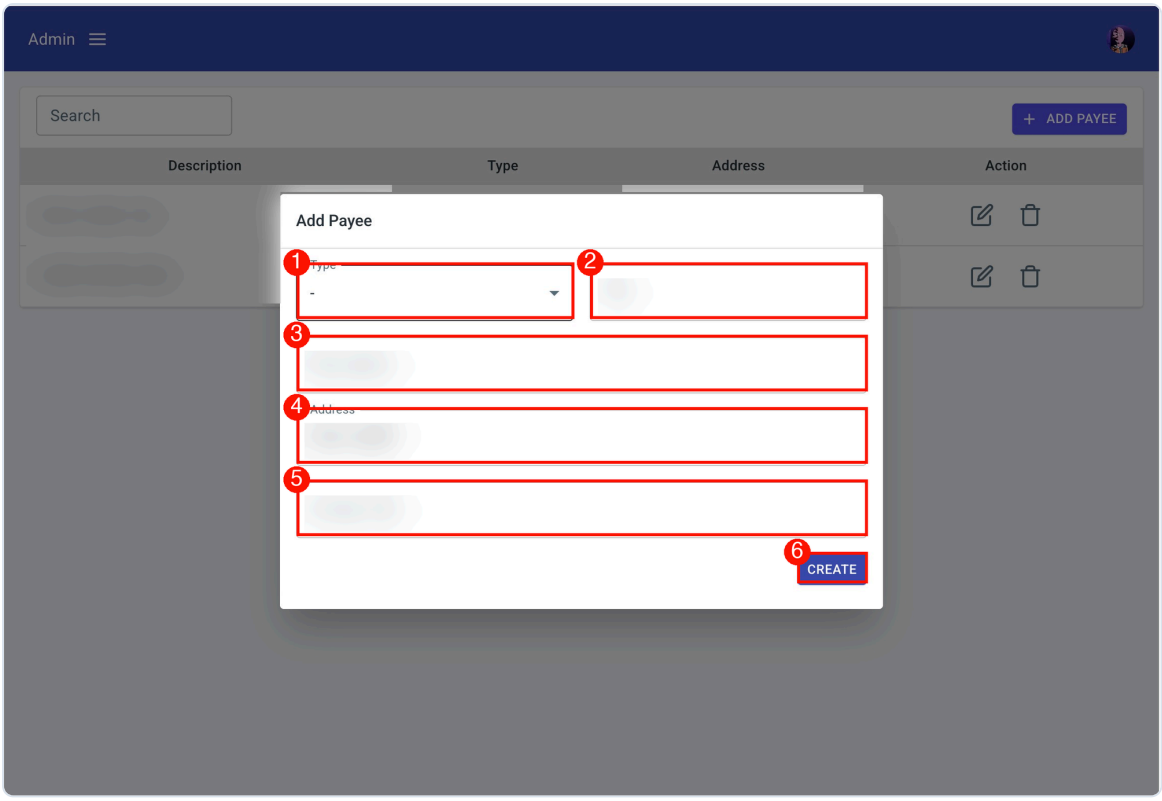

Figure 2.70. The window to add a record in Creditor/Payee. 1 Type · 2 TIN · 3 Description · 4 Address · 5 Contact Info · 6 Create

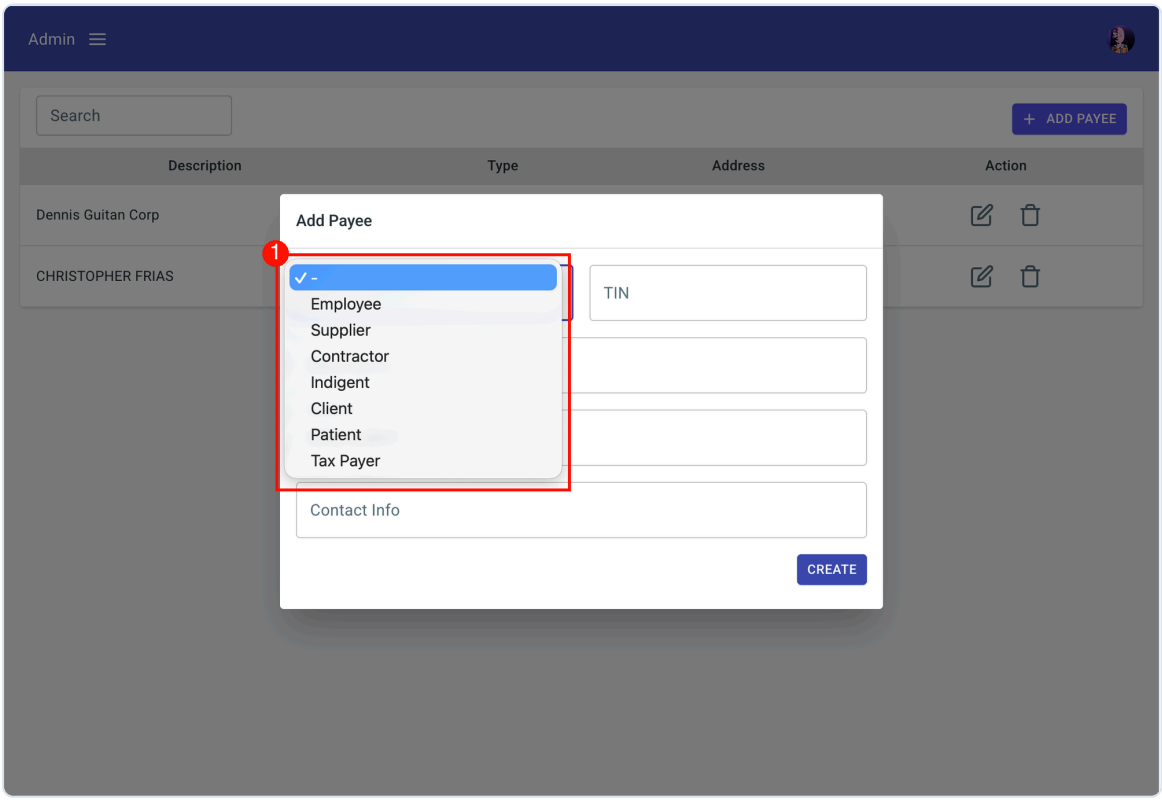

Figure 2.71. The Type drop-down list. 1 The seven types of payee.

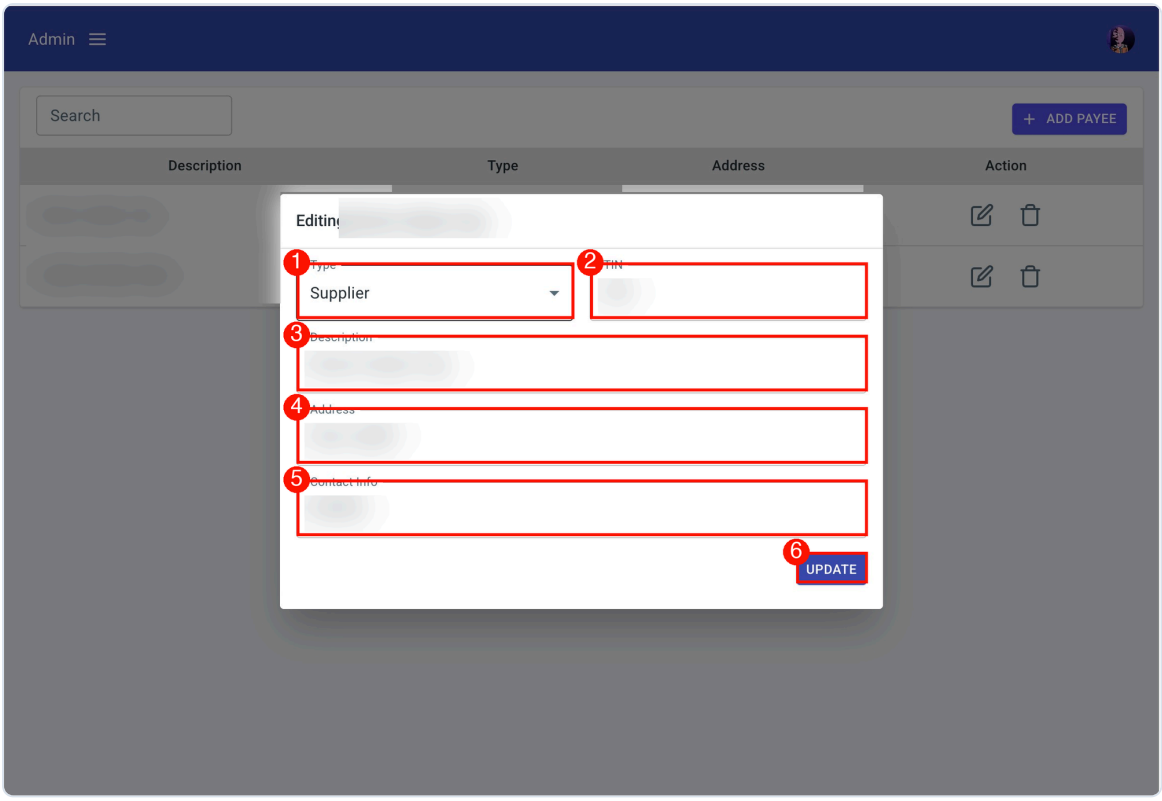

Figure 2.72. The window to edit a record in Creditor/Payee. 1 Type · 2 TIN · 3 Description · 4 Address · 5 Contact Info · 6 Update

2.6.9 OR Template

OR Template sets which accounts appear for each collection type on an official receipt (see Section 2.6.10 for how the two pages work together). The columns are **#**, **Collection Type**, **Account Code**, **Description**, **Order**, **Amount**, **Fund** and **Action**. The list is long (385 rows), so use the **Search** box. In this list the pencil is above the trash can in each row.

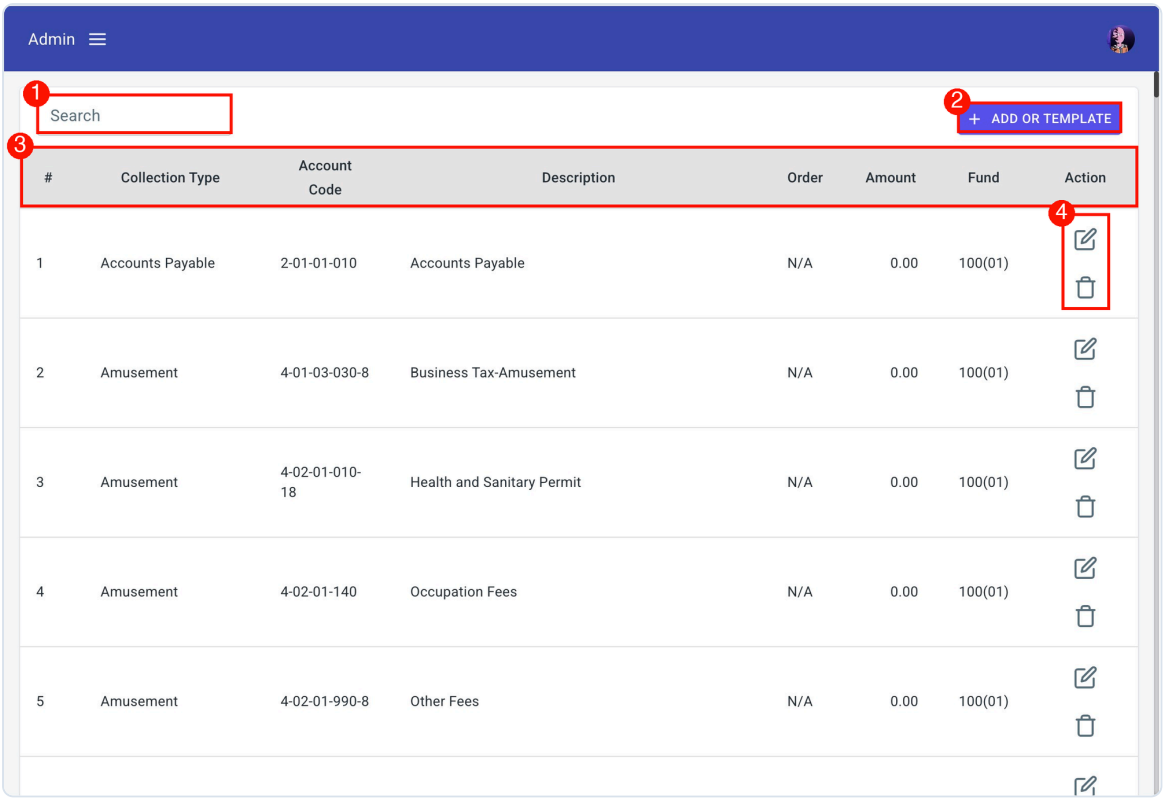

Figure 2.73. The OR Template page. 1 Search box · 2 Add button · 3 Table headings · 4 Action icons (Edit, Delete)

In the window **Add OR Template**, fill in:

- **Account Code** (required): click the box to open the list of account codes (283 at present), then pick one or type to search. As soon as you pick a code, the box beside it fills in by itself with the description of that account.
- **Collection Type** (required): pick a collection type from the Collection Type page.
- **Account Group** (required): **CTC - Details**, **CTC - Interest**, **N/A**, the numbers 1 to 9 or the letters a to z.
- **Amount**: the usual amount of the account.
- **Fund** (required): pick a fund code. The box beside it shows the description.
- **Is Special Account?** (check box).

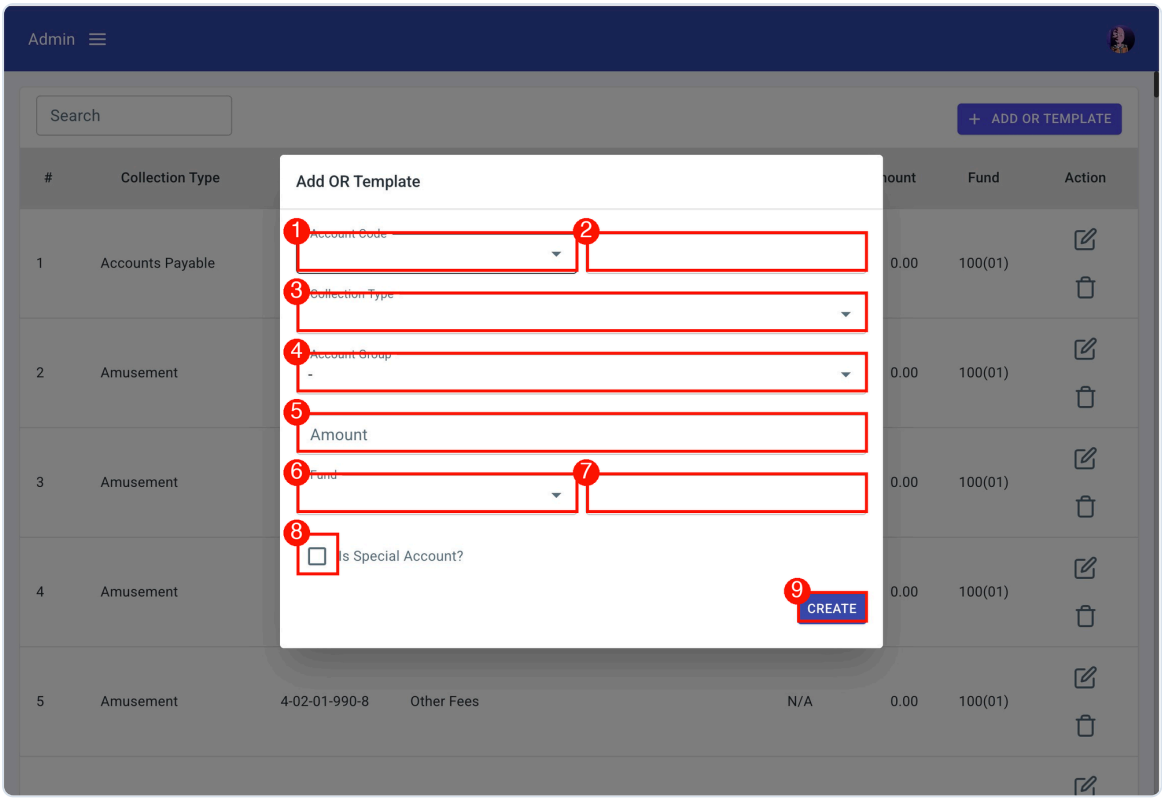

Figure 2.74. The window to add a record in OR Template. 1 Account Code · 2 Box · 3 Collection Type · 4 Account Group · 5 Amount · 6 Fund · 7 Box · 8 Check box · 9 Create

The Account Code list and the description beside it. Click the **Account Code** box. A list of account codes opens (only the codes are listed). Scroll the list or type a few characters to find the code.

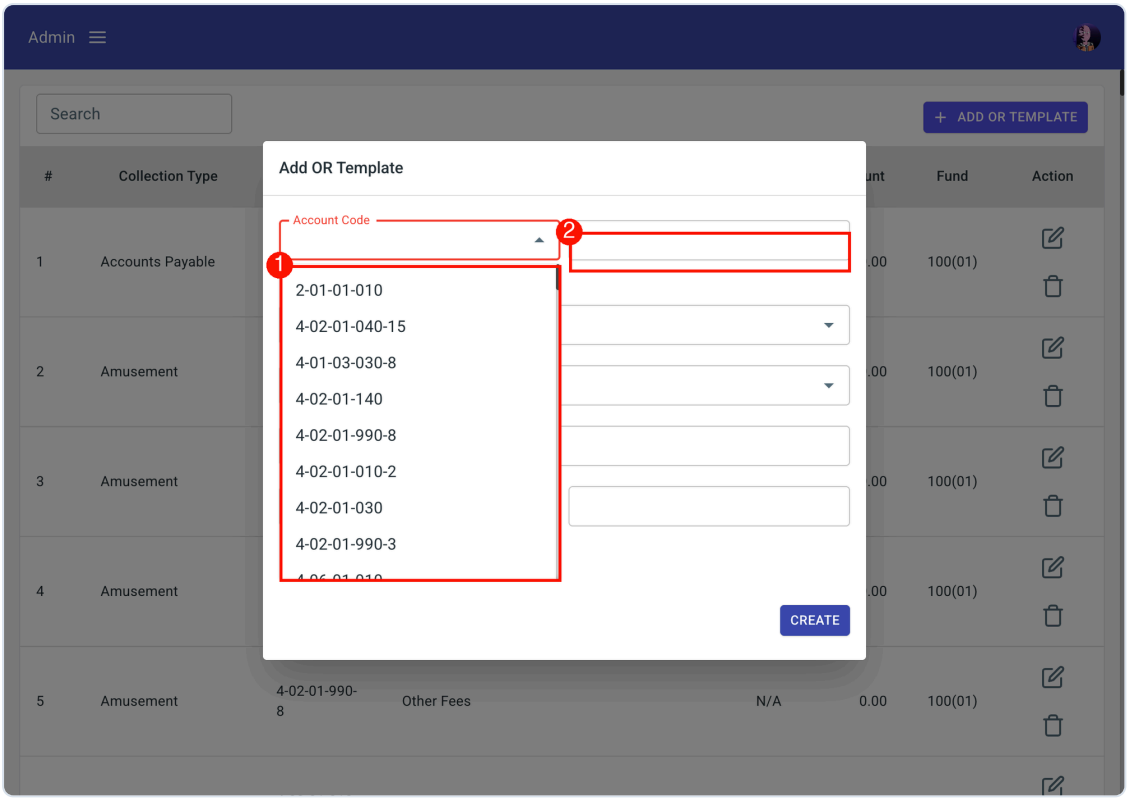

Figure 2.75. The Account Code list of the window to add an OR template. 1 The list of account codes · 2 The box beside the Account Code, which is empty until a code is picked.

When you pick a code, the box beside it fills in by itself and shows the description of the account. For example, the code **4-01-03-030-8** shows **Business Tax-Amusement**. You do not type the description. The **Fund** box works the same way: the list shows the fund code with its name, and the box beside it shows the description of the fund.

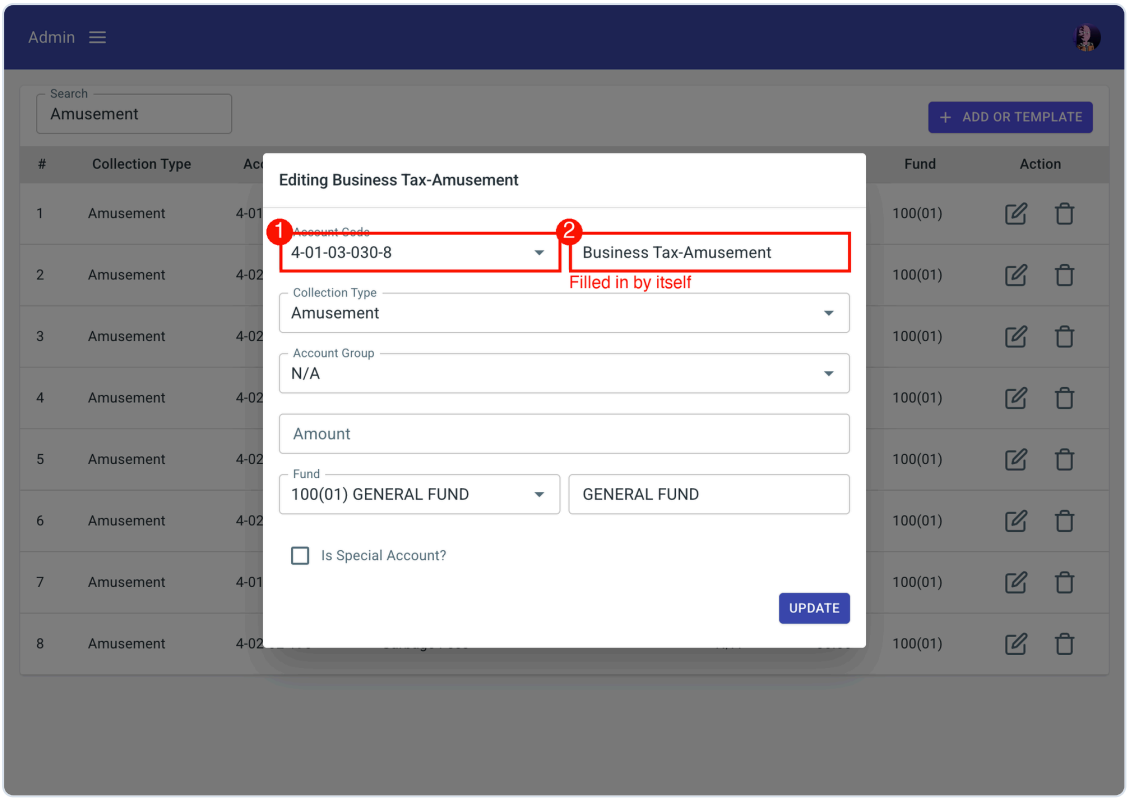

Figure 2.76. The window of an OR template line. 1 The Account Code · 2 The box beside it, filled in by itself with the description of the account (4-01-03-030-8 and Business Tax-Amusement).

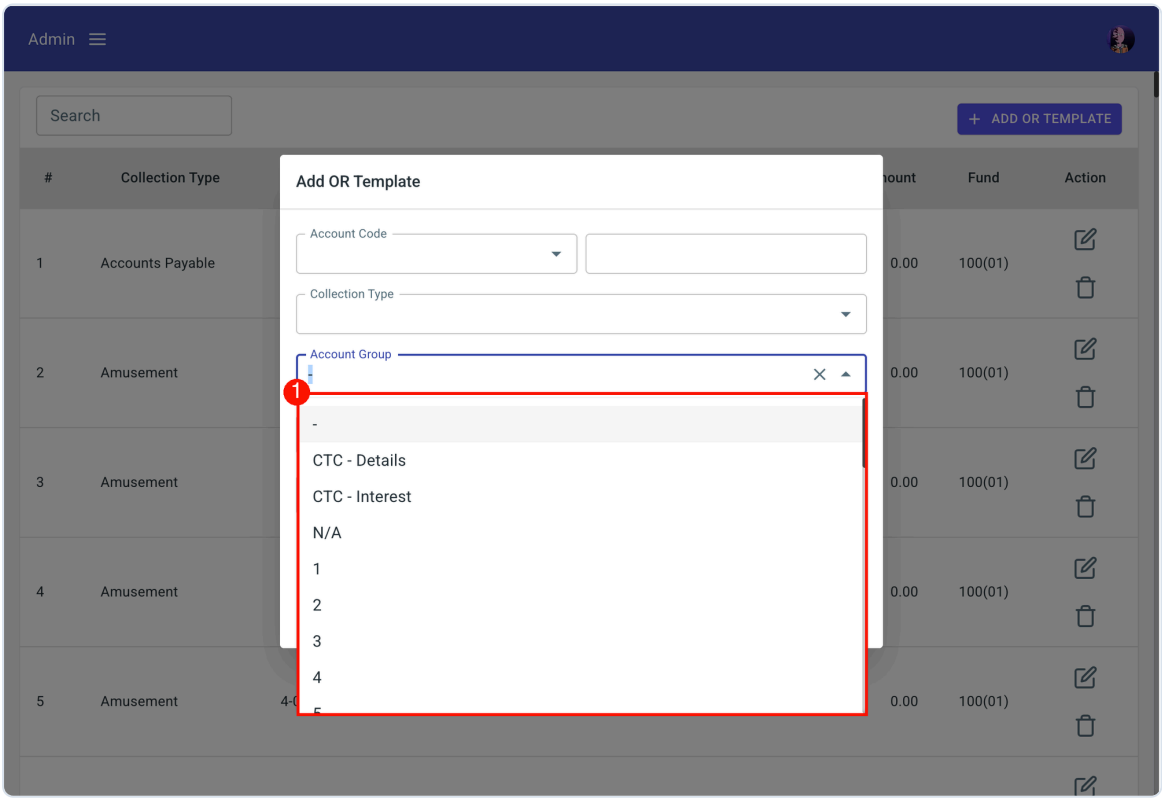

Figure 2.77. The Account Group list. 1 The choices. Scroll the list to see all of them.

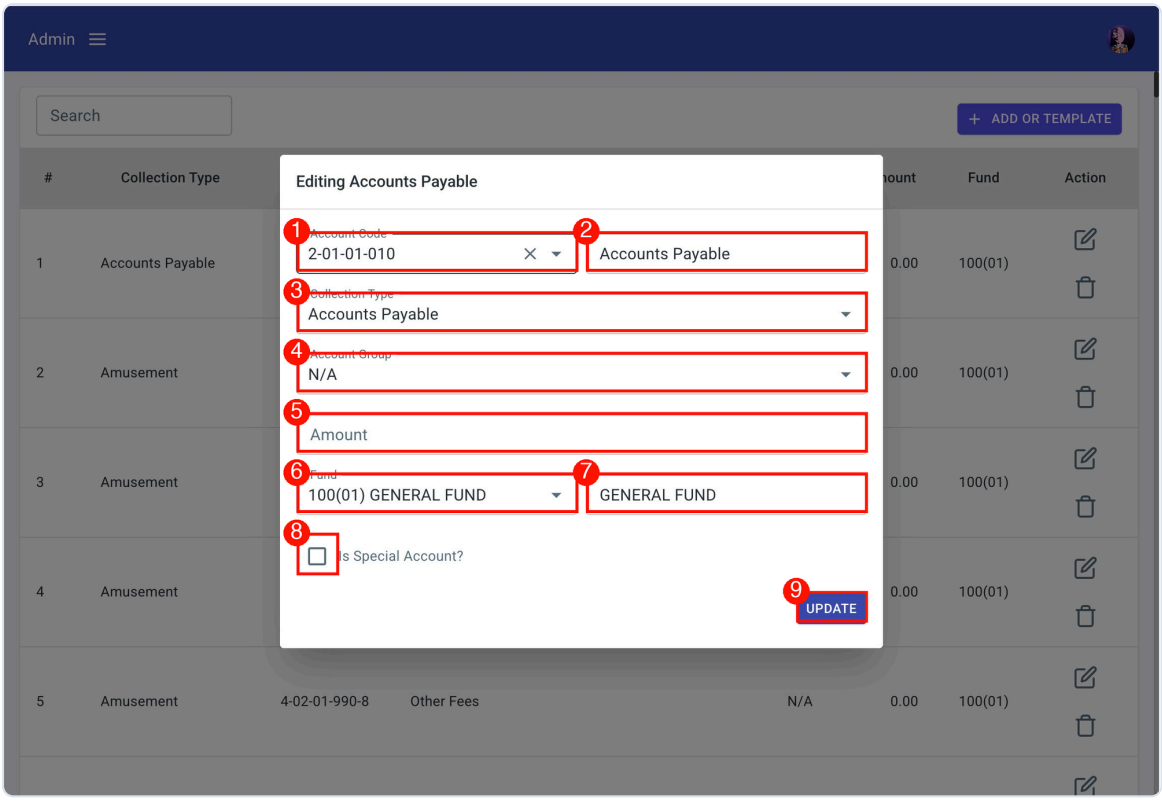

Figure 2.78. The window to edit a record in OR Template. 1 Account Code · 2 Box · 3 Collection Type · 4 Account Group · 5 Amount · 6 Fund · 7 Box · 8 Check box · 9 Update

2.6.10 How OR Template and Collection Type work together

> **The relationship in one line.** A **Collection Type** is the kind of payment that a cashier chooses (for example *006 Amusement*). The **OR Template** is the list of accounts that belong to that collection type. One collection type has many OR template lines, and each OR template line belongs to one collection type.

Each line of the OR Template page links one account of the chart of accounts (Section 2.5.1) and one fund (Section 2.2.2) to one collection type. The usual amount of the account is kept on the line. The lines of a collection type together make up what is printed on the official receipt for that kind of payment.

A sample: the collection type Amusement. First, the Collection Type page lists **006 Amusement**. It is only a code and a name.

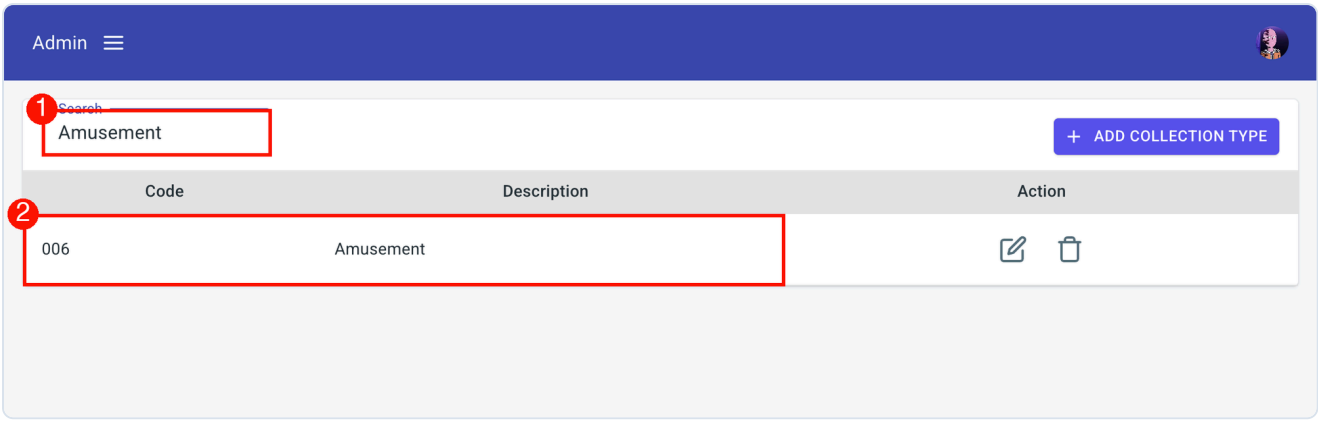

Figure 2.79. Step 1. The collection type 006 Amusement on the Collection Type page. 1 The Search box with the word typed · 2 The code and the name of the collection type.

Second, the OR Template page lists the lines that belong to Amusement. Typing **Amusement** in the Search box of the OR Template page finds them, because the search also matches the collection type. Amusement has eight lines: Business Tax-Amusement, Health and Sanitary Permit, Occupation Fees, Other Fees, Permit Fees-Business (Mayor's Permit), Registration Plates, Tags and Stickers Fees, Penalty and Garbage Fees. Seven lines have an amount of 0.00 and Garbage Fees has 30.00. All eight use the fund 100(01).

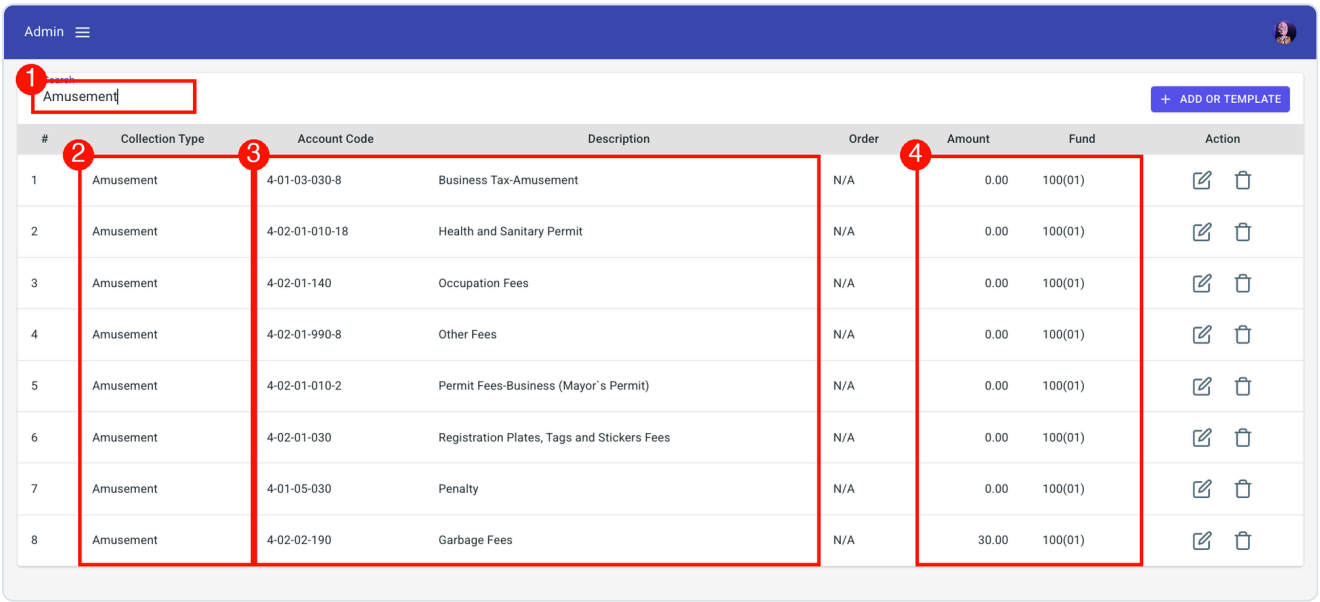

Figure 2.80. Step 2. The eight OR template lines of the collection type Amusement. 1 The Search box · 2 The Collection Type column (every line says Amusement) · 3 The account code and the description of each line · 4 The amount and the fund of each line.

Third, click the pencil of any line. The window shows the link: the **Account Code**, the **Collection Type** that the line belongs to, and the **Fund**. To move a line to another collection type, change the Collection Type box and click **Update**.

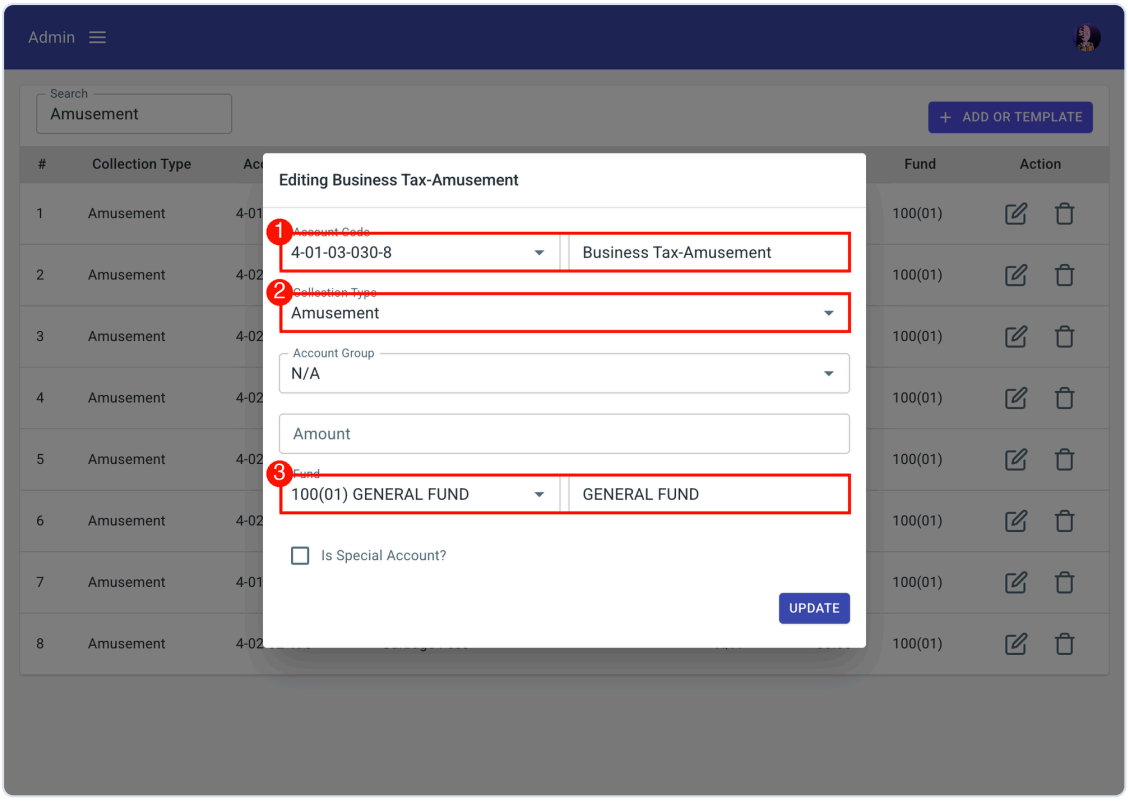

Figure 2.81. Step 3. The window of one OR template line. 1 The account of the line · 2 The Collection Type of the line (Amusement) · 3 The fund of the line.

Where the cashier sees it. On the Issuance of Official Receipt page, the cashier chooses a collection type. TIS then loads the OR template lines of that collection type (the accounts, the amounts and the funds) and the cashier adds them to the receipt. This part is described from the system's code and is shown in the Transaction section of this manual.

To make a new kind of payment available:

1. Add the collection type on the Collection Type page (Section 2.7).
2. On the OR Template page, add one line for each account of that payment. In every line choose the same **Collection Type**, then the **Account Code**, the **Account Group** and the **Fund**.
3. Check the result by typing the name of the collection type in the Search box of the OR Template page.

> **CAUTION.** A collection type with no OR template line gives the cashier nothing to load. Deleting a collection type or a line changes the receipts of that kind of payment from then on.

2.6.11 Accountant

Accountant lists the municipal accountants. It has the same columns and windows as the Treasurer page: **#**, **Full Name**, **Position**, **Status** and **Action**. The page has no record yet, so it says `No record found.`

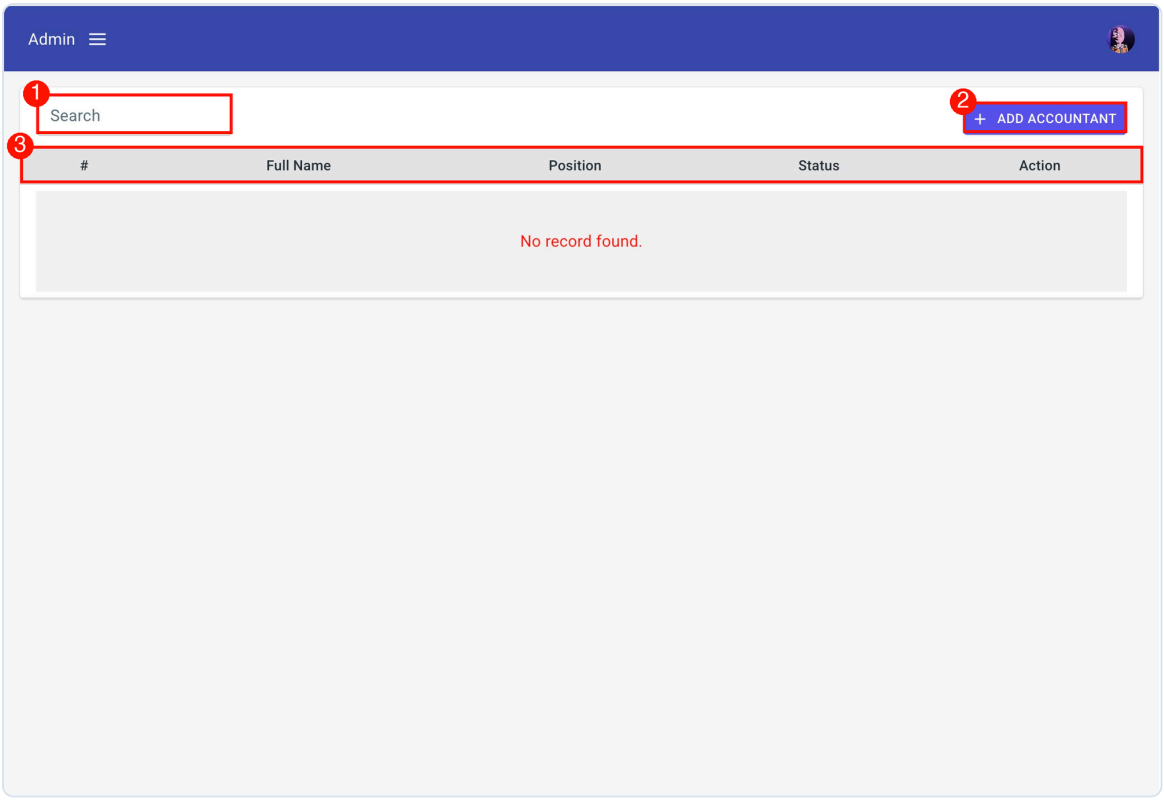

Figure 2.82. The Accountant page. 1 Search box · 2 Add button · 3 Table headings

In the window **Add Accountant**, type the **Full Name** and the **Position** (both required). Click **Add Accountant** to save, or **Cancel** to close without saving. If an active record already exists, the window says `An active record already exists. New record will be saved as inactive.`

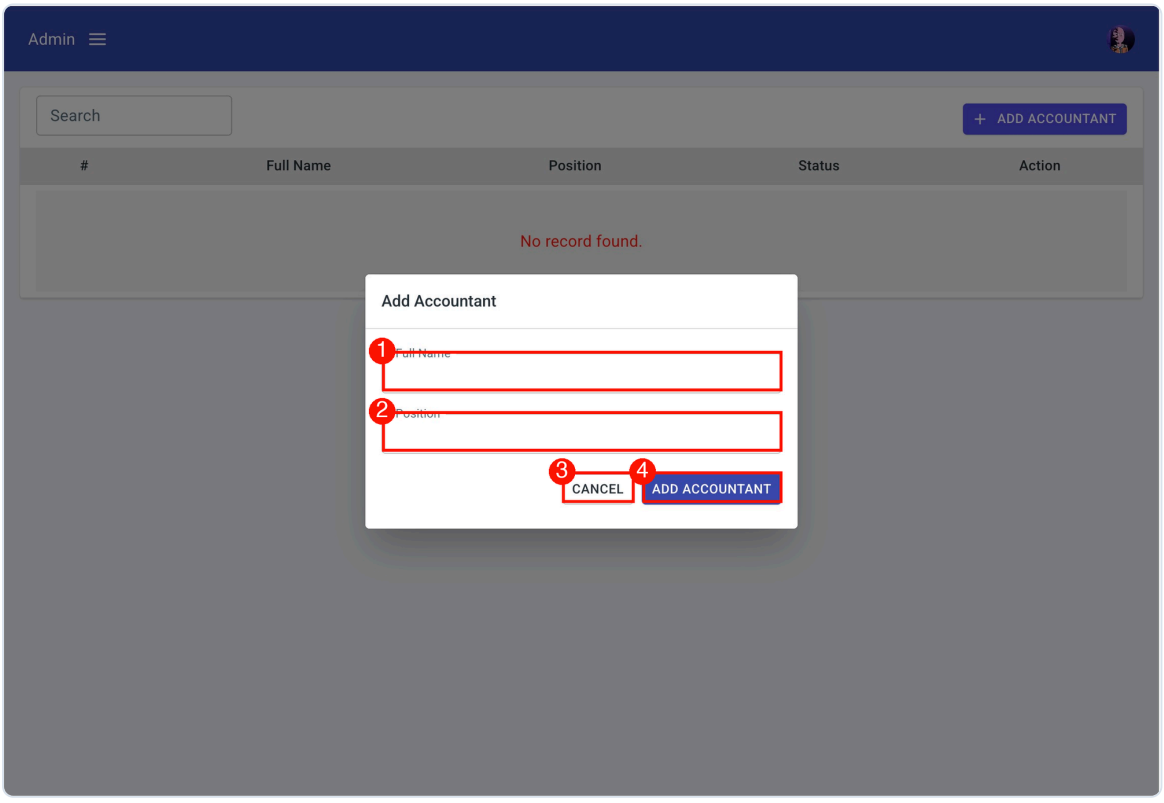

Figure 2.83. The window to add a record in Accountant. 1 Full Name · 2 Position · 3 Cancel · 4 Add Accountant

2.6.12 Treasurer

Treasurer lists the municipal treasurers. The columns are **#**, **Full Name**, **Position**, **Status** and **Action**. The status **Active** marks the treasurer that the system uses at present. Only one record can be active.

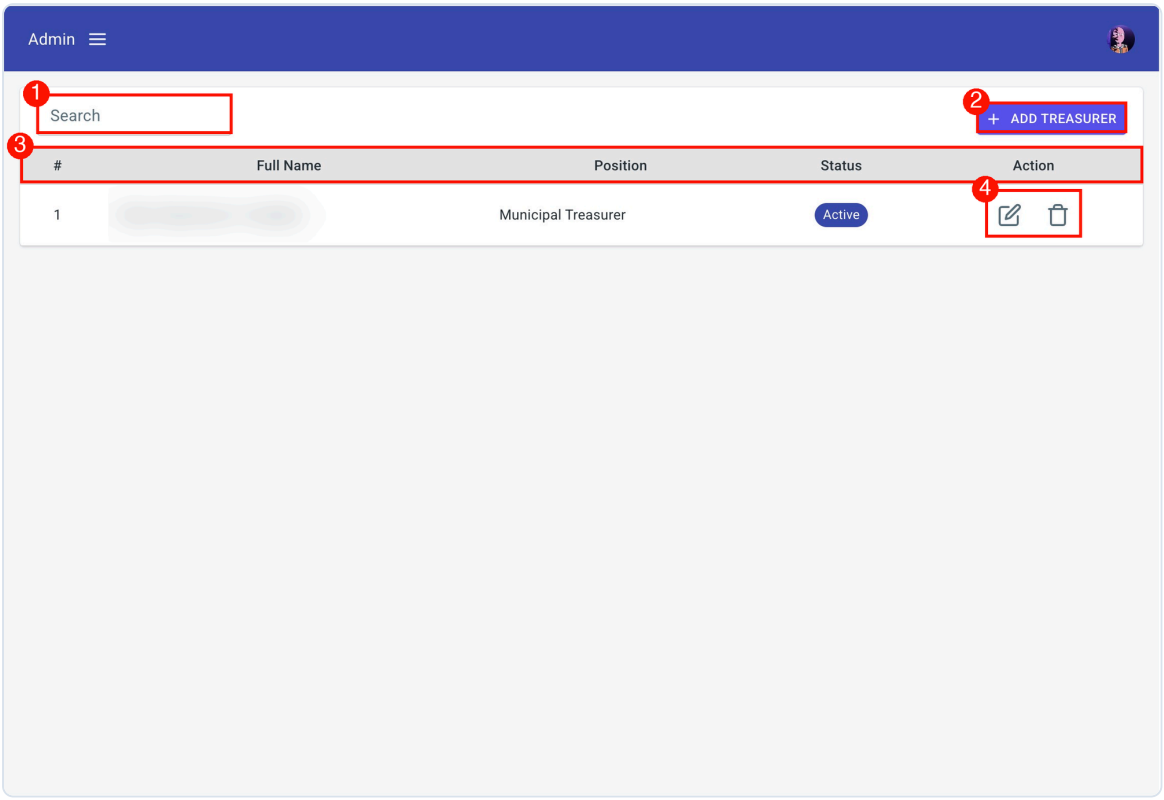

Figure 2.84. The Treasurer page. 1 Search box · 2 Add button · 3 Table headings · 4 Action icons (Edit, Delete)

In the window **Add Treasurer**, type the **Full Name** and the **Position** (both required). Click **Add Treasurer** to save, or **Cancel** to close without saving. If an active record already exists, the window says `An active record already exists. New record will be saved as inactive.`

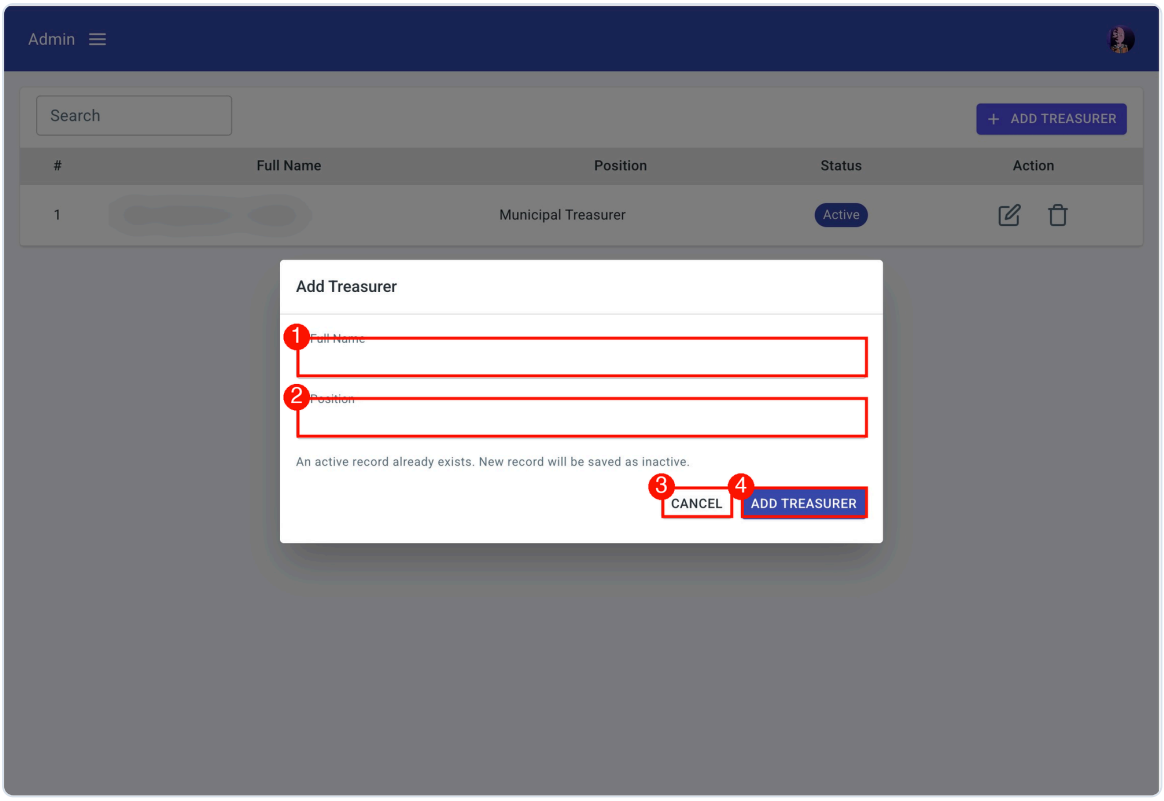

Figure 2.85. The window to add a record in Treasurer. 1 Full Name · 2 Position · 3 Cancel · 4 Add Treasurer

In the window **Edit Treasurer**, the check box **Set as Active** makes this treasurer the active one. The note says

`Only one active record is allowed. Setting this active will deactivate all others.` To delete a record, click its trash can. The question reads

`Are you sure you want to delete (the name)?` with **Cancel** and **Yes**.

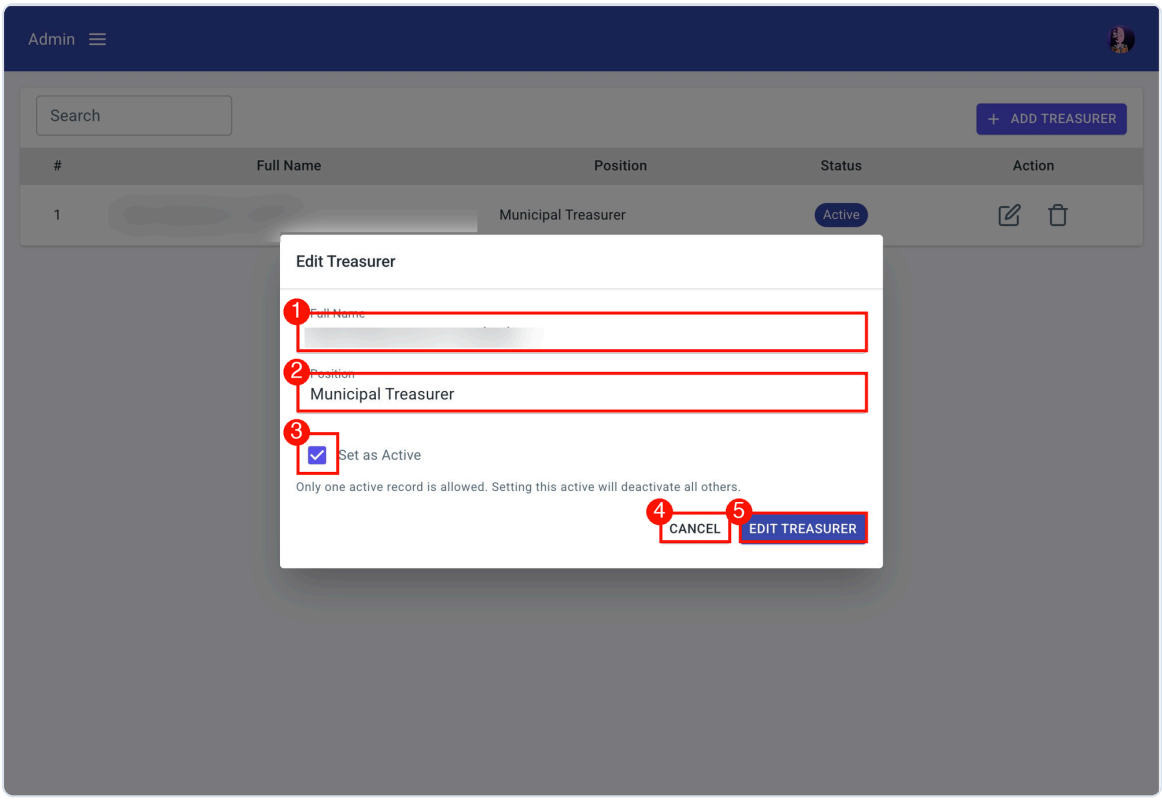

Figure 2.86. The window to edit a record in Treasurer. 1 Full Name · 2 Position · 3 Check box · 4 Cancel · 5 Edit Treasurer

2.6.13 Mayor

Mayor lists the municipal mayors. It has the same columns and windows as the Treasurer page: **#**, **Full Name**, **Position**, **Status** and **Action**. The page has no record yet, so it says `No record found.`

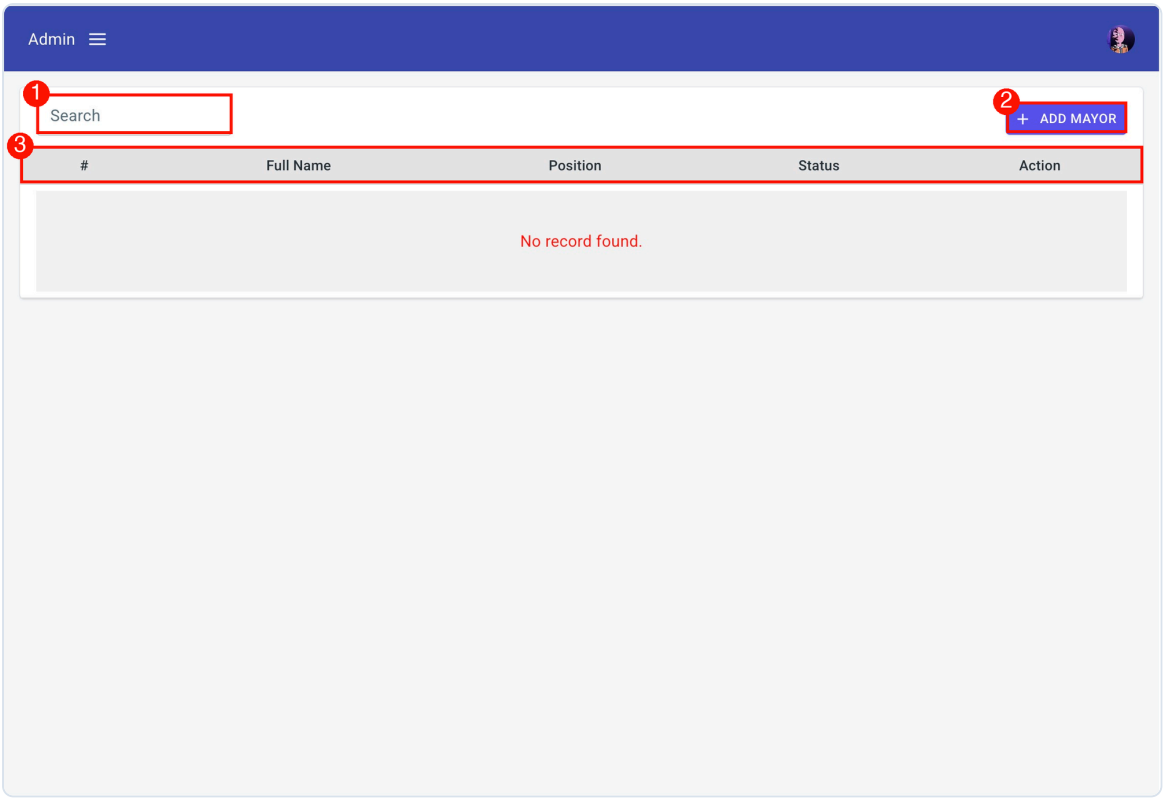

Figure 2.87. The Mayor page. 1 Search box · 2 Add button · 3 Table headings

In the window **Add Mayor**, type the **Full Name** and the **Position** (both required). Click **Add Mayor** to save, or **Cancel** to close without saving. If an active record already exists, the window says `An active record already exists. New record will be saved as inactive.`

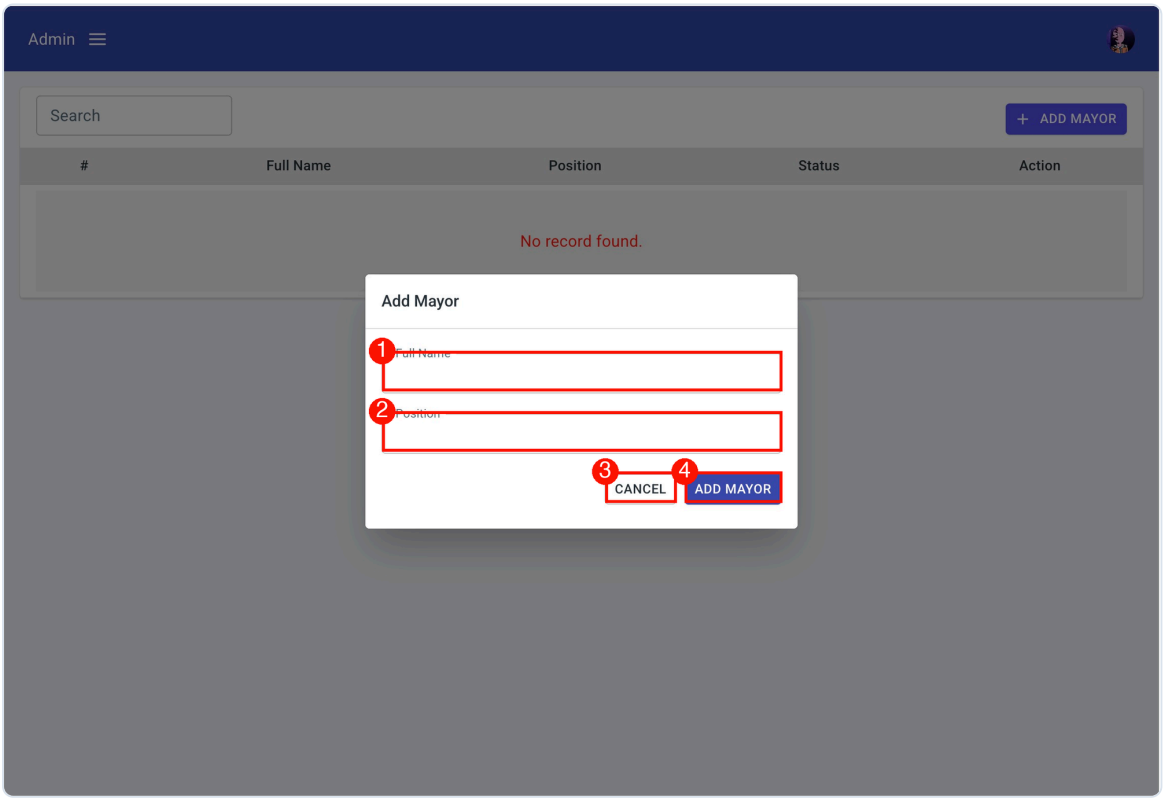

Figure 2.88. The window to add a record in Mayor. 1 Full Name · 2 Position · 3 Cancel · 4 Add Mayor

2.7 Collection Type

Collection Type lists the types of collection that the cashier chooses from. The columns are **Code** and **Description**. The list is long (171 types), so use the **Search** box. In the window to add a record, type the **Code** and the **Description**. Both are required.

> A collection type is only a code and a name. The accounts that belong to it are set on the OR Template page. See Section 2.6.10.

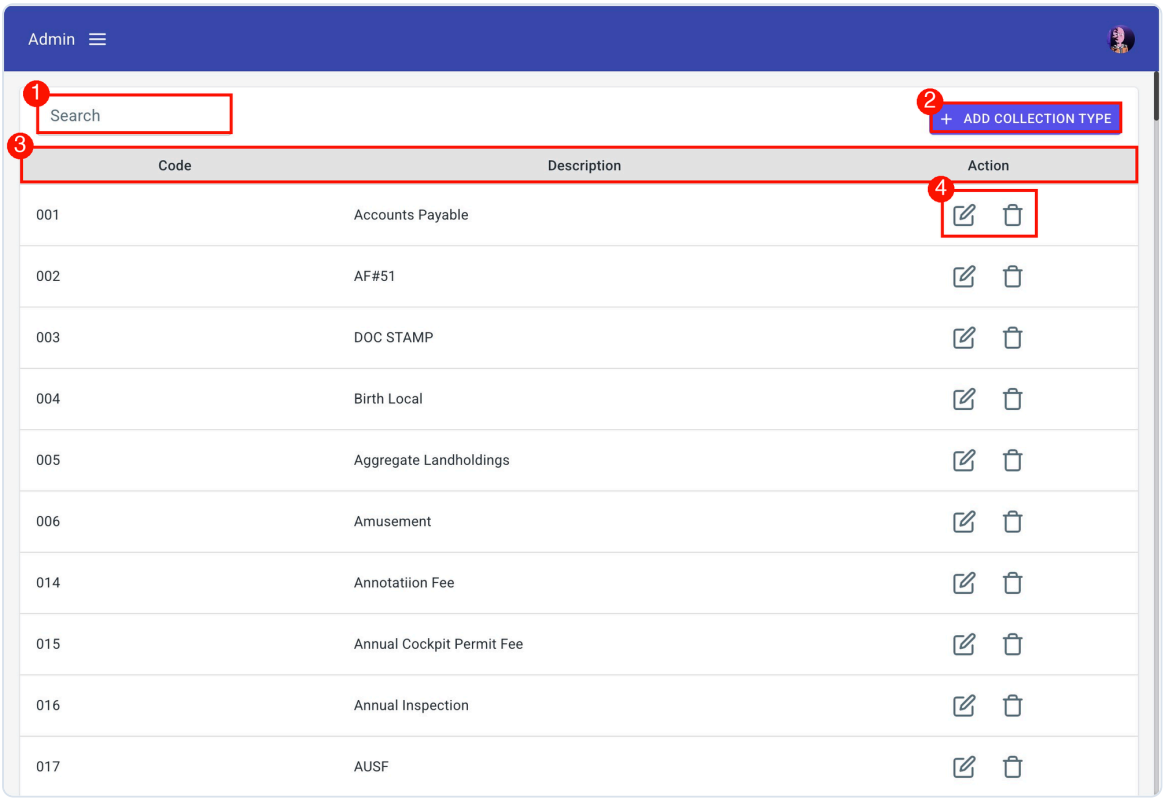

Figure 2.89. The Collection Type page. 1 Search box · 2 Add button · 3 Table headings · 4 Action icons (Edit, Delete)

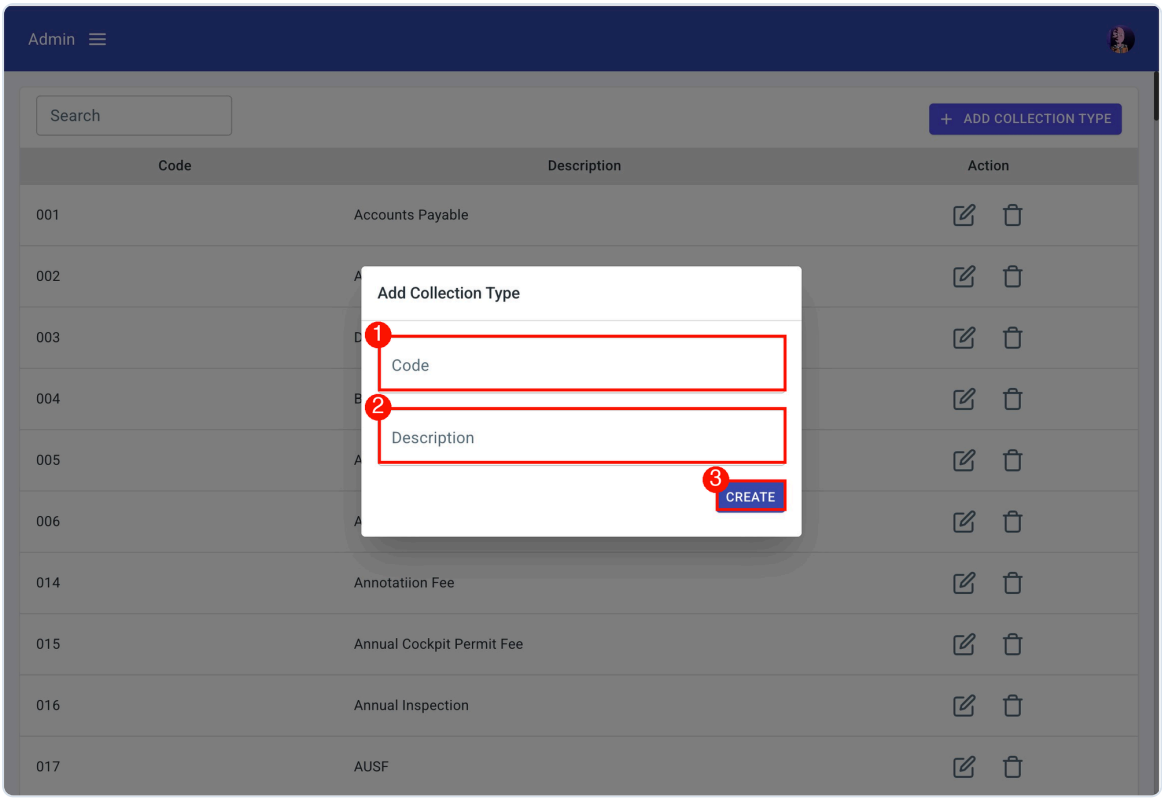

Figure 2.90. The window to add a record in Collection Type. 1 Code · 2 Description · 3 Create

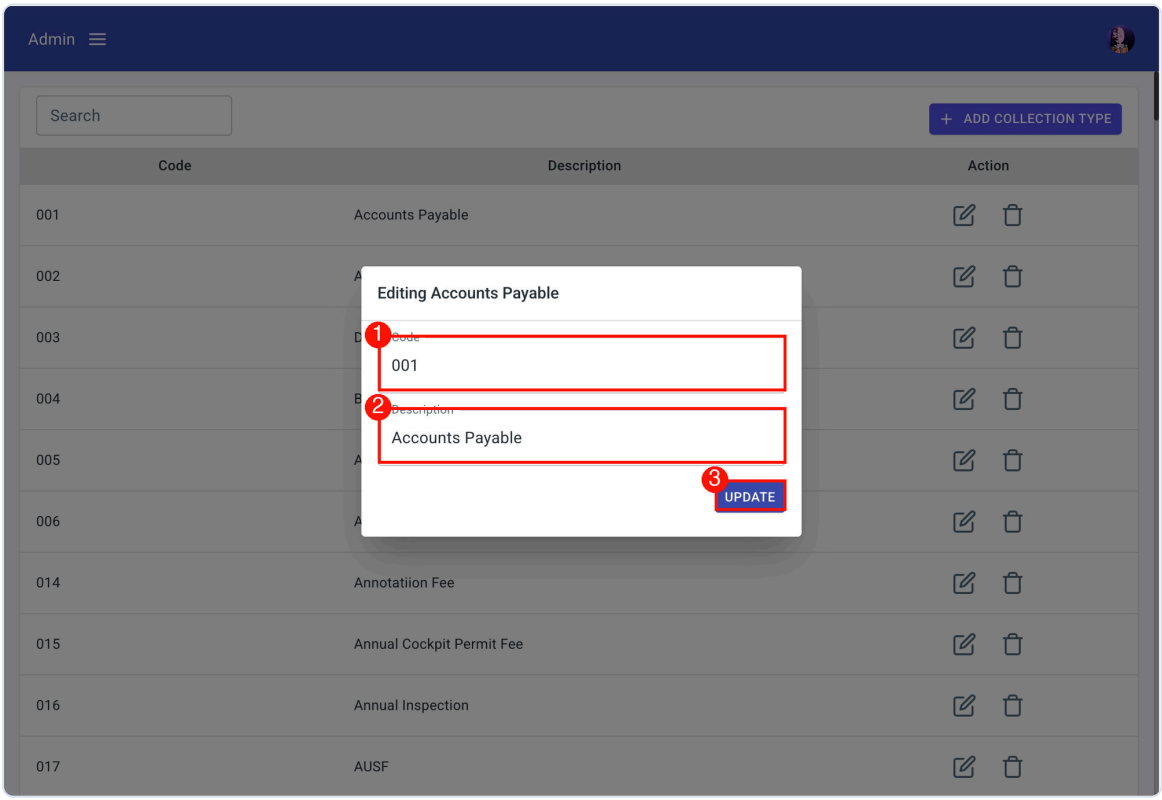

Figure 2.91. The window to edit a record in Collection Type. 1 Code · 2 Description · 3 Update

2.8 Cemetery

Cemetery lists the cemeteries of the municipality, such as the cemeteries that burial permits refer to. The only column is **Description** (17 cemeteries at present). In the window to add a record, type the **Description**. It is required.

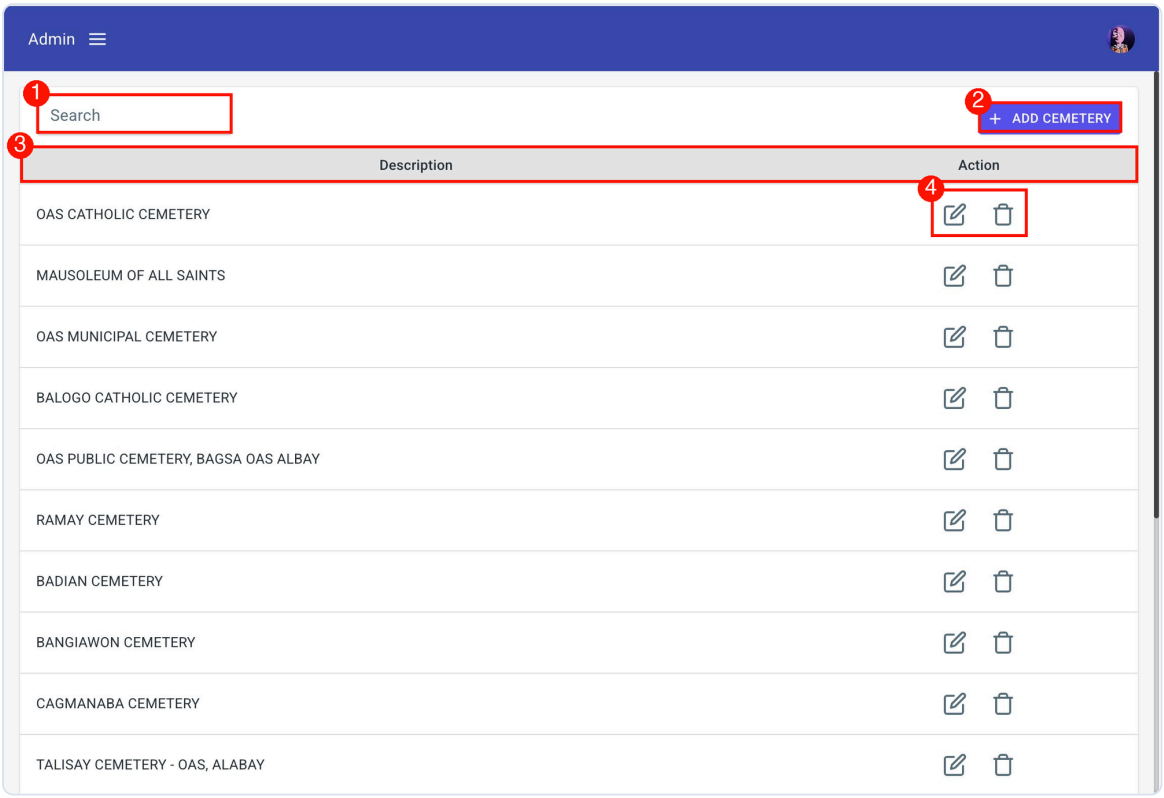

Figure 2.92. The Cemetery page. 1 Search box · 2 Add button · 3 Table headings · 4 Action icons (Edit, Delete)

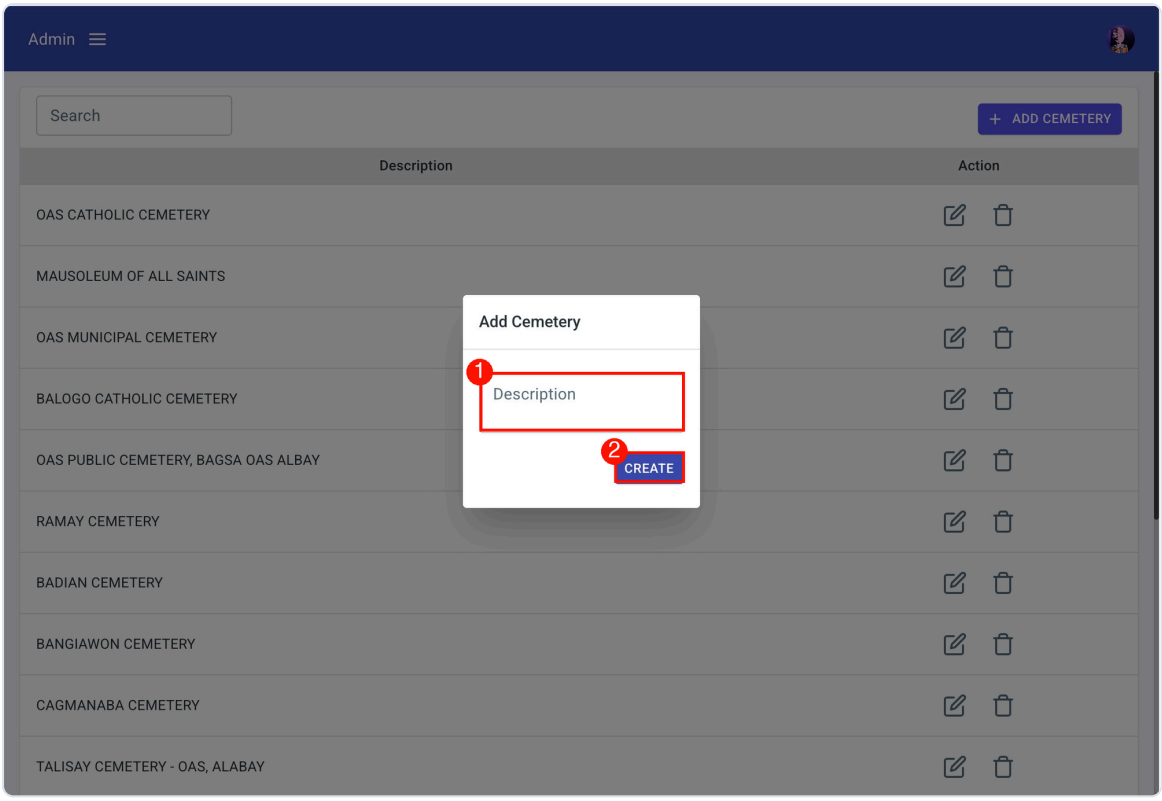

Figure 2.93. The window to add a record in Cemetery. 1 Description · 2 Create

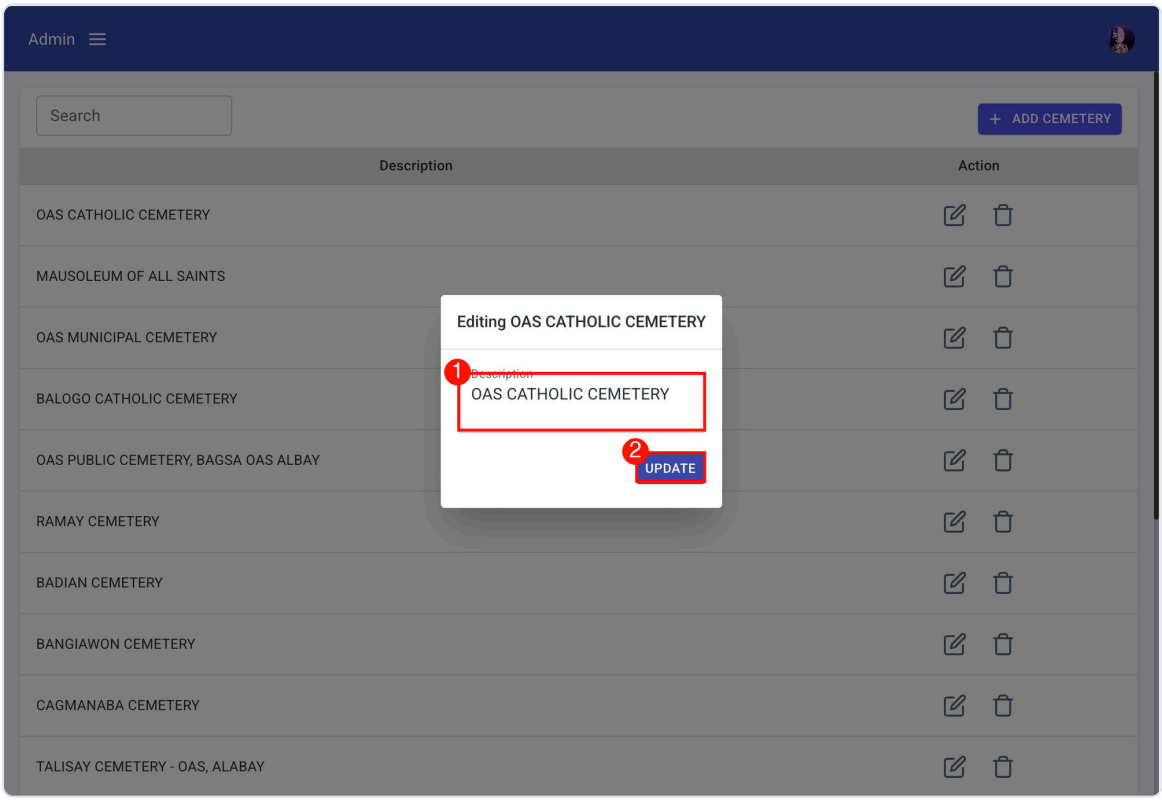

Figure 2.94. The window to edit a record in Cemetery. 1 Description · 2 Update

SECTION 3

Transaction

The Transaction menu is where receipts and vouchers are made. **Collection** records the money that the municipality receives, and gives an official receipt (OR) for each payment. **Disbursement** records the money that the municipality pays out, with a disbursement voucher (DV). This section explains each page, each button and each message.

> **Reading the colored boxes.** Messages of TIS are shown in boxes: `gray` for a question or notice, `green` for success, `red` for an error and `yellow` for a warning.

3.1 The Transaction menu

Open the sidebar and click **Transaction**. It has two groups. **Collection** has seven pages: **Issuance of Official Receipt(OR)**, **Business Permit(OR)**, **Building Permit**, **Community Tax Certificate(CTC) - Ind**, **Community Tax Certificate(CTC) - Corp**, **Burial Permit and Fee Receipt** and **Online Request**. **Disbursement** has one page, **Disbursement Voucher(DV)**.

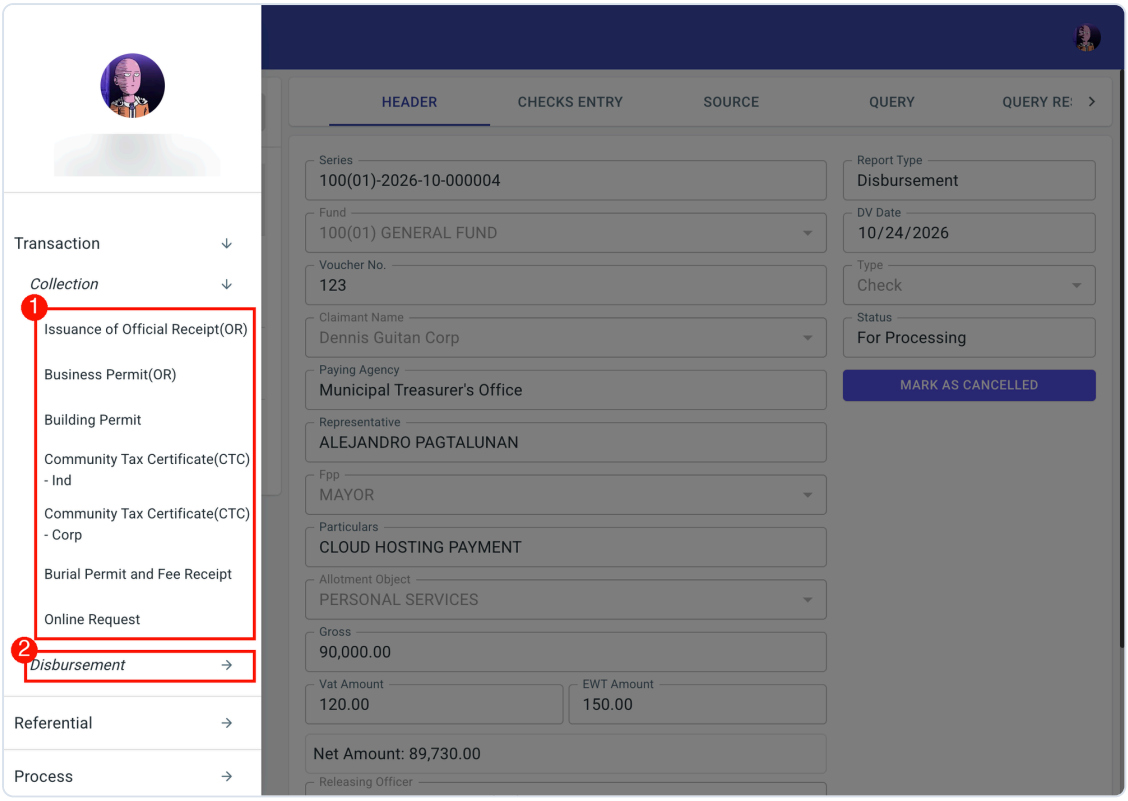

Figure 3.1. The sidebar with Transaction open. 1 The seven Collection pages · 2 Disbursement. The name and email are blurred.

3.2 How a receipt is made

Six of the Collection pages (Issuance, Business Permit, Building Permit, CTC Ind, CTC Corp and Burial Permit) work in the same way. A receipt is never typed from nothing. It always starts from a receipt number that already exists in a booklet.

1. **The booklet comes first.** On the Referential page **Accountable Forms** (Section 2.6.1), a booklet of 50 receipts is recorded for a collector. This gives TIS the receipt numbers, the form type, the fund, the liquidating officer and the collector.
2. **Type the receipt number.** On the page, type the number in the **OR No.** box (on the CTC pages, the **CTC No.** box) and click **Check**, or press **Ctrl+Enter**.
3. **TIS looks the number up.** A new number from a booklet opens the form, and the gray box at the right shows the **Liq Officer**, the **Collector**, the **Form Type**, the **RCD No.** and the **RCLO No.** from the booklet. You do not type them.
4. **Fill in the payor and what is paid.** Fill in the boxes of the page, then choose the collection type or the details. TIS loads the accounts of that payment (see Section 2.6.10).
5. **Save.** Click **Save** (or press **Ctrl+S**). The receipt is saved. Then print it and TIS asks if you want the next receipt number.

The collector must also be one of the officers assigned to your user (Section 1.2.6). If not, the receipt is refused.

3.2.1 Messages after Check

When you check a receipt number, TIS answers with one of these windows. Each shows a red circle with an exclamation mark, the message and an **OK** button.

- `O.R # NOT FOUND!` The number is not in any booklet, or it is in a booklet of another kind of form (for example a CTC number on the Issuance page).
- `O.R # ALREADY USED!` The receipt was already saved. After OK, TIS shows the saved receipt so that you can read it.
- `You are not allowed to proccess this personnel.` The collector of the receipt is not one of your assigned personnel (the system spells it this way).
- `O.R # REGISTERED TO THE BUSINESS PERMIT!` The number already belongs to a business permit receipt, so it cannot be used on this page.

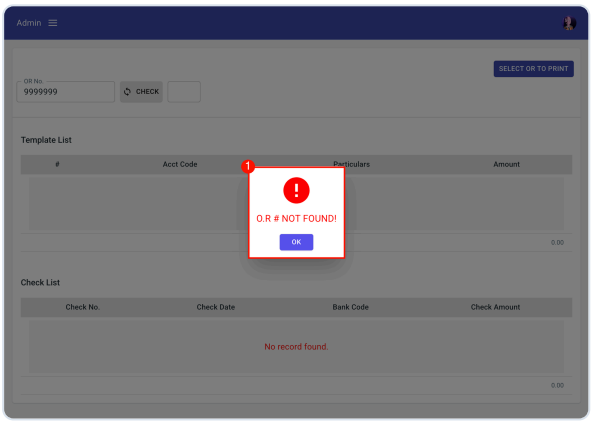

Figure 3.2. The window after checking a number that does not exist. 1 The message and the OK button.

3.2.2 After the receipt is saved

- `Issuance details updated successfully` appears when the receipt is saved. The receipt then opens for printing.
- `Next OR?` TIS asks if you want to work on the next receipt number. Click **Yes** to fill the OR No. box with the next number (the number plus 1), or **No** to stay.
- `No record found.` shows in an empty Template List or Check List.

3.2.3 The buttons of a saved receipt

When you check a number that was already used, TIS shows the saved receipt and these buttons at the top right:

- **Select OR To Print:** opens the list of receipts that can be printed (Section 3.3.1).
- **Mark As Cancelled:** cancels the receipt. TIS does not ask a question first and the message `Issuance OR cancelled successfully` follows at once, so click it only when you mean it.
- **Print OR:** prints the receipt (**Ctrl+P**).

- **Edit:** opens the lines of the receipt so that the particulars and the amounts can be changed. `Issuance OR updated successfully` follows.
- **Erase:** removes the lines of the receipt after the question `Are you sure to delete this issuance?` It is also the **Del** key. The message `Issuance deleted successfully` follows.

> **CAUTION.** Mark As Cancelled, Edit and Erase change a receipt that was already given to a payor. Use them only with the approval of the treasurer. These buttons were not pressed while this manual was prepared; they are described from the code.

3.3 Issuance of Official Receipt(OR)

This page makes an official receipt for any payment that does not have its own page. When you open it, only the **OR No.** box, the **Check** button and the **Select OR To Print** button show. Below are the **Template List** (the accounts paid) and the **Check List** (the checks that paid it).

> **Click the Check button first.** Type the number in the OR No. box and click the **Check** button (or press **Ctrl+Enter**). The form window then opens below it. Nothing can be filled in before you click Check.

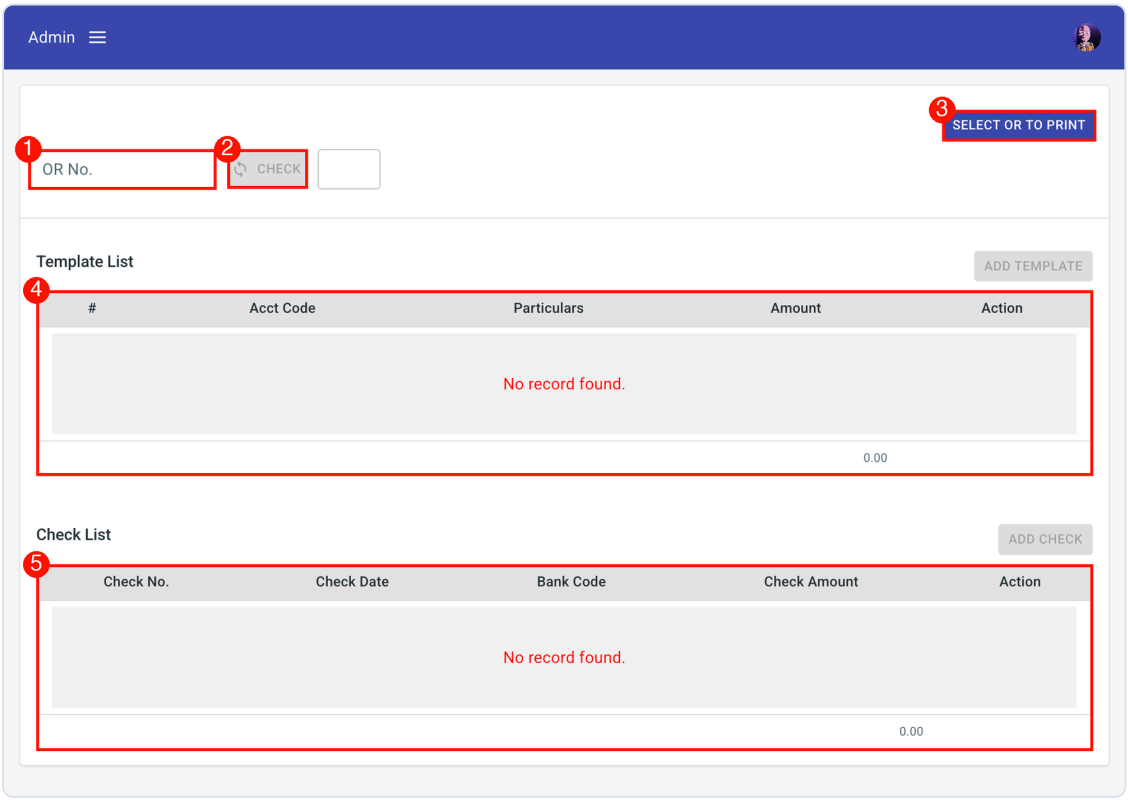

Figure 3.3. The Issuance of Official Receipt page when it opens. 1 OR No. · 2 Check · 3 Select OR To Print · 4 Template List · 5 Check List.

3.3.1 Select OR To Print

Click **Select OR To Print** to see the receipts that were issued and can still be printed or copied. The list shows the **OR Date**, the **OR No.** and the **Payor**. Type in the **Search OR No. or payor** box to find one, then click **Select**. A preview of the receipt opens with a **Print** button. If there is nothing to print, the message `No OR to print` appears.

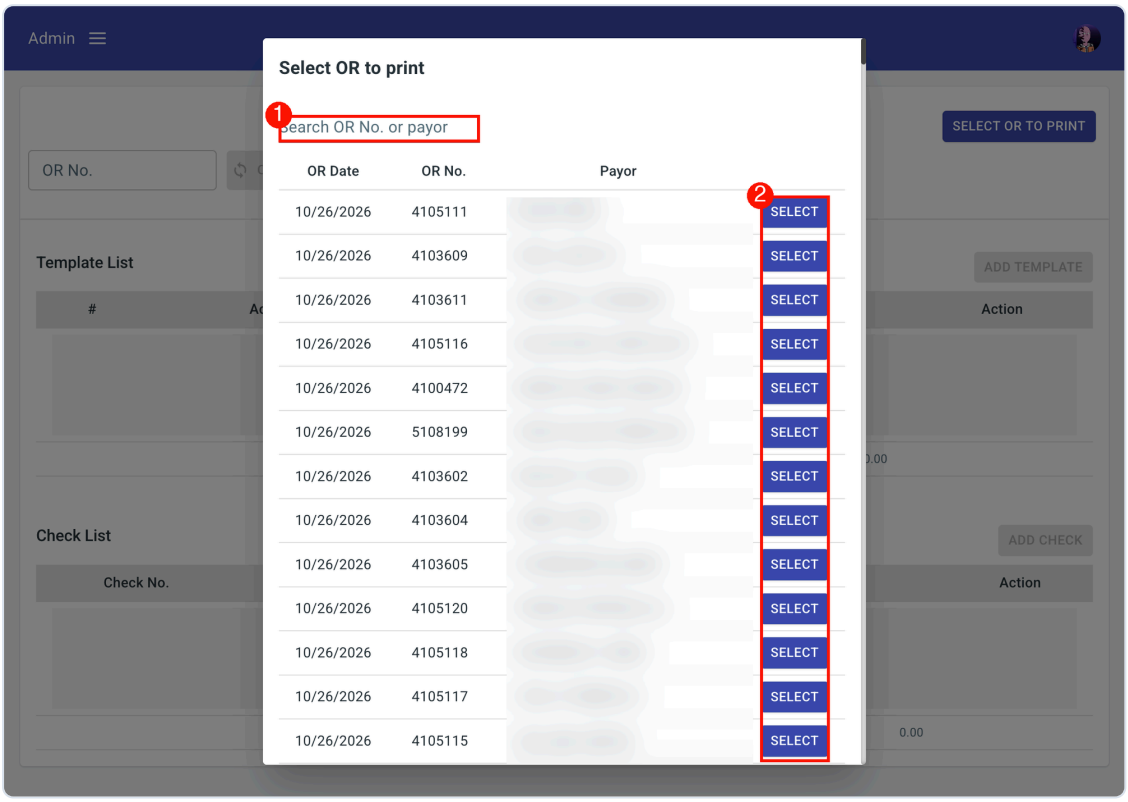

Figure 3.4. The Select OR to print window. 1 The search box · 2 The Select buttons. The payor names are blurred.

3.3.2 A new receipt

Type a receipt number of an open booklet and click **Check**. The form opens. The boxes are:

Box	What to do
OR No.	The receipt number that you checked.
Payor	Required. The name of the person or company that pays.
Gender	Required. A list: **Male** or **Female**.
Address	Required. It starts as *OAS, ALBAY*.
Document Date and OR Date	Required. Both start as today's date.
Business Type, Business Info, Remarks	They start as *N/A*. Change them when they apply.

Box	What to do
Collection Type	Required. A list of the collection types (Section 2.7). The choice decides which accounts are added.
Fund Code	Shown by TIS after the collection type is chosen.
Gray box at the right	Liq Officer, Collector, Form Type, RCD No. and RCLO No. from the booklet. It cannot be changed.

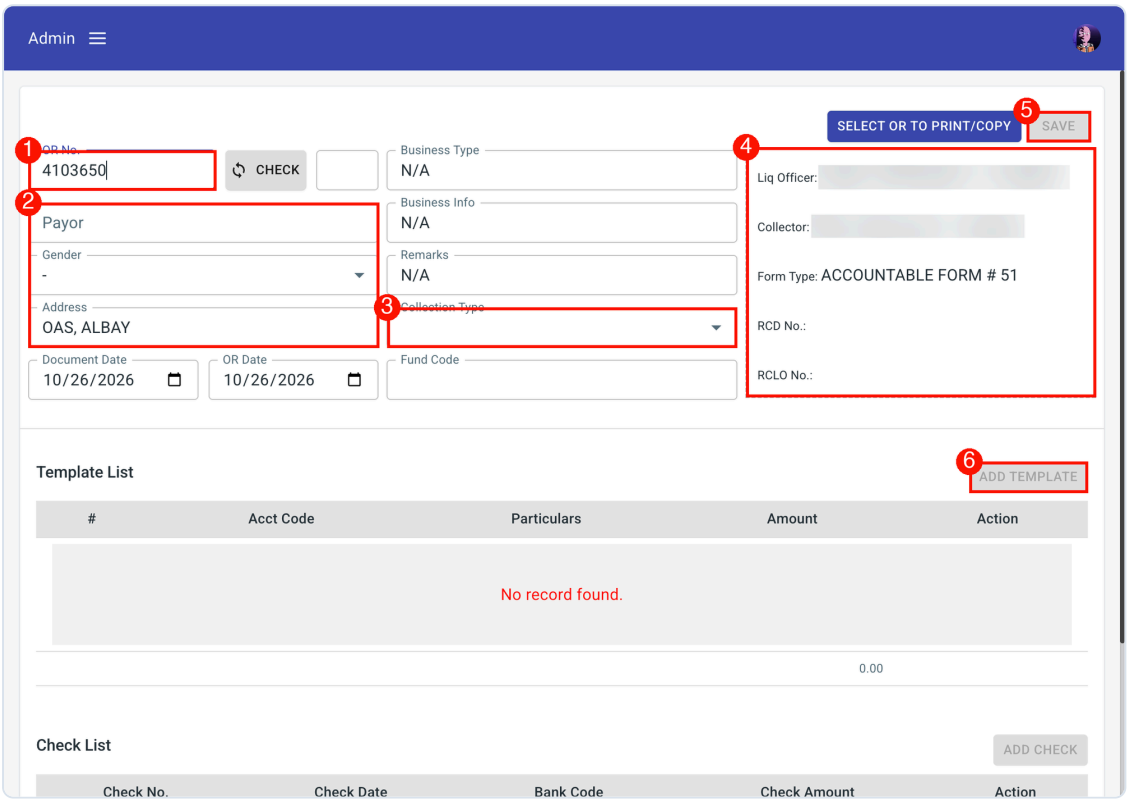

Figure 3.5. The form after checking an open receipt number. 1 OR No. · 2 Payor, Gender and Address · 3 Collection Type · 4 The booklet information · 5 Save (gray until the form is complete) · 6 Add Template (gray until a collection type is chosen). The officer names are blurred.

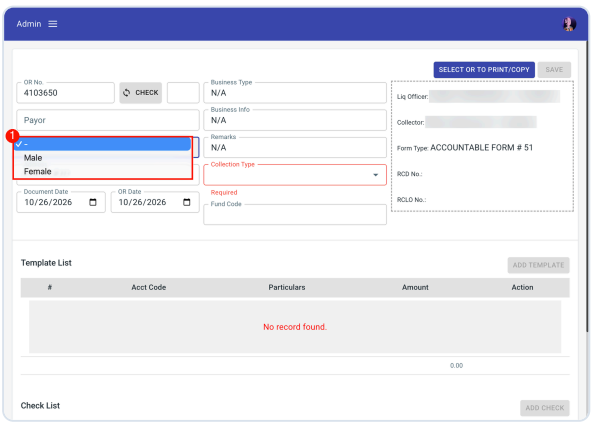

Figure 3.6. The Gender list. 1 Male and Female.

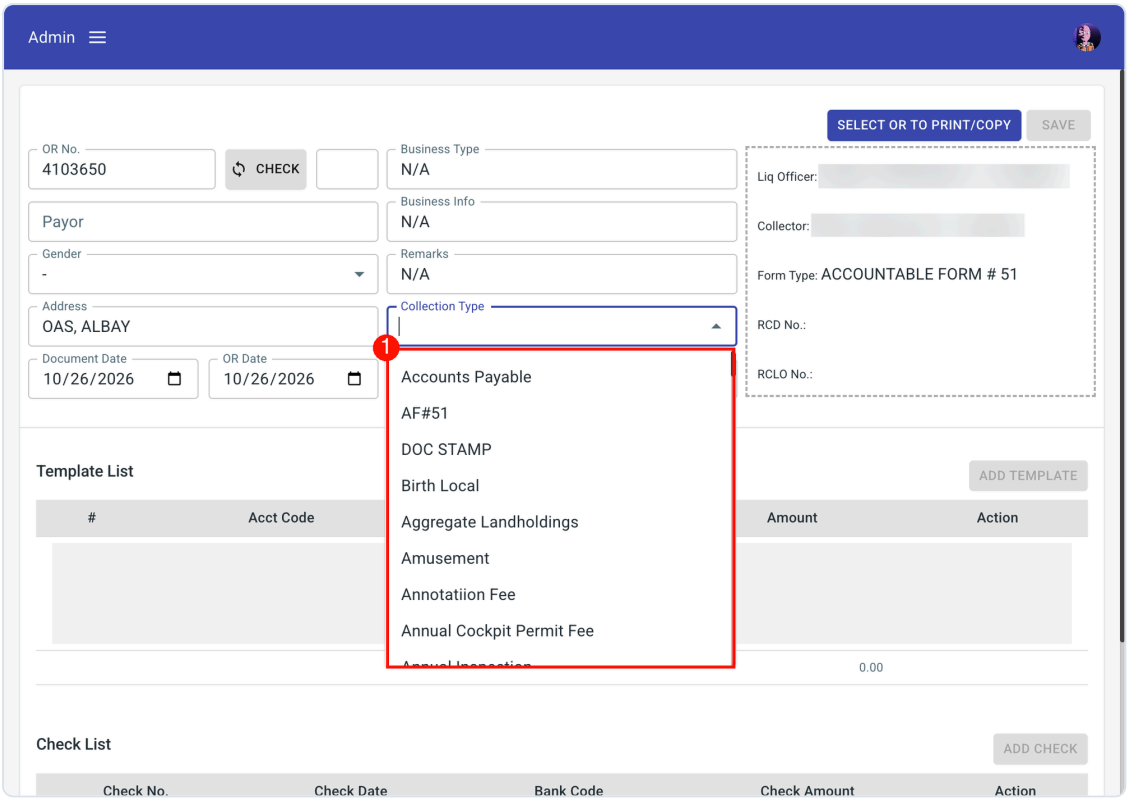

Figure 3.7. The Collection Type list. 1 The collection types. Type a few letters to search. The officer names are blurred.

3.3.3 Adding the accounts of the collection type

When you choose a collection type, TIS asks `Do you want to add the template?` Click **Yes** to add all the OR template lines of that collection type to the **Template List**. Each line shows the account code, the particulars and the amount, and the total is shown below. `Adding template to table success` appears. The **Add Template** button is gray until a template has been added. After that it adds one more account by hand (account code, account group, amount and fund) and shows `Template added to list successfully`.

Step 1. Click the **Collection Type** box and choose a collection type from the list. The **Fund Code** then fills in by itself (here 100(01)).

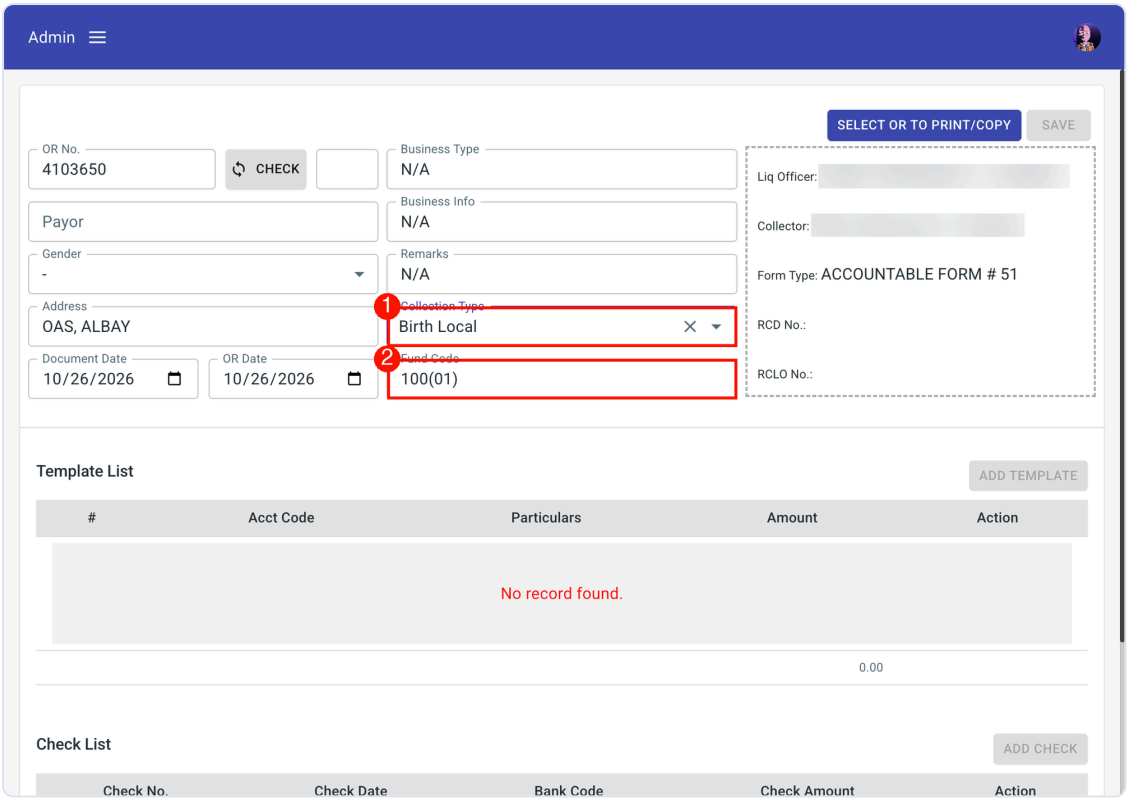

Figure 3.8. A collection type chosen. 1 Collection Type: Birth Local · 2 Fund Code, filled in by itself.

Step 2. At once TIS asks the question. Click **Yes** to add the template, or **No** to leave without adding it.

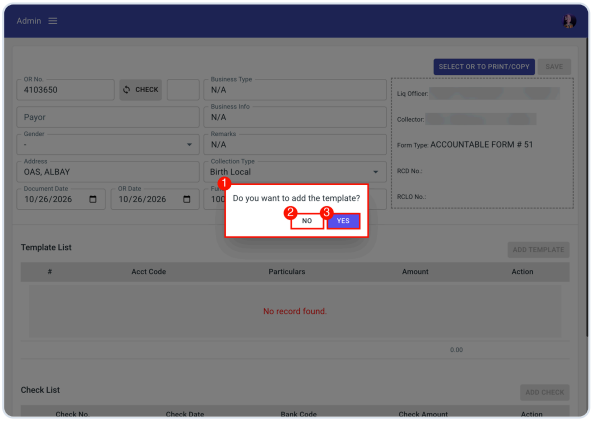

Figure 3.9. The question after choosing a collection type. 1 The question · 2 No · 3 Yes, which adds the template lines.

Step 3. After **Yes**, the lines fill the Template List.

For example, the collection type *Birth Local* adds the lines *Doc Stamp* (4-02-01-020-37, 30.00) and *Birth Cert. (Local)* (4-02-01-040-10, 50.00), a total of 80.00.

3.3.4 The Check List

When a payment is made by check, click **Add Check** and fill in **Check No.**, **Check Date**, **Bank Code** and **Check Amount**. `Check created successfully` appears. A check row has a trash can to

remove it. The Add Check button is gray until a receipt is open.

3.3.5 A saved receipt

This is a receipt that was already issued, opened with **Check**. The form is read-only and the buttons of Section 3.2.3 show at the top. The Template List shows the accounts and the total of the receipt.

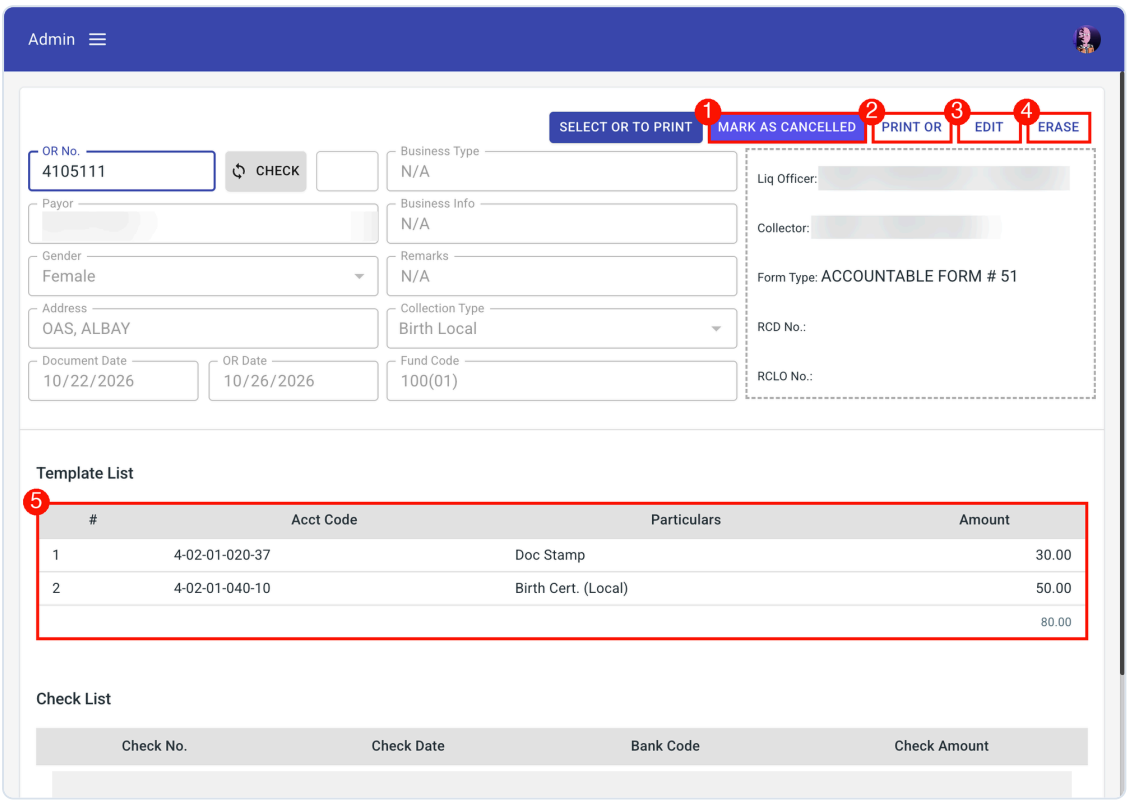

Figure 3.10. A saved receipt. 1 Mark As Cancelled · 2 Print OR · 3 Edit · 4 Erase · 5 The accounts and the total. The payor, the officers and the collector are blurred.

3.4 Business Permit(OR)

This page makes the official receipt for a business permit. It works like Issuance (Section 3.3), with these differences: the collection type is fixed to **BUSINESS**, the gender box is named **Sex**, and the accounts come from the assessment of the business.

> **Click the Check button first.** Type the number in the OR No. box and click the **Check** button (or press **Ctrl+Enter**). The form window then opens below it. Nothing can be filled in before you click Check.

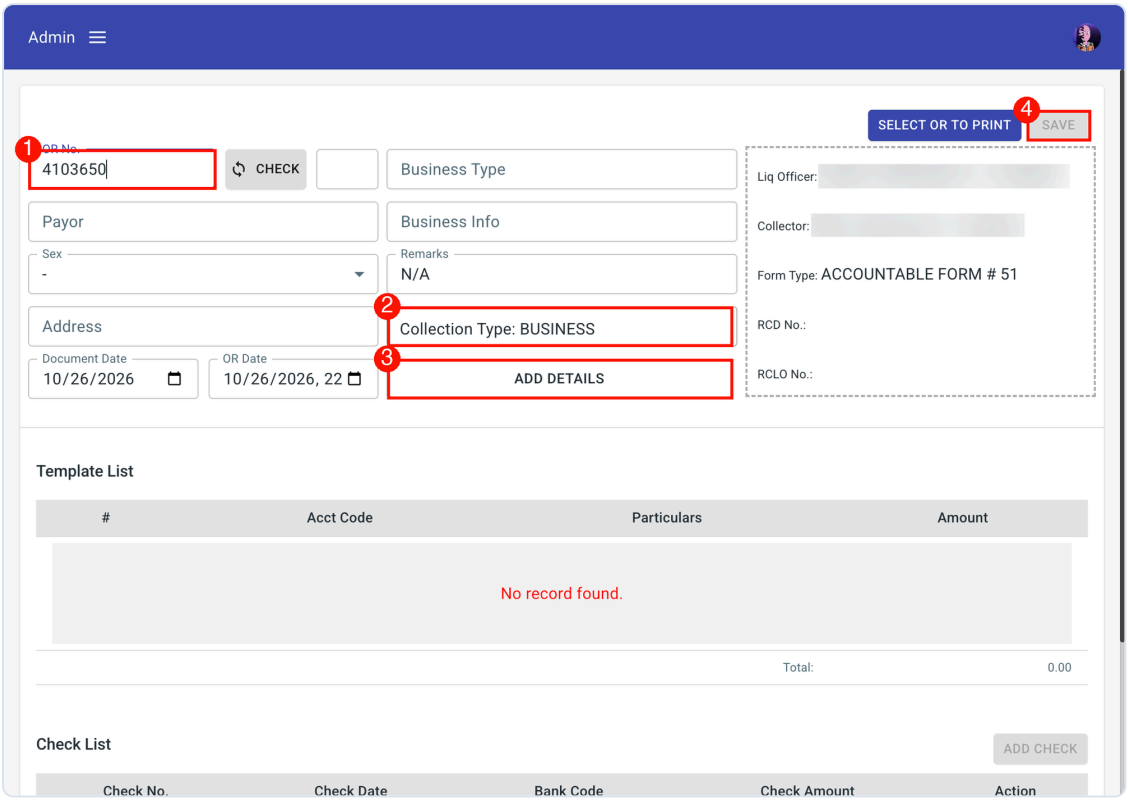

Figure 3.11. The Business Permit form after checking an open receipt number. 1 OR No. · 2 Collection Type: BUSINESS (fixed) · 3 Add Details · 4 Save. The officer names are blurred.

Click **Add Details** to find the business. The window **Filter To Display** offers two ways to search. Tick **Search for Business** and type the **Business Name**, or tick **Search for Assessment Code** and type the **Assessment Code**. Then click **Filter**. TIS looks in the assessments of the Business Permit system and shows the matches in a list. Click **Retrieve** on the right business. TIS then fills in the business name and the payor, and adds the assessed fees to the Template List for this receipt number.

- `Please select a filter type` appears when you click Filter without ticking a search.
- `Assessment Code is required` appears when there is no assessment code.
- `No record found` appears when nothing matches.
- After the receipt is saved, TIS marks the assessment as paid in the Business Permit system.

The buttons of a saved business receipt are the same as in Section 3.2.3. Mark As Cancelled shows `Business cancelled successfully` and Erase shows `Business permit deleted successfully`.

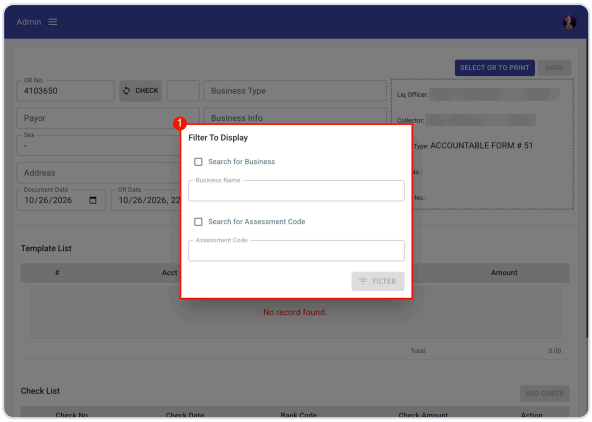

Figure 3.12. The window Filter To Display. 1 The two ways to search: by business name or by assessment code.

3.5 Building Permit

This page makes the official receipt for a building permit. The form is short: the receipt number, the **Payor**, the dates, and **Add Details**. The application is taken from the building permit applications.

> **Click the Check button first.** Type the number in the OR No. box and click the **Check** button (or press **Ctrl+Enter**). The form window then opens below it. Nothing can be filled in before you click Check.

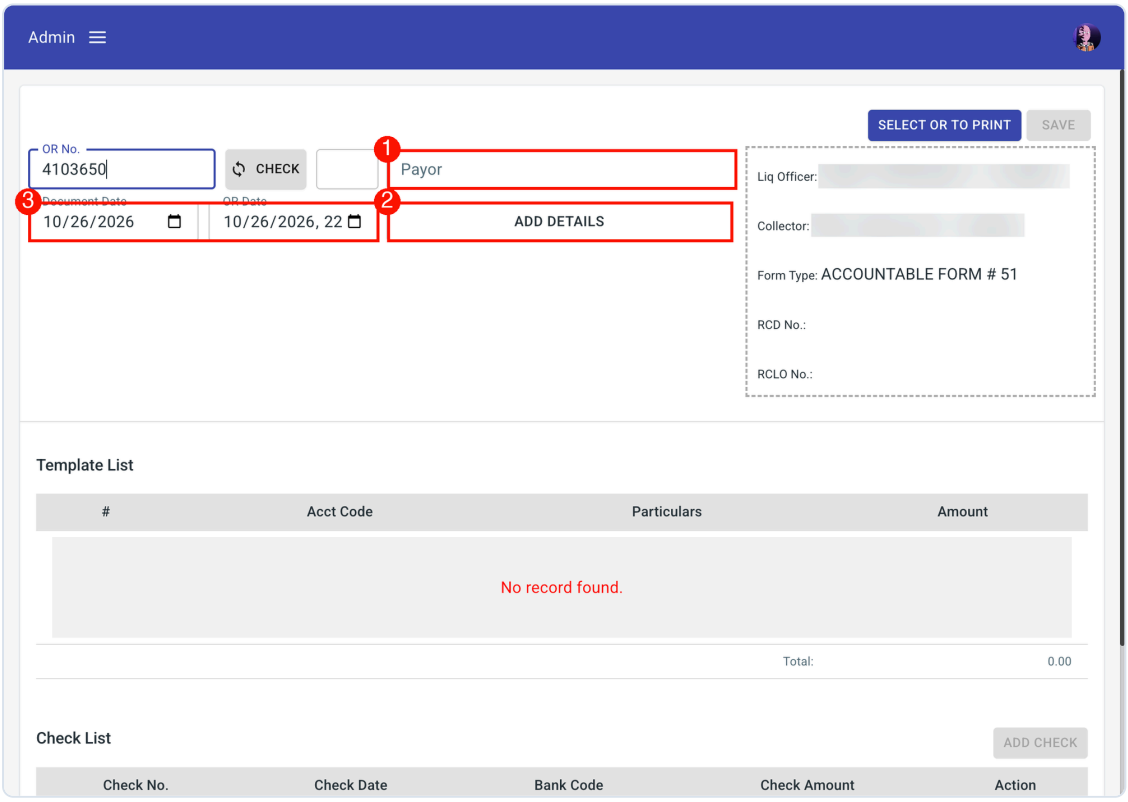

Figure 3.13. The Building Permit form after checking an open receipt number. 1 Payor · 2 Add Details · 3 Document Date and OR Date. The officer names are blurred.

Click **Add Details**. In the window **Filter To Display**, tick **Search for Application No.** and type the **Application No.**, or tick **Search for Owner** and type the **Owner**, then click **Filter**. Click **Retrieve** on the right application. The owner becomes the payor and the fees of the application fill the Template List. `Please select a filter type` and `No record found` appear as on the Business Permit page.

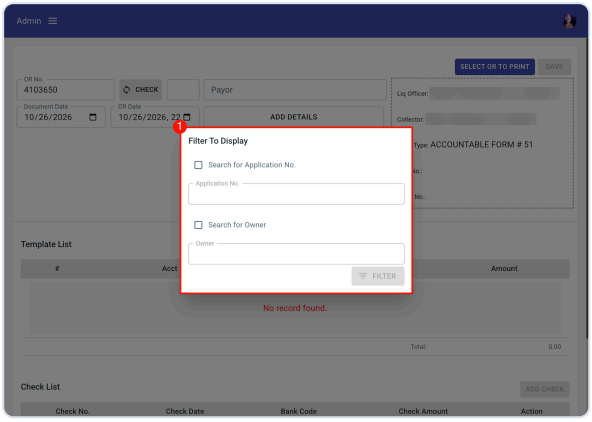

Figure 3.14. The window Filter To Display. 1 Search by application number or by owner.

3.6 Community Tax Certificate(CTC) - Ind

This page makes a community tax certificate for a person. It starts with the **CTC No.** of an open booklet of the form type *COMMUNITY TAX CERTIFICATION*. The gray box shows the **CTC Type: Individual** and the fund.

> **Click the Check button first.** Type the number in the CTC No. box and click the **Check** button (or press **Ctrl+Enter**). The form window then opens below it. Nothing can be filled in before you click Check.

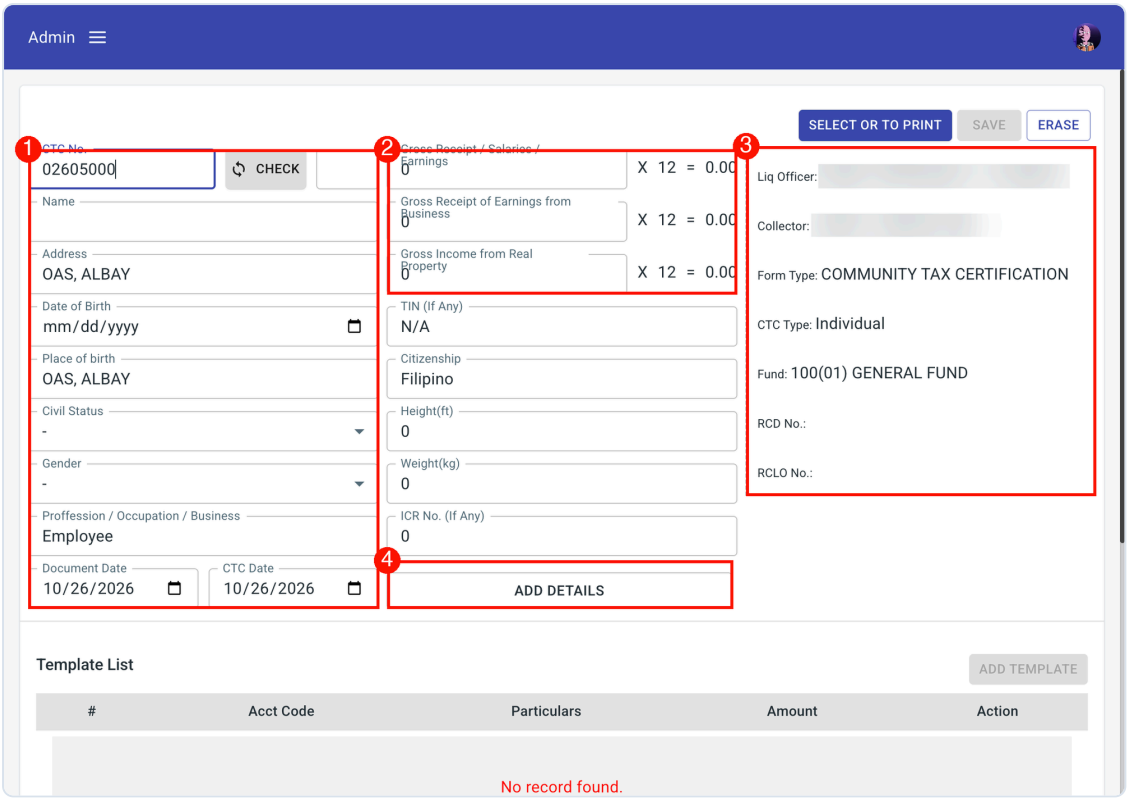

Figure 3.15. The CTC Individual form after checking an open number. 1 The person: name, address, date and place of birth, civil status, gender, occupation · 2 The incomes, each multiplied by 12 · 3 The booklet information · 4 Add Details. The officer names are blurred.

Box	What to do
Name, Address	The person. The address starts as *OAS, ALBAY*.
Date of birth, Place of birth, Citizenship	Date of birth is typed or chosen from a calendar. Place of birth starts as *OAS, ALBAY*, citizenship as *Filipino*.
Civil Status, Gender	Lists.
Profession / Occupation / Business	Starts as *Employee*.
TIN (If Any), ICR No. (If Any), Height (ft), Weight (kg)	TIN starts as *N/A*, the others as 0.
Gross Receipt / Salaries / Earnings; Gross Receipt of Earnings from Business; Gross Income from Real Property	The yearly figures. The page shows each one multiplied by 12 with the result beside it.
Document Date, CTC Date	Start as today's date.

Choose the details with **Add Details** and add the accounts with **Add Template**. The question is `Do you want to add the CTC Ind template?`. `CTC Ind created successfully` follows the save,

and Erase asks `Are you sure to delete this CTC Ind?` and shows `CTC Ind deleted successfully`. This page also has an **Erase** button beside Save.

3.7 Community Tax Certificate(CTC) - Corp

This page makes a community tax certificate for a company. It works like the CTC Ind page, with a **CTC No.** box, a **Check** button and the Template List and Check List.

> **Click the Check button first.** Type the number in the CTC No. box and click the **Check** button (or press **Ctrl+Enter**). The form window then opens below it. Nothing can be filled in before you click Check.

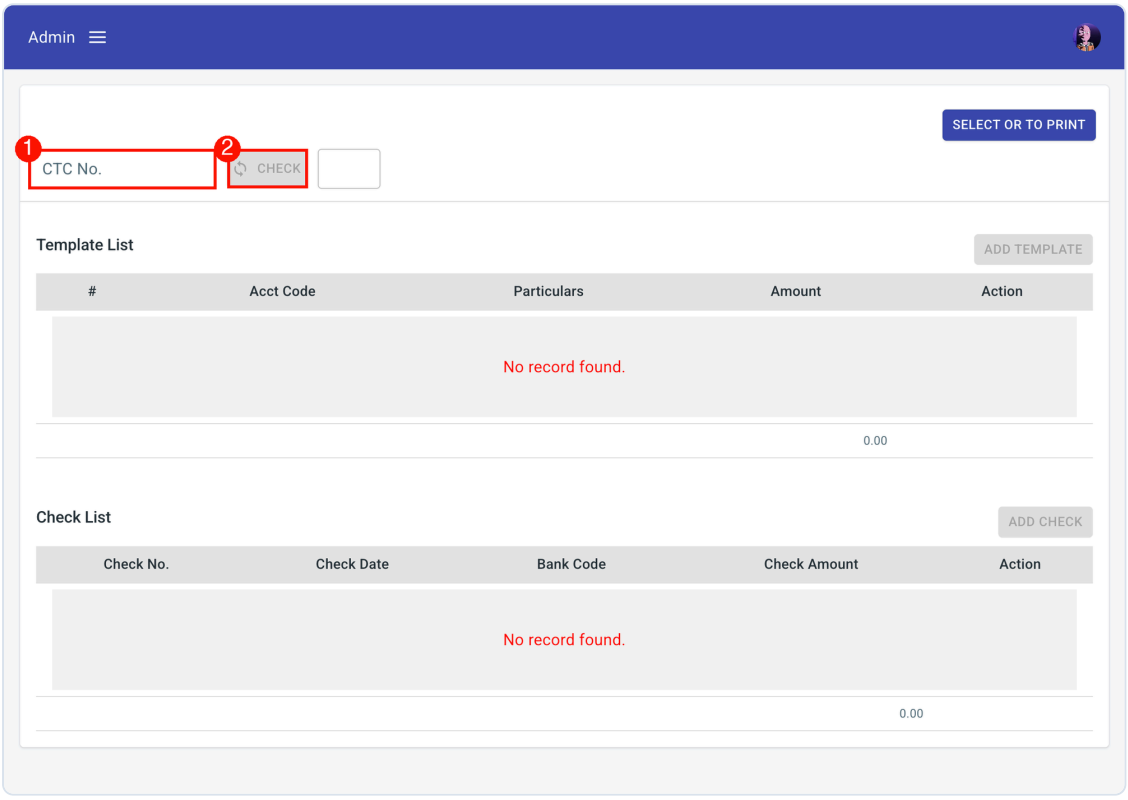

Figure 3.16. The CTC Corporation page when it opens. 1 CTC No. · 2 Check.

A new number opens a form with these boxes (from the code): **Company's Name**, **Place of Business**, **Kind of Organization**, **Kind/Nature of Business**, **Place of Incorporation**, **Date of Reg/Incorporation**, **TIN (If Any)**, **Assessed Value of Real Property**, **Gross Receipts / Salaries / Earnings**, **Document Date** and **CTC Date**, and the gray box of the booklet. The messages are `Do you want to add the CTC Corp template?`, `CTC Corp created successfully`, `CTC Corp cancelled successfully`, `Are you sure to delete this CTC Corp?` and `CTC Corp deleted successfully`.

3.8 Burial Permit and Fee Receipt

This page makes the official receipt for a burial permit. It uses the form type *MUNICIPAL BURIAL PERMIT AND FEE RECEIPT*. It works like the Issuance page, with the **OR No.** box, **Check**, **Add Template** and **Add Check**.

> **Click the Check button first.** Type the number in the OR No. box and click the **Check** button (or press **Ctrl+Enter**). The form window then opens below it. Nothing can be filled in before you click Check.

The form (from the code) has the boxes **Payee (S/F/M)**, **Gender**, **Deceased Name (S/F/M)**, **Deceased Gender**, **Nationality**, **Cause Death**, **Date Death** (with **Day**, **Month** and **Year**), **Cemetery** or **Name of Cemetery** (the cemetery list of Section 2.8), **Document Date** and **OR Date**. The messages are `Burial Permit created successfully`, `Are you sure to delete this burial?` and `Burial deleted successfully`.

3.9 Online Request

This page shows the requests that people made online (for example a burial permit) and are waiting to be paid at the treasury. The list shows the **Payor#**, the **Service Type** and an eye icon. Type in **Search payor** to find one. **Scan QR** opens a request by scanning its QR code, and **Upload QR** opens it from a picture of the QR code.

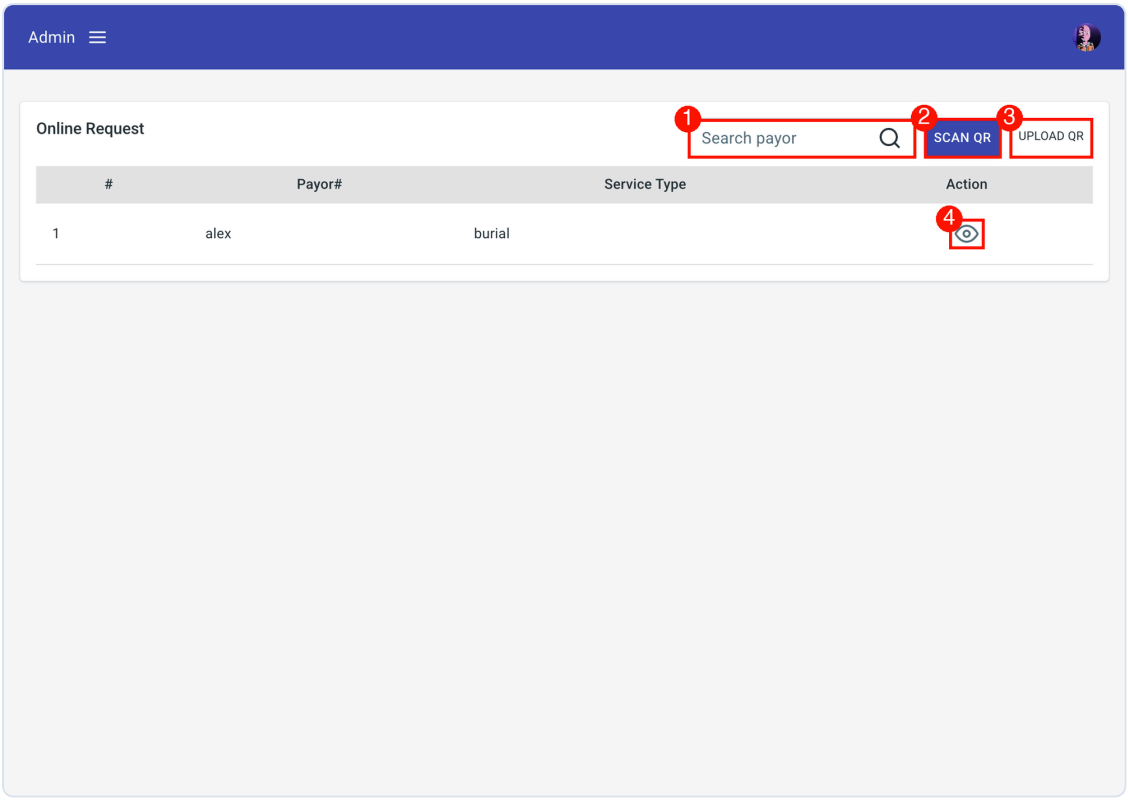

Figure 3.17. The Online Request page. 1 Search payor · 2 Scan QR · 3 Upload QR · 4 The eye icon, which opens the request.

Click the eye icon to open the **Request Details** window. It shows the **Request Information** (the payee, the sex, the deceased, the cemetery, the dates, the nationality and the cause of death) and the **Breakdown**, which is a table of the accounts with their amounts and a total.

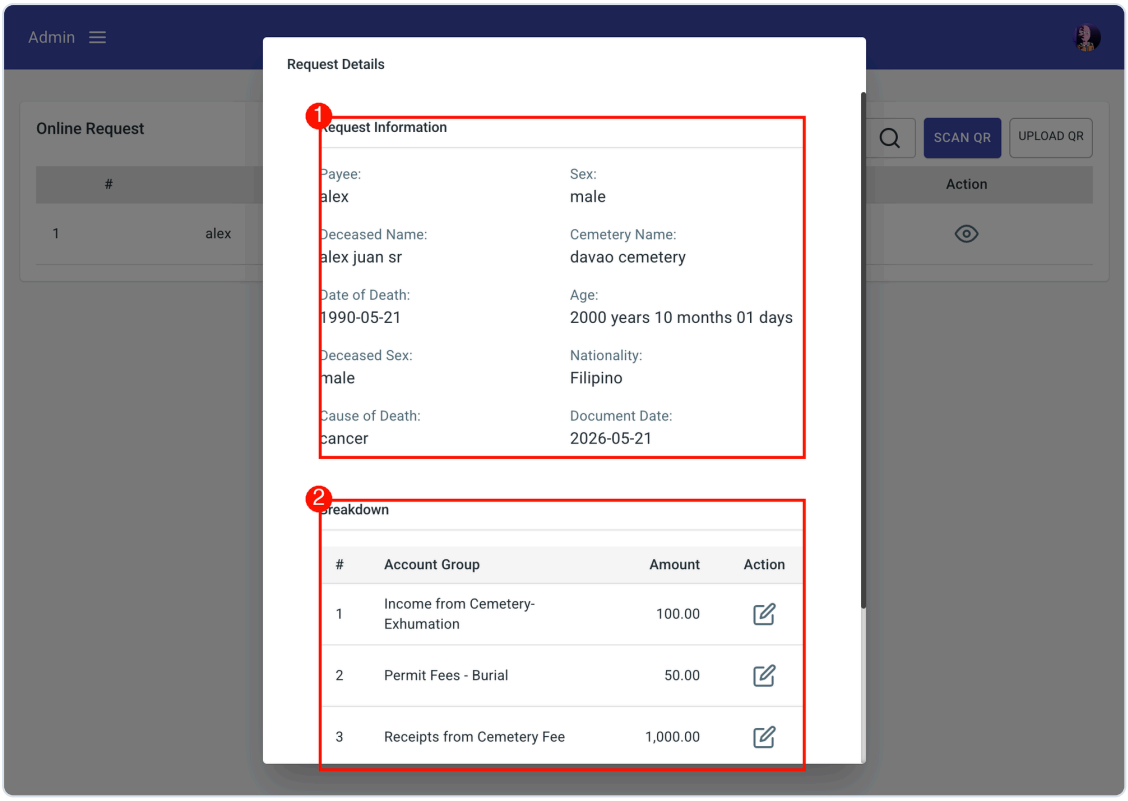

Figure 3.18. The Request Details window. 1 Request Information · 2 Breakdown.

Scroll down in the window. Each breakdown row has an **Edit** icon that opens **Editing Amount** to change the amount of that row; it shows `Template updated successfully`. Under the table are the **Reference No.** and the **Status**: Cancelled, Approved or Pending. Two buttons follow:

- **Set Payment:** opens the window **Set Payment**. Type the **OR No.** and the **OR Date** of the receipt that the person was given at the cashier, and click **Confirm Payment**. `Payment confirmed successfully` appears.
- **Upload Attachment:** adds a file to the request. `Attachment uploaded successfully` appears, and `Please select a file to upload` appears when no file was chosen.

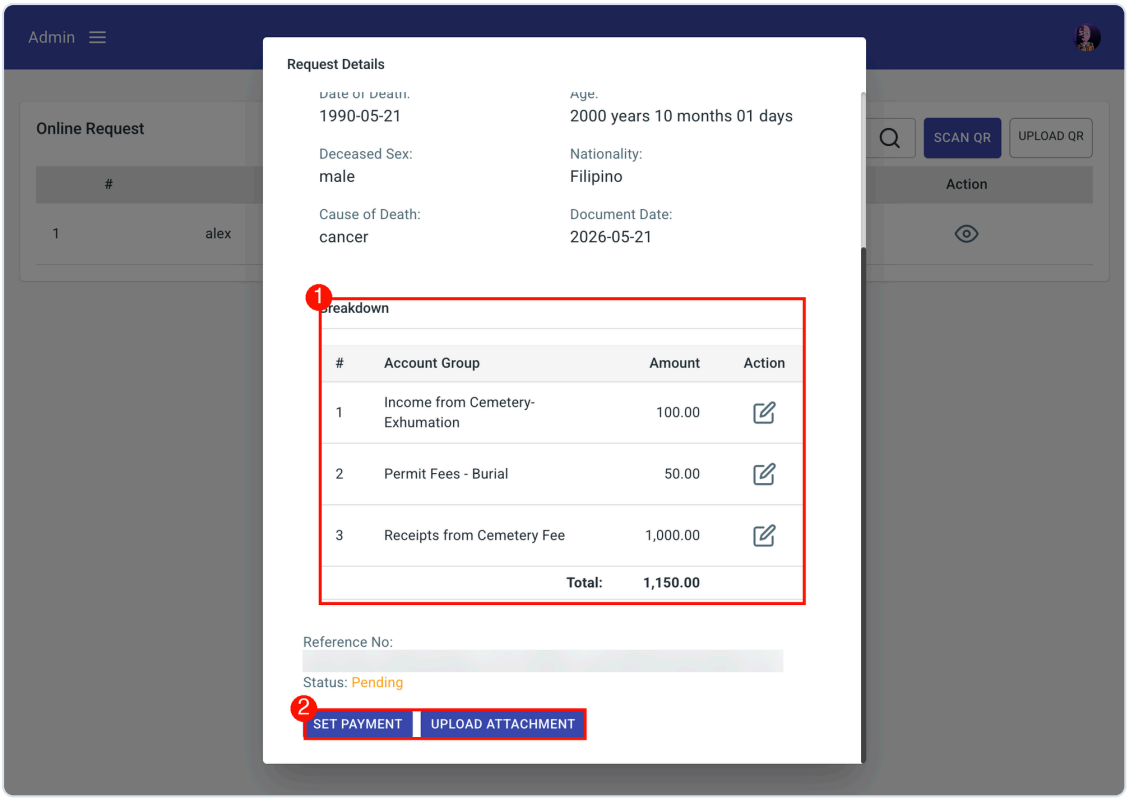

Figure 3.19. The Request Details window scrolled down. 1 The Breakdown with its Edit icons and the total · 2 Set Payment and Upload Attachment. The reference number is blurred. The request shown is a test record.

> **CAUTION.** Set Payment marks the request as paid. Press it only after the person has paid. The window **Set Payment** itself was not opened while this manual was prepared; it is described from the code.

3.10 Disbursement Voucher(DV)

This page records a payment that the municipality makes (for example to a supplier) on a disbursement voucher. The left side lists the vouchers. The right side has tabs for the voucher that is selected: **Header**, **Checks Entry**, **Query**, **Query Result**, **RCI** and **Preview Print**.

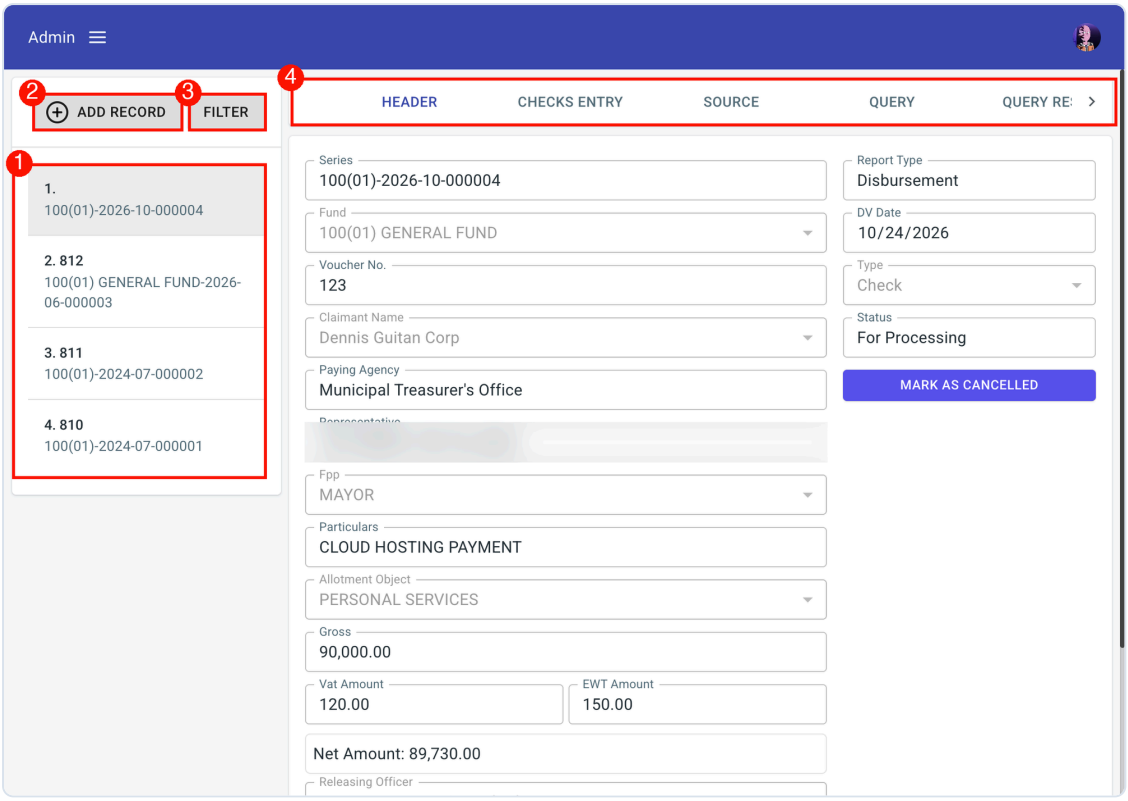

Figure 3.20. The Disbursement Voucher page. 1 The list of vouchers (the check number and the series) · 2 Add Record · 3 Filter · 4 The tabs. The representative is blurred.

3.10.1 The voucher list, Filter and Add Record

- **The list:** each row shows a number (the check number once there is one) and the **series**, for example *100(01)-2026-10-000004*: fund, year, month and a running number. Click a row to open that voucher.
- **Filter:** opens **Filter To Display**. Choose the **Fund** and the **Year** (a year and month), then click **Retrieve**. Retrieve stays gray until both are chosen.
- **Add Record:** shows an empty form titled **Add Record** (Section 3.10.2). Nothing is saved until you click **Create**.

3.10.2 Header and Add Record

The **Header** tab has the main details of the voucher. In a new record fill in:

- **Fund** (list of fund codes), **Voucher No.** and **Claimant Name** (list of the payees of the Creditor/Payee page, Section 2.6.8).
- **Paying Agency** (starts as *Municipal Treasurer's Office*), **Representative** and **Particulars** (what is paid).
- **Fpp** (list: MAYOR or VICE MAYOR) and **Allotment Object** (list of the allotment classes).
- **Gross**, **Vat Amount** and **EWT Amount**. TIS shows the **Net Amount** below them.
- **Releasing Officer** (list of the officers of the LiqDisb Collector page) and **Check Description**.

- On the right: **Report No.**, **Report Type** (*Disbursement*), **DV Date** (starts as today), **Type** and **Status** (*For Processing*).

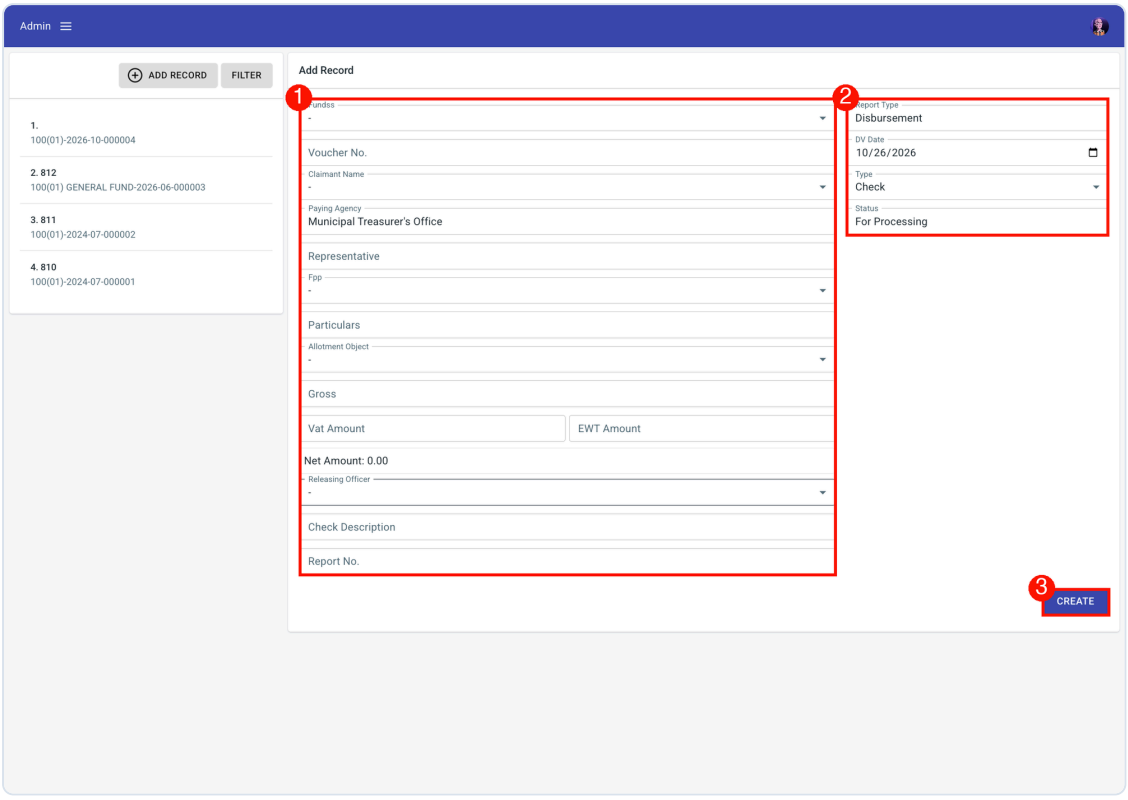

Figure 3.21. The Add Record form of the Disbursement Voucher. The whole form. 1 The boxes of the voucher · 2 Report Type, DV Date, Type and Status · 3 The Create button.

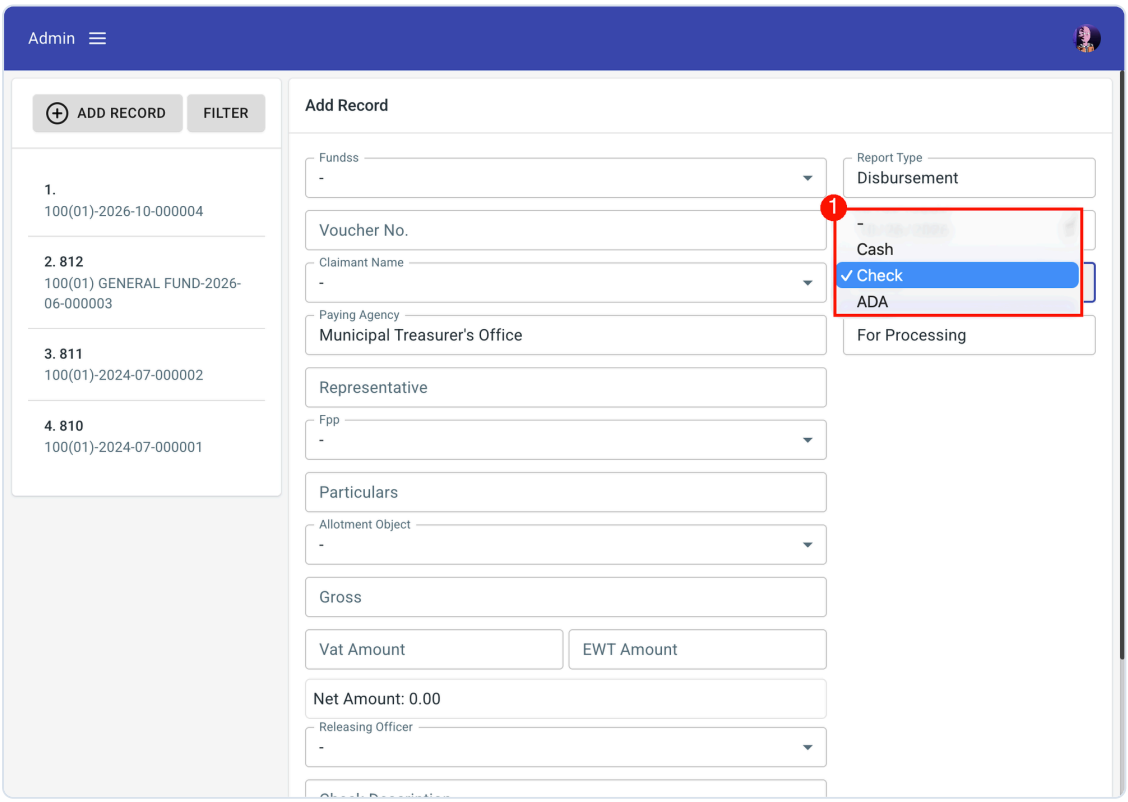

Figure 3.22. The Type list. 1 Cash, Check and ADA.

When the form is complete, click the Create button at the bottom right of the form (boxed 3 in the figure) to save the voucher. `Disbursement created successfully` appears. On a saved voucher, the button **Mark As Cancelled** changes the status from *For Processing* to *Cancelled* (and back). `Status updated to Cancelled` appears, or `Failed to update status` when it fails.

> **CAUTION.** Mark As Cancelled does not ask a question first. Press it only when you mean it.

3.10.3 Checks Entry

This tab lists the checks of the voucher. Click **Add** to open **Add Check Entry**. Type the **Check No.** and the **Obligation No.** TIS looks the check number up in the check booklets of the Referential menu (Section 2.6.2). `Check No. not found!` appears when the number is not in a booklet and `Check No. already used!` when it was used. `Check entry created successfully` follows a good entry.

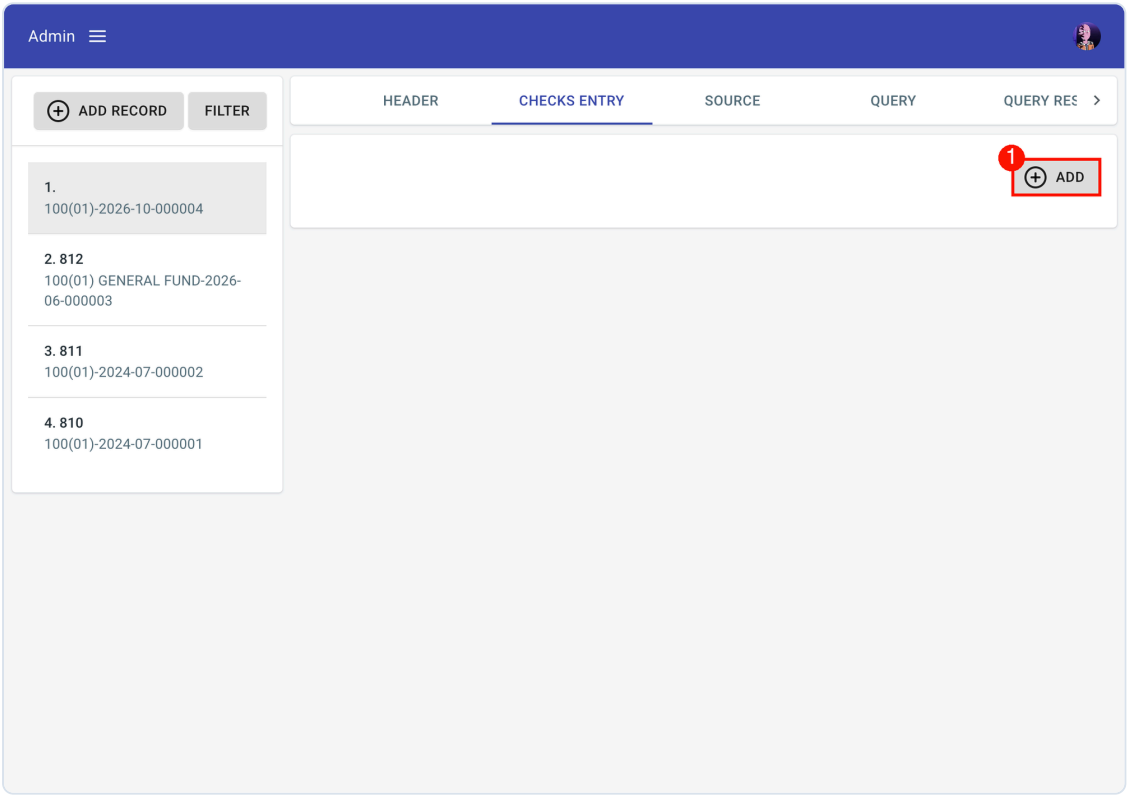

Figure 3.23. The Checks Entry tab. 1 Add.

3.10.4 Query and Query Result

The **Query** tab searches the vouchers. **Filter** opens **Filter To Display** to choose what to look for, **Retrieve Query** loads the vouchers and **Clear Query** empties the table. The columns are **Released**, **Fund**, **DV Date**, **Name**, **Voucher No.**, **Obligation No.**, **Check Number**, **Particulars**, **Total**, **Tax** and **Gross**. Scroll the table sideways to see all of them. The **Query Result** tab shows the result of the query.

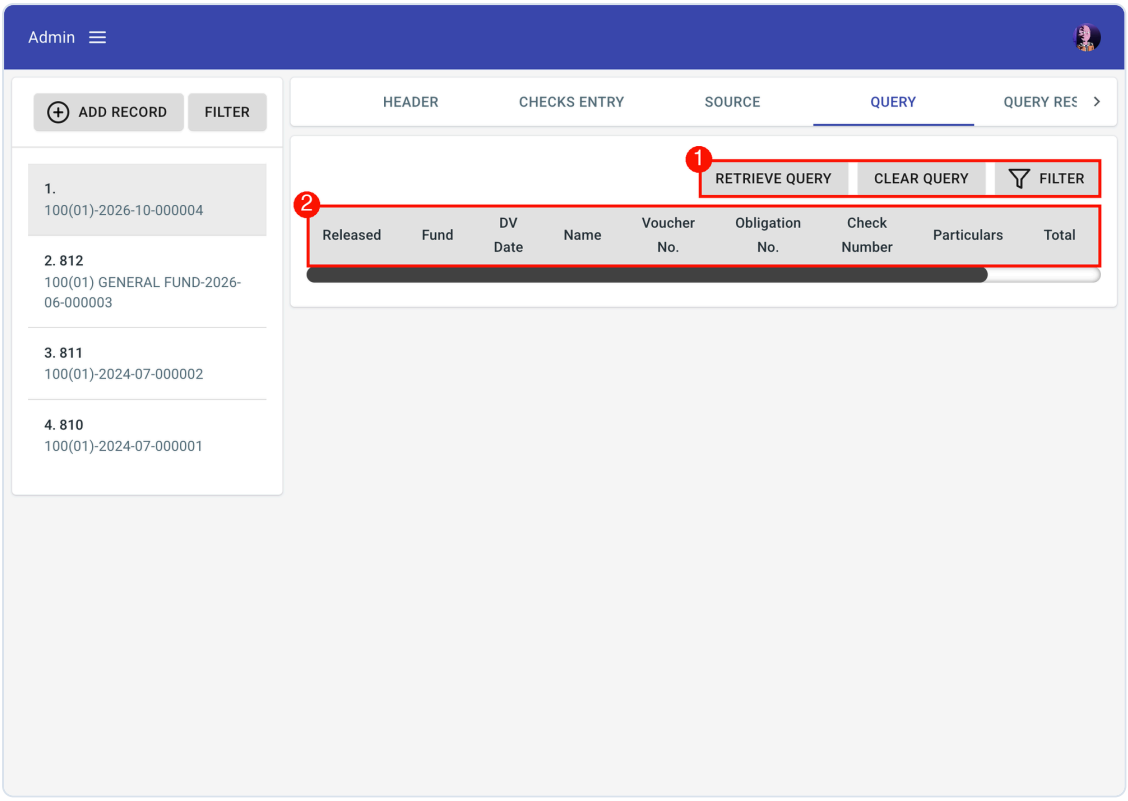

Figure 3.24. The Query tab. 1 Retrieve Query, Clear Query and Filter · 2 The columns of the result.

3.10.5 RCI: Report of Checks Issued

The **RCI** tab shows the **Report of Checks Issued** for the Municipal Government of Oas. Click **Filter** and choose the **Date From**, the **Date To** and the **Fund** (or *All Funds*). `Date from and date to are required` and `Date from cannot be after date to` appear when the dates are wrong, and `Failed to retrieve RCI records` when the report cannot be loaded. The report lists each check (date, serial number, DV or payroll number, office, payee, nature of payment and amount) and ends with the certification of the municipal treasurer. The treasurer's name comes from the **active** record of the Treasurer page (Section 2.6.12). **Export** saves the report as a file and **Print** prints it.

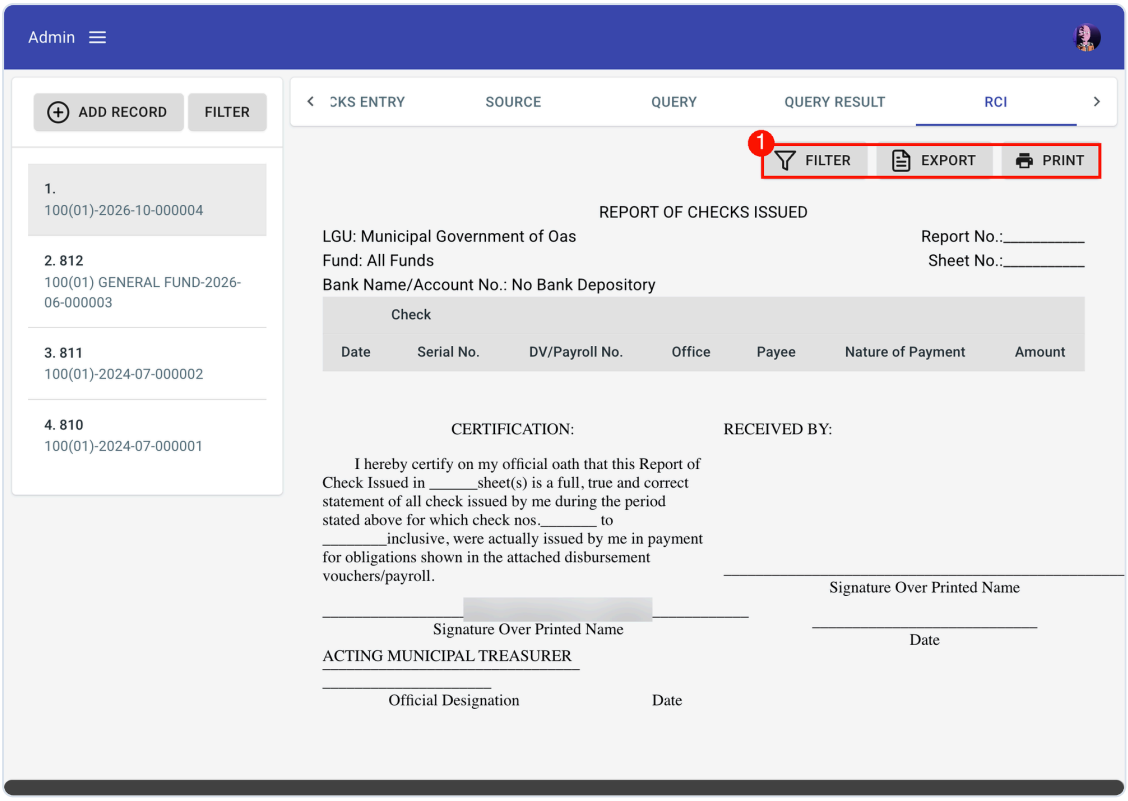

Figure 3.25. The RCI tab. 1 Filter, Export and Print. The name of the treasurer is blurred.

3.10.6 Preview Print

The **Preview Print** tab shows the printed form of the voucher: **Republic of the Philippines, Province of Albay, Municipal Government of Oas**, the voucher number, the mode of payment, the payee, the address, the explanation, the amount and four signature blocks: **A. Certified** (the accountant), **B. Certified** (the treasurer), **C. Approved for payment** (the mayor) and **D. Received Payment**. The three names come from the **active** records of the Accountant, Treasurer and Mayor pages of the Referential menu (Section 2.6.11 to 2.6.13). Click **Print** to print the voucher.

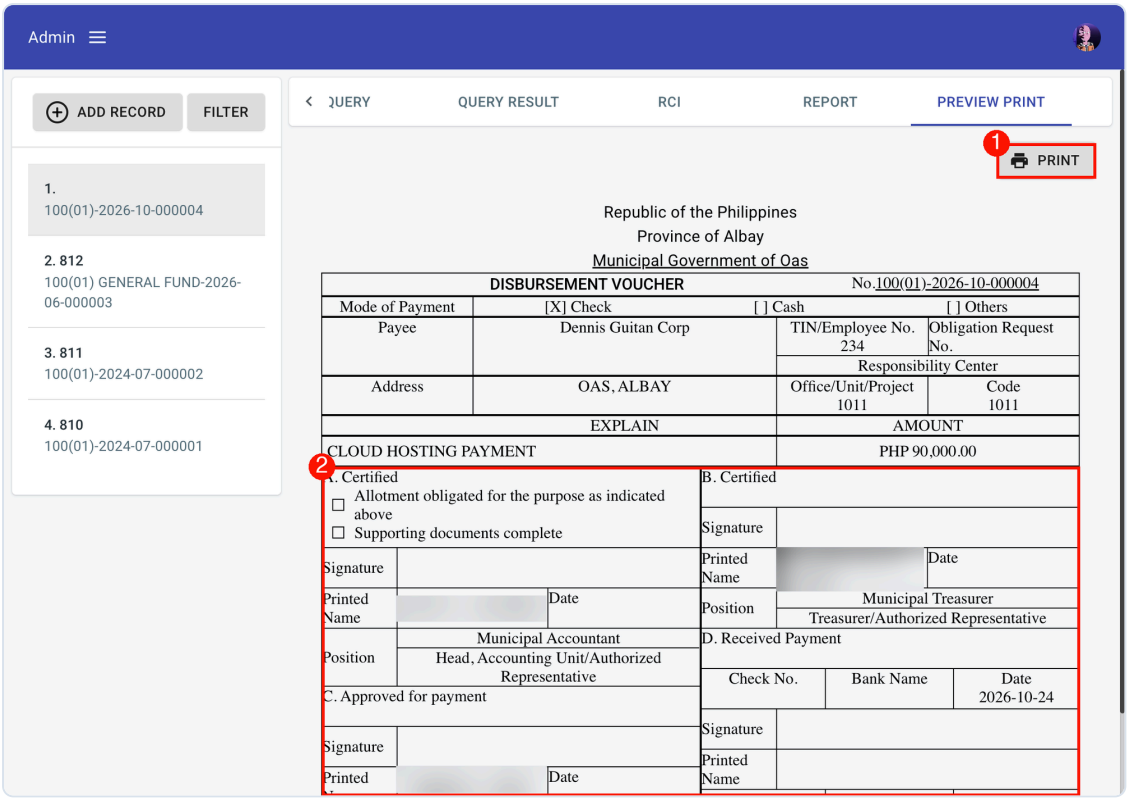

Figure 3.26. The Preview Print tab. 1 Print · 2 The signature blocks A, B, C and D. The names are blurred.

> **Keep the Referential lists current.** When the accountant, the treasurer or the mayor changes, set the new person as **Active** on their Referential page. If you do not, the vouchers and the reports print the old name.

SECTION 4

Process

The Process menu closes the collections of a period. **RCD Processing** gathers the receipts of one collector into a **Report of Collection and Deposits (RCD)**. **RCLO Processing** then gathers the RCDs of a fund into a **Report of Collection by Liquidating Officer (RCLO)**. Each step gives the report a number.

> **Reading the colored boxes.** Messages of TIS are shown in boxes: `gray` for a question or notice, `green` for success, `red` for an error and `yellow` for a warning.

In this section

4.1 The Process menu and the order of work

4.2 RCD Processing

- 4.2.1 The Process RCD window
- 4.2.2 Retrieve: read before you process
- 4.2.3 Process
- 4.2.4 The list of RCDs and Remove

4.3 RCLO Processing

- 4.3.1 The Process RCLO window
- 4.3.2 Retrieve and Process
- 4.3.3 The list of RCLOs and Remove

4.1 The Process menu and the order of work

Open the sidebar and click **Process**. It has two pages: **Report of Collection and Deposits(RCD) Processing** and **Report of Collection by Liquidating Officer(RCLO) Processing**.

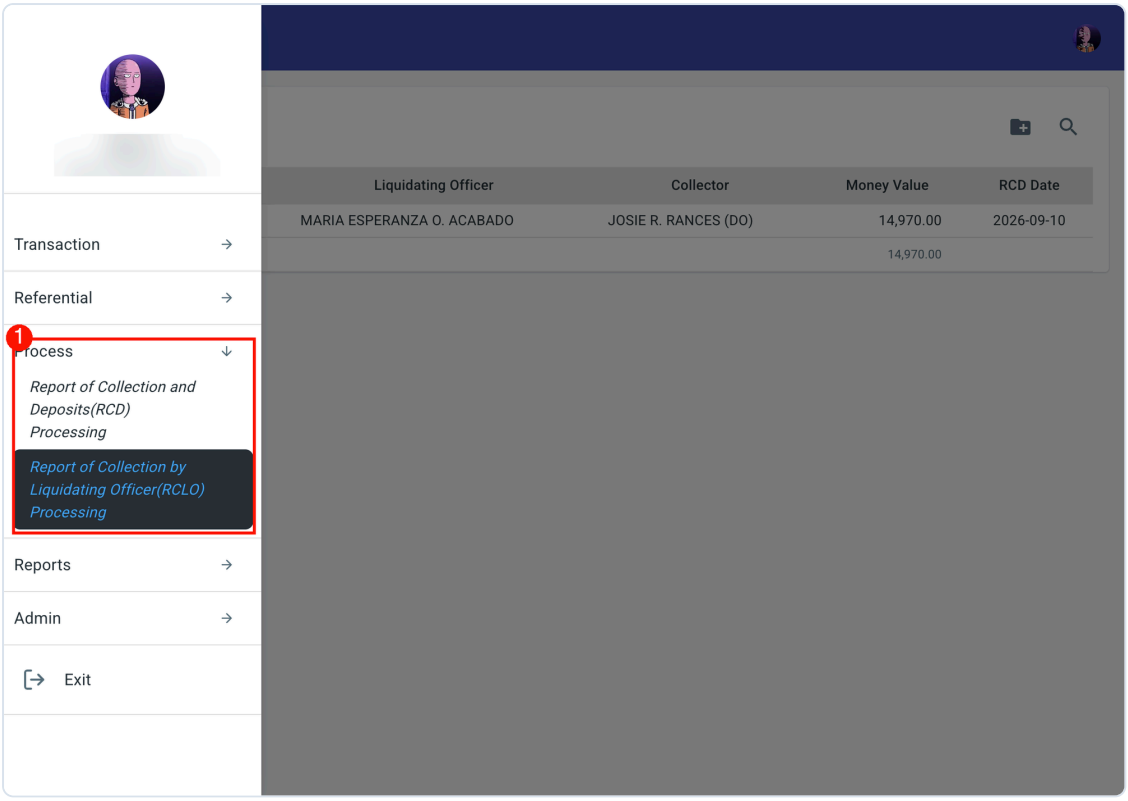

Figure 4.1. The sidebar with Process open. 1 The two Process pages. The name and email are blurred.

The two steps follow each other:

1. **Receipts are issued** on the Transaction pages (Section 3.2). Each receipt comes from a booklet of 50 (Section 2.6.1).
2. **RCD Processing** (Section 4.2) takes the receipts of one collector, one fund and one kind of form in a range of dates, adds up the money and gives them an **RCD No.**
3. **RCLO Processing** (Section 4.3) takes the RCDs of one fund in a range of dates and gives them an **RCLO No.**

Both pages also feed the reports of the Reports menu.

4.2 RCD Processing

This page processes the receipts of one collector into an RCD. When it opens, it shows a table and two icons at the top right: the **folder icon with a plus sign** opens the window **PROCESS RCD DIALOG**, and the **magnifying glass** opens the list of RCDs that were already made. The table has no row until you retrieve one, and says `No record found.`

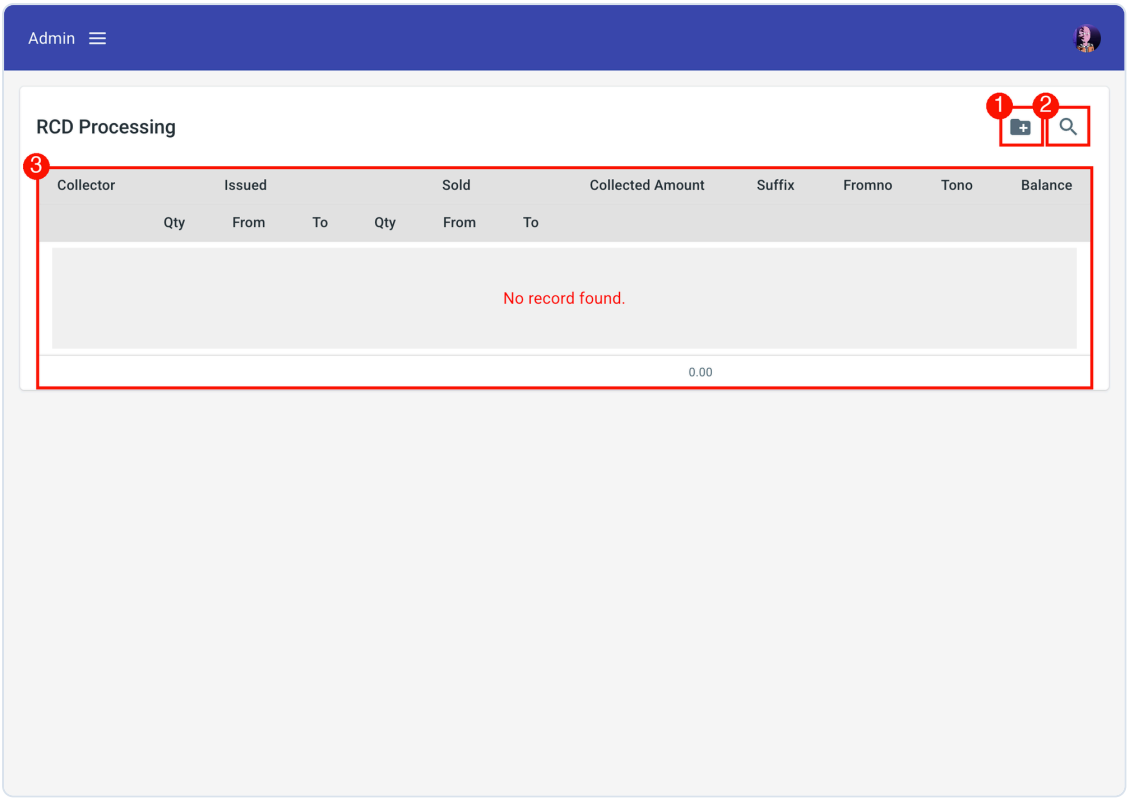

Figure 4.2. The RCD Processing page when it opens. 1 The folder icon: process an RCD · 2 The magnifying glass: the list of RCDs · 3 The table.

4.2.1 The Process RCD window

Click the folder icon. Fill in the boxes of **PROCESS RCD DIALOG** from top to bottom:

Box	What to do
Liq Officer	Required. A list of the liquidating officers.
Collector	Required. A list of the collectors, each shown as the name and the code. The list follows your assigned personnel (Section 1.2.6): only the collectors of type Collector that are assigned to you appear.
Fund Code	Required. A list of the fund codes (100(01), 100(91), 100(92), 200, 200(01), 300, 300(13), 300(14), 300(15) and 400).
Form Code	Required. The kind of receipt, for example *AF#51 - ACCOUNTABLE FORM # 51*.
From OR Date and To OR Date	The first and the last date of the receipts. Both start as today. Change From OR Date to go back in time.
RCD Date	The date of the RCD. It starts as today.
RCD No.	Empty at first. TIS fills it in after you click Process.

The two buttons at the bottom are gray until the required boxes are filled in. **Retrieve** shows the receipts. **Process** makes the RCD.

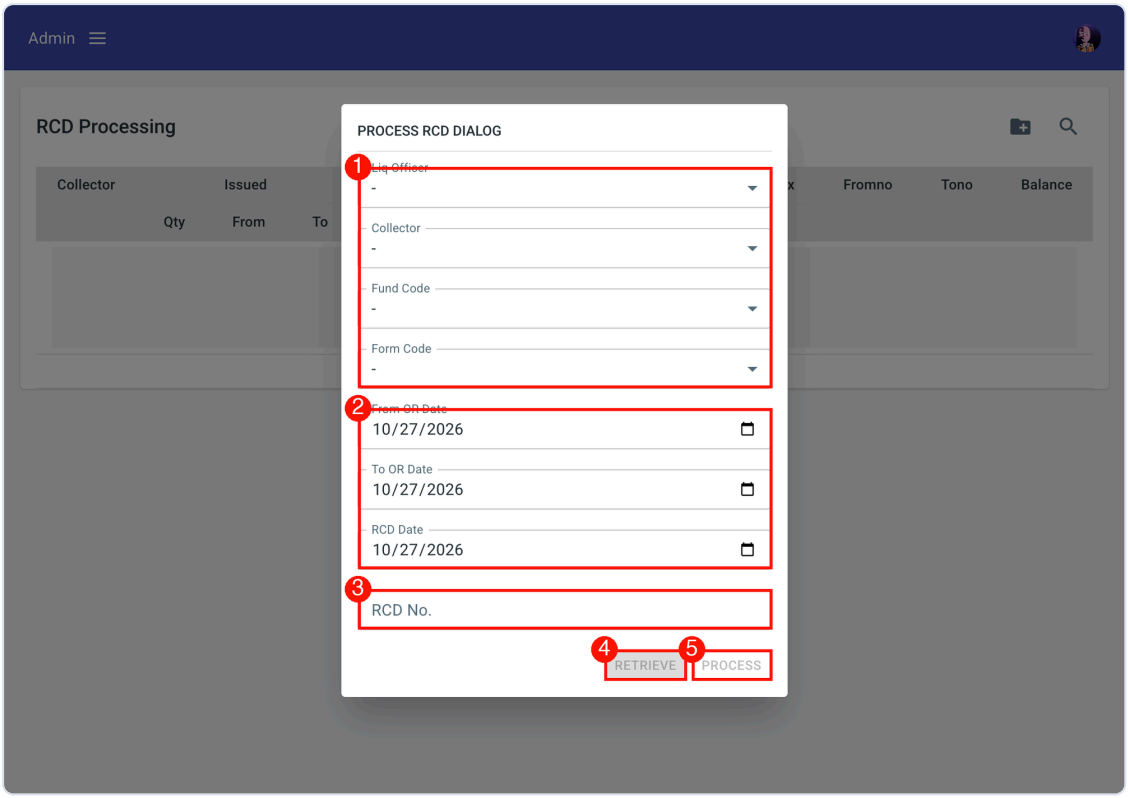

Figure 4.3. The Process RCD window. 1 Liq Officer, Collector, Fund Code and Form Code · 2 From OR Date, To OR Date and RCD Date · 3 RCD No. · 4 Retrieve · 5 Process.

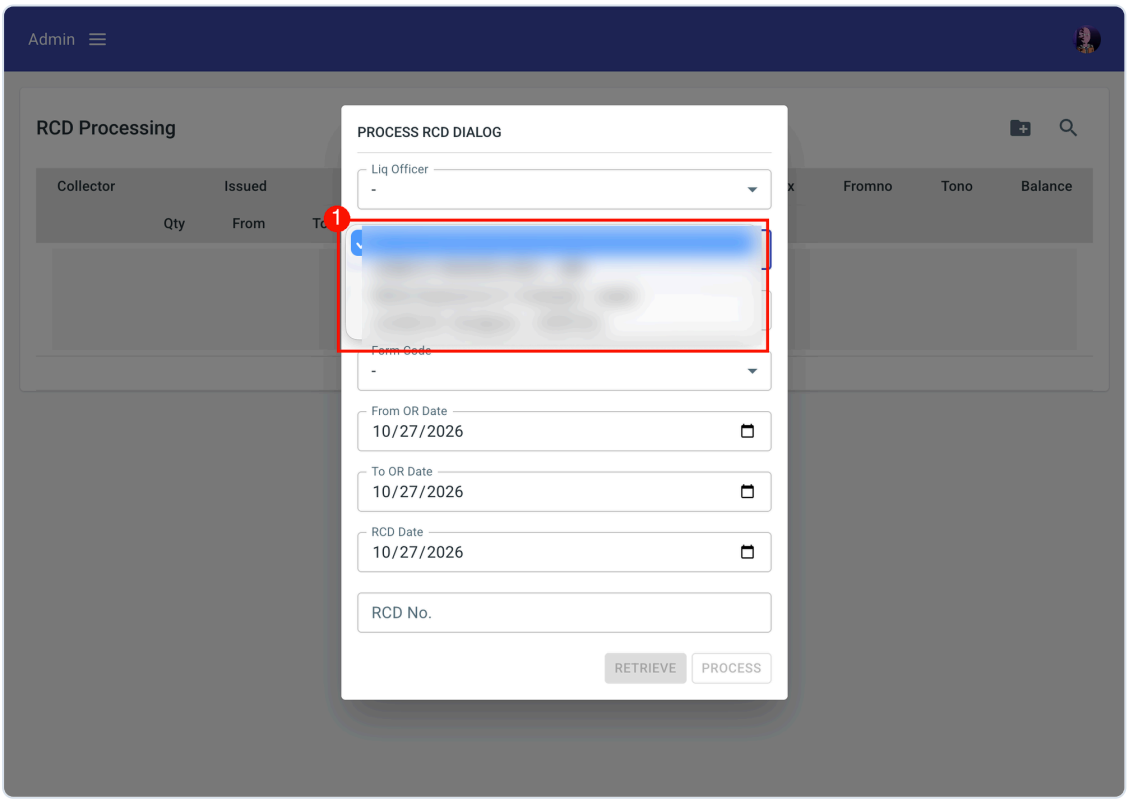

Figure 4.4. The Collector list. 1 The collectors that you may choose. The names are blurred.

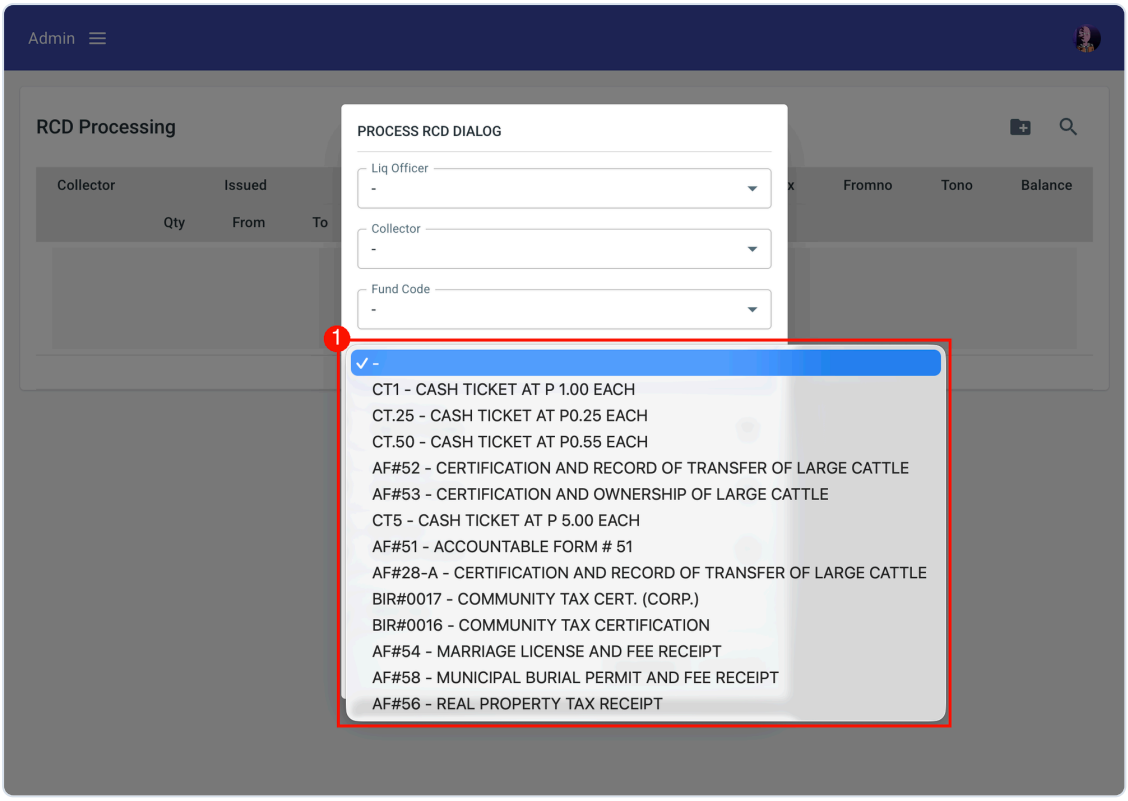

Figure 4.5. The Form Code list. 1 The kinds of receipt, from the cash tickets to the real property tax receipt.

4.2.2 Retrieve: read before you process

Click **Retrieve**. TIS fills the table of the page behind the window. It only reads, it does not make the RCD. Check the table first. The columns are:

- **Collector** and, under **Issued**, the booklet that was given to the collector: **Qty**, **From** and **To**. Every booklet has 50 receipts.
- Under **Sold**: how many receipts were used (**Qty**) and the first and last number that were used (**From** and **To**).
- **Collected Amount:** the money collected with those receipts.
- **Suffix**, **Fromno** and **Tono**: the receipt suffix and the first and last number of the booklet.
- **Balance:** the receipts that were not used yet (50 minus the Qty sold).

The total of the Collected Amount is shown below the table. For example, one booklet of 50 receipts, number 4099451 to 4099500, shows 49 sold from 4099452 to 4099500, an amount of 5,310.00 and a balance of 1.

Figure 4.6. The table after Retrieve. 1 Issued: the booklet · 2 Sold: the receipts that were used · 3 Collected Amount · 4 Balance. The collector names are blurred.

4.2.3 Process

When the table is right, click **Process** in the window. TIS gives the RCD a number and fills the **RCD No.** box. The number is made of the fund code, the collector code, the RCD date and a running number, for example *100(01)JRR10212026029*: fund 100(01), collector JRR, 10/21/2026, number 029. `RCD No. updated successfully` appears.

Process then marks every receipt of the range (and its checks) with the RCD No. and the RCD date, so that the same receipt cannot go into another RCD. Receipts of other collectors, other funds or other forms are not touched.

> **CAUTION.** Process changes many receipts at once. Retrieve first and check the dates, the fund and the collector.

4.2.4 The list of RCDs and Remove

Click the magnifying glass to open the **RCD List**. It shows the **RCD Date**, the **RCD No.** and the **RCLO No.** of each RCD, with a **Remove** button. Type in **Search RCD No.** to find one. When there is none, `No RCD record` appears.

- An RCD that is already in an RCLO shows its RCLO No. and its **Remove** button is gray, so it cannot be removed.

- An RCD without an RCLO No. can be removed. TIS asks `Are you sure to delete this RCD?` **Yes** removes the RCD, and the receipts of that RCD become free again for a new RCD. `RCD deleted successfully` follows.

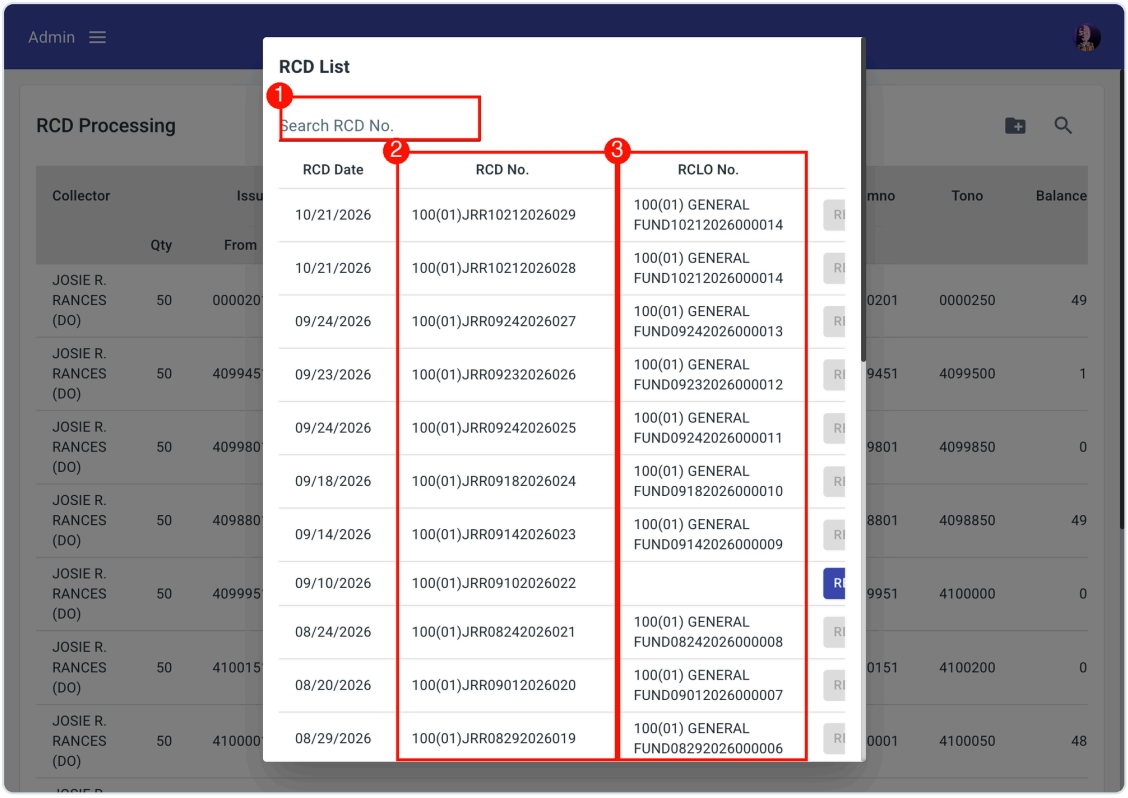

Figure 4.7. The RCD List. 1 Search RCD No. · 2 The RCD No. of each RCD · 3 The RCLO No. of each RCD (empty when the RCD is not in an RCLO yet).

4.3 RCLO Processing

This page gathers RCDs into an RCLO. It looks like RCD Processing: a table, the folder icon (**PROCESS RCLO DIALOG**) and the magnifying glass (the list of RCLOs). Its columns are **RCD No.**, **Liquidating Officer**, **Collector**, **Money Value** and **RCD Date**.

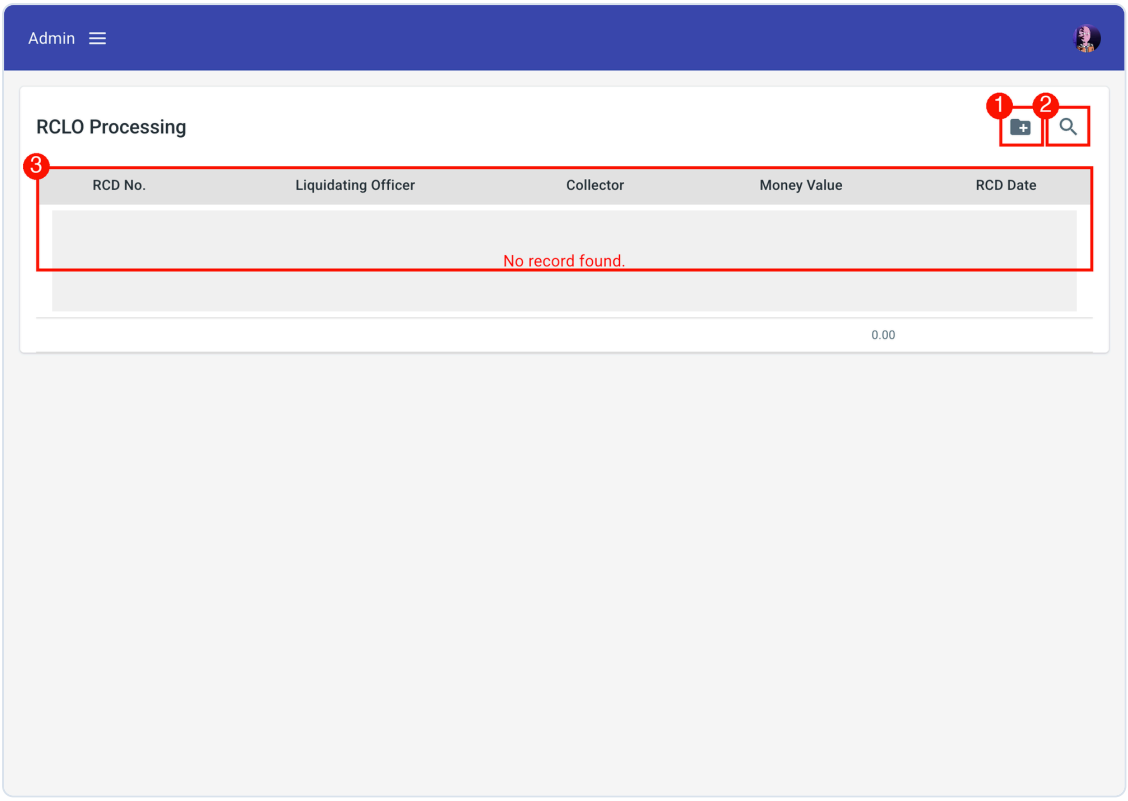

Figure 4.8. The RCLO Processing page when it opens. 1 The folder icon: process an RCLO · 2 The magnifying glass: the list of RCLOs · 3 The table.

4.3.1 The Process RCLO window

Click the folder icon. The window **PROCESS RCLO DIALOG** has fewer boxes than the RCD window:

- **Fund Code** (required): the fund of the RCDs.
- **From RCD Date** and **To RCD Date**: the first and the last date of the RCDs. Both start as today.
- **RCLO Date**: the date of the RCLO. It starts as today.
- **RCLO No.**: empty until you click Process.
- **Retrieve** and **Process**, gray until a fund is chosen.

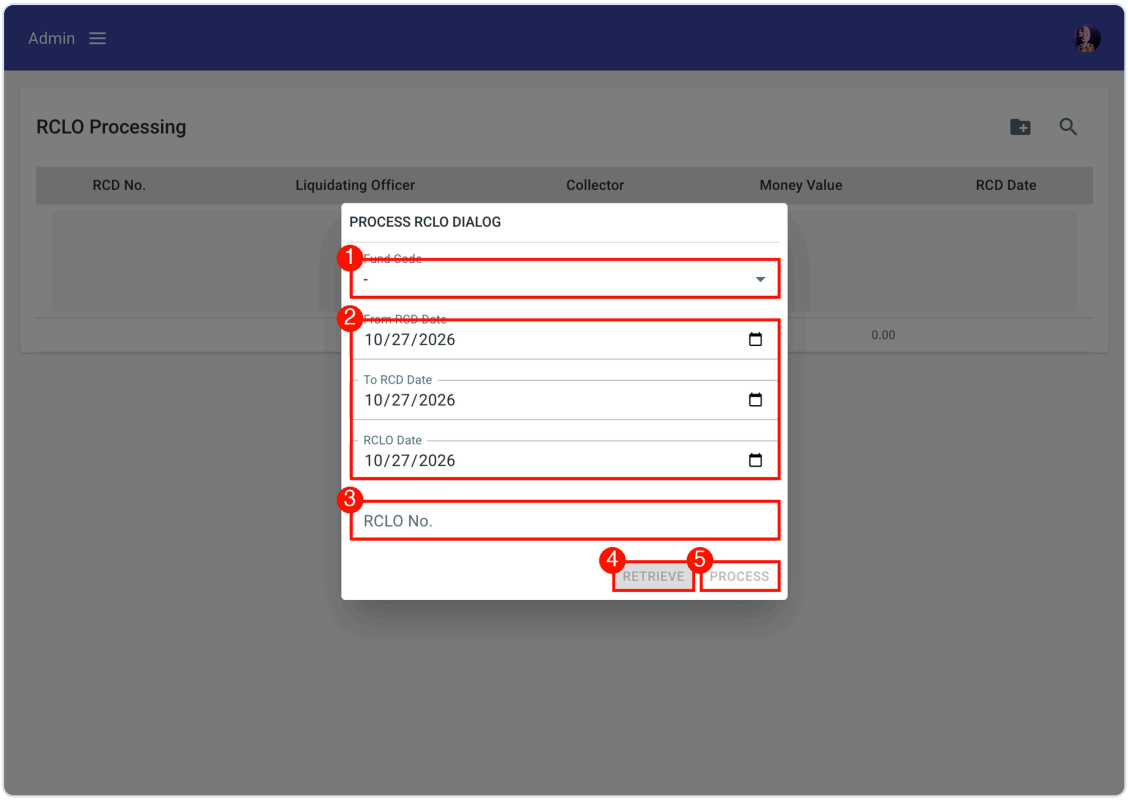

Figure 4.9. The Process RCLO window. 1 Fund Code · 2 From RCD Date, To RCD Date and RCLO Date · 3 RCLO No. · 4 Retrieve · 5 Process.

4.3.2 Retrieve and Process

> **RCD and RCLO are not the same report. RCD** means **Report of Collection and Deposit**. **RCLO** means **Report of Collection by Liquidating Officer**. The RCD is the smaller report and the RCLO is built from RCDs.

	RCD (Section 4.2)	RCLO (Section 4.3)
Full name	Report of Collection and Deposit	Report of Collection by Liquidating Officer
What it processes	The **official receipts** of one collector, one fund and one kind of form, in a range of receipt dates (From OR Date and To OR Date).	The **RCDs** of one fund, in a range of RCD dates (From RCD Date and To RCD Date). It does not look at single receipts.
What you choose	Liq Officer, Collector, Fund Code and Form Code.	Fund Code only.

	RCD (Section 4.2)	RCLO (Section 4.3)
What it makes	An **RCD No.** (fund, collector code, date and a running number), for example 100(01)JRR09102026022.	An **RCLO No.** (fund name, date and a running number), for example 100(01) GENERAL FUND09102026000010.
What is marked	Every receipt (and check) of the range receives the RCD No. and the RCD date.	Every RCD of the range receives the RCLO No. and the RCLO date.
The result on the page	One row for each booklet of the collector: issued, sold, collected amount and balance.	One row for each RCD: its number, the officer, the collector, the money value and the date, with the total.
Who it covers	One collector.	All the collectors of the liquidating officer under the fund.
Printed report	Report of Collection and Deposit (Section 5.4).	Report of Collection by Liquidating Officer, with the deposits (Section 5.5).
Order	First.	Second, after the RCDs exist. An RCD in an RCLO can no longer be removed.

Choose the fund and the first date, then click **Retrieve**. The page behind the window lists the RCDs that are not yet in an RCLO: the RCD No., the liquidating officer, the collector, the money value of each RCD and the RCD date, with the total below. In the example, one RCD, *100(01)JRR09102026022* of 09/10/2026, has a money value of 14,970.00.

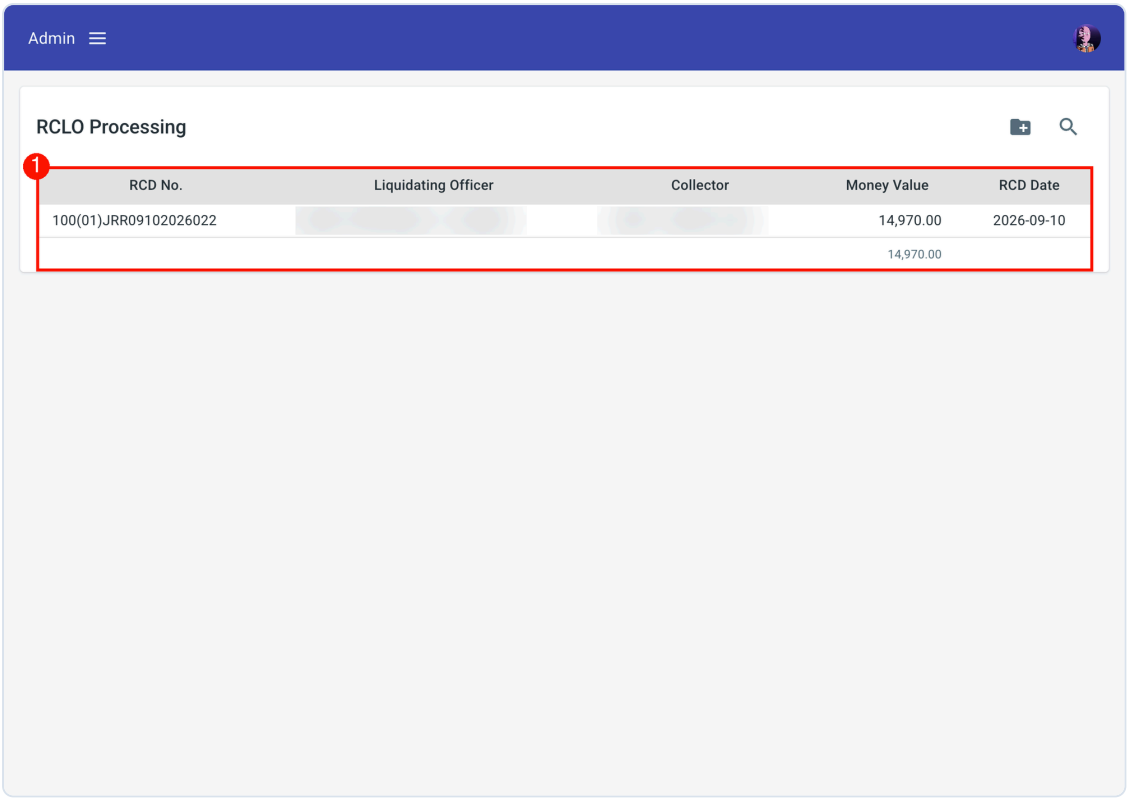

Figure 4.10. The table after Retrieve. 1 The RCDs that are not in an RCLO yet, and their total. The officer and collector names are blurred.

When the table is right, click **Process**. TIS gives the RCLO a number (the fund name, the RCLO date and a running number, for example *100(01) GENERAL FUND10212026000014*) and fills the **RCLO No.** box. `RCLO no. updated successfully` appears. Every RCD of the table receives the RCLO No. and the RCLO date.

> **CAUTION.** Process makes the RCDs part of an RCLO and locks them: an RCD with an RCLO No. can no longer be removed from RCD Processing.

4.3.3 The list of RCLOs and Remove

Click the magnifying glass to open the **RCLO List**. It shows the **RCLO Date** and the **RCLO No.** of each RCLO, with a **Remove** button. Type in **Search RCLO No.** to find one. When there is none, `No RCLO record` appears. **Remove** asks `Are you sure to delete this RCLO?` **Yes** removes the RCLO and frees its RCDs, which can then go into another RCLO. `RCLO deleted successfully` follows.

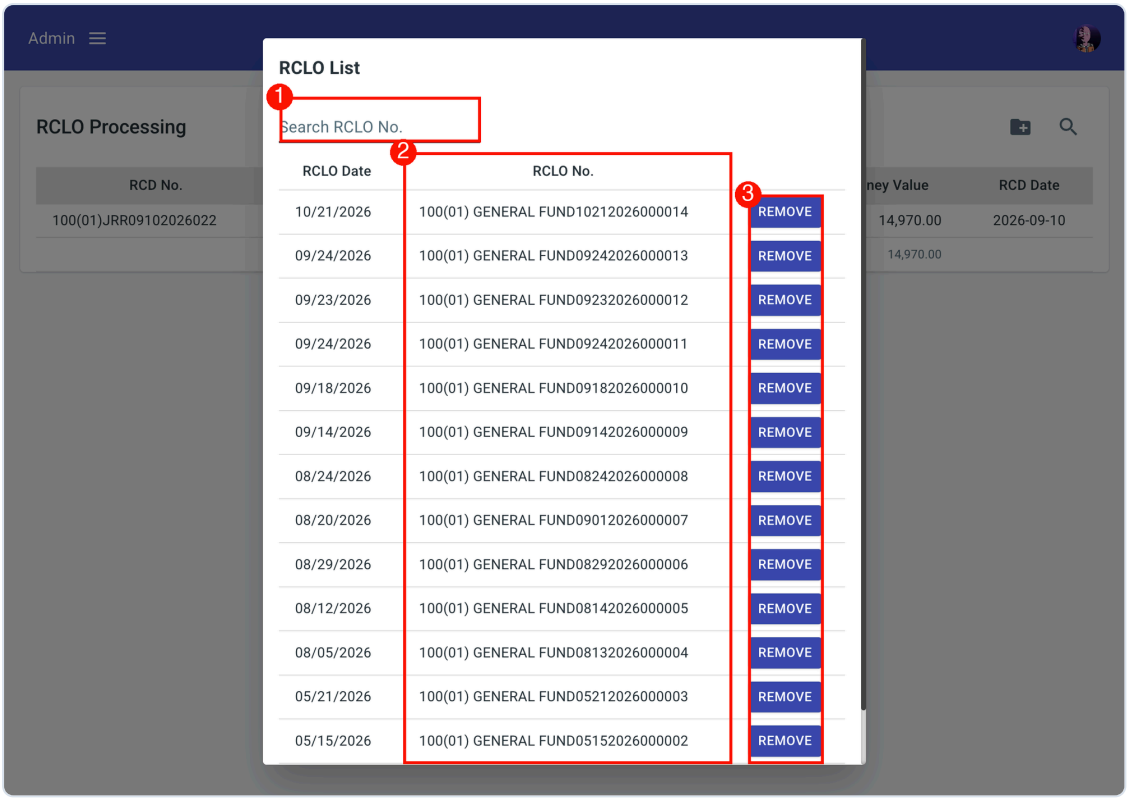

Figure 4.11. The RCLO List. 1 Search RCLO No. · 2 The RCLO No. of each RCLO · 3 The Remove buttons.

> **The two reports.** The printed reports of these numbers are in the Reports menu: **Report of Collection and Deposit(RCD)** and **Report of Collection by Liquidating Officer(RCLO)**.

SECTION 5

Reports

The Reports menu shows and prints the official reports of the treasury. Most of them are made from the receipts and numbers of the earlier sections: the forms report on the booklets, the Abstract of Collection reports on the receipts, and the RCD and RCLO reports show the numbers made in Process.

> **Reading the colored boxes.** Messages of TIS are shown in boxes: `gray` for a question or notice, `green` for success, `red` for an error and `yellow` for a warning.

In this section

5.1 The Reports menu

5.2 Accountable Forms

- 5.2.1 Report of Accountability for Accountable Forms
- 5.2.2 Consolidated Report of Accountability for Accountable Forms

5.3 Abstract of Collection

5.4 Report of Collection and Deposit (RCD)

- 5.4.1 Search, Retrieve and Print
- 5.4.2 Import RPT

5.5 Report of Collection by Liquidating Officer (RCLO)

- 5.5.1 Search, Retrieve and Print
- 5.5.2 Breakdown and deposits

5.1 The Reports menu

Open the sidebar and click **Reports**. It has five reports in three groups: **Accountable Forms** (two reports), **Collection** (**Abstract of Collection**), and then **Report of Collection and Deposit(RCD)** and **Report of Collection by Liquidating Officer(RCLO)**.

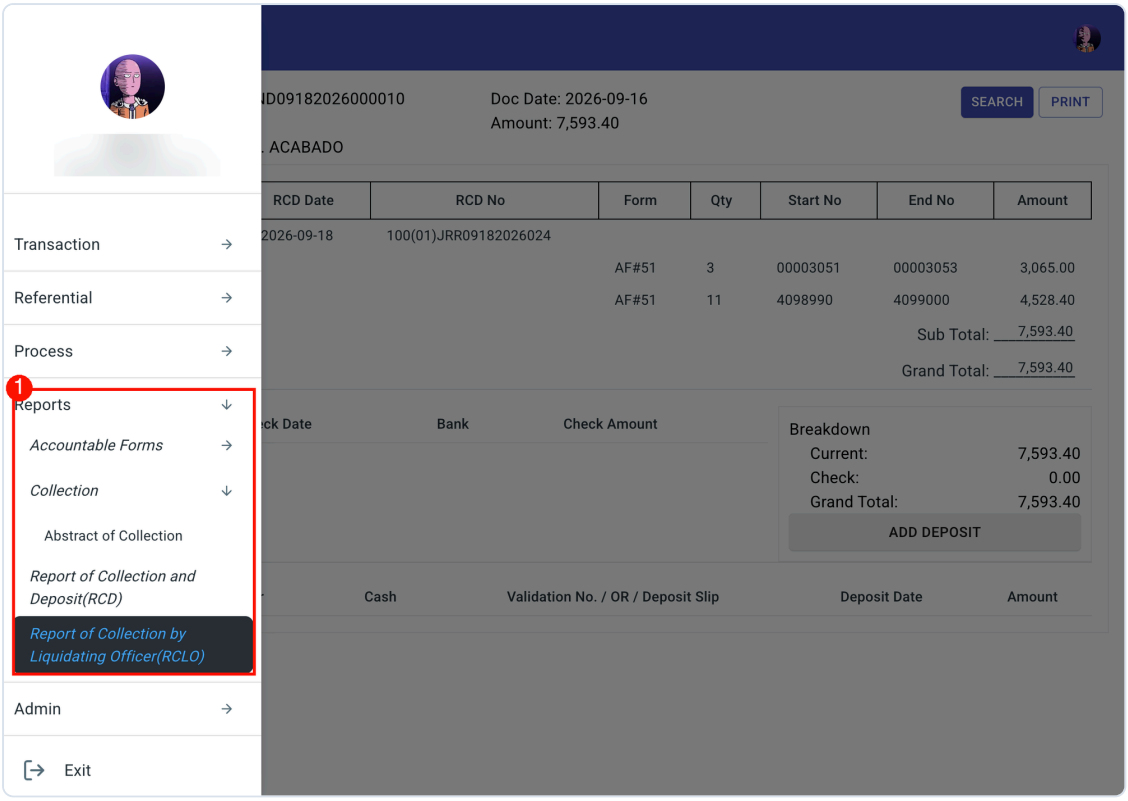

Figure 5.1. The sidebar with Reports open. 1 The Reports group. The name and email are blurred.

The pages use the same few buttons: **Filter** or **Search** opens a window to choose what to show, **Print** prints the report as it is on the page, and in the Abstract of Collection **Export To Excel** saves it as a spreadsheet. Choosing the filter only reads data. It does not change any receipt.

5.2 Accountable Forms

5.2.1 Report of Accountability for Accountable Forms

This report shows, for each booklet of accountable forms, what happened to it during the year. When it opens it shows the empty form: the title, **Accountable Officer**, **Designation** and **Cost Center**, and a table with the columns **Form Code**, **Trans Date**, **Beginning Balance**, **Receipt**, **Issued**, **Returned or Transfer** and **Ending Balance**. Each of the five groups has **Qty.**, **From** and **To**.

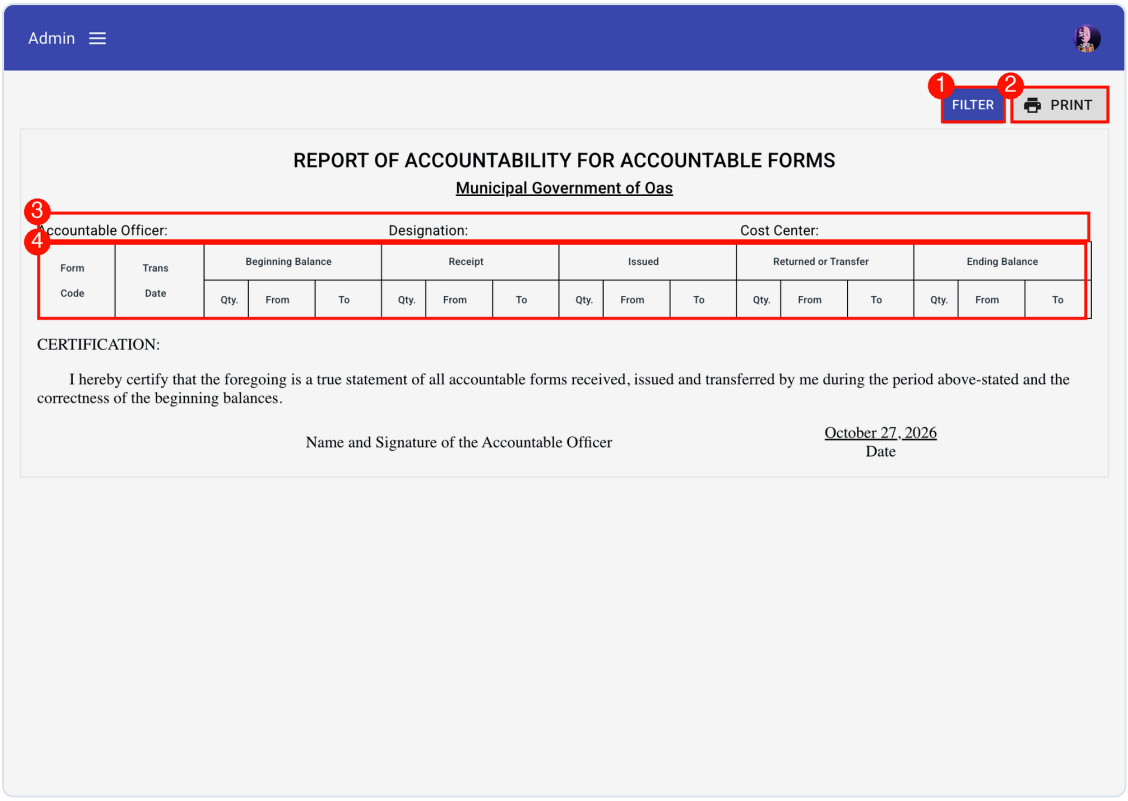

Figure 5.2. Step 1. Click Filter (1). 1 Filter · 2 Print · 3 Accountable Officer, Designation and Cost Center · 4 The columns of the report.

Step 2. Choose what to show. The window **Filter To Display** has the **Year** (it starts as the present year) and the check box **Filter By Collector**. Tick the box to choose one collector from the list; leave it empty to show all collectors. Then click **Filter** in the window.

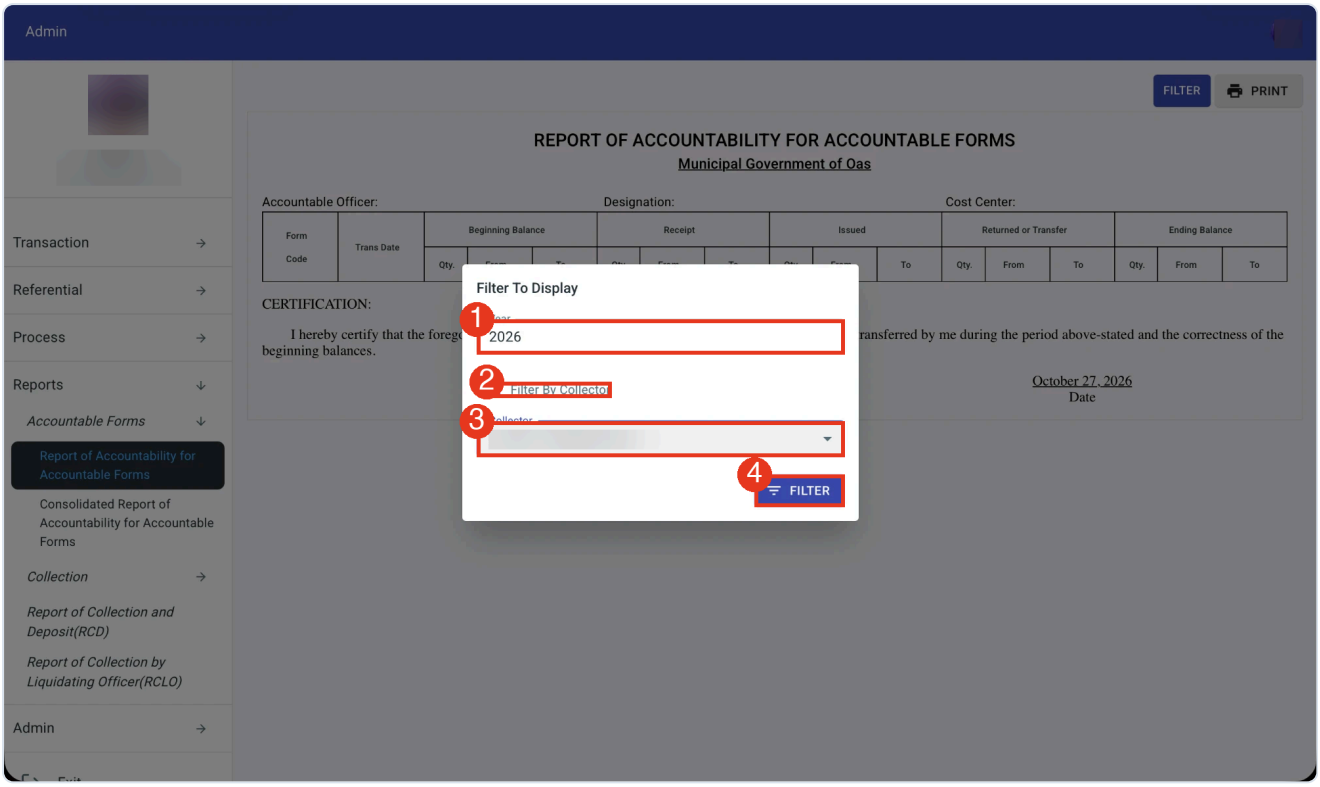

Figure 5.3. Step 2. The filter window. 1 Year · 2 Filter By Collector (ticked) · 3 The Collector list · 4 Filter. The collector name is blurred.

Step 3. Read the report. Each row is one booklet. In the example the first row is a booklet of 50 receipts of *BIR#0016*: how many receipts were issued and how many are left (the ending balance). The heading shows the accountable officer, the designation and the cost center. The data of the officer is blurred.

Form Code	Trans Date	Beginning Balance			Receipt			Issued			Returned or Transfer			Ending Balance		
		Qty.	From	To	Qty.	From	To	Qty.	From	To	Qty.	From	To	Qty.	From	To
BIR#0016	07/20/2026	50	02603101	02603150				1	02603101	02603101				49	02603102	02603150

1

ERTIFICATION:

I hereby certify that the foregoing is a true statement of all accountable forms received, issued and transferred by me during the period above-stated and the correctness of he beginning balances.

[redacted]
Name and Signature of the Accountable Officer

October 27, 2026
Date

Figure 5.5. The end of the report. 1 The certification, the name of the accountable officer and the date. The name is blurred.

Print. Click **Print**. TIS opens the print window of the browser with the report as it is on the page. Choose the printer, or *Save as PDF*, and print.

5.2.2 Consolidated Report of Accountability for Accountable Forms

This is the same report in a short form, one row for each booklet without the dates, for the **Treasurer**. The name of the treasurer at the top comes from the **active** record of the Treasurer page (Section 2.6.12). It has a **Report No** line to write by hand and the column **Remarks**, which shows the collector that holds the booklet.

Step 1. Click **Consolidated Report of Accountability for Accountable Forms** in the menu (1), then click **Filter** (2).

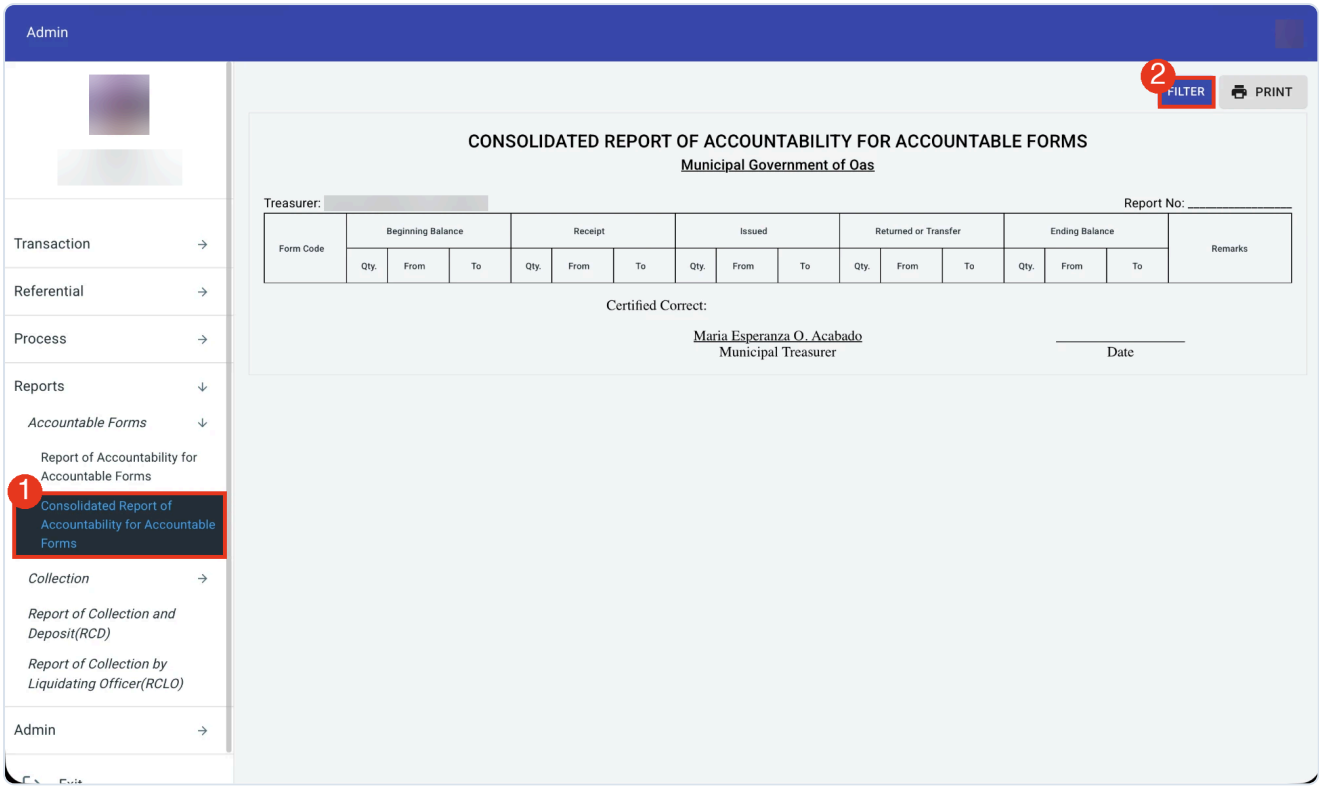

Figure 5.6. Step 1. The report when it opens. 1 The menu item · 2 Filter. The names are blurred.

Step 2. Its filter has only the **Year**. Type the year (it starts as the present year) and click **Filter**.

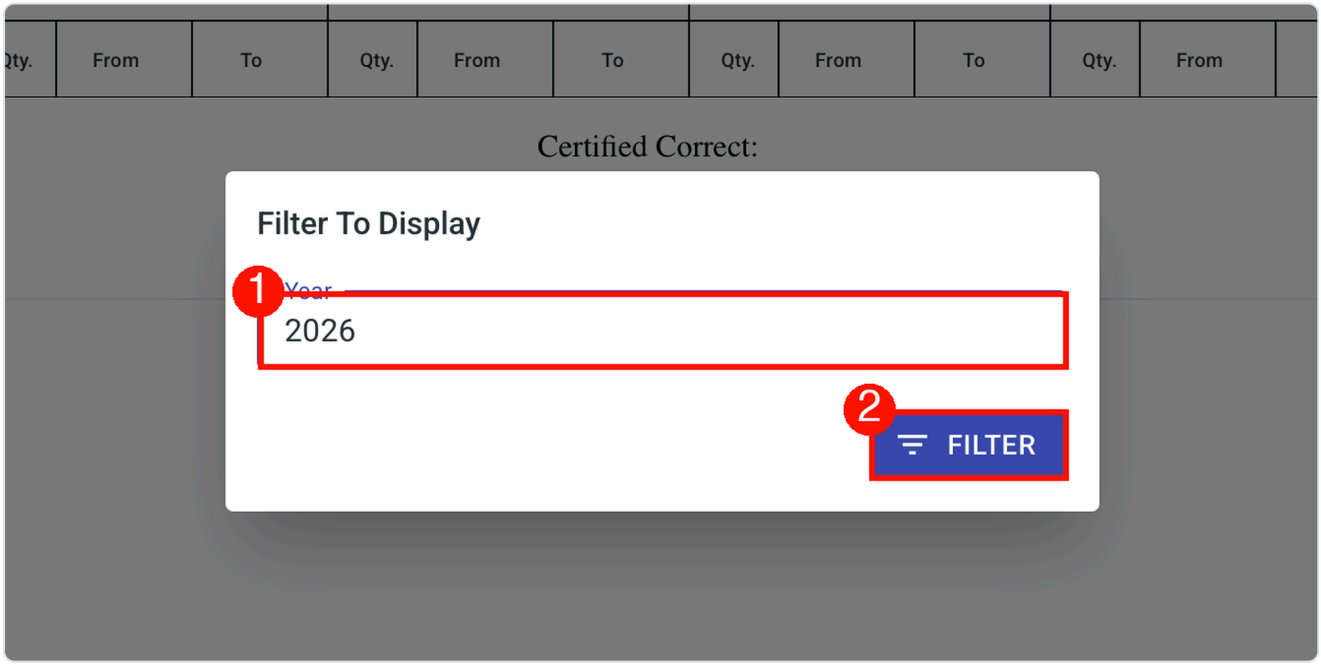

Figure 5.7. Step 2. The filter window. 1 Year · 2 Filter.

Step 3. The report shows all the booklets of the year. **Remarks** shows the collector of each booklet.

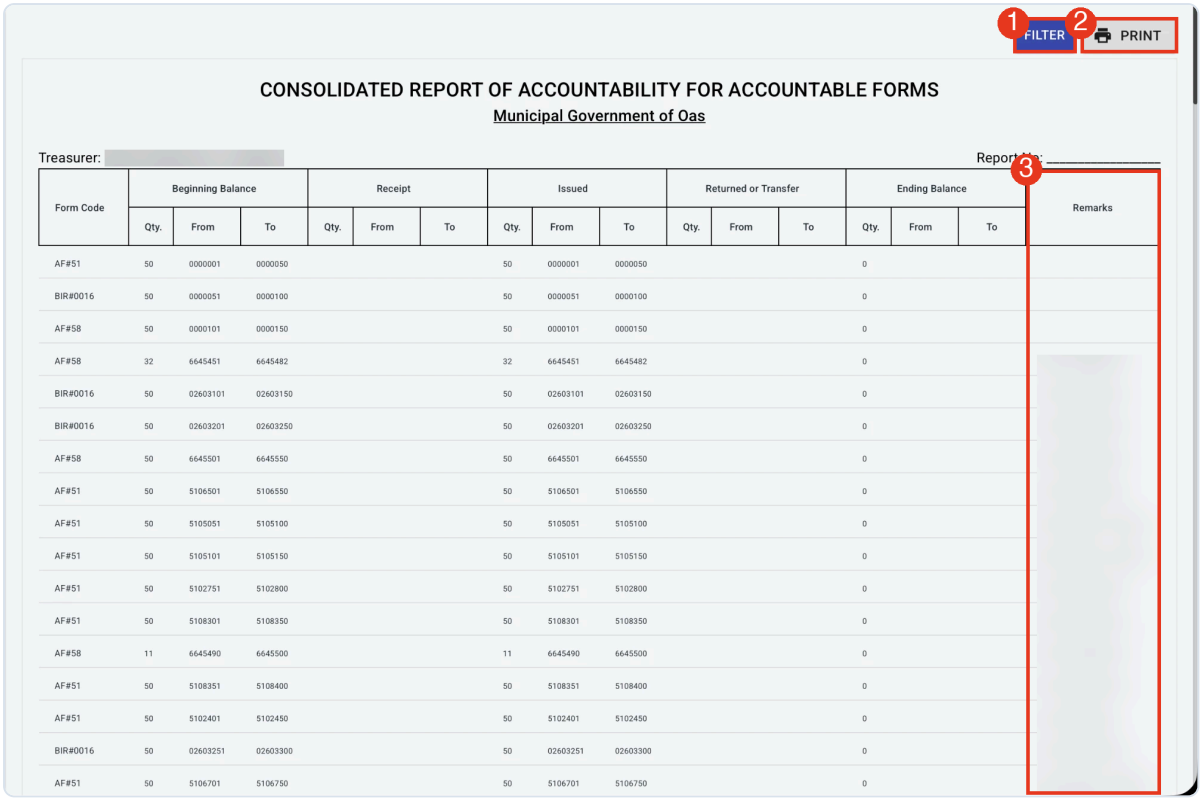

Figure 5.8. Step 3. The report after Filter. 1 Filter · 2 Print · 3 Remarks: the collector of each booklet. The names are blurred.

At the end of the report is the line **Certified Correct** with the name of the Municipal Treasurer and a line for the date.

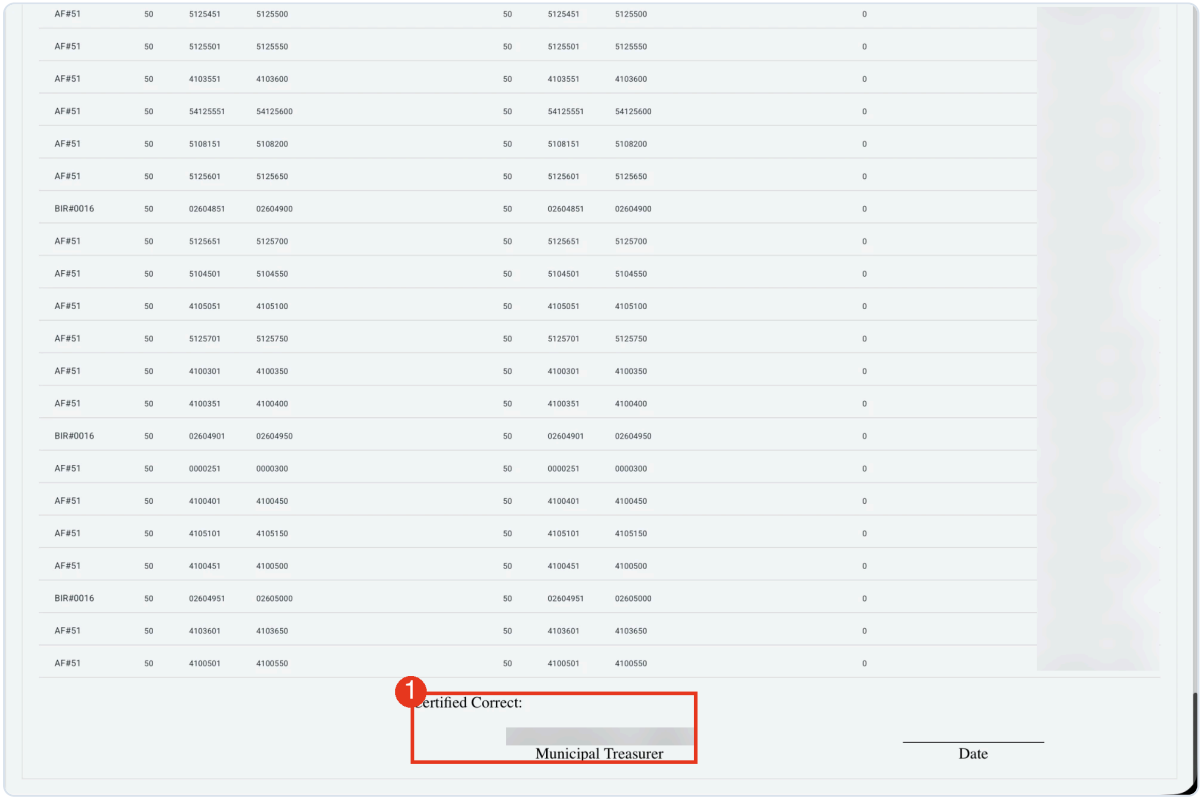

Figure 5.9. The end of the report. 1 Certified Correct, the Municipal Treasurer and the date. The names are blurred.

Print. Click **Print**. TIS opens the print window of the browser with the report as it is on the page. Choose the printer, or *Save as PDF*, and print.

5.3 Abstract of Collection

The Abstract of Collection lists the receipts that were issued, with the payee, the account and the amount. When it opens it is empty, with the columns **OR Date**, **OR No.**, **Gender**, **Payee**, **Account Code**, **Particulars** and **Amount** and a **Total**. The example uses **October 21, 2026**.

Step 1. Click **Abstract of Collection** in the menu (1), then click **Filter** (2).

Figure 5.10. Step 1. The empty report. 1 The menu item · 2 Filter. The name and email are blurred.

Step 2. In **Filter To Display** tick the check box of each way of filtering that you want:

- **Filter By Date:** from **Date & Time From** to **Date & Time To**. Choose October 21, 2026 in both boxes.
- **Filter By Collector:** one collector.
- **Filter By Fund:** one fund code. **Filter By OR Template:** one collection type (the list of Section 2.7).

The **Filter** button of the window stays gray until you tick at least one. When a box that is needed is empty, `Collector required!` or `Fund required!` appears. Click **Filter** (3).

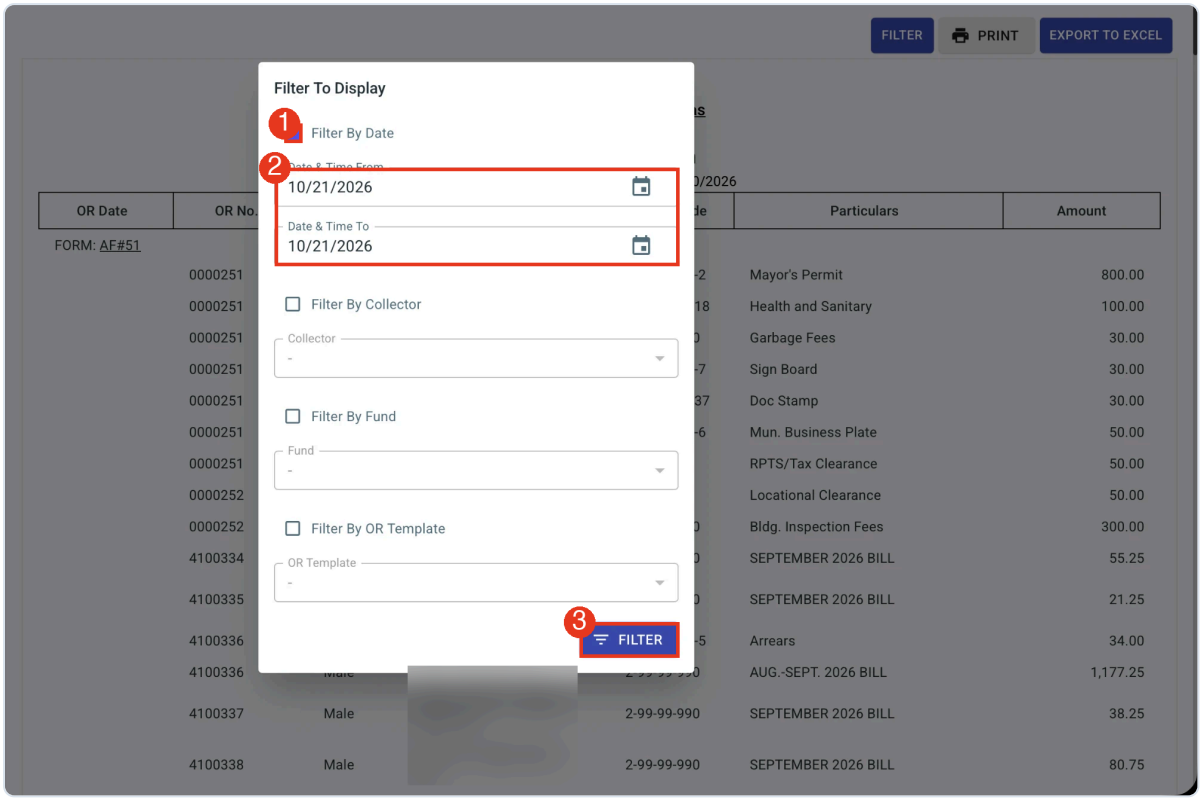

Figure 5.11. Step 2. The filter window with Filter By Date ticked. 1 The check box · 2 The dates · 3 Filter. The payee names are blurred.

Step 3. The report shows the period, *For the period of 21/10/2026 to 21/10/2026*, and is grouped by form. Under each **FORM** (for example *AF#51*) the receipts are listed with their date, number, payee, account and amount. The buttons at the top are **Filter**, **Print** and **Export To Excel**.

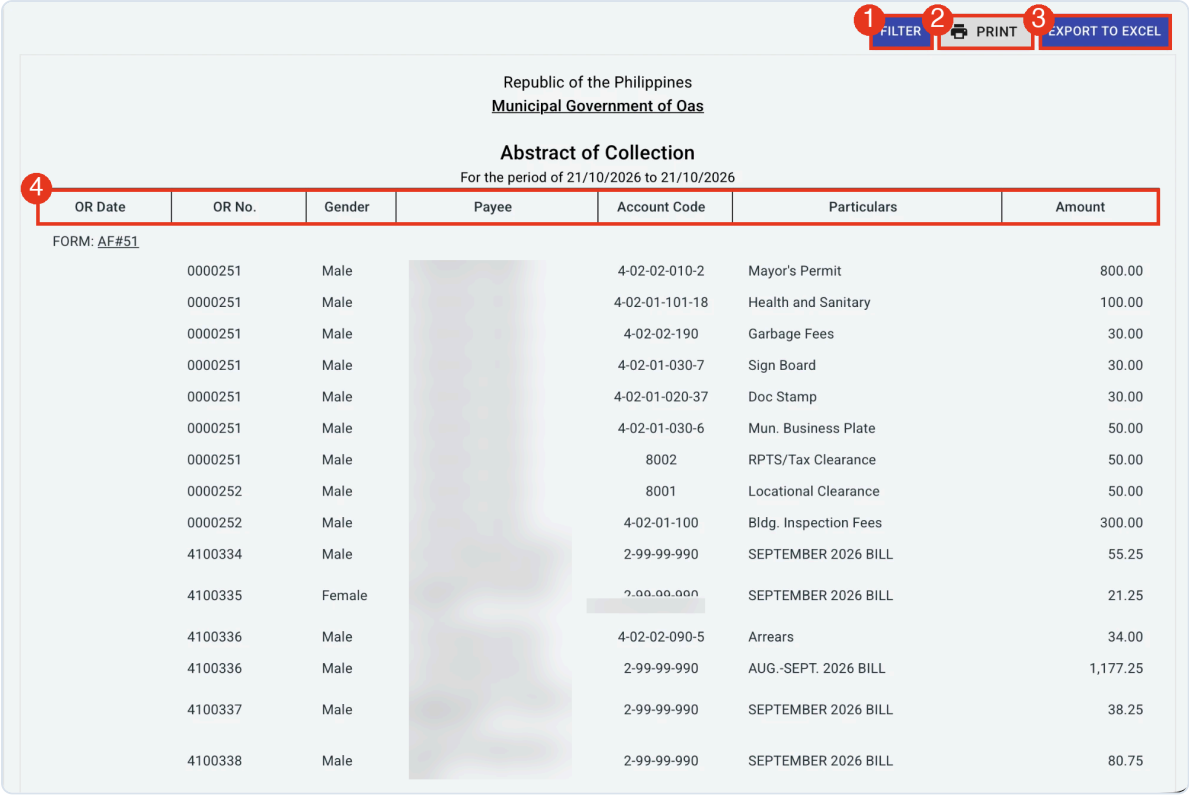

Figure 5.12. Step 3. The abstract after Filter. 1 Filter · 2 Print · 3 Export To Excel · 4 The columns. The payee names are blurred.

At the end of each form TIS adds a **Sub Total for the month** and a **Sub Total for the form**, and then the **Total** of the report.

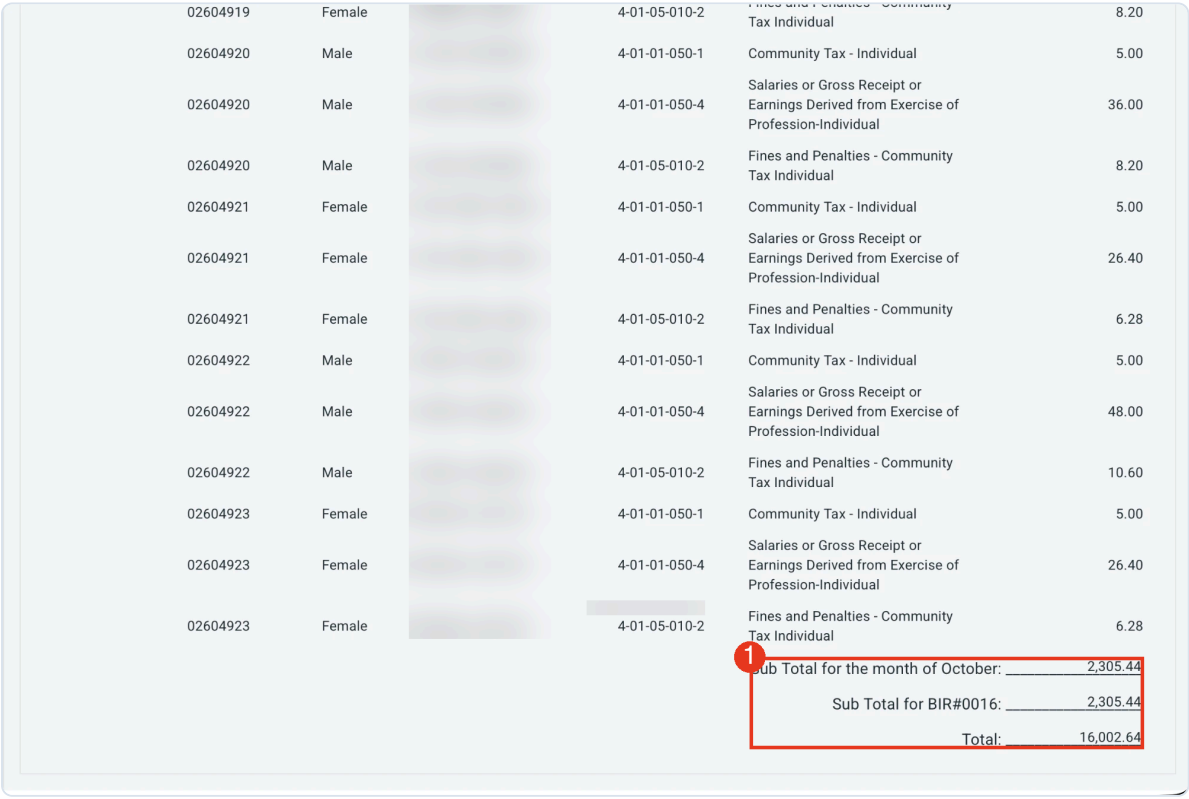

Figure 5.13. The end of the report. 1 The sub totals and the Total.

Print. Click **Print** to print the abstract with the browser print window. Click **Export To Excel** to save it as a spreadsheet file.

5.4 Report of Collection and Deposit (RCD)

This report shows one RCD made in RCD Processing. When it opens it is empty: **RCD No.**, **Liq Officer**, **Collector**, **RCD Date**, **Amount** and **Ref No.** have no value, and the table has the columns **OR Date**, **OR No.**, **Payor**, **Particulars**, **Acct Code** and **Amount** with a **Grand Total**.

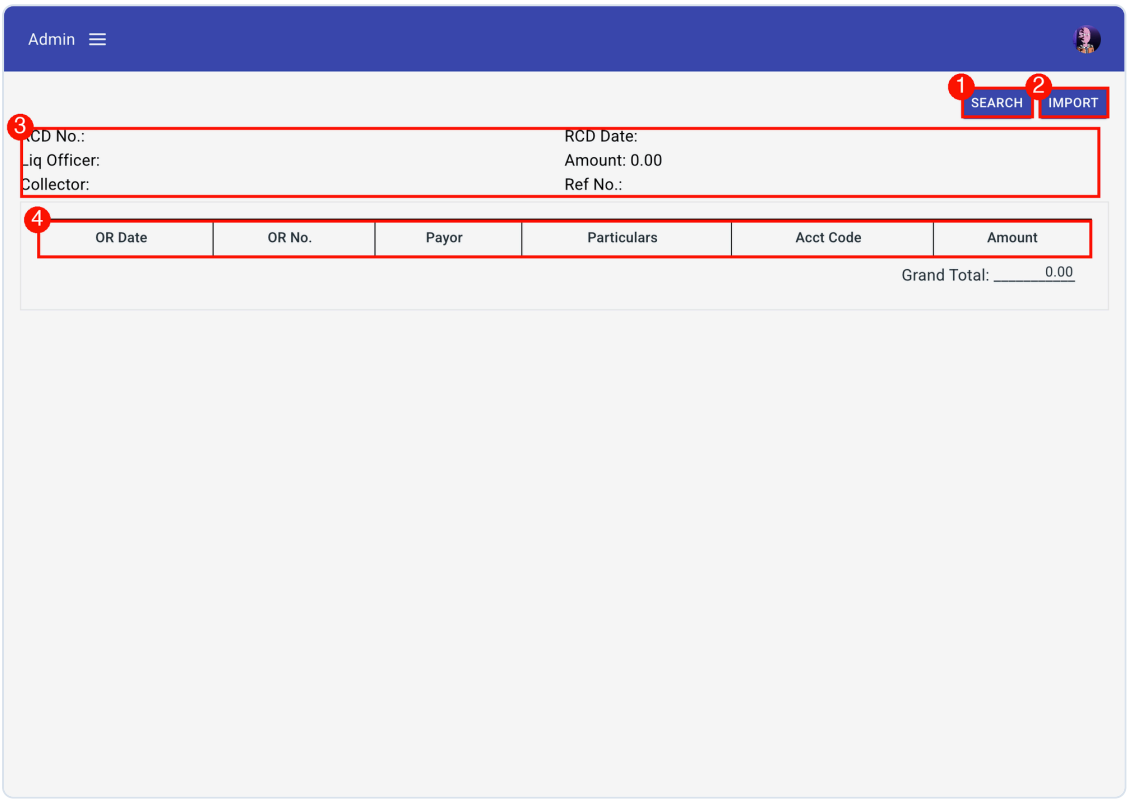

Figure 5.14. The RCD report when it opens. 1 Search · 2 Import · 3 The details of the RCD · 4 The table.

5.4.1 Search, Retrieve and Print

Follow these steps. The example uses the date **October 21, 2026**.

Step 1. Click Search. The window **Filter To Display** opens. Each way of finding an RCD has a check box at its left: **Collector**, **Year**, **Month** and, after the word **OR**, a single **Date**. The boxes are gray and the **Filter** button is gray until you tick one.

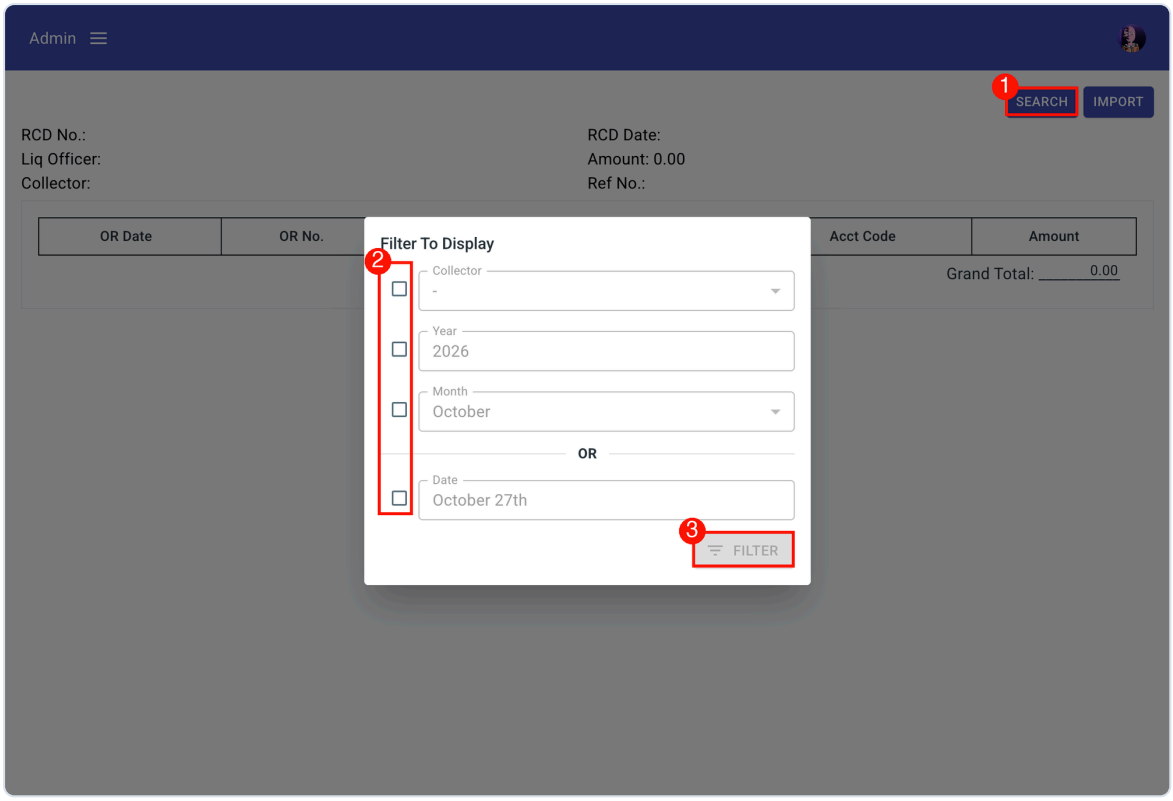

Figure 5.15. Step 1. Click Search (1). The filter window opens. 1 Search · 2 The check boxes · 3 Filter (gray until you tick a box).

Step 2. Tick the check box of the way that you want, here **Date**. Its box becomes active and the **Filter** button turns blue.

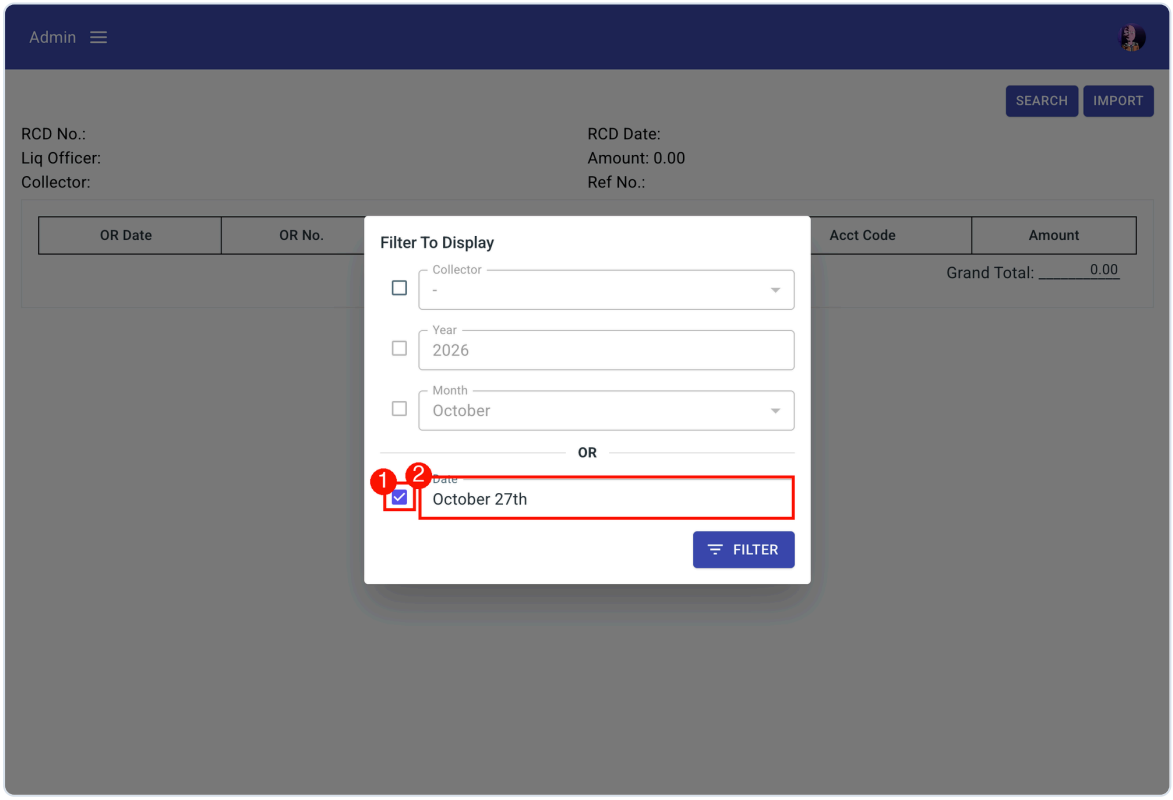

Figure 5.16. Step 2. The Date check box is ticked. 1 The check box · 2 The Date box, now active.

Step 3. Choose the date. Click the Date box. A calendar opens. Click the day, here the **21**, then click **OK**. For Collector, Year or Month choose from the list or type in the box.

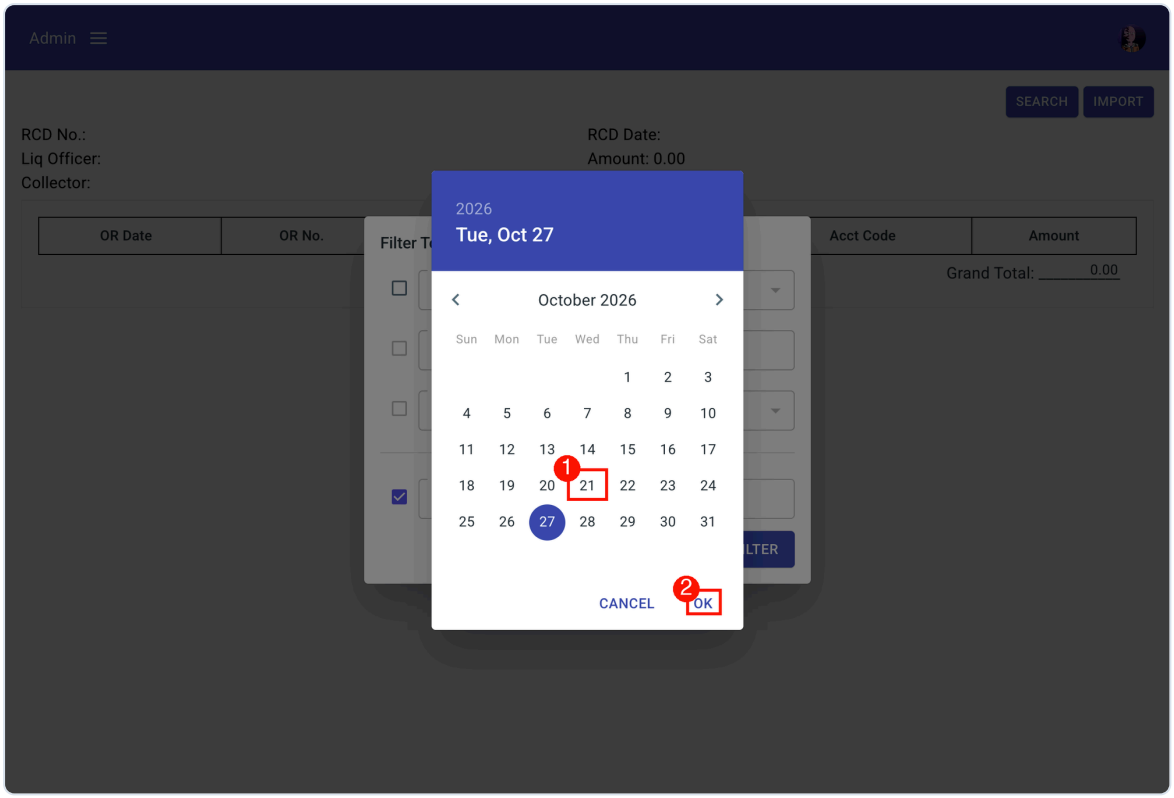

Figure 5.17. Step 3. The calendar. 1 The day 21 · 2 OK.

Step 4. Click Filter (highlighted). The box now reads *October 21st*.

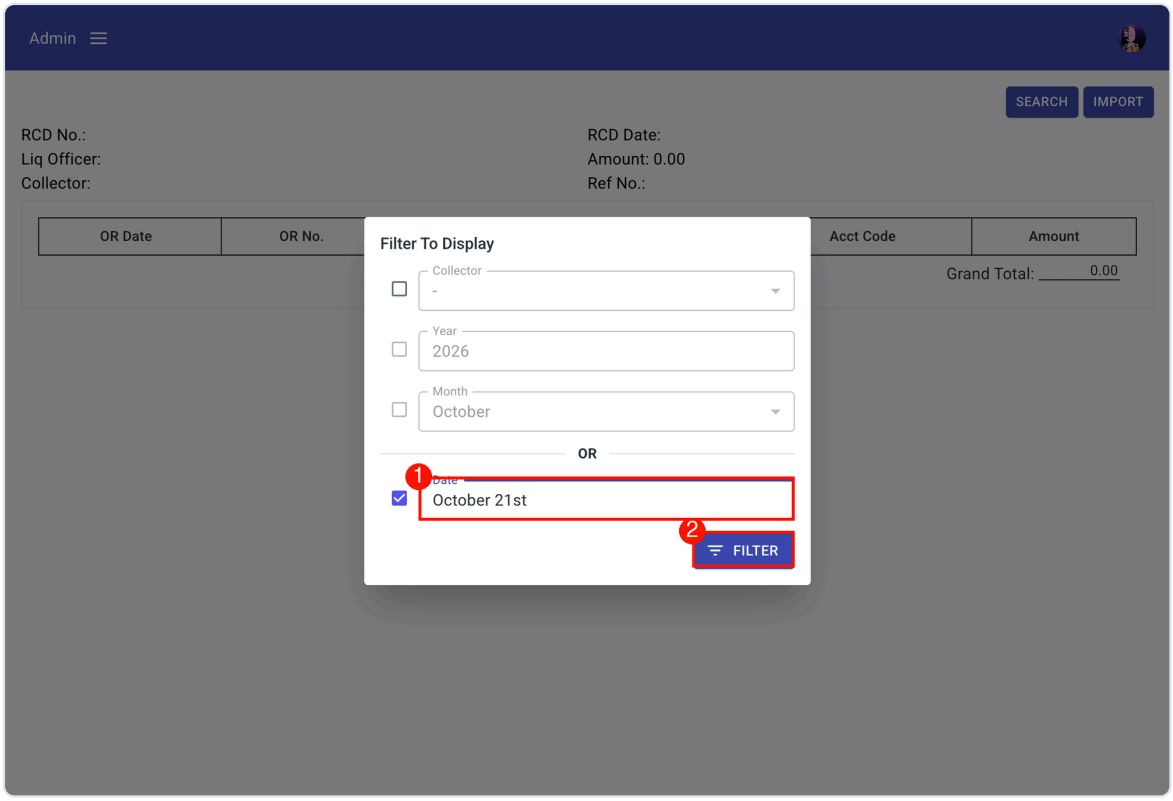

Figure 5.18. Step 4. The date is October 21st. 1 The Date box · 2 Click Filter.

A list **RCD No. List** opens with the RCD numbers of that day and their amounts.

`Date from and date to are required` and `Date from cannot be after date to` appear when the dates of a filter are wrong.

Step 5. Click Retrieve on the RCD that you want.

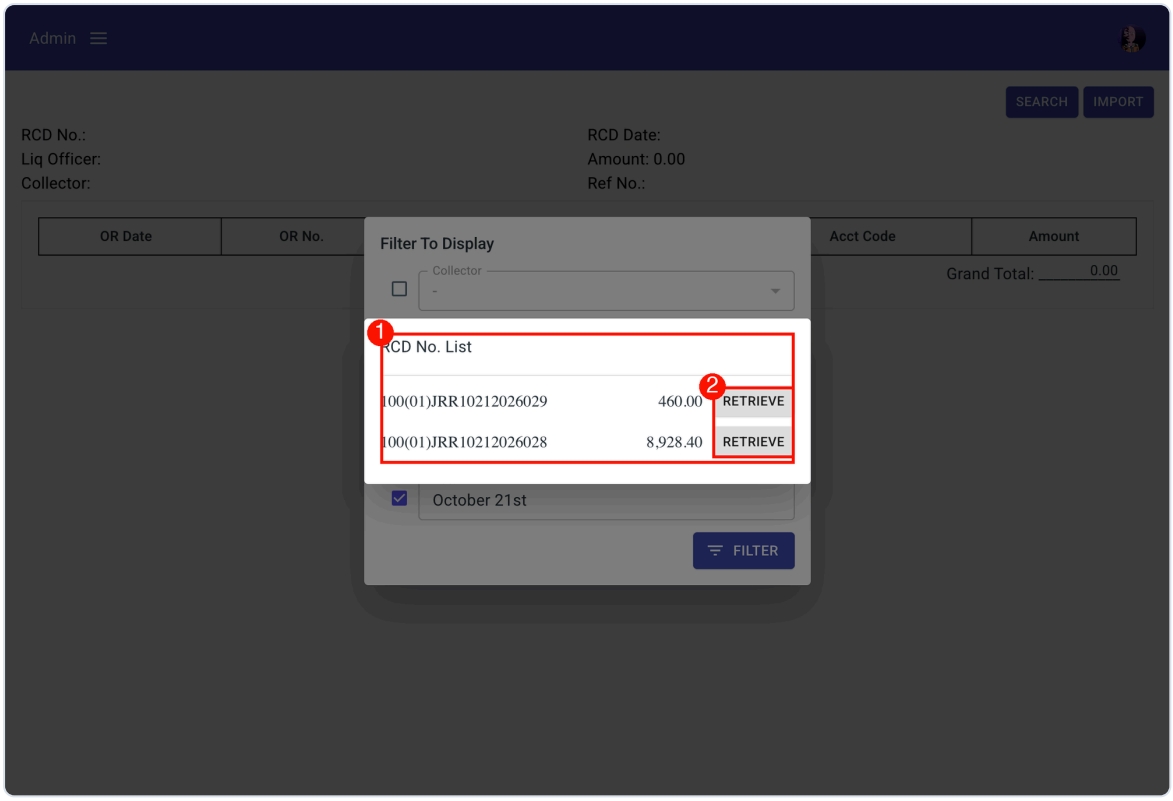

Figure 5.19. Step 5. The RCD No. List for October 21: two RCDs. 1 The list · 2 Retrieve.

The page shows the RCD: its number, the liquidating officer, the collector, the RCD date and the amount, and the table of all the receipts of the RCD, grouped by form, with a **Grand Total**.

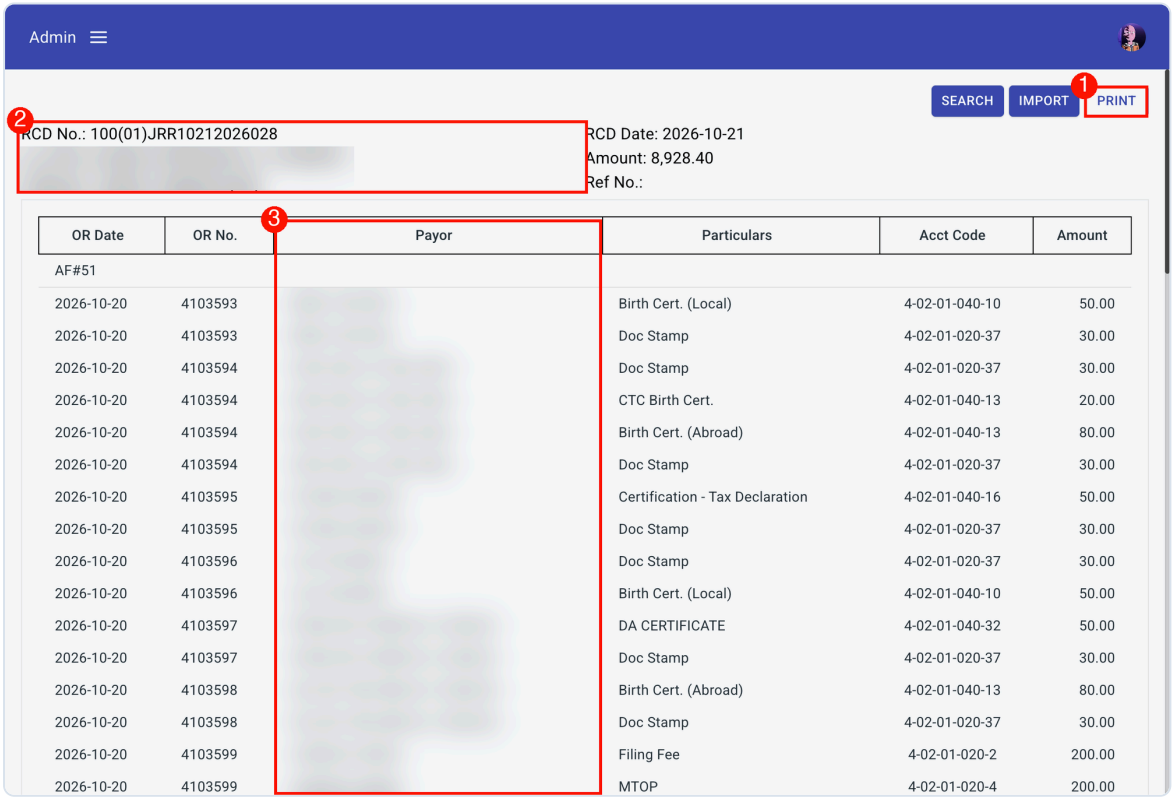

Figure 5.20. The RCD after Retrieve. 1 Print · 2 The details of the RCD · 3 The receipts. The payors and the officer names are blurred.

Step 6. Click Print (box 1 of the figure above). A print page opens, the **Collector's Report of Collections and Deposits** of the *Office of the Treasurer*. It shows the fund, the accountable officer, the date and the RCD No., **A. Collections** (the forms with quantity, start and end numbers, amount and total), **B. Remittances/Deposits** and **C. Accountability for Accountable Forms**. Click its own **Print** button (box 1 below) to send it to the printer.

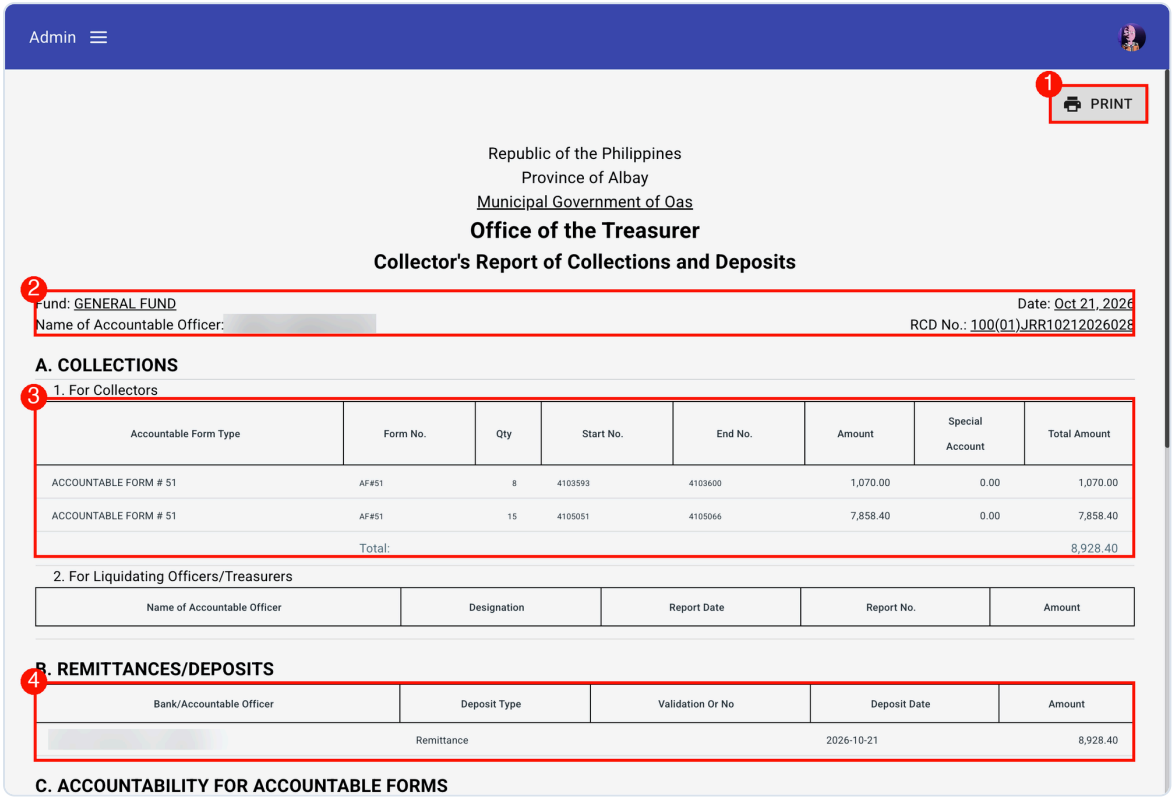

Figure 5.21. The print page of the RCD. 1 Print · 2 A. Collections · 3 B. Remittances/Deposits. The officer names are blurred.

5.4.2 Import RPT

Real property tax receipts are made in another system. **Import** brings them into the RCD. In the window **Import RPT**, choose the **Date From**, the **Date To** and **Encoded By**, then click **Filter**. The **Encoded By** list shows only the RPT users that are assigned to your user (Section 1.2.5). TIS then lists the RPT receipts of that person (*From API RPT OR List*) so that you can import them. The messages are `Encoded by is required`, `No rpt permit OR records found` and `No OR records to import`.

> **CAUTION.** Importing saves the RPT receipts into the RCD. Filter only shows them first. The import itself was not pressed while this manual was prepared; it is described from the code.

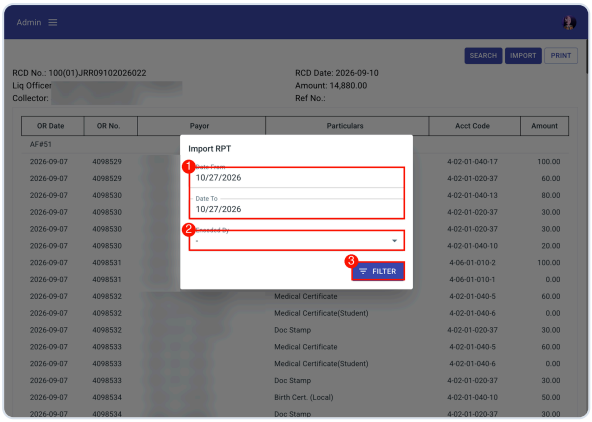

Figure 5.22. The window Import RPT. 1 Date From and Date To · 2 Encoded By (the RPT users assigned to you) · 3 Filter.

5.5 Report of Collection by Liquidating Officer (RCLO)

This report shows one RCLO made in RCLO Processing, and records the deposits of its money. When it opens it is empty: **RCLO No.**, **RCLO Date**, **Liq Officer**, **Doc Date** and **Amount** have no value. It has three parts: the table of the RCDs of the RCLO, the checks with a **Breakdown** box, and the table of deposits.

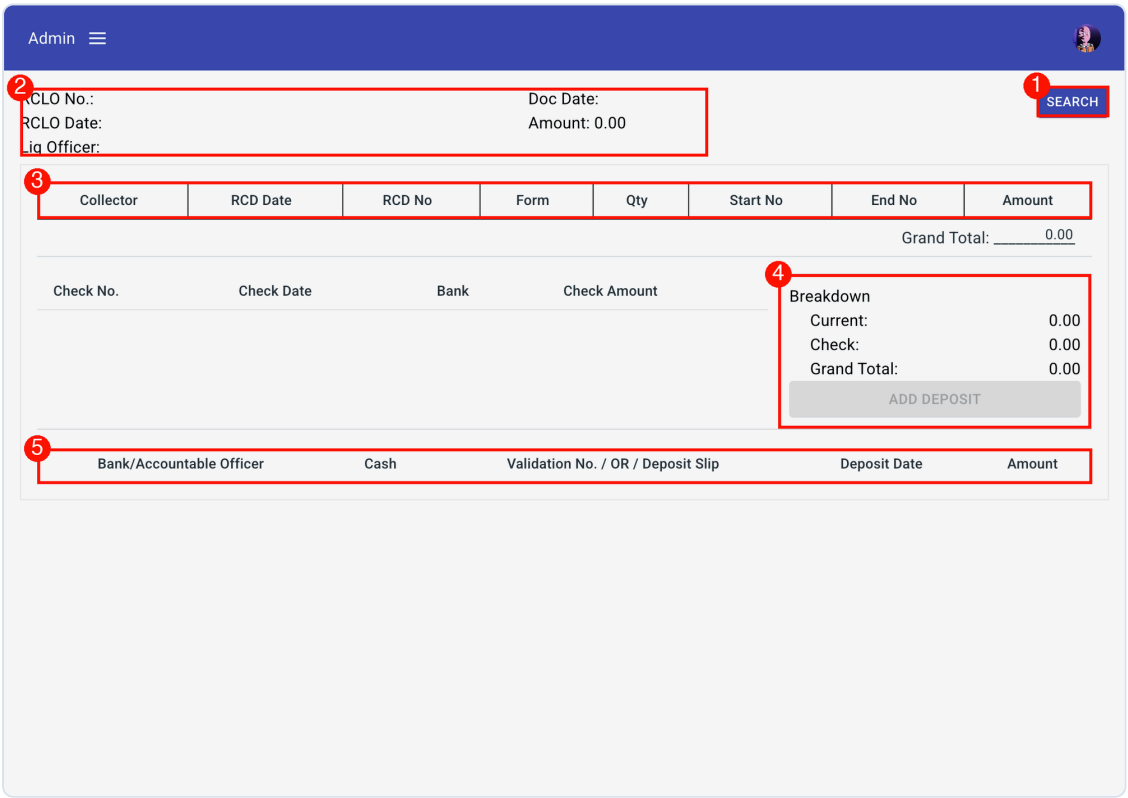

Figure 5.23. The RCLO report when it opens. 1 Search · 2 The details of the RCLO · 3 The RCDs · 4 The Breakdown · 5 The deposits.

5.5.1 Search, Retrieve and Print

The steps are the same as for the RCD (Section 5.4.1). The example uses **October 21, 2026**.

Step 1. Click Search. In **Filter To Display** the check boxes are **Liquidation Officer**, **Year**, **Month** and, after **OR**, a single **Date**. **Filter** is gray until you tick one.

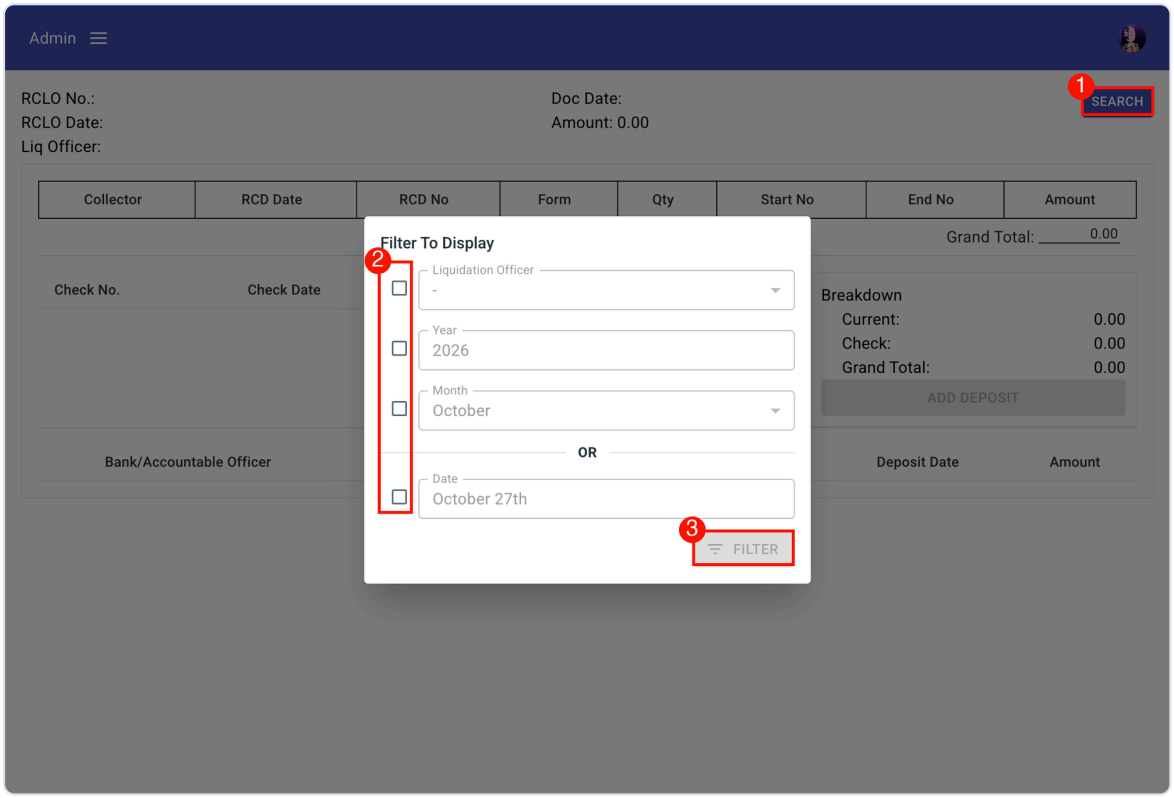

Figure 5.24. Step 1. Click Search (1). 1 Search · 2 The check boxes · 3 Filter (gray until you tick a box).

Step 2. Tick Date, then click the Date box and choose the day in the calendar (here the **21**), and click **OK**.

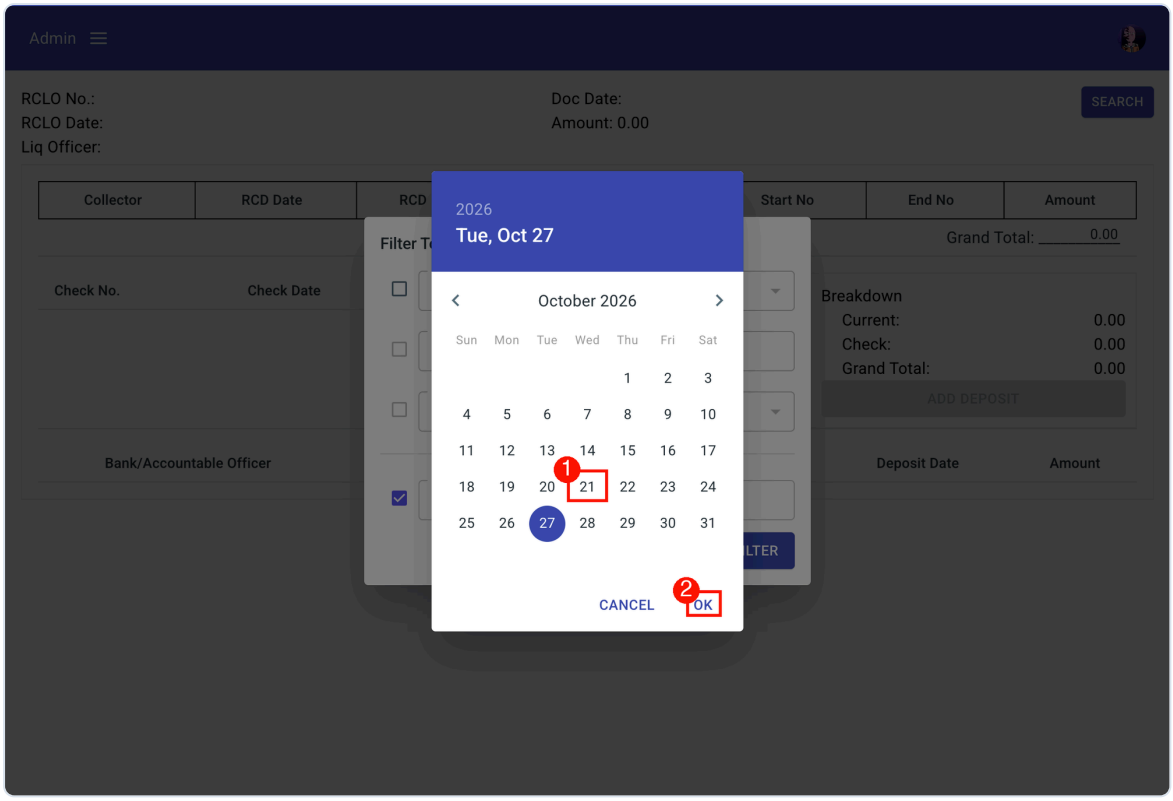

Figure 5.25. Step 2. The calendar. 1 The day 21 · 2 OK.

Step 3. Click Filter. The Date box reads *October 21st*.

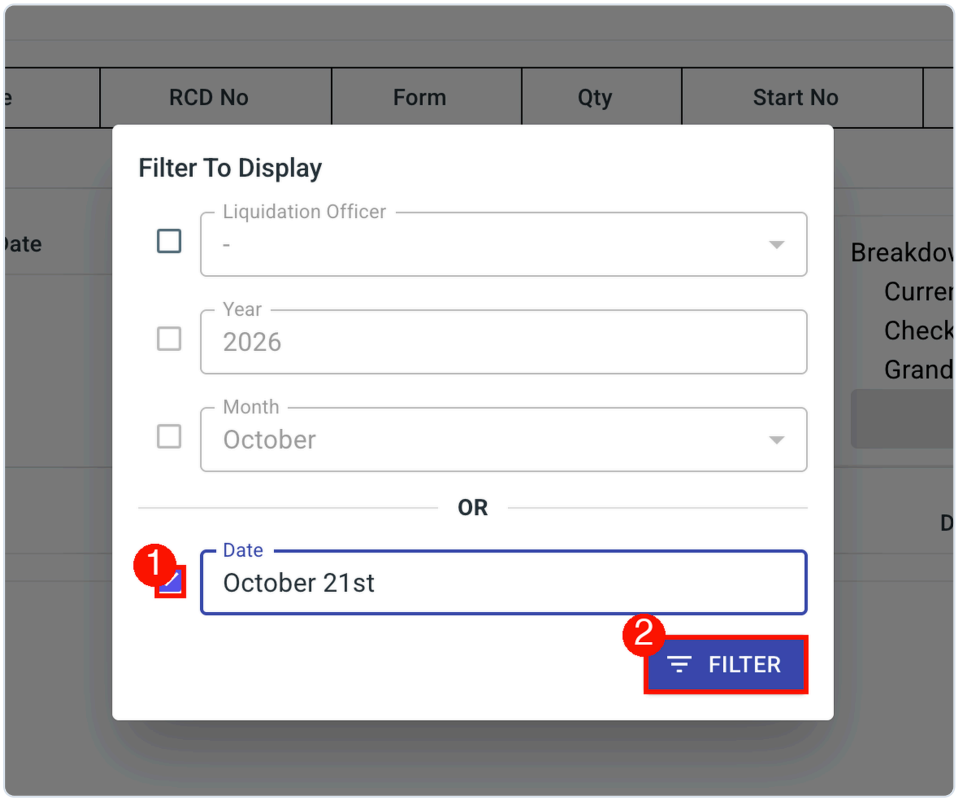

Figure 5.26. Step 3. Date ticked and set to October 21st. 1 The Date check box · 2 Click Filter.

The **RCLO No. List** opens with the RCLO numbers of that day and their amounts.

Step 4. Click Retrieve on the RCLO that you want.

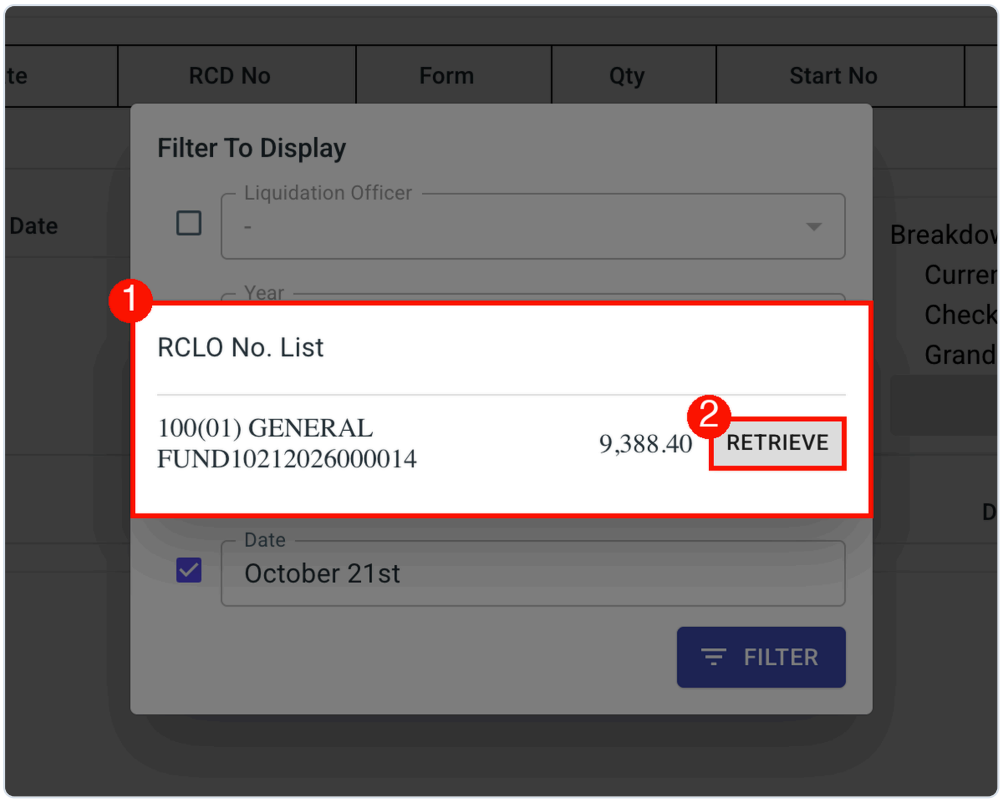

Figure 5.27. Step 4. The RCLO No. List for October 21: one RCLO, 9,388.40. 1 The list · 2 Retrieve.

The page shows the RCLO. The table lists the collector, the RCD date, the **RCD No**, and for each form its **Qty**, **Start No**, **End No** and **Amount**, with a **Sub Total** and a **Grand Total**. In the example, the RCLO *100(01) GENERAL FUND10212026000014* has one RCD with 8 receipts (1,070.00) and 18 receipts (8,318.40), a total of 9,388.40. The Breakdown shows the cash (Current) and the checks.

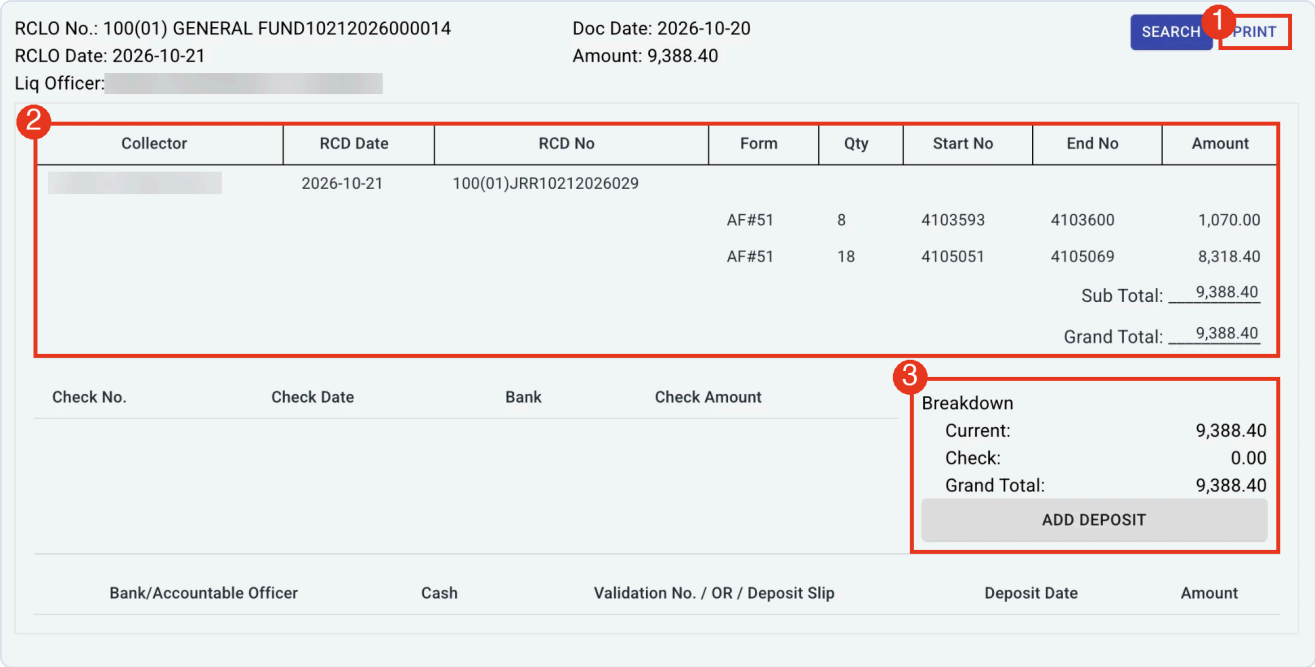

Figure 5.28. The RCLO after Retrieve. 1 Print · 2 The RCDs and the totals · 3 The Breakdown and Add Deposit. The collector and officer names are blurred.

Step 5. Click Print (box 1 above). A print page opens with **A. Collections** (the receipts with date issued, serial number, payor, particulars and amount), **B. Remittances/Deposits** (the accountable officer or bank, the reference and the amount) and **C. Accountability for Accountable Forms**. Click its own **Print** button (box 1 below) to send it to the printer.

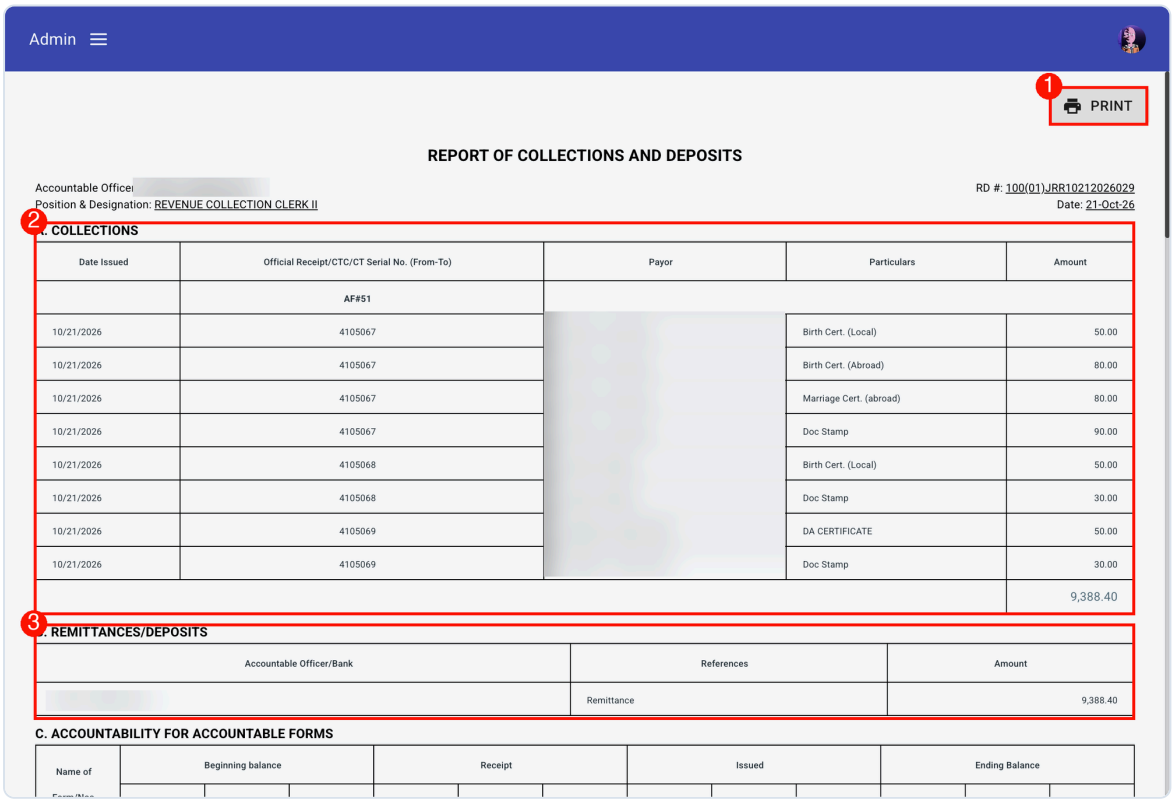

Figure 5.29. The print page of the RCLO. 1 Print · 2 A. Collections · 3 B. Remittances/Deposits. The officer names and payors are blurred.

5.5.2 Breakdown and deposits

The **Breakdown** box adds up the money of the RCLO: **Current** (cash), **Check** (the checks of the receipts, listed on the left with their number, date, bank and amount) and the **Grand Total**. The money has to be deposited. Click **Add Deposit** and fill in the window:

- **Bank / Accountable Officer:** where the money goes (a bank of the Bank Depository page, or an officer).
- **Method: Cash** or **Check**.
- **Validation No / O.R / Deposit Slip:** the number of the deposit slip or receipt.
- **Deposit Date** (starts as today) and **Amount**.

Click **Create**. `RCLO deposits created successfully` appears and the deposit shows in the table of deposits at the bottom (bank or officer, cash, validation number, date and amount). **Add Deposit** is gray until an RCLO is on the page.

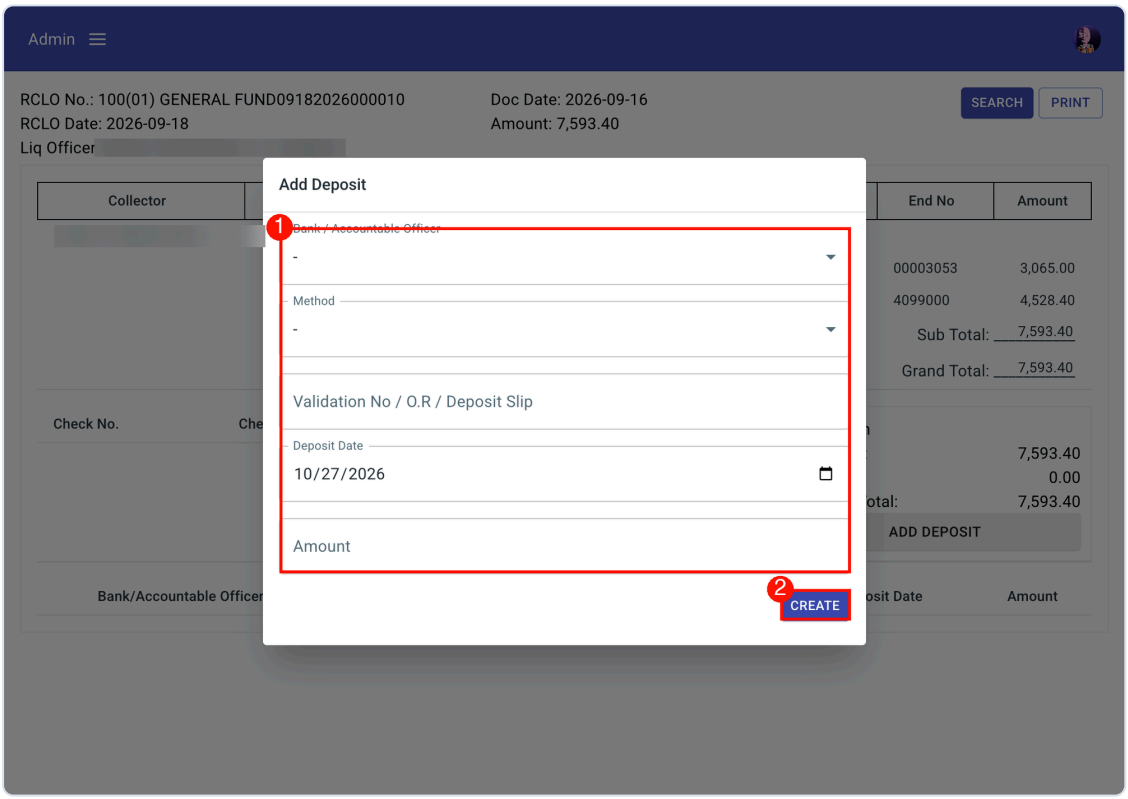

Figure 5.30. The window Add Deposit. 1 The boxes of the deposit · 2 Create. The collector and officer names are blurred.

> **Printing.** The Print buttons of the RCD and RCLO reports open the printed forms of these reports (with the treasurer's certification). They were not opened while this manual was prepared.

SECTION 6

The Cashier

The Cashier is the person who receives payments at the treasury. A user with the role **Cashier** signs in and goes to the same workspace as the Admin, but the sidebar shows only the work of the cashier: **Collection**, **Process** and **Reports**. The Transaction group has no Disbursement page, and the **Referential** and **Admin** menus do not appear.

In this section

6.1 The Cashier menu

6.2 How the day of a cashier goes

6.3 What limits a cashier

6.1 The Cashier menu

The sidebar of the Cashier has three groups. Each page is the same page that the Admin sees, so it is explained in the earlier sections. The table lists every item, what it does and where to read about it.

Group	Item	What it does	Read
Collection	**Issuance of Official Receipt(OR)**	Makes an official receipt for any payment that has no page of its own, from a booklet number.	Section 3.3
Collection	**Business Permit(OR)**	Makes the receipt for a business permit. The business and its fees come from the assessment.	Section 3.4
Collection	**Building Permit**	Makes the receipt for a building permit from the application.	Section 3.5
Collection	**Community Tax Certificate(CTC) - Ind**	Makes a community tax certificate for a person.	Section 3.6
Collection	**Community Tax Certificate(CTC) - Corp**	Makes a community tax certificate for a company.	Section 3.7

Group	Item	What it does	Read
Collection	**Burial Permit and Fee Receipt**	Makes the receipt for a burial permit.	Section 3.8
Collection	**Online Request**	Lists payments that people asked for online and sets them as paid.	Section 3.9
Process	**Report of Collection and Deposits(RCD) Processing**	Gathers a collector's receipts into an RCD and gives it a number.	Section 4.2
Process	**Report of Collection by Liquidating Officer(RCLO) Processing**	Gathers RCDs of a fund into an RCLO.	Section 4.3
Reports	**Accountable Forms: Report of Accountability and Consolidated Report**	Shows what happened to each booklet of receipts.	Section 5.2
Reports	**Collection: Abstract of Collection**	Lists the receipts issued, by form and month.	Section 5.3
Reports	**Report of Collection and Deposit(RCD)**	Shows one RCD and its receipts, and imports RPT receipts.	Section 5.4
Reports	**Report of Collection by Liquidating Officer(RCLO)**	Shows one RCLO and records its deposits.	Section 5.5

6.2 How the day of a cashier goes

1. **Receive the payment and make the receipt.** Open the page of the payment (Collection). Type the receipt number from your booklet, click **Check**, fill in the payor and what is paid, and save (Section 3.2). Print the receipt.
2. **Online payments.** Open **Online Request**, find the request and set its payment with the receipt number (Section 3.9).
3. **Close the collection.** At the end of a period, process the RCD of your collector (Section 4.2). The RCLO is processed after the RCDs (Section 4.3).
4. **Print the reports** of the Reports menu (Section 5) and deposit the money. The deposit is recorded on the RCLO report.

6.3 What limits a cashier

- **Assigned personnel.** A receipt can be processed only when its collector is one of the officers assigned to the cashier's user. Otherwise TIS shows `You are not allowed to proccess this personnel.` The Collector list of RCD Processing offers only the assigned collectors (Section 1.2.6). Ask the Admin to assign the officers.
- **Assigned RPT users.** The Import of RPT receipts in the RCD report offers only the RPT users assigned to the cashier (Section 1.2.5).
- **Erase.** On the Business Permit page, the **Erase** button (and the Del key) is shown only to the Admin. A cashier can look at a business receipt but cannot erase it.
- **No set-up pages.** The lists of the Referential menu (funds, accounts, collection types, officers, booklets and the OR templates) are kept by the Admin. If a collection type or an account is missing, ask the Admin.

> **How this section was made.** The Cashier menu is read from the system code. The pages were viewed with an Admin account, because a Cashier sign-in was not available. A page may show a different list of collectors, because the lists follow the assigned personnel of the user who signs in. To add screenshots of the Cashier's own sidebar, sign in as a Cashier in the browser pane.

TIS USER MANUAL

The Cashier

The Cashier is the person who receives payments at the treasury. This manual follows the sidebar of the Cashier, item by item: **Collection** (seven pages), **Process** (two pages) and **Reports** (five pages). For each page it shows what the page is for, what each button opens, and what you see after you filter or retrieve. Every figure was taken with a Cashier account.

> **Reading the colored boxes.** Messages of TIS are shown in boxes: `gray` for a question or notice, `green` for success, `red` for an error and `yellow` for a warning. In the figures, red boxes with numbers point to the parts that the text explains, and names of people are blurred.

In this manual

1. The Cashier workspace
2. Collection
    - 2.1 Issuance of Official Receipt(OR)
    - 2.2 Business Permit(OR)
    - 2.3 Building Permit
    - 2.4 Community Tax Certificate(CTC) - Ind
    - 2.5 Community Tax Certificate(CTC) - Corp
    - 2.6 Burial Permit and Fee Receipt
    - 2.7 Online Request
3. Process
    - 3.1 Report of Collection and Deposits(RCD) Processing
    - 3.2 Report of Collection by Liquidating Officer(RCLO) Processing
4. Reports
    - 4.1 Accountable Forms: Report of Accountability for Accountable Forms
    - 4.2 Accountable Forms: Consolidated Report of Accountability for Accountable Forms
    - 4.3 Collection: Abstract of Collection
    - 4.4 Report of Collection and Deposit(RCD)
    - 4.5 Report of Collection by Liquidating Officer(RCLO)
5. What limits a cashier

1. The Cashier workspace

When a user with the role **Cashier** signs in, the header shows **Cashier** and the sidebar has three groups, then **Exit**. Click the menu icon (three lines) at the top left to open the sidebar. The Admin menus (Transaction, Referential and Admin) do not appear.

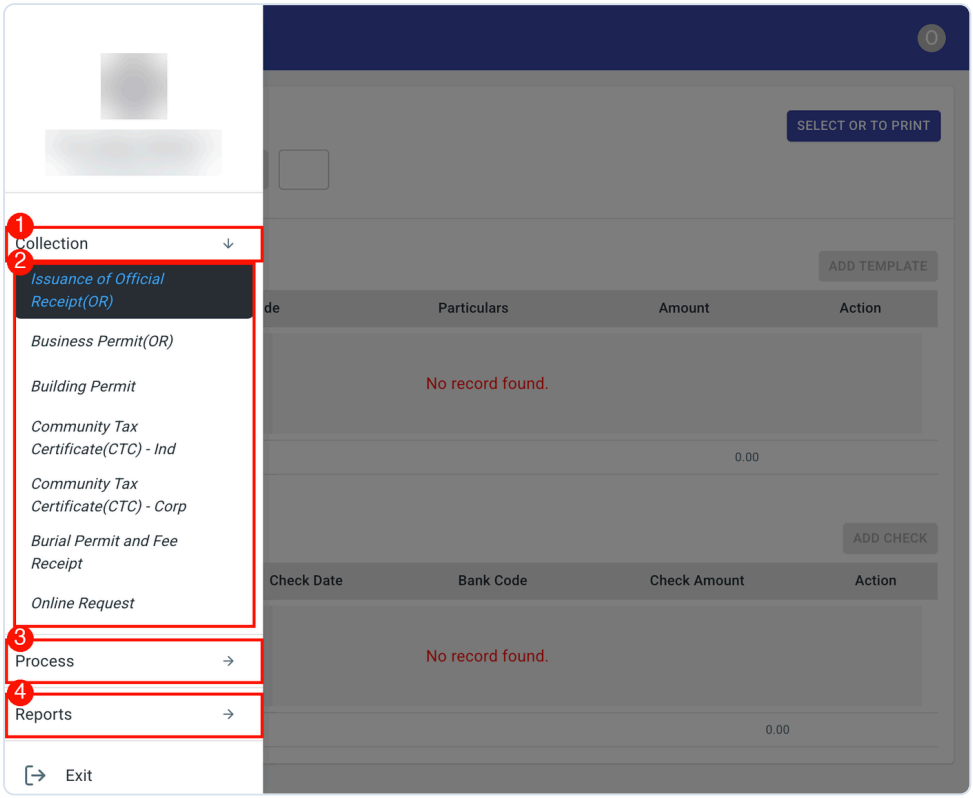

Figure 1. The sidebar of the Cashier, with Collection open. 1 Collection · 2 The seven Collection pages · 3 Process · 4 Reports. The name and email are blurred.

Pages that list receipts, RCDs or RCLOs only **read** the data when you filter or retrieve. Pressing **Print** prints a page as it is. Nothing changes the records until you press a button such as **Create**, **Process**, **Remove**, **Import** or **Add Deposit**, which this manual only describes.

2. Collection

The Collection group makes the official receipts. Six of its pages have the same layout, the seventh (Online Request) lists requests made online.

The process of every receipt page (in general)

All six receipt pages follow the same process. The two examples in this manual, Issuance of Official Receipt (details typed by the cashier) and Building Permit (details retrieved from an application), show it step by step. Business Permit(OR), Community Tax Certificate - Ind, Community Tax Certificate - Corp and Burial Permit and Fee Receipt work the same way.

1. **Check the number.** Type the OR number (or CTC number) from your booklet and click **Check**. TIS shows the officer, collector and form type of the booklet. If the number is not available, a message appears (for example that it is already used, not found, or not of an officer assigned to you).
2. **Get the details.** Either type them (payor, gender, address, collection type) or retrieve them from the record of the permit with **Add Details**.
3. **Look at the Template List.** It lists the accounts that are paid, their amounts and the total. Add or change lines if the page allows it. Add checks in the Check List.
4. **Click Save** (or Ctrl+S). A green message confirms it.
5. **Print.** Print the receipt, or find it later with **Select OR To Print**.

2.1 Issuance of Official Receipt(OR)

Makes a receipt for any payment that has no page of its own. The page has two parts: the **Template List** (the accounts being paid, with their amounts) and the **Check List** (the checks that the payor gave). **Add Template** and **Add Check** are gray until a receipt number has been checked.

The steps below follow one receipt from the number to Save. To look at a receipt that is already made, click **Select OR To Print** (box 1 of the next figure).

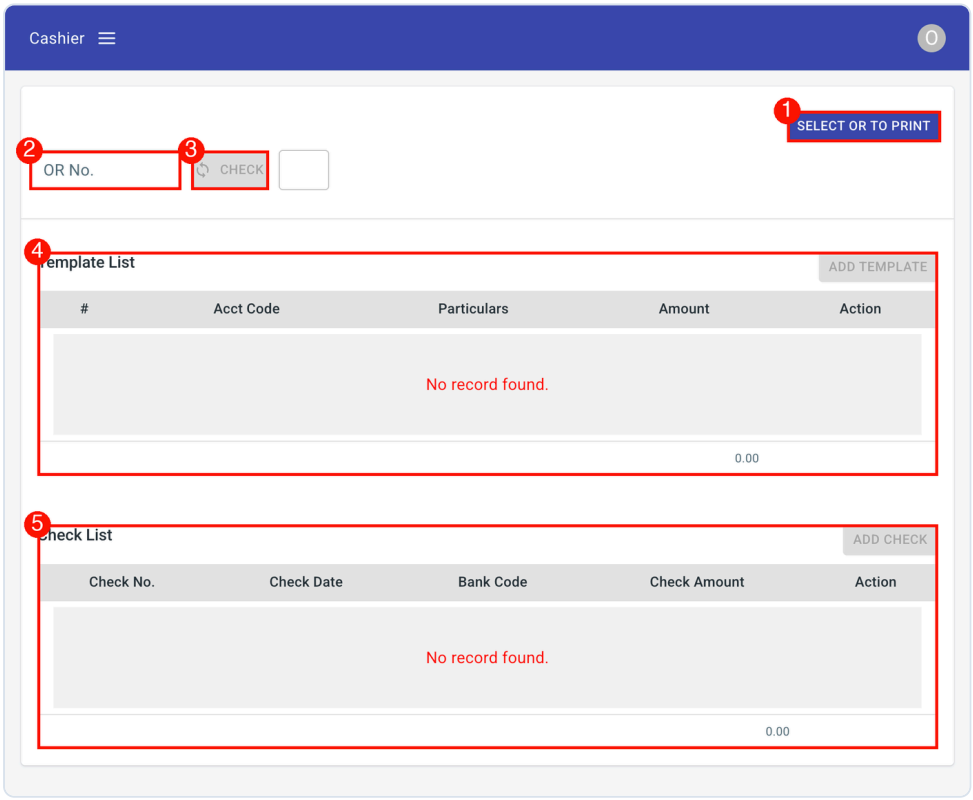

Figure 2. The page when it opens. 1 Select OR To Print · 2 OR No. · 3 Check · 4 Template List · 5 Check List.

The button Select OR To Print. A window opens with the receipts of the day: the date, the OR number and the payor. Type in the search box (box 1) to find an OR number or a payor. Click **Select**

(box 3) on the receipt that you want.

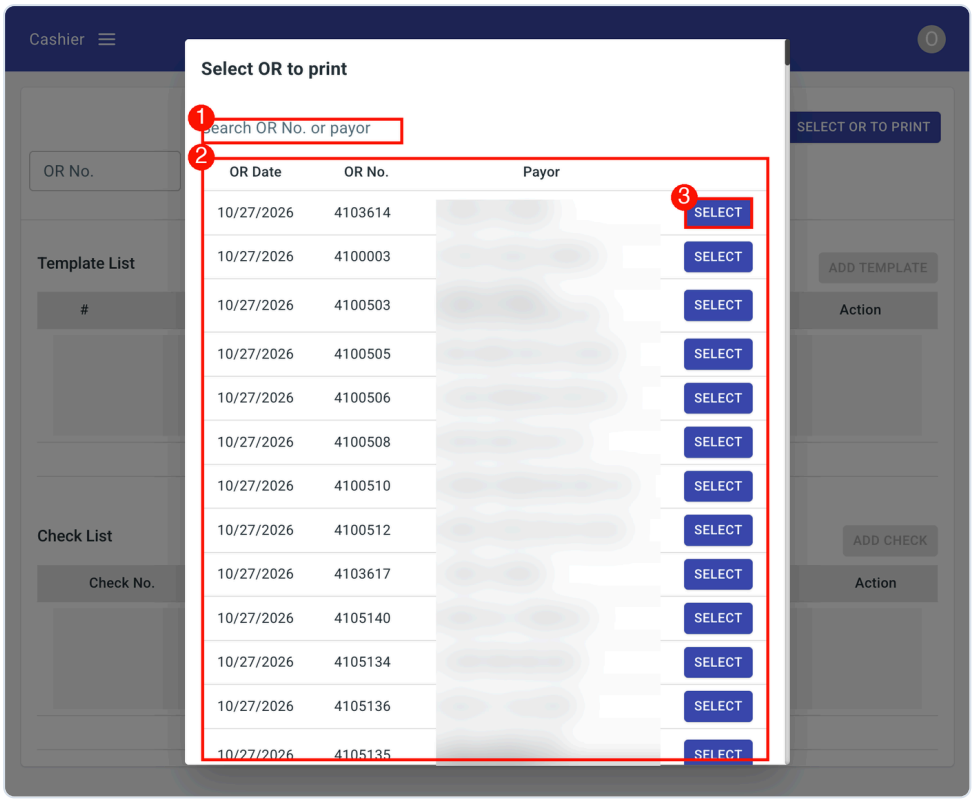

Figure 3. The window Select OR to print. 1 Search OR No. or payor · 2 The list of receipts · 3 Select. The payors are blurred.

The receipt opens in a small window with its number, date, payor, the accounts and amounts, the total in words and the checks. Click **Print** (box 2) to print it.

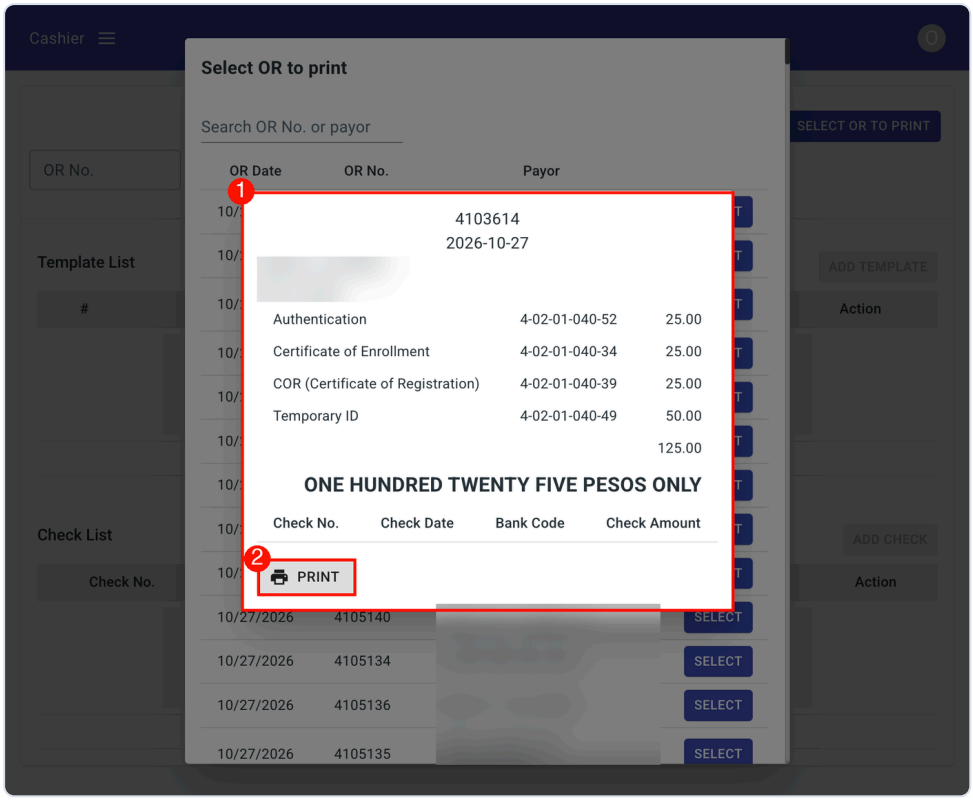

Figure 4. The receipt that was selected. 1 The receipt · 2 Print. The payor is blurred.

Making a receipt, step by step

Step 1. Check the number. Type the receipt number from your booklet in **OR No.** and click **Check** (or press Ctrl+Enter). The form opens. The box at the right shows the **Liq Officer**, the **Collector** and the **Form Type** of the booklet, and the **RCD No.** and **RCLO No.** stay empty until the receipt is processed. The **Document Date** and **OR Date** start as today.

Step 2. Fill in the payor. Type the **Payor**, choose the **Gender** and check the **Address**. **Business Type**, **Business Info** and **Remarks** can stay *N/A*. A box that is left empty shows `Required` under it when you save.

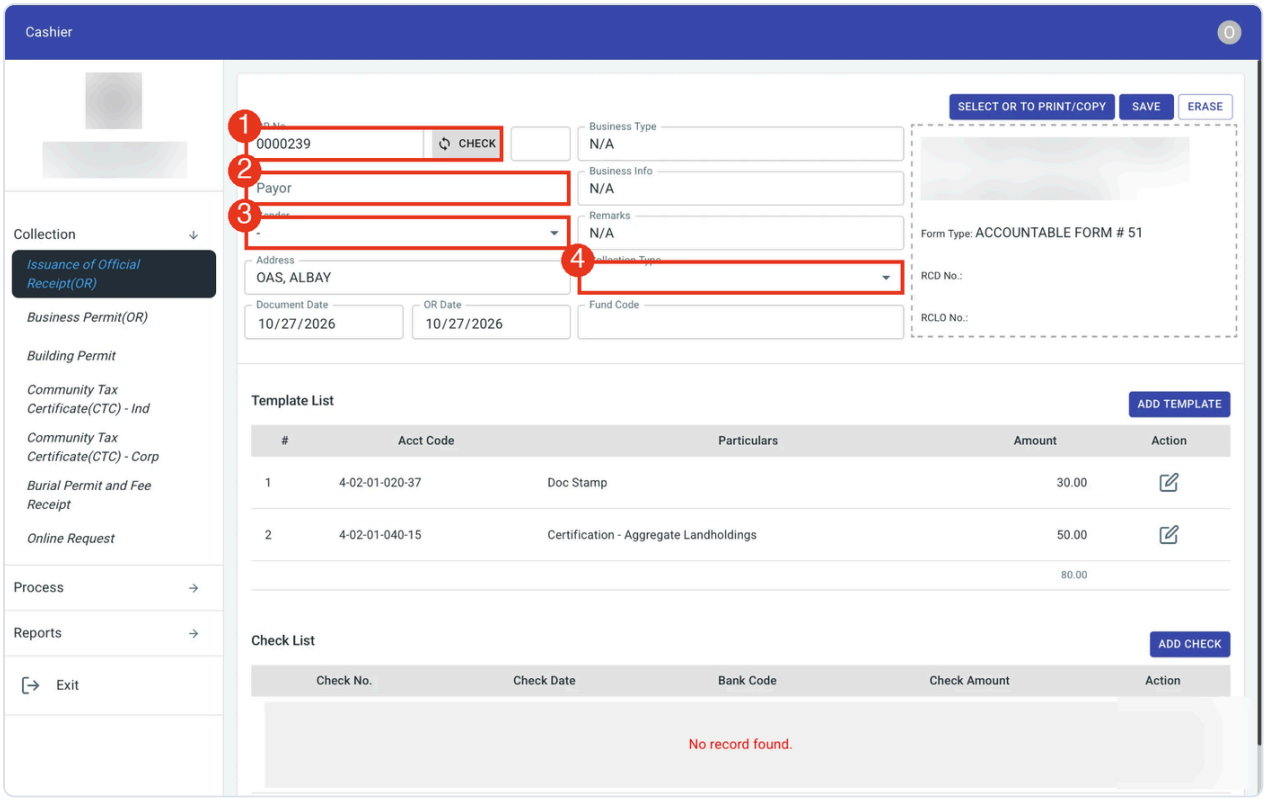

Figure 5. The form after Check. 1 OR No. and Check · 2 Payor · 3 Gender · 4 Collection Type.

Step 3. Choose the Collection Type. Open the **Collection Type** list and choose the payment, for example *Aggregate Landholdings*. The list can be searched by typing. The **Fund Code** is filled in for you.

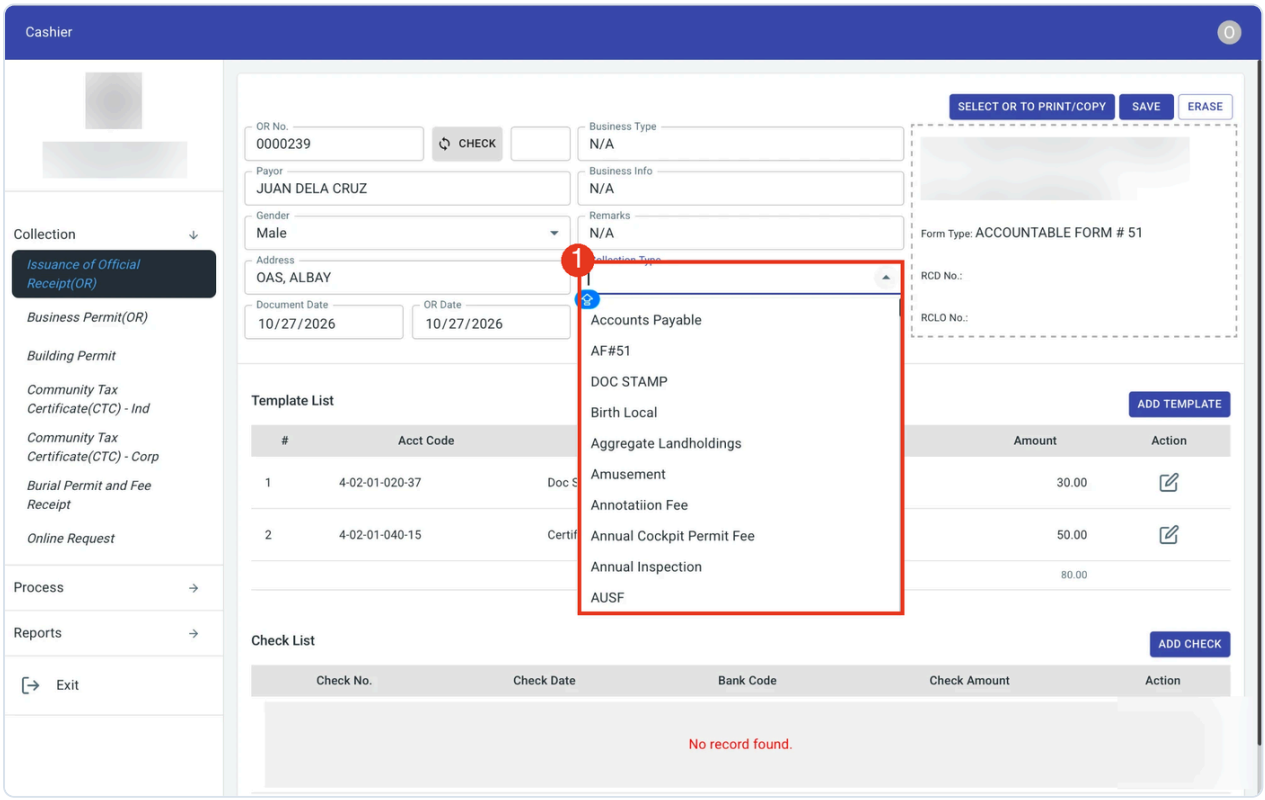

Figure 6. The Collection Type list. 1 The collection types (the OR templates).

TIS asks `Do you want to add the template?` Click **Yes** to put the lines of that collection type in the Template List, or **No** to stop.

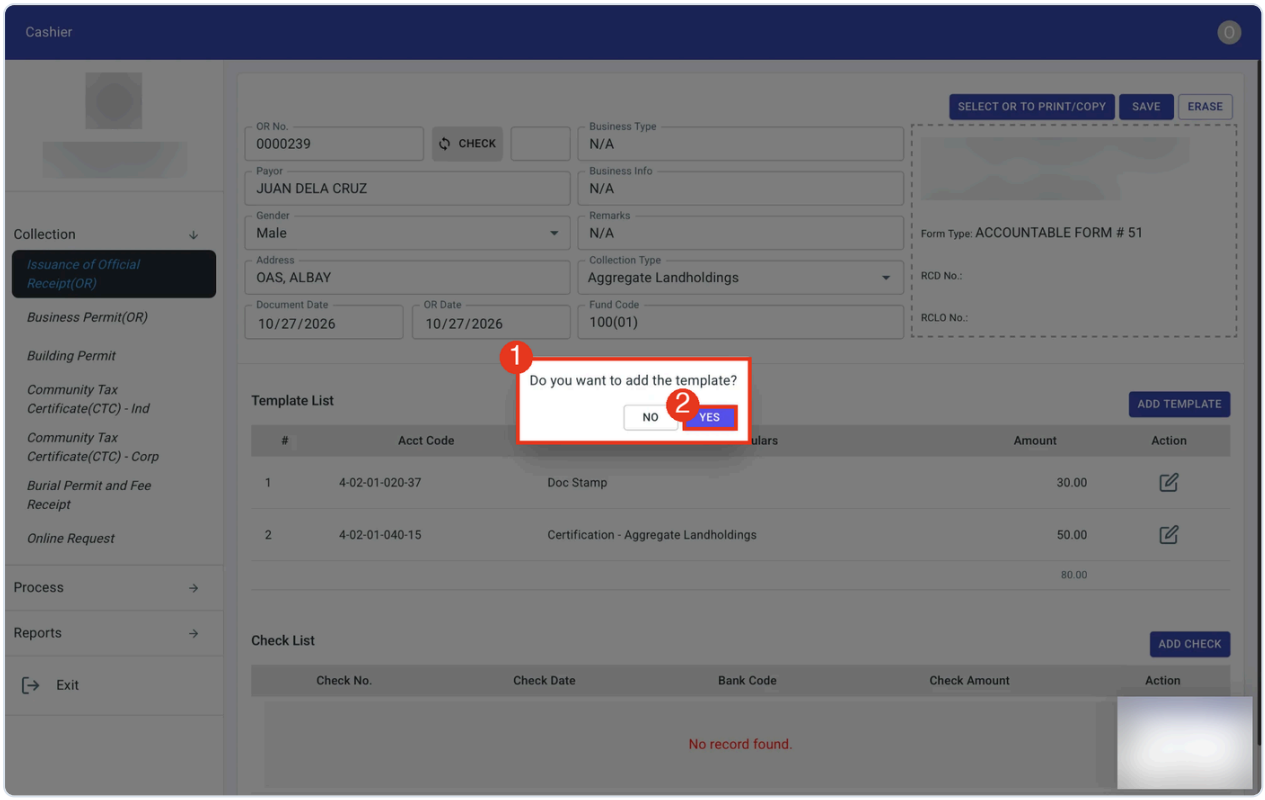

Figure 7. The question. 1 The question · 2 Yes.

A green message `Adding template to table success` appears and the Template List shows the lines: the account code, the particulars and the amount, with the total below.

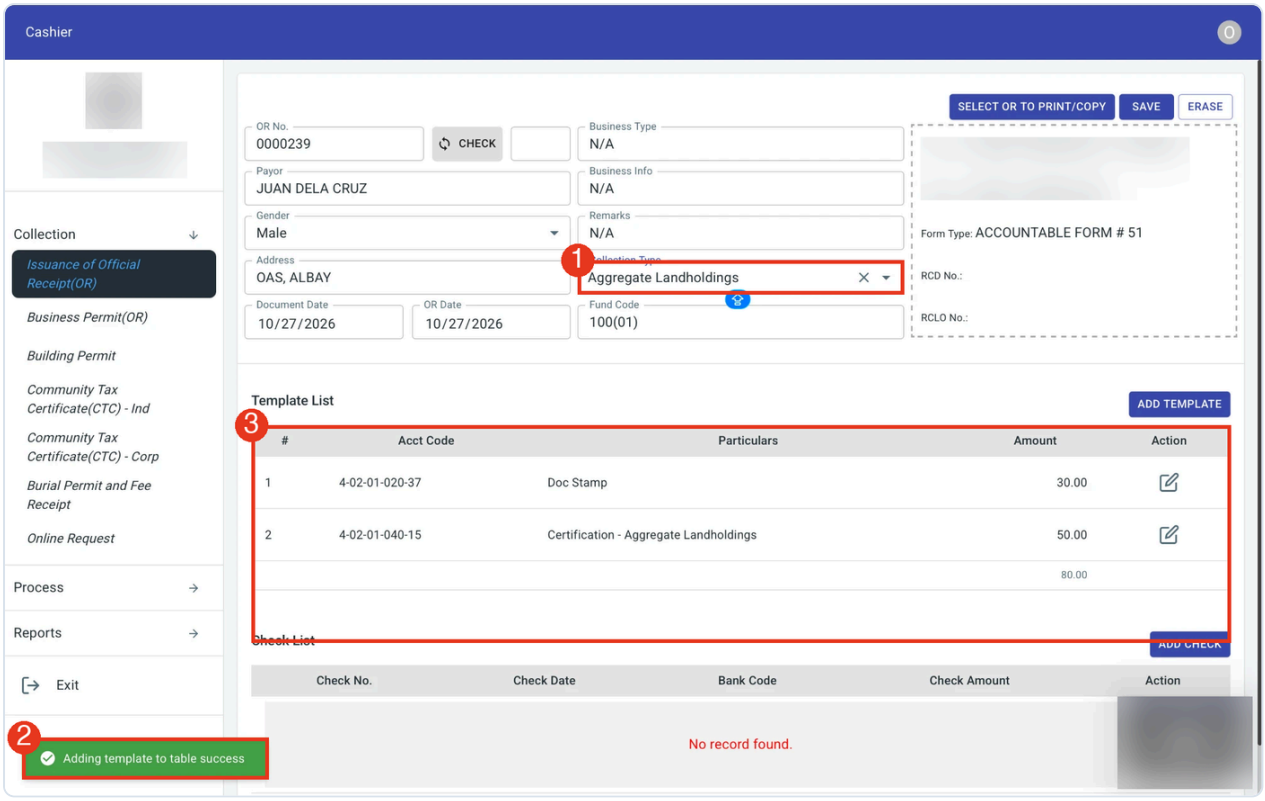

Figure 8. The template added. 1 Collection Type · 2 The message · 3 The Template List and its total.

Step 4. Add another collection type. If the payor pays for something else, click **Add Template**. In **Select Additional Collection Type** choose the type and answer **Yes** to the question. Its lines are added under the others and the total grows.

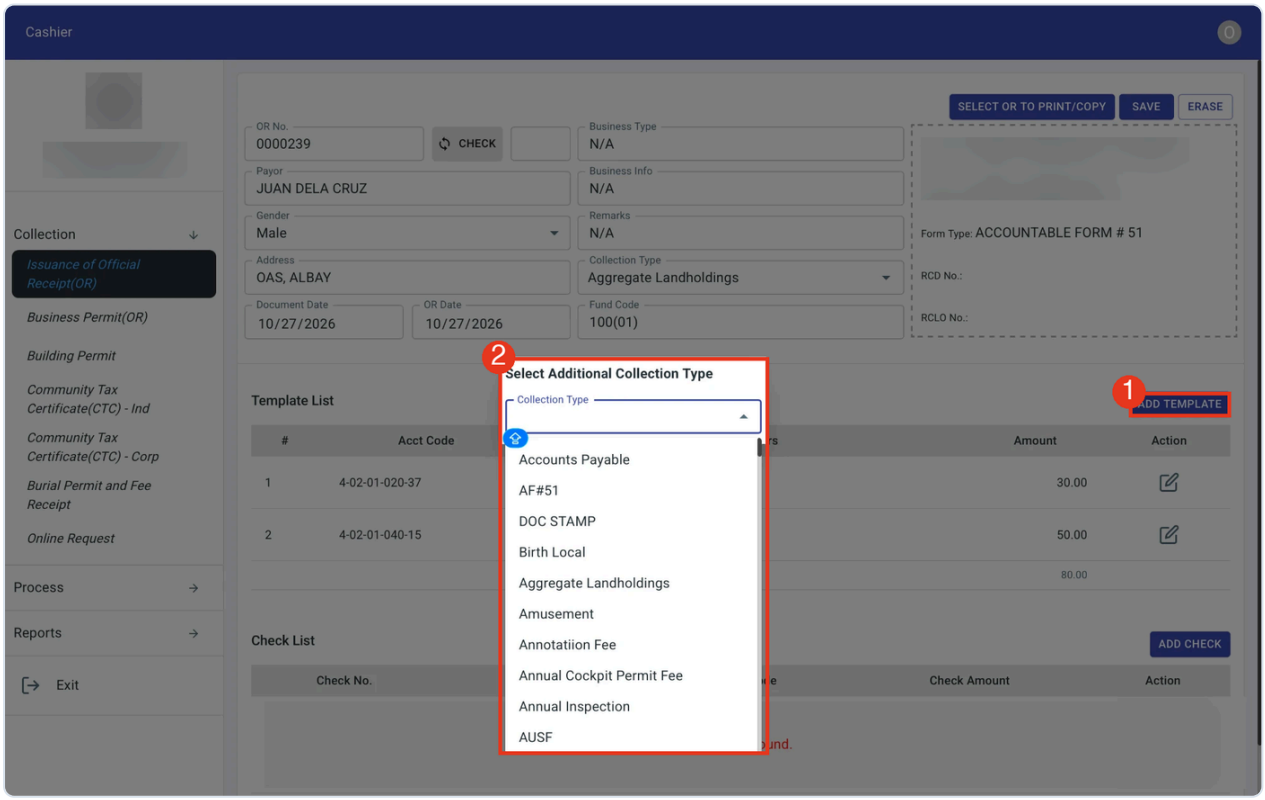

Figure 9. The button and the window. 1 Add Template · 2 Select Additional Collection Type.

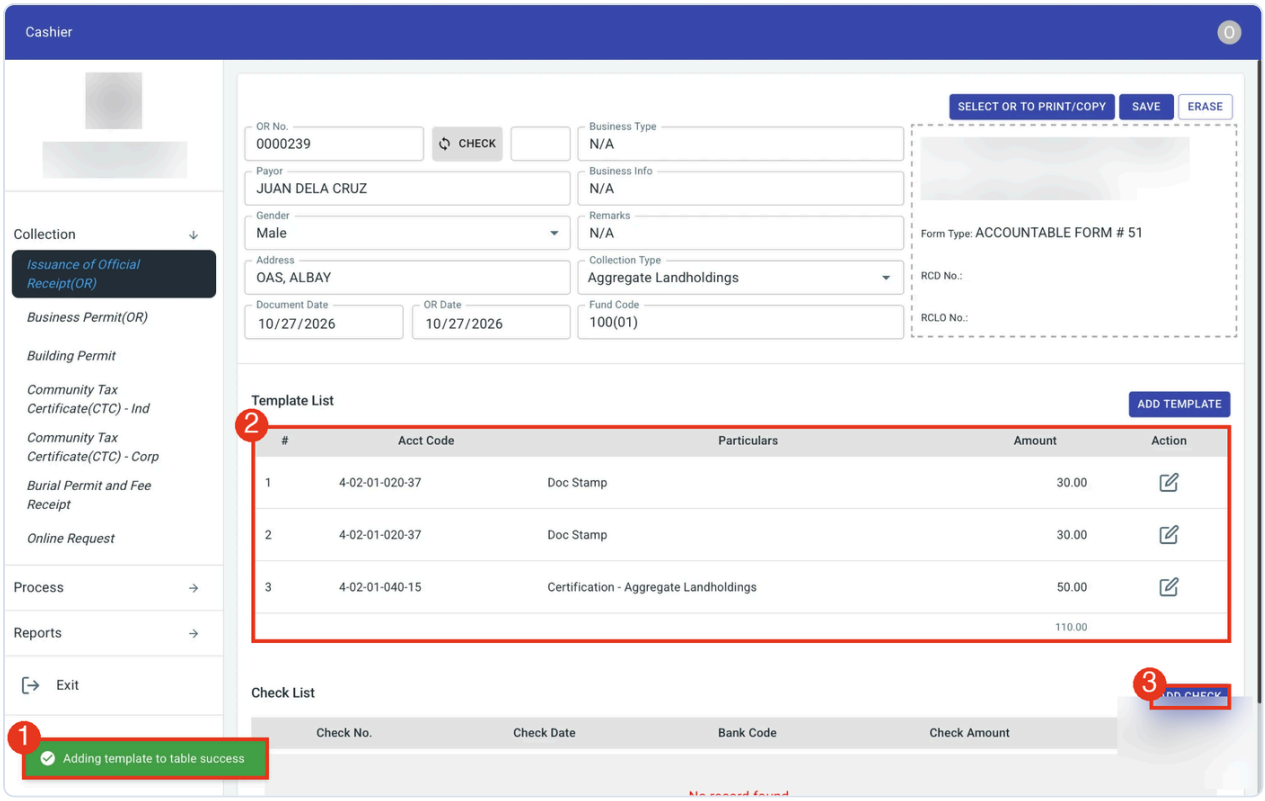

Figure 10. After the second template. 1 The message · 2 The Template List, now with three lines and a total of 110.00 · 3 Add Check.

Step 5. Change a line (if needed). Click the pencil icon of a line. The window **Edit** shows the **Particulars** and the **Amount**. Change them and click **Update**, or click **Close** to leave without a change.

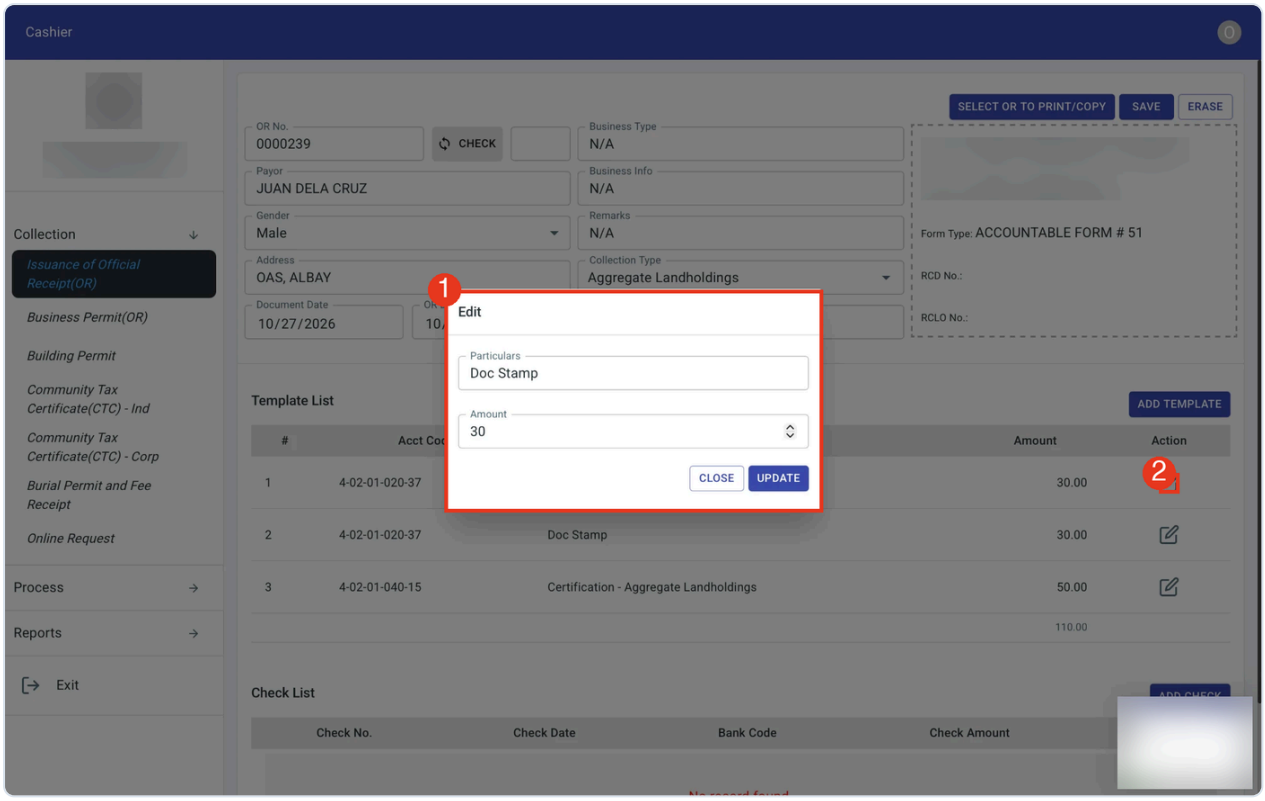

Figure 11. The window Edit. 1 Particulars, Amount, Close and Update · 2 The pencil icon of the line.

Step 6. Checks. If the payor pays by check, click **Add Check** and fill in the check number, date, bank and amount. The checks appear in the Check List.

Step 7. Click Save. The buttons at the top right of the form are **Select OR To Print/Copy**, **Save** and **Erase**.

Figure 12. The buttons of the form. 1 Select OR To Print/Copy · 2 Save · 3 Erase.

What Save does. Click **Save** (or press Ctrl+S). **Save** is gray until the form has at least one line in the Template List. TIS then records the receipt under the OR number, with the payor, gender, address, collection type, the dates and the total amount (split between special accounts and the other accounts). The green message `Issuance details updated successfully` appears and the receipt is shown again as saved, with its lines and checks. After a moment the receipt opens for printing, and then TIS asks **Next OR?** Choose **Yes** to continue with the next number of the booklet. A saved receipt can later be found with **Select OR To Print/Copy**. **Erase** cancels a receipt that was saved, and shows `Issuance OR cancelled successfully`.

2.2 Business Permit(OR)

Makes the receipt of a business permit. The business and its fees come from the assessment of the business. It has the same layout as the page above: **OR No.**, **Check**, **Template List** and **Check List**, and **Select OR To Print**.

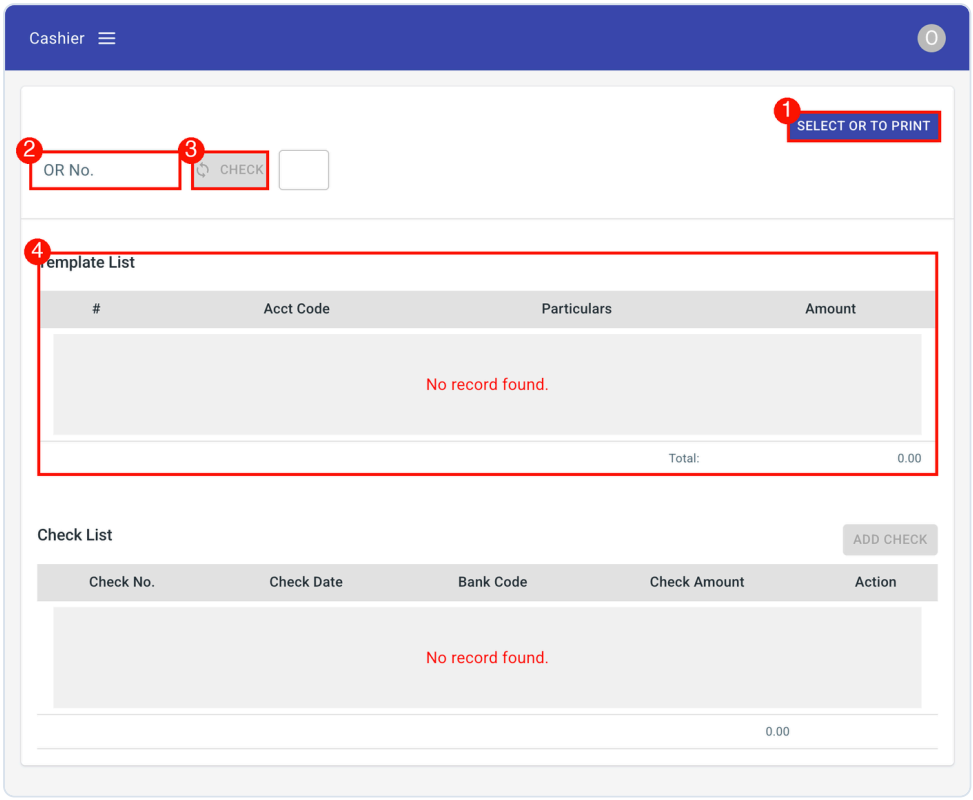

Figure 13. The page when it opens. 1 Select OR To Print · 2 OR No. · 3 Check · 4 Template List.

What a cashier sees on Check. A receipt can be handled only when its booklet belongs to an officer that is assigned to your user. If you type a number of another officer, TIS shows a red message. Click **OK** and ask the Admin to assign the officer to your user.

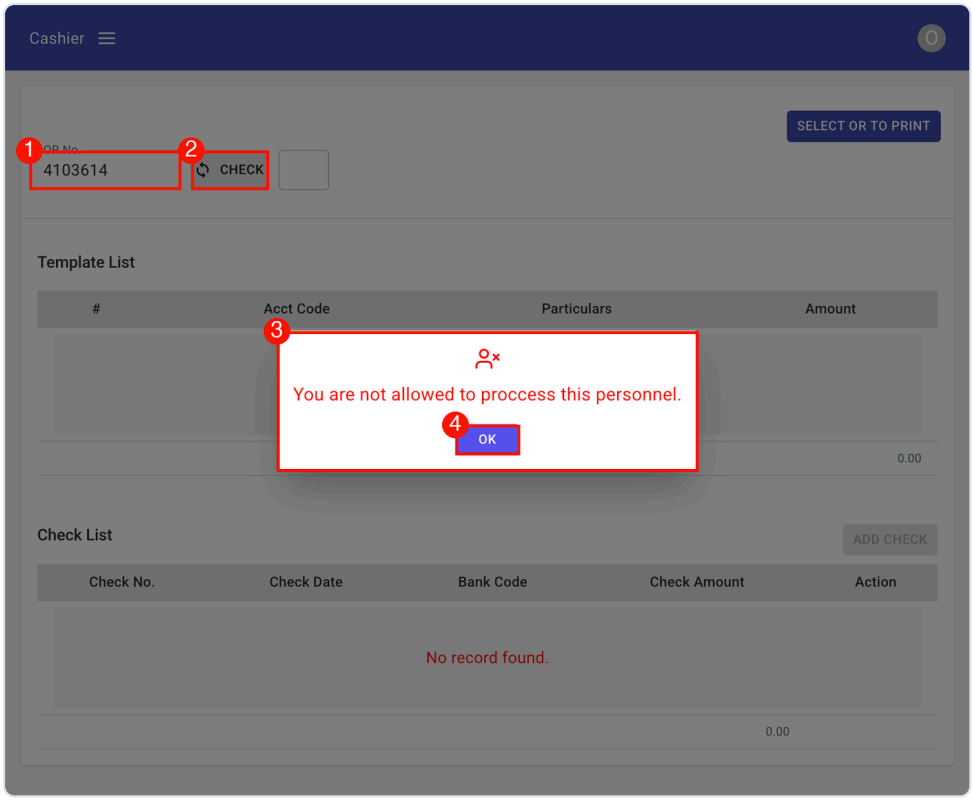

Figure 14. Check on a number that is not of an assigned officer. 1 OR No. · 2 Check · 3 The message · 4 OK.

The message reads `You are not allowed to proccess this personnel.`

2.3 Building Permit

Makes the receipt of a building permit from the application of the permit. This is the sample for the pages that take their data from another office: the payor and the fees are not typed, they are retrieved from the application. **Business Permit(OR)** and the other Collection pages follow **the same process** (check the number, retrieve or fill in the details, look at the Template List, click Save, print). Only the source of the details differs.

Step 1. Check the number. Type the OR number and click **Check**. The form opens with the officer, collector and form type of the booklet. The **Payor** is empty, **Save** is gray and the Template List shows *No record found*. Click **Add Details**.

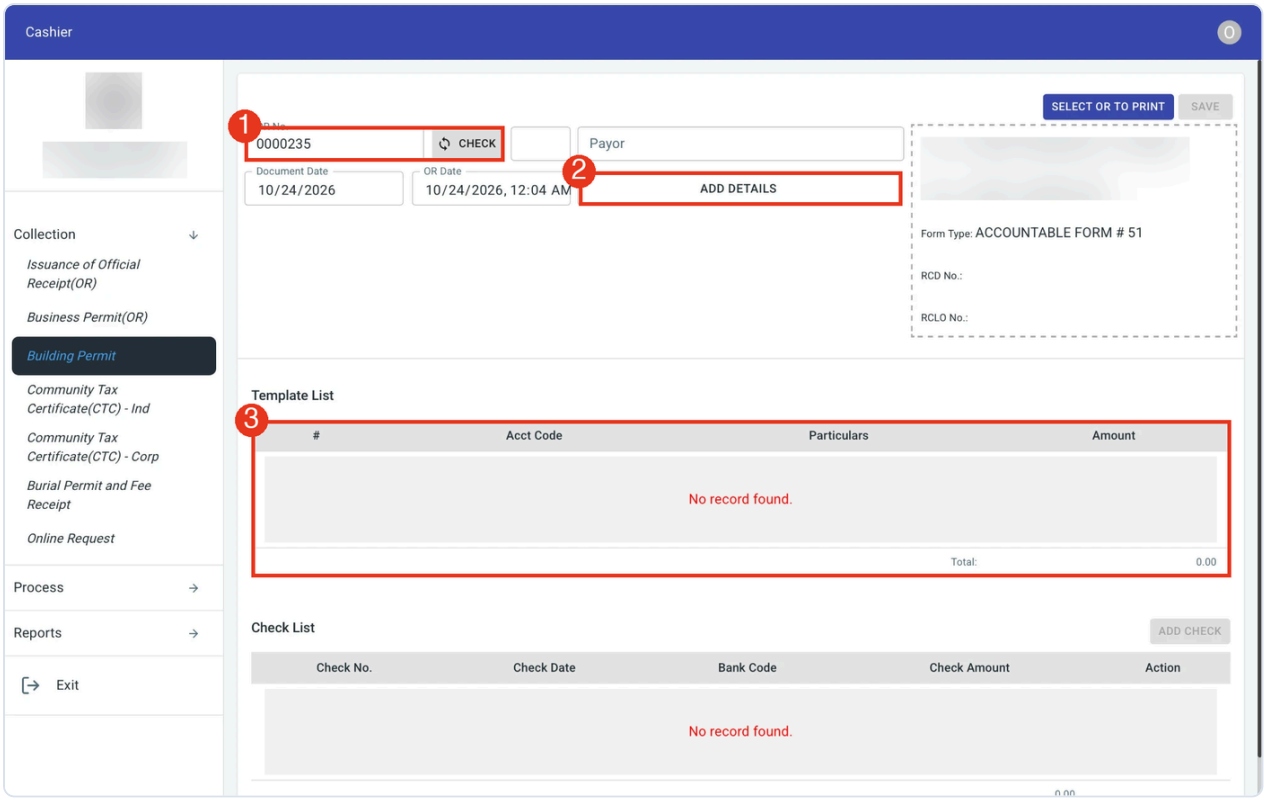

Figure 15. The form after Check. 1 OR No. and Check · 2 Add Details · 3 The empty Template List. The officers are blurred.

Step 2. Find the application. The window **Filter To Display** offers two ways: tick **Search for Application No.** and type the number, or tick **Search for Owner** and type the name (the owner is required). Click **Filter**.

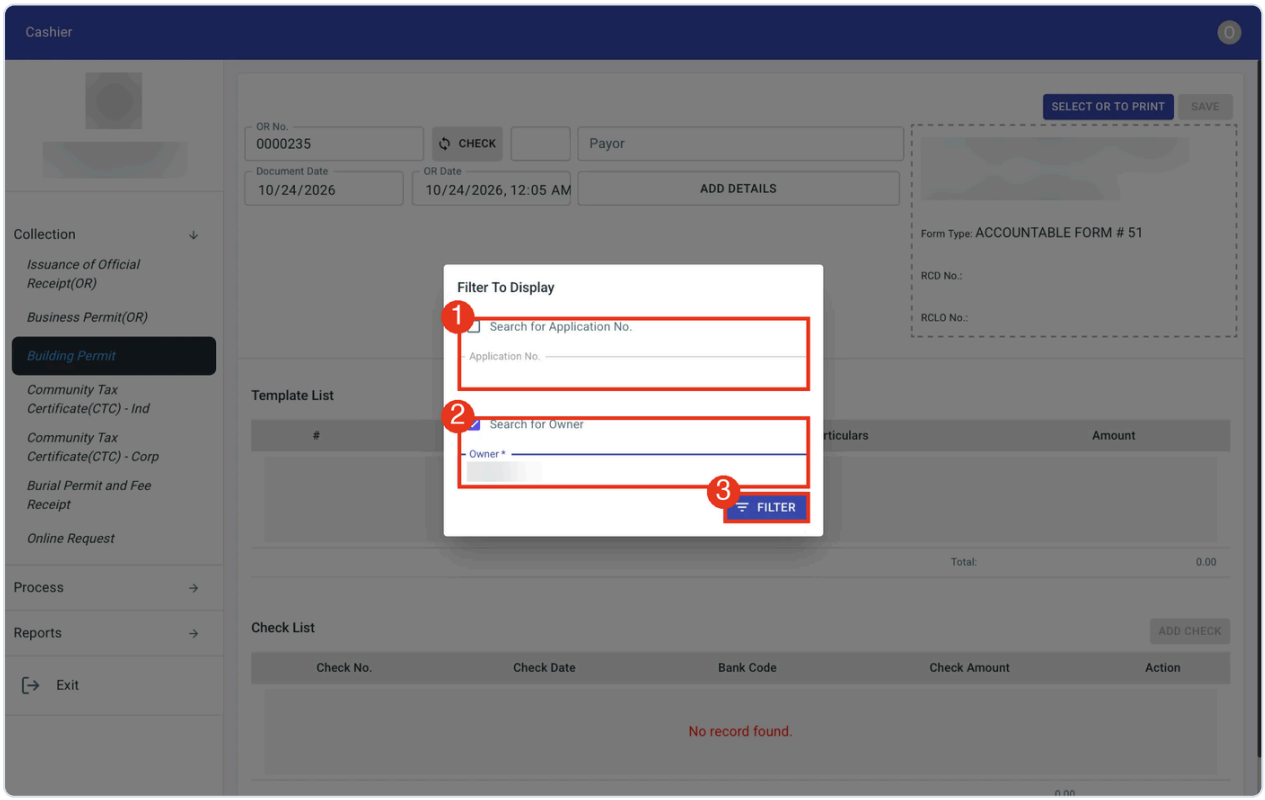

Figure 16. The window Filter To Display. 1 Search for Application No. · 2 Search for Owner · 3 Filter.

The list shows each application with its number and the owner. Use the search box to narrow it. Click **Retrieve** on the application of the payor.

Figure 17. The list of applications. 1 Search application no./owner · 2 Retrieve. The owner is blurred.

Step 3. Look at the receipt. The **Payor** is filled in and the Template List shows the fees of the permit with their account codes and the total, here 5,808.50 and 468.00 for 6,276.50. **Save** is now blue. If the payor pays by check, use **Add Check** as in 2.1.

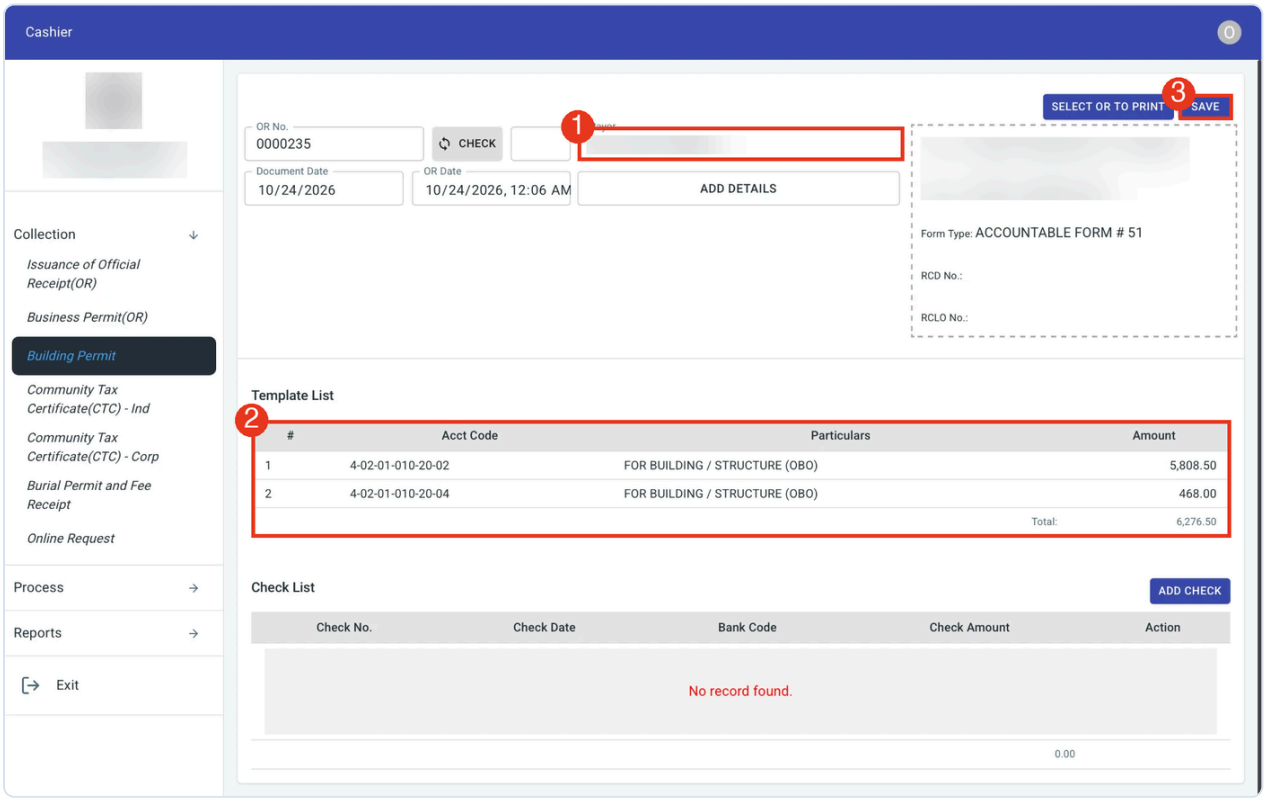

Figure 18. The form after Retrieve. 1 Payor · 2 The fees of the permit and the total · 3 Save. The names are blurred.

Step 4. Click Save (or press Ctrl+S).

Figure 19. The buttons of the page. 1 Select OR To Print · 2 Save.

The green message `Building permit created successfully` appears. The button **Save** is replaced by **Print OR**, and the lines of the Template List now show the particulars of the accounts (for example *Accessory Structure Fees* and *Electrical Fees*).

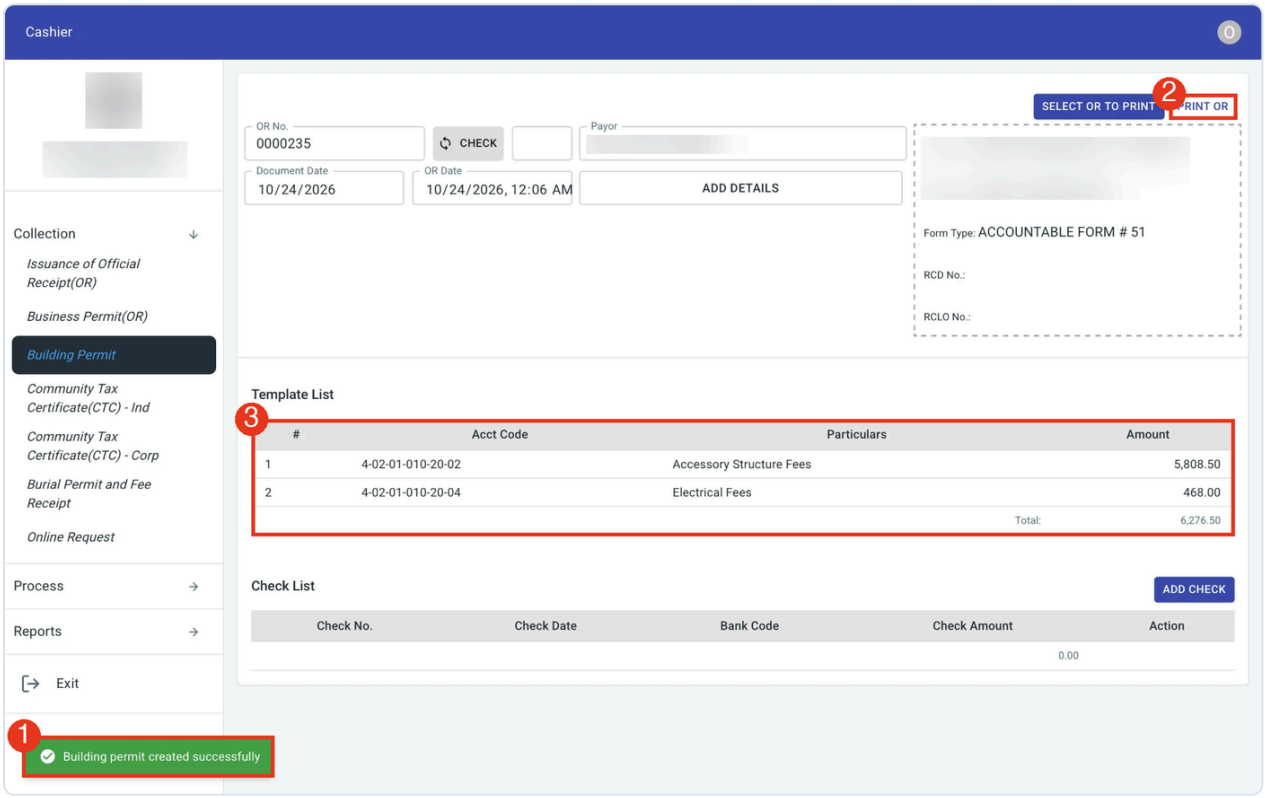

Figure 20. After Save. 1 The message · 2 Print OR · 3 The saved fees. The names are blurred.

Step 5. Print. Click **Print OR** to print the receipt on the official form: the date, the OR number, the fund, the payor, the lines with their account codes and amounts, the total in figures and in words, and the name of the treasurer. To print an older receipt, use **Select OR To Print**.

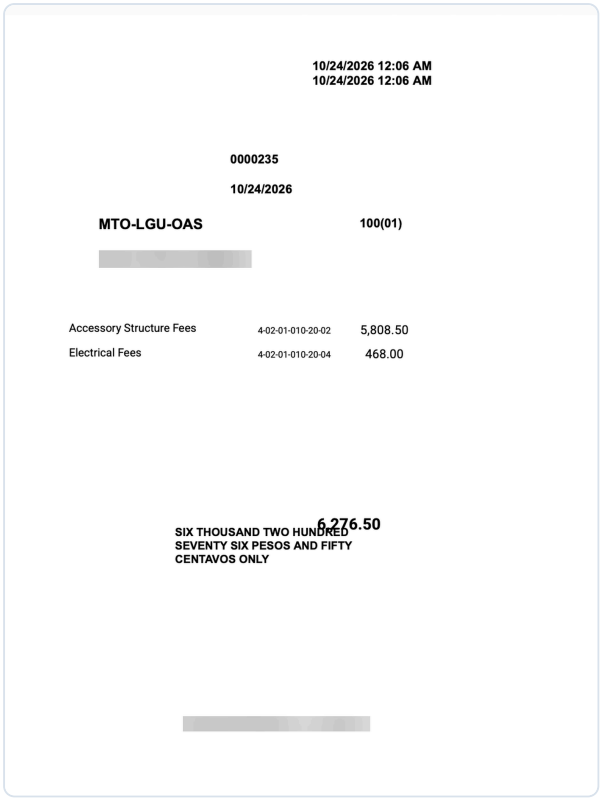

Figure 21. The printed receipt. The payor and the treasurer are blurred.

2.4 Community Tax Certificate(CTC) - Ind

Makes a community tax certificate for a person. The first box is the **CTC No.** (not an OR number), followed by **Check** and a small box for the suffix. **Add Template** and **Add Check** work as in the other pages after a number is checked.

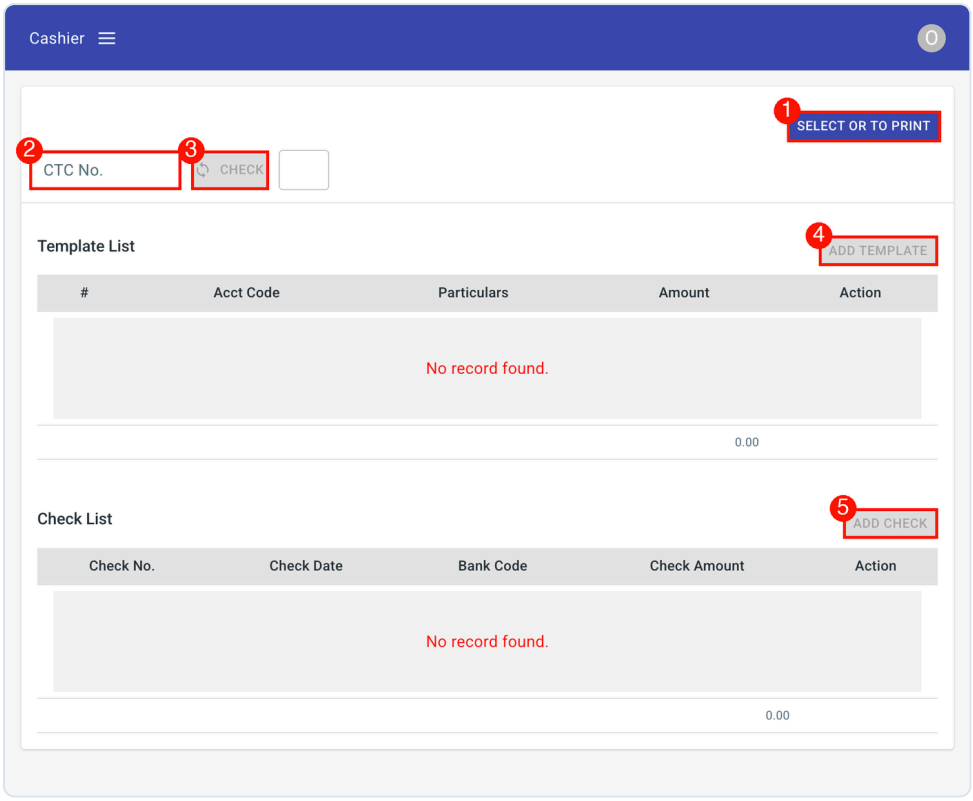

Figure 22. The page when it opens. 1 Select OR To Print · 2 CTC No. · 3 Check · 4 Add Template · 5 Add Check.

2.5 Community Tax Certificate(CTC) - Corp

The same page for a company. It also shows **CTC No.**, **Check**, **Add Template**, **Add Check** and **Select OR To Print**.

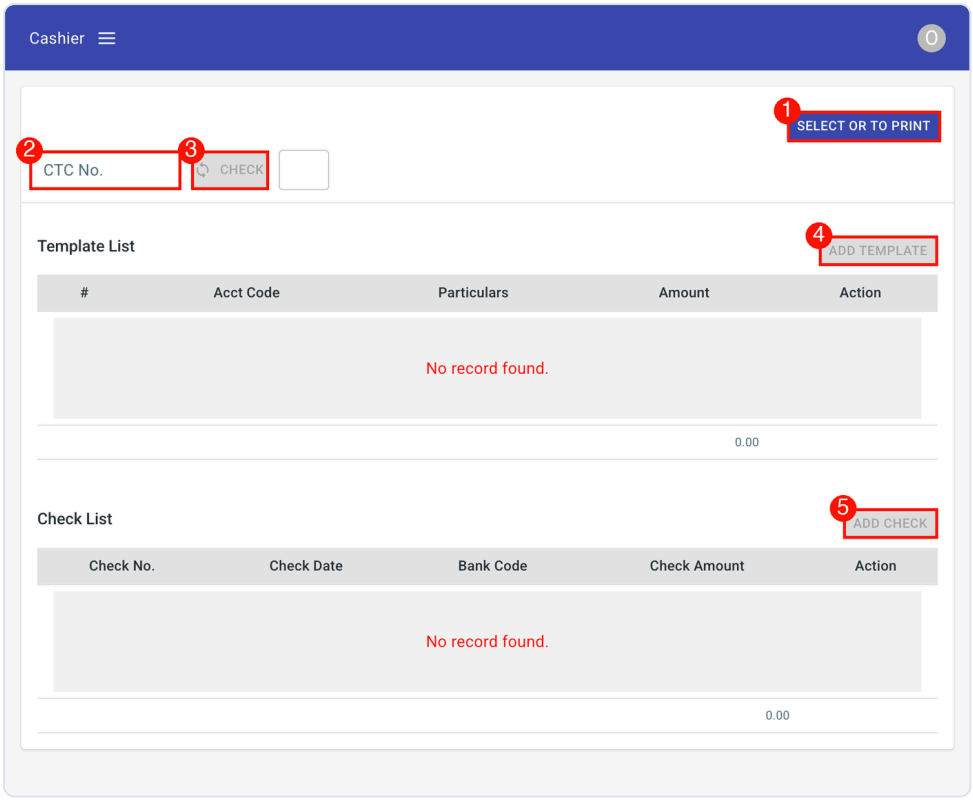

Figure 23. The page when it opens. 1 Select OR To Print · 2 CTC No. · 3 Check · 4 Add Template · 5 Add Check.

2.6 Burial Permit and Fee Receipt

Makes the receipt of a burial permit and its fees. The page has **OR No.**, **Check**, **Add Template**, **Add Check** and **Select OR To Print**.

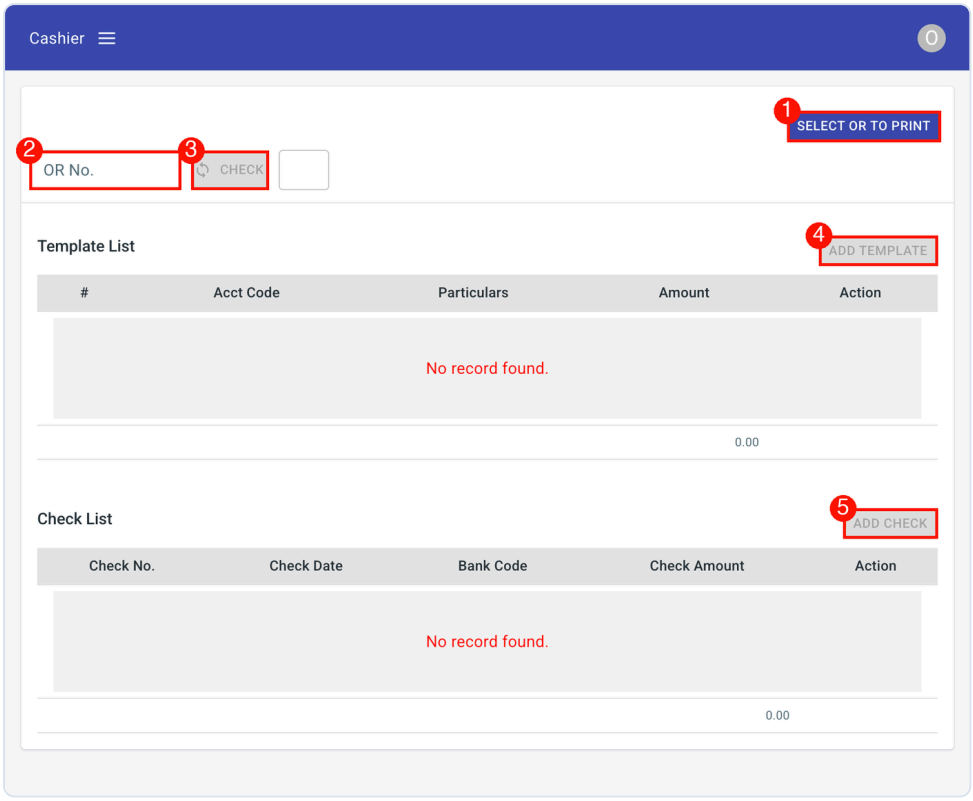

Figure 24. The page when it opens. 1 Select OR To Print · 2 OR No. · 3 Check · 4 Add Template · 5 Add Check.

2.7 Online Request

Lists the payments that people requested online, so that the cashier can find a request and set it as paid. The list shows the number, the payor and the **Service Type** (for example *burial*). Use the search box (box 1) to find a payor, **Scan QR** (box 2) to read the QR code of a request with the camera, or **Upload QR** (box 3) to read it from a picture file. The eye icon in the **Action** column opens the request.

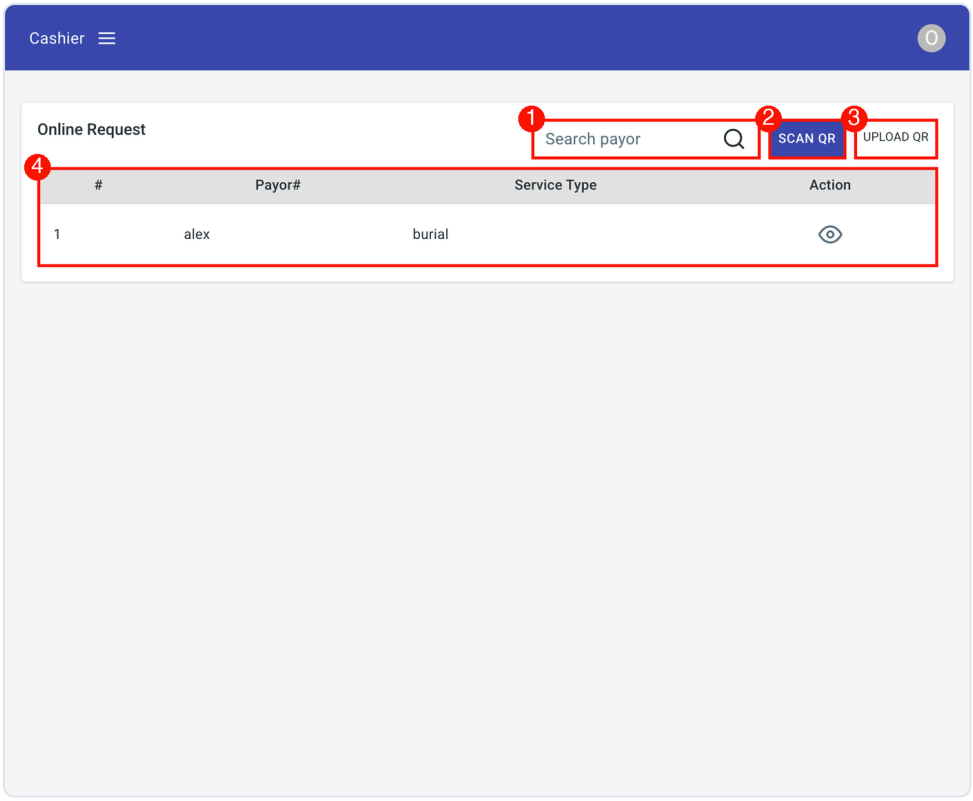

Figure 25. The page when it opens. 1 Search payor · 2 Scan QR · 3 Upload QR · 4 The requests. The example is a test request.

The window **Request Details** shows the **Request Information** (payee, deceased, cemetery, dates and cause) and the **Breakdown**: the accounts to pay with their amounts. The pencil icon of each line changes that line.

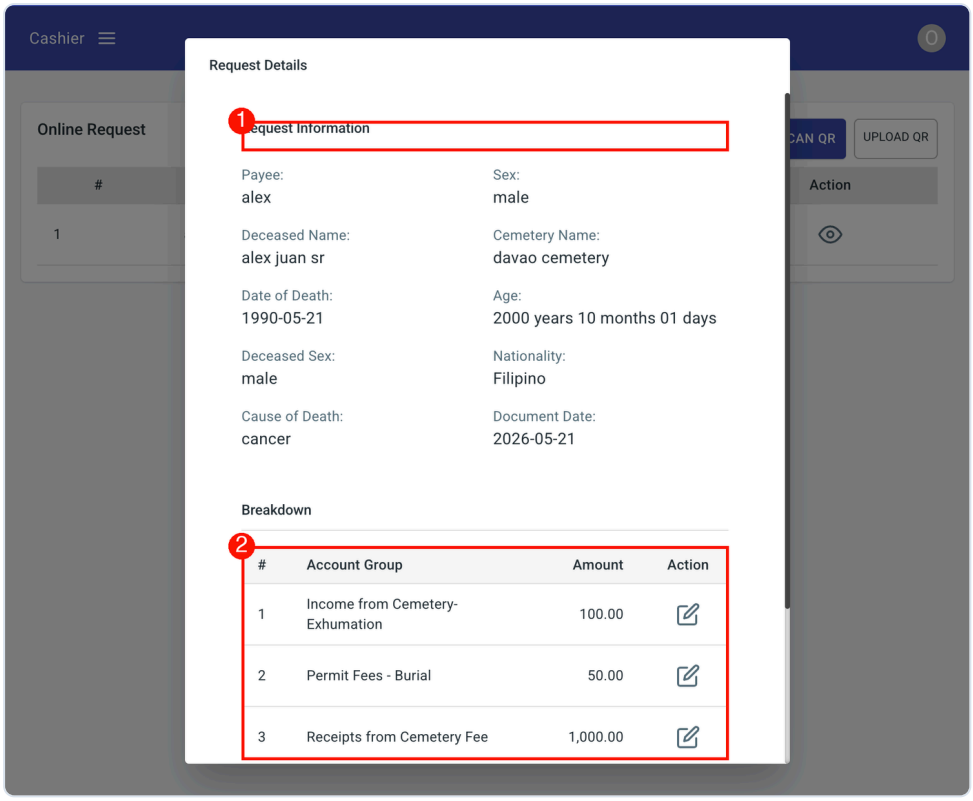

Figure 26. The window Request Details. 1 Request Information · 2 Breakdown.

3. Process

Process closes the collection. The RCD gathers the receipts of one collector, and the RCLO gathers the RCDs of one fund. Both pages have two icons at the top right: the **folder with a plus** (to process) and the **magnifier** (to list what was processed).

3.1 Report of Collection and Deposits(RCD) Processing

The table shows the collector, the receipts **Issued** and **Sold** (quantity, from and to), the **Collected Amount**, the booklet **Suffix**, **Fromno**, **Tono** and the **Balance**. It is empty until you retrieve.

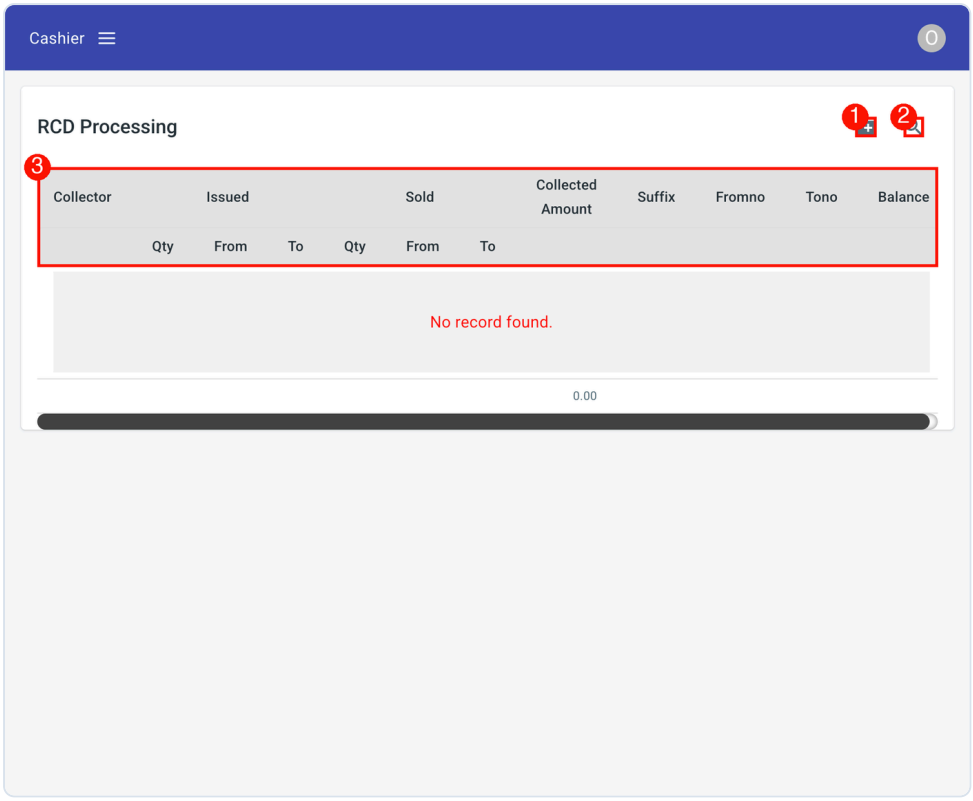

Figure 27. The page when it opens. 1 Process (folder icon) · 2 The list of RCDs (magnifier) · 3 The table of the collector.

The magnifier opens the **RCD List**: the date of each RCD, its number and the RCLO that holds it. Use the search box (box 1) to find an RCD number. The **Remove** button of a line is blue only for an RCD that is not yet in an RCLO.

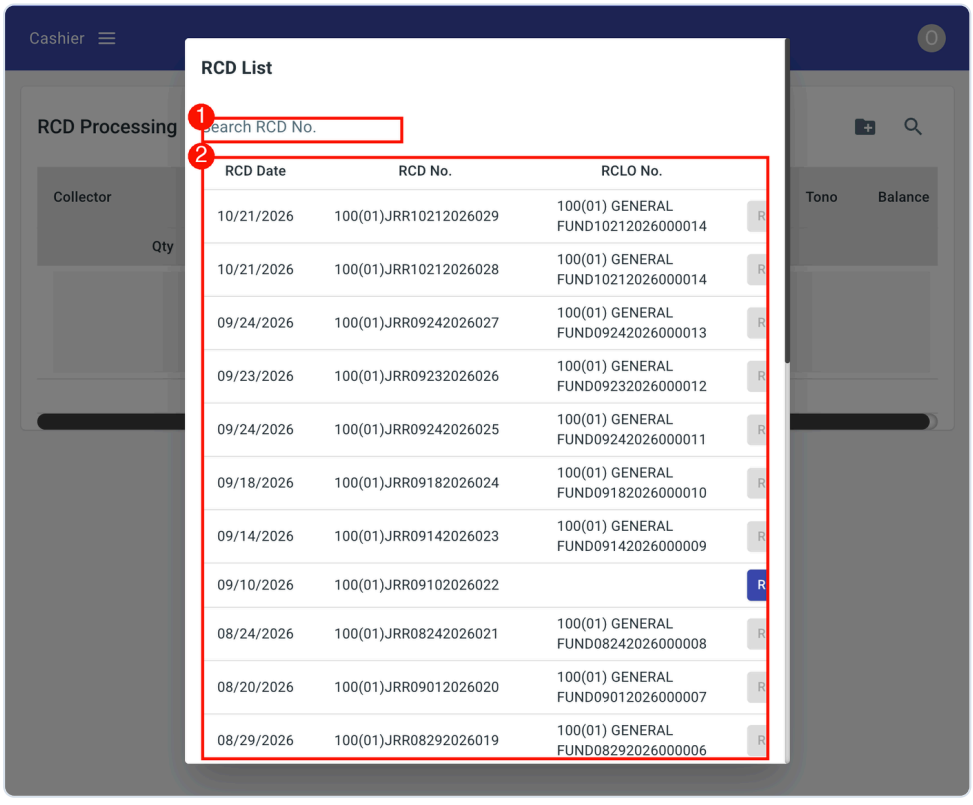

Figure 28. The window RCD List. 1 Search RCD No. · 2 RCD date, RCD number and RCLO number.

The folder icon opens **PROCESS RCD DIALOG**. Choose the **Liq Officer**, the **Collector** (only the officers assigned to your user are offered), the **Fund Code** and the **Form Code**, then the **From OR Date**, **To OR Date** and the **RCD Date**. Click **Retrieve** to see the receipts of that choice. **Process** gives the RCD its number. Both buttons are gray until the lists are chosen.

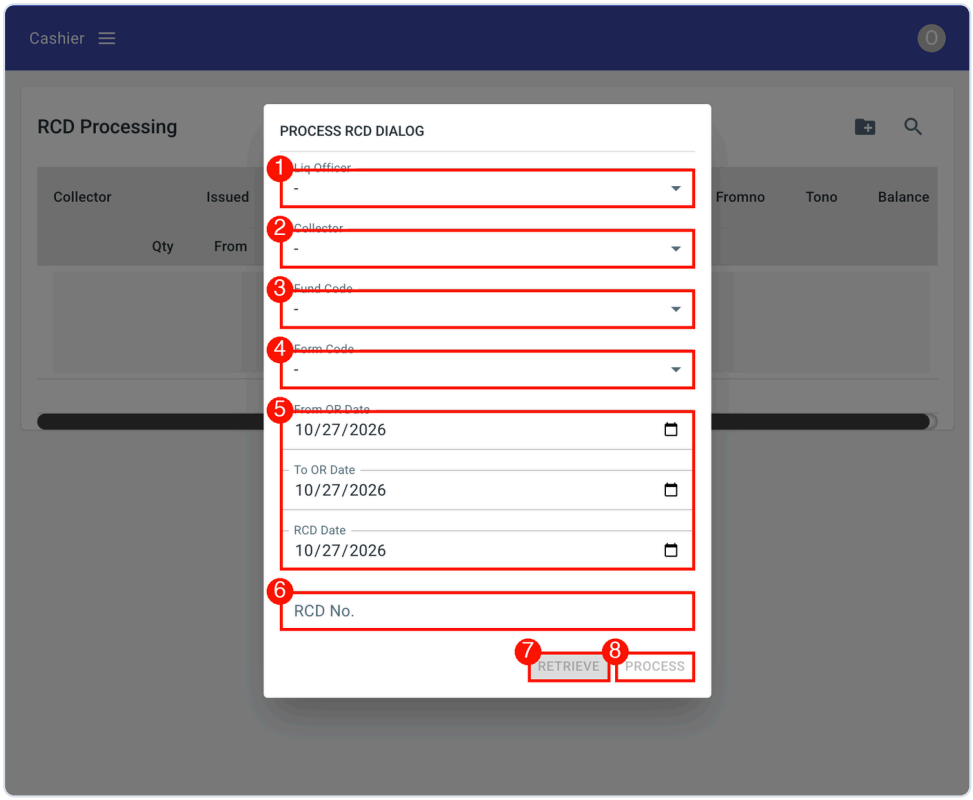

Figure 29. The window PROCESS RCD DIALOG. 1 Liq Officer · 2 Collector · 3 Fund Code · 4 Form Code · 5 The dates · 6 RCD No. · 7 Retrieve · 8 Process.

3.2 Report of Collection by Liquidating Officer(RCLO) Processing

The table lists the RCDs that go into the RCLO: **RCD No.**, **Liquidating Officer**, **Collector**, **Money Value** and **RCD Date**.

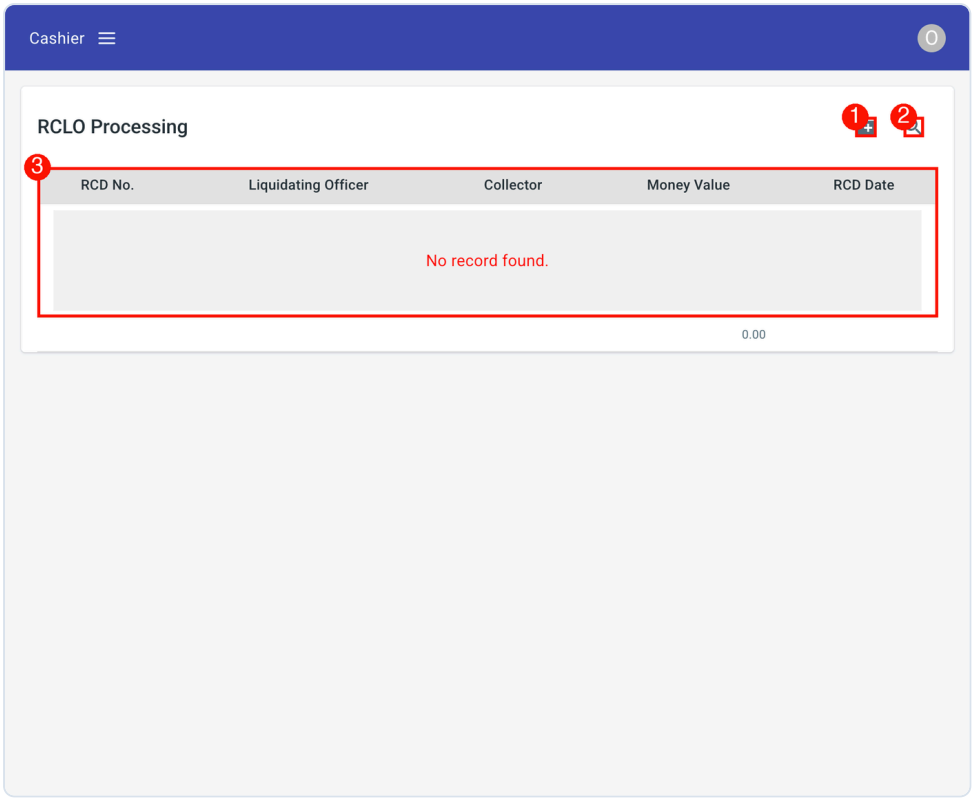

Figure 30. The page when it opens. 1 Process (folder icon) · 2 The list of RCLOs (magnifier) · 3 The table of RCDs.

The folder icon opens **PROCESS RCLO DIALOG**: choose the **Fund Code**, the **From RCD Date** and **To RCD Date**, and the **RCLO Date**. **Retrieve** shows the RCDs of the period. **Process** gives them the RCLO number.

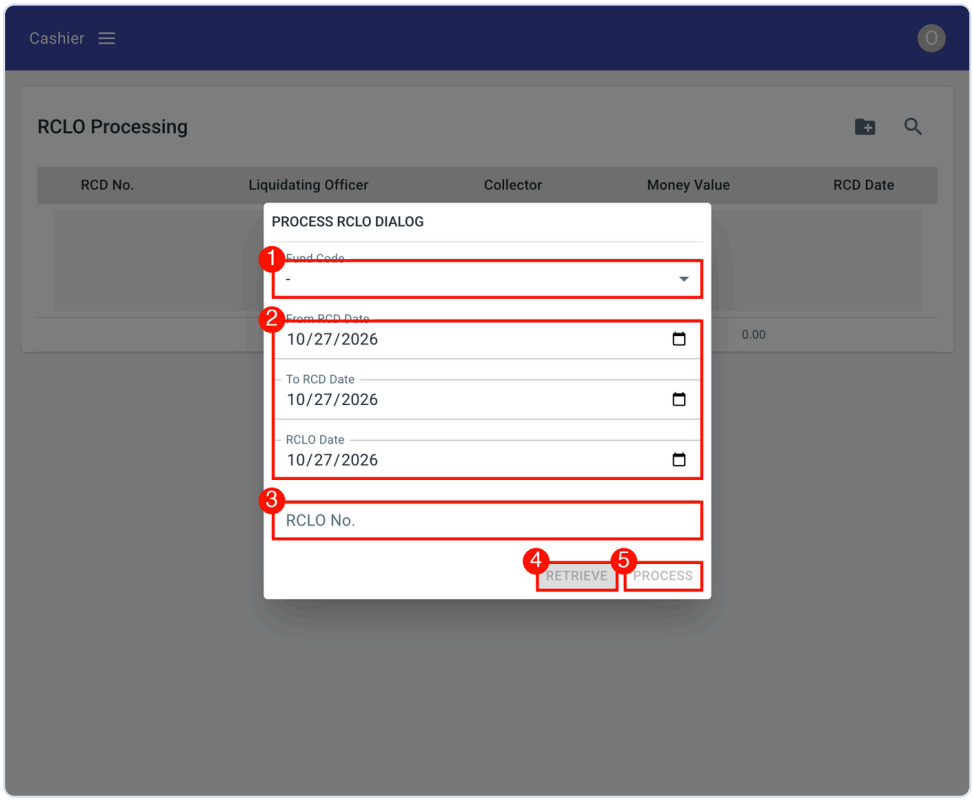

Figure 31. The window PROCESS RCLO DIALOG. 1 Fund Code · 2 The dates · 3 RCLO No. · 4 Retrieve · 5 Process.

The magnifier opens the **RCLO List**, with the date and number of each RCLO and a **Remove** button. Use the search box to find an RCLO number.

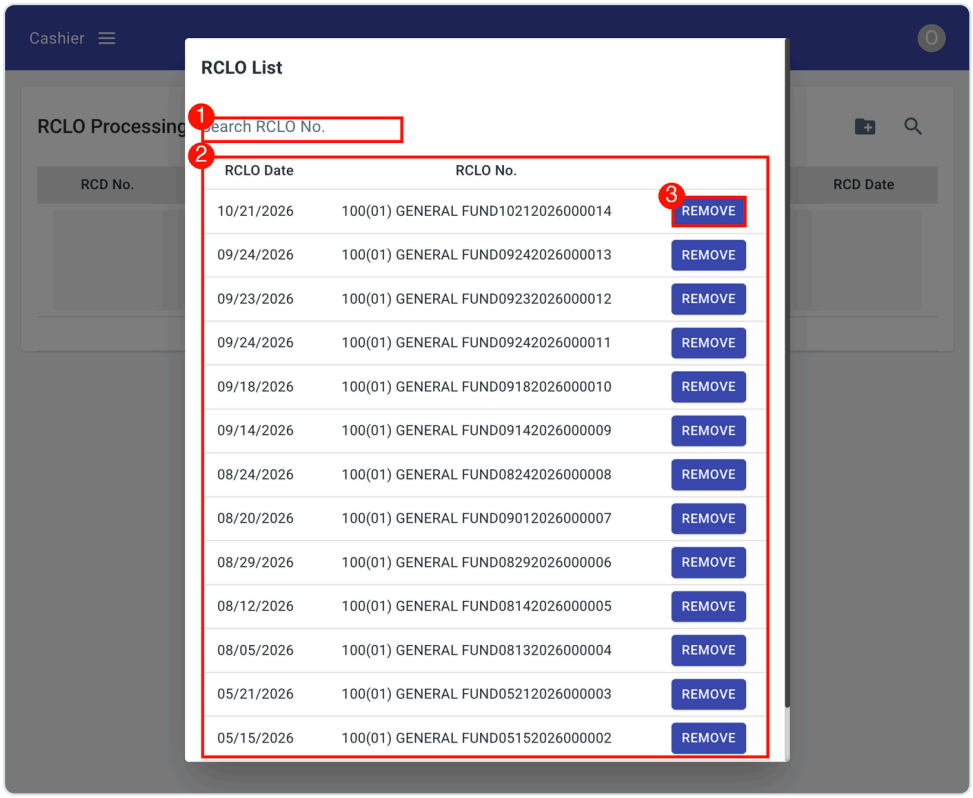

Figure 32. The window RCLO List. 1 Search RCLO No. · 2 The RCLOs · 3 Remove.

4. Reports

The Reports group has five reports. The pages only show data. Each one has a **Filter** or **Search** button to choose what to show, and **Print** to print the report on the page. Printing opens the print window of the browser.

4.1 Accountable Forms: Report of Accountability for Accountable Forms

Shows what happened to each booklet of receipts during a year.

Step 1. The page opens with the empty report. Click **Filter** (box 1).

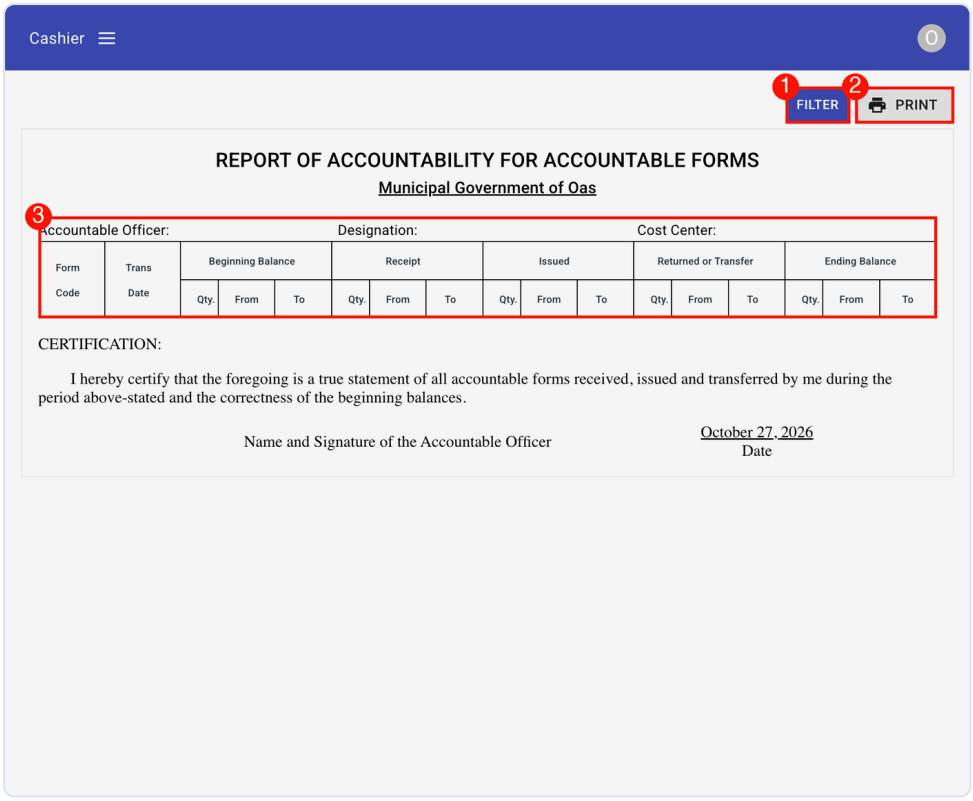

Figure 33. The report when it opens. 1 Filter · 2 Print · 3 The columns of the report.

Step 2. In **Filter To Display** the **Year** starts as the present year. Tick **Filter By Collector** to choose one collector, or leave it empty to show all. Click **Filter**.

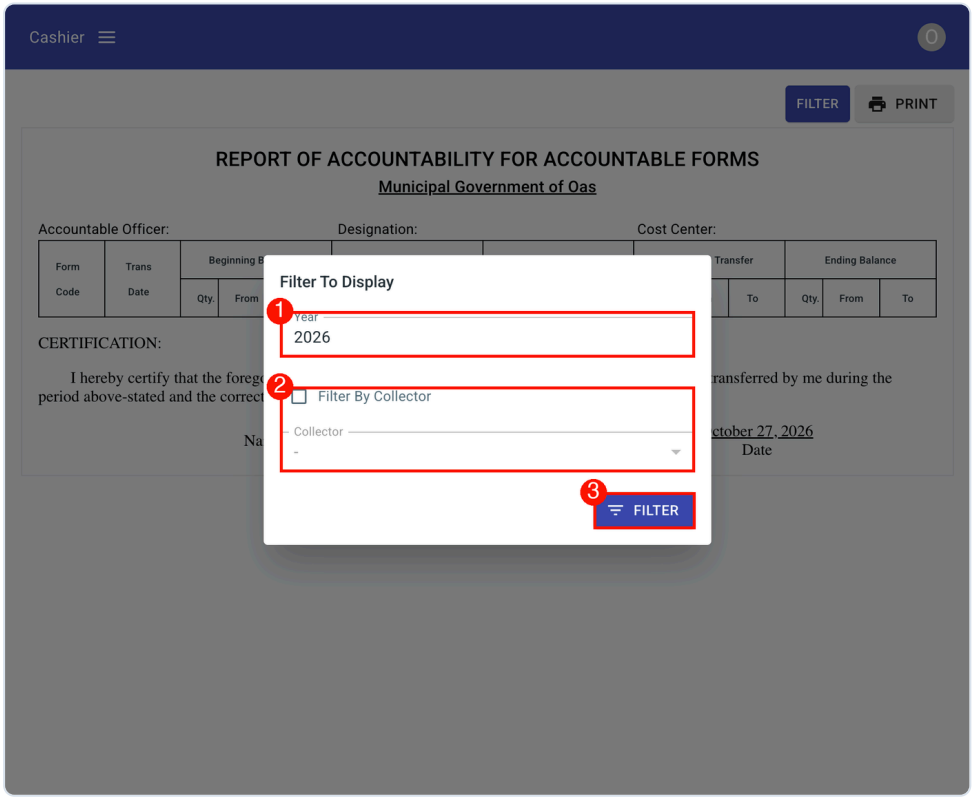

Figure 34. The filter window. 1 Year · 2 Filter By Collector and the Collector list · 3 Filter.

Step 3. Each row is one booklet: its form code, date, the beginning balance, what was issued and the ending balance. Click **Print** to print it.

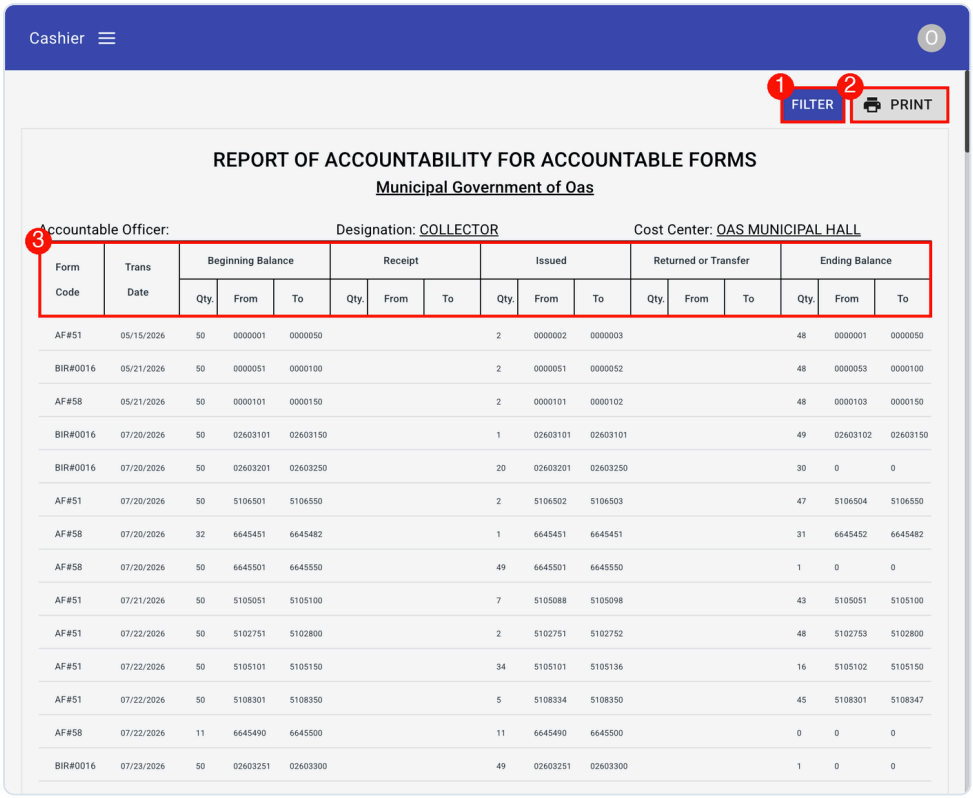

Figure 35. The report after Filter. 1 Filter · 2 Print · 3 The columns · 4 One row for each booklet.

4.2 Accountable Forms: Consolidated Report of Accountability for Accountable Forms

The same report in a short form, for the Treasurer, with a **Report No** line to write by hand and a **Remarks** column with the collector who holds each booklet. The filter has only the **Year**.

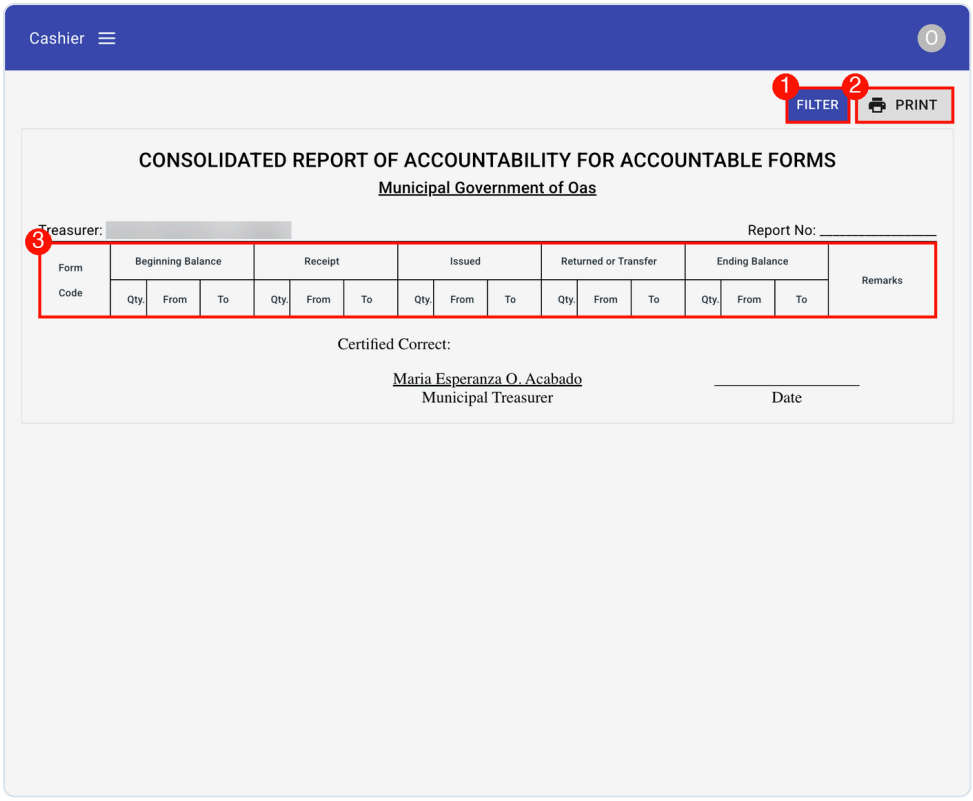

Figure 36. The report when it opens. 1 Filter · 2 Print · 3 The columns. The name of the treasurer is blurred.

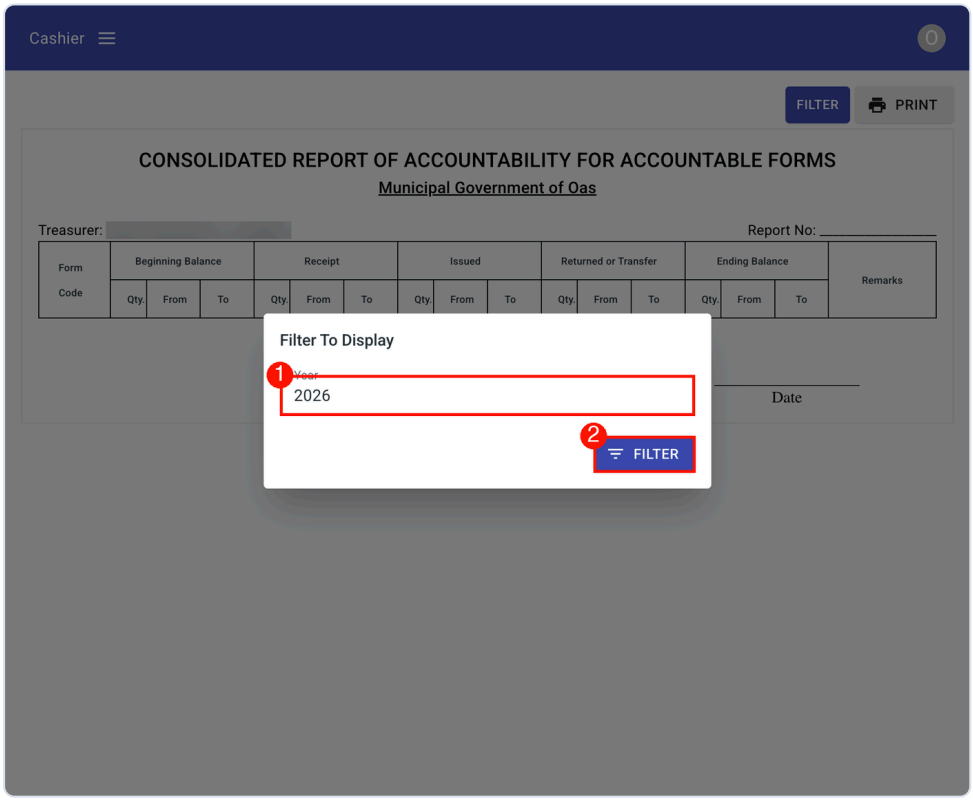

Figure 37. The filter window. 1 Year · 2 Filter.

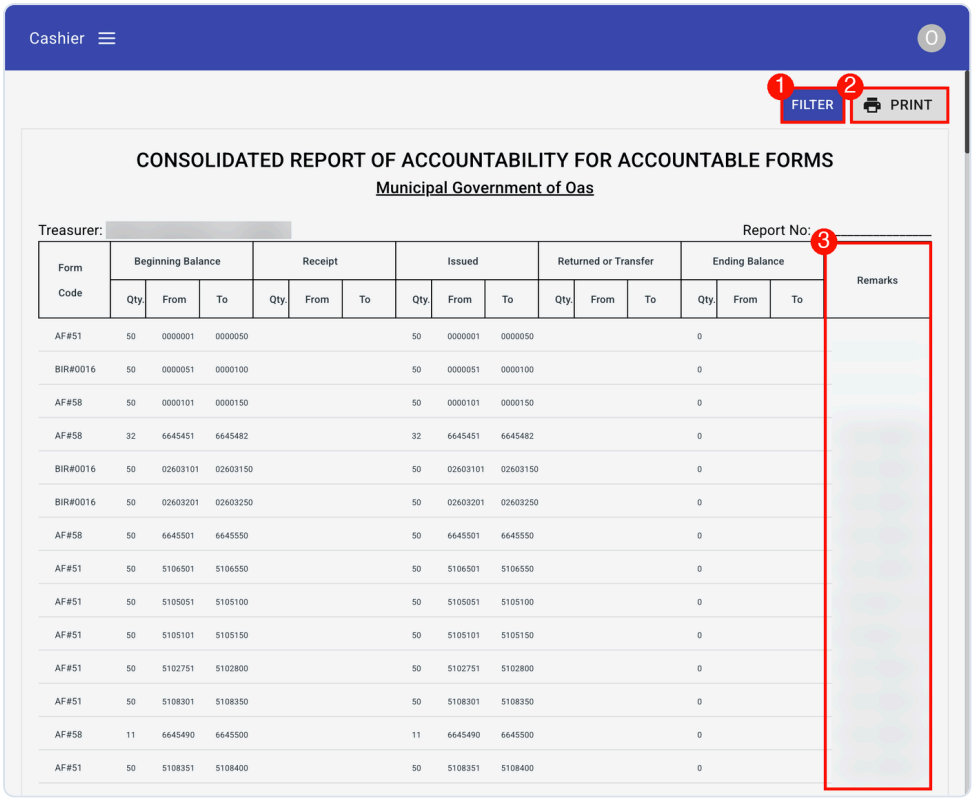

Figure 38. The report after Filter. 1 Filter · 2 Print · 3 Remarks: the collector of each booklet. The names are blurred.

4.3 Collection: Abstract of Collection

Lists the receipts that were issued, with the payee, the account and the amount, grouped by form and month, with sub totals and a total. The buttons are **Filter**, **Print** and **Export To Excel** (saves the report as a spreadsheet).

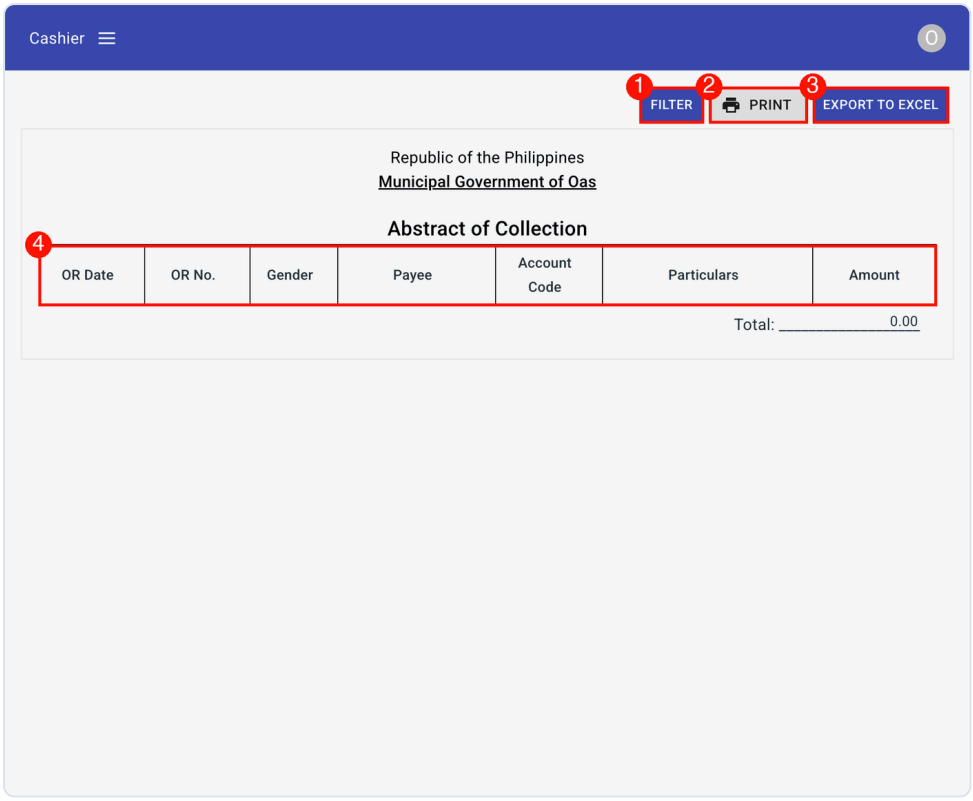

Figure 39. The report when it opens. 1 Filter · 2 Print · 3 Export To Excel · 4 The columns.

Click **Filter**. Tick the check box of each way of filtering: **Filter By Date** (from and to), **Filter By Collector**, **Filter By Fund** and **Filter By OR Template**. A list is active only after its box is ticked. **Filter** stays gray until you tick at least one box. If a ticked list is empty, `Collector required!` or `Fund required!` appears.

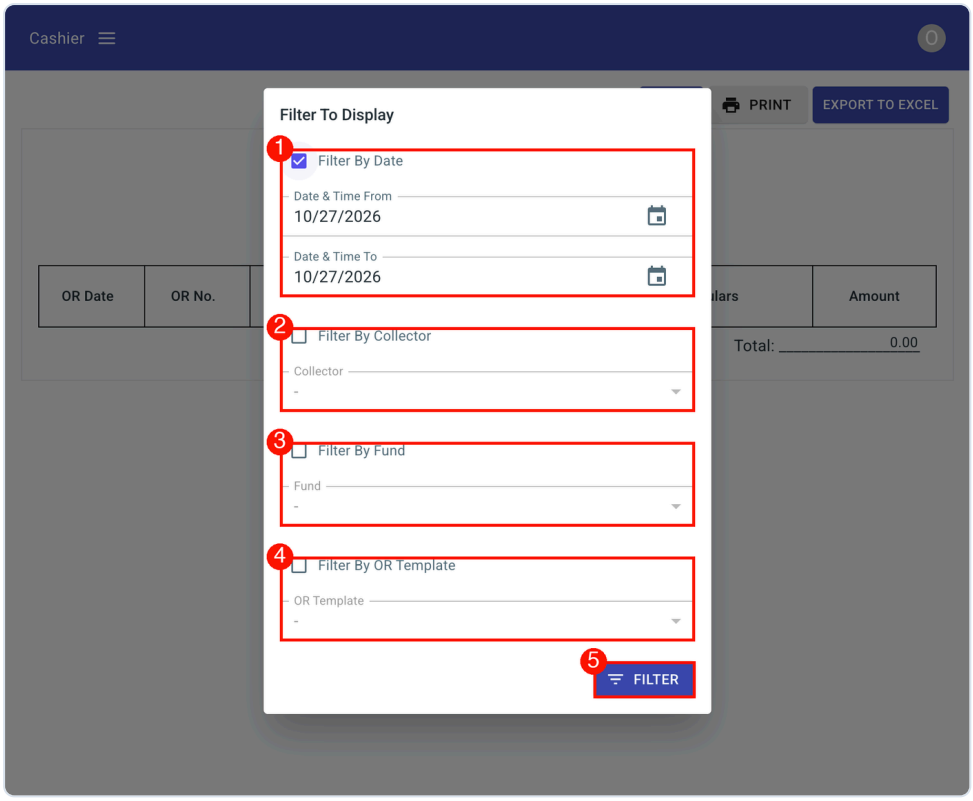

Figure 40. The filter window with Filter By Date ticked. 1 Date · 2 Collector · 3 Fund · 4 OR Template · 5 Filter.

The report then shows the period, for example *For the period of 27/10/2026 to 27/10/2026*, and the receipts.

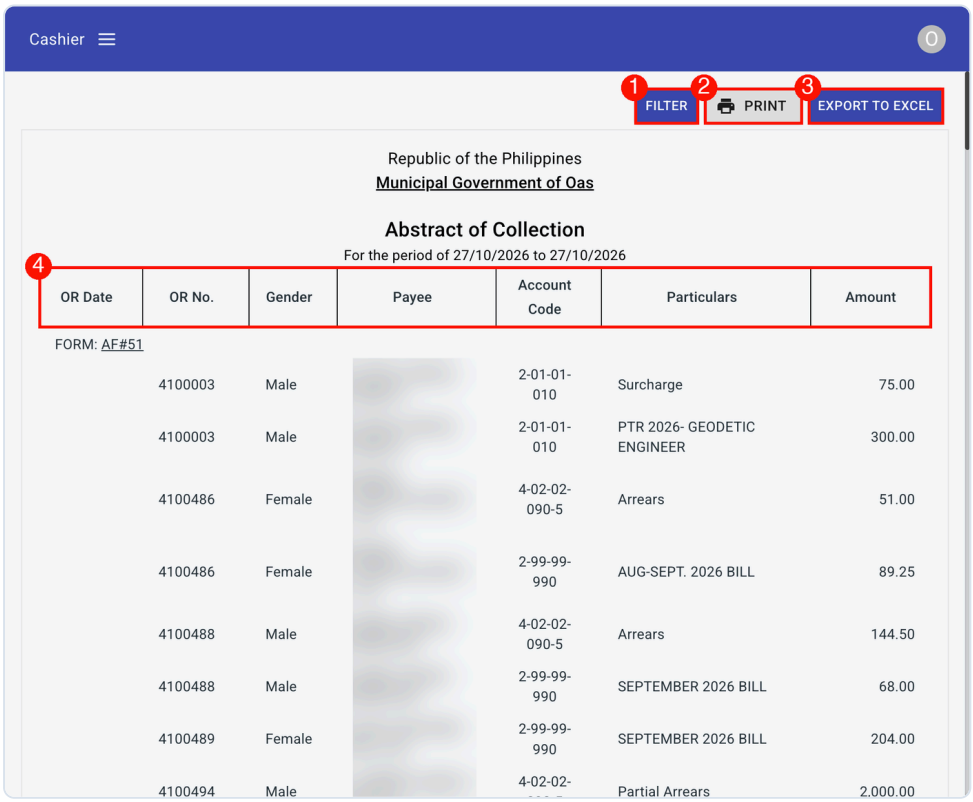

Figure 41. The abstract after Filter. 1 Filter · 2 Print · 3 Export To Excel · 4 The columns. The payee names are blurred.

4.4 Report of Collection and Deposit(RCD)

Shows one RCD made in RCD Processing. When it opens it is empty. The buttons are **Search** and **Import**; **Print** appears when an RCD is on the page.

Step 1. Click **Search**. In **Filter To Display** each way of finding an RCD has a check box: **Collector**, **Year**, **Month**, and after the word **OR** a single **Date**. **Filter** stays gray until you tick one.

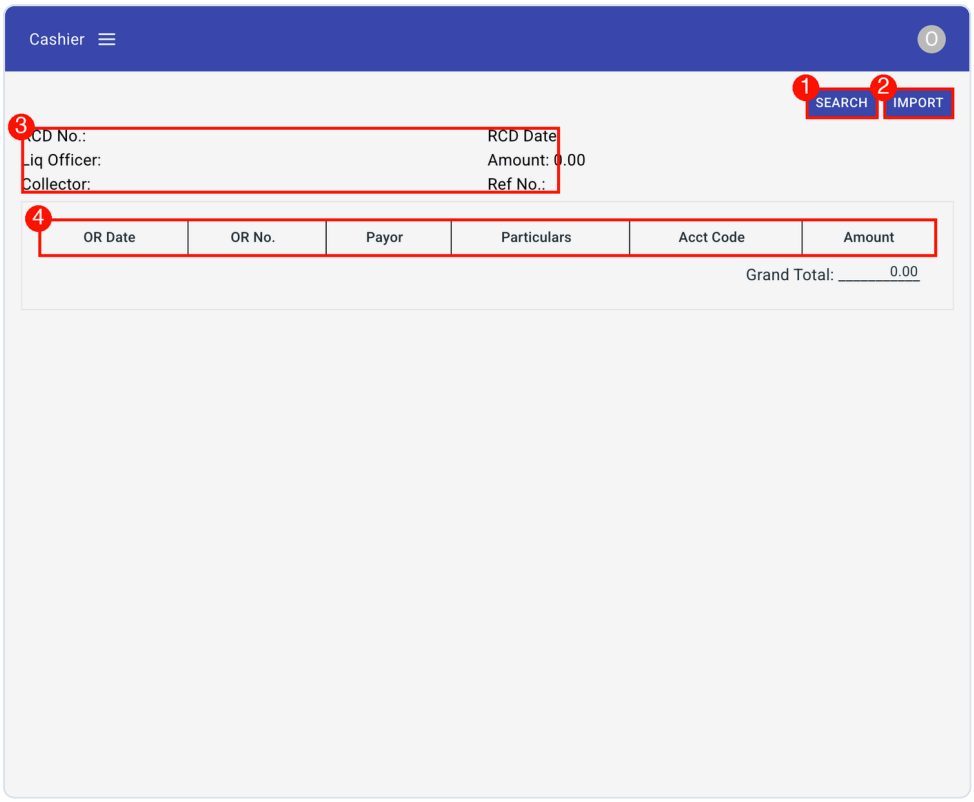

Figure 42. The report when it opens. 1 Search · 2 Import · 3 The details of the RCD · 4 The table.

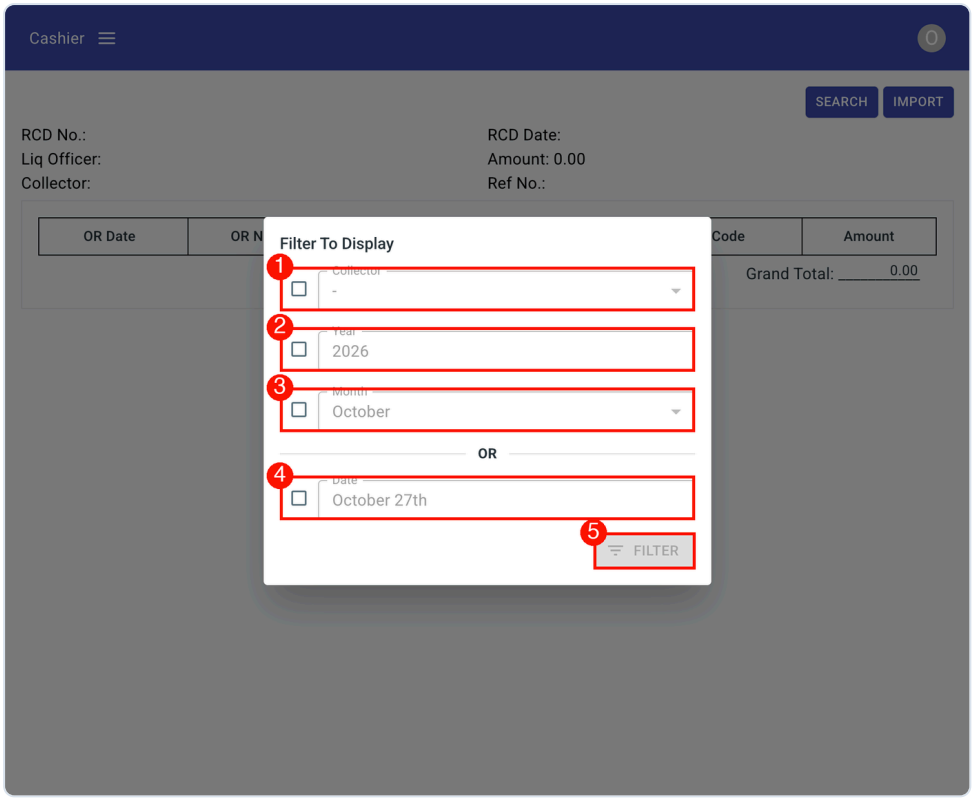

Figure 43. The filter window. 1 Collector · 2 Year · 3 Month · 4 Date · 5 Filter.

Step 2. Tick a box (here the **Year**) and click **Filter**. The window **RCD No. List** lists the RCDs with their amounts.

Step 3. Click **Retrieve** on the RCD that you want.

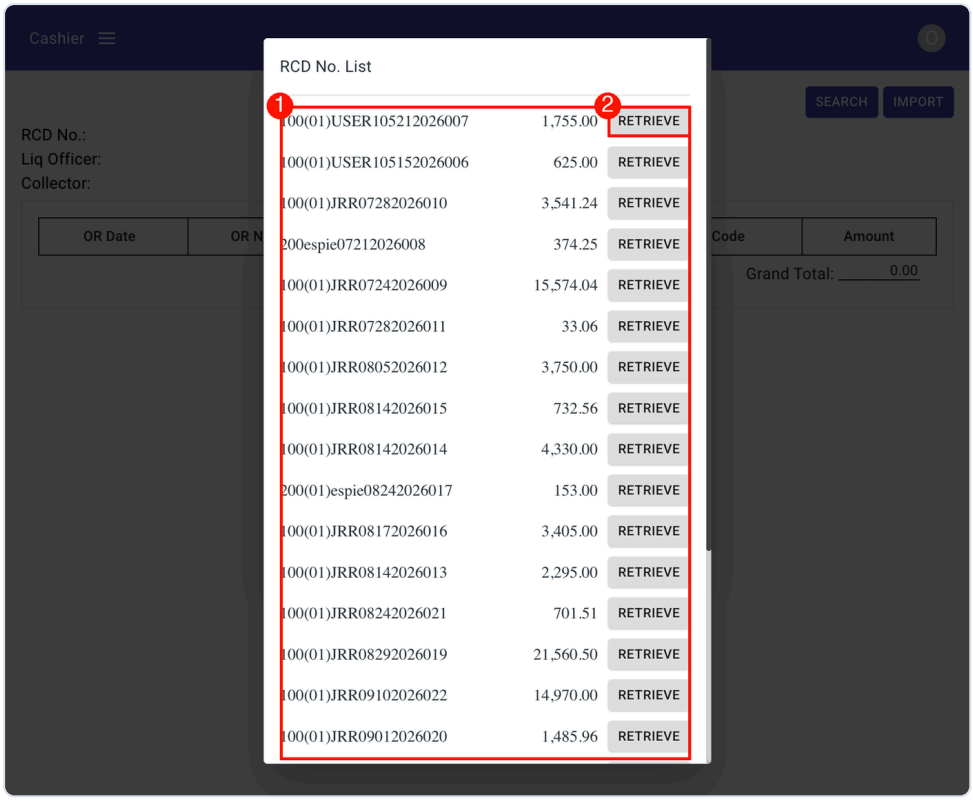

Figure 44. The window RCD No. List. 1 The RCDs and their amounts · 2 Retrieve.

The page shows the number, date, liquidating officer, collector and amount of the RCD, and the table of its receipts with the **Grand Total**.

Figure 45. The RCD after Retrieve. 1 Search · 2 Import · 3 Print · 4 The details · 5 The receipts. The names are blurred.

Step 4. Print. The button **Print** opens the print page, the **Collector's Report of Collections and Deposits**, with the collections, the remittances and deposits and the accountability for accountable forms. Click its own **Print** button to send it to the printer.

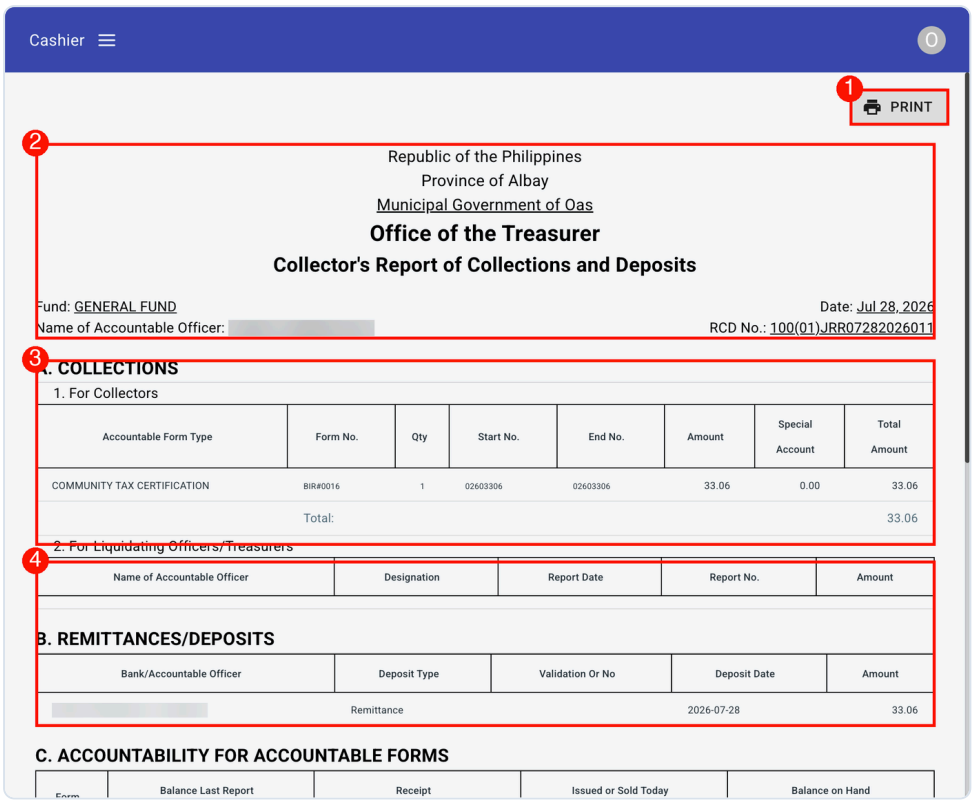

Figure 46. The print page. 1 Print · 2 The heading and the accountable officer · 3 A. Collections · 4 B. Remittances/Deposits. The names are blurred.

Import. Real property tax receipts are made in another system. **Import** opens **Import RPT**: choose the **Date From**, **Date To** and **Encoded By** (only the RPT users assigned to your user), then click **Filter** to list them. The messages are `Encoded by is required`, `No rpt permit OR records found` and `No OR records to import`.

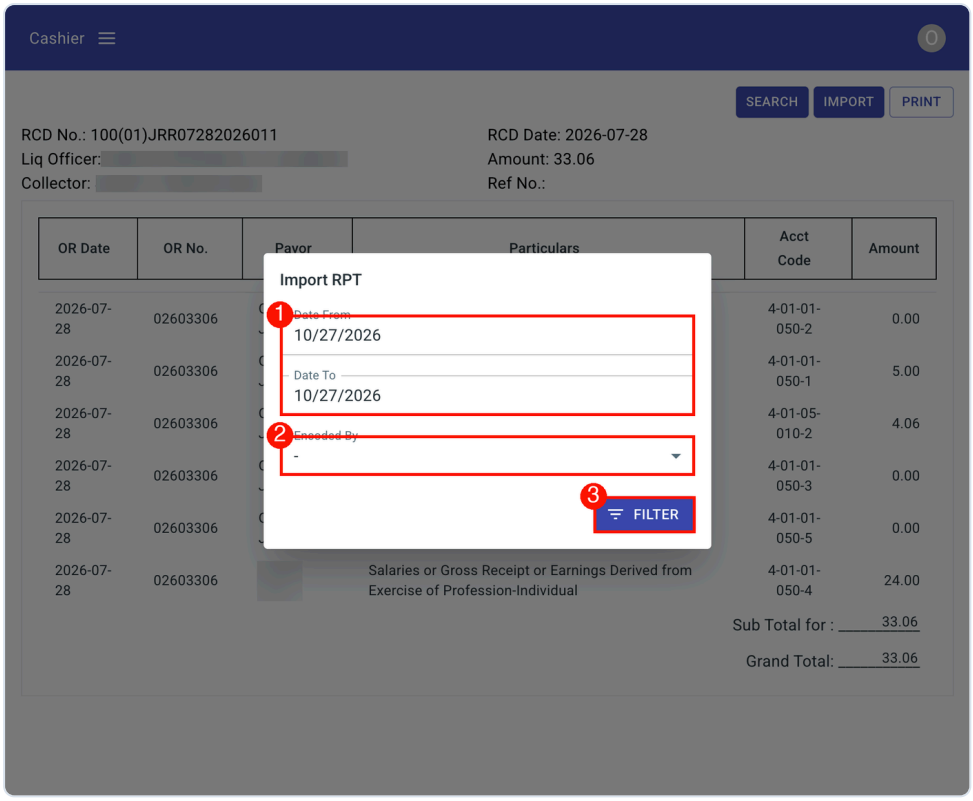

Figure 47. The window Import RPT. 1 Date From and Date To · 2 Encoded By · 3 Filter.

4.5 Report of Collection by Liquidating Officer(RCLO)

Shows one RCLO made in RCLO Processing and records the deposits of its money. When it opens it is empty. It has the table of the RCDs, a list of checks with a **Breakdown** box and the table of deposits.

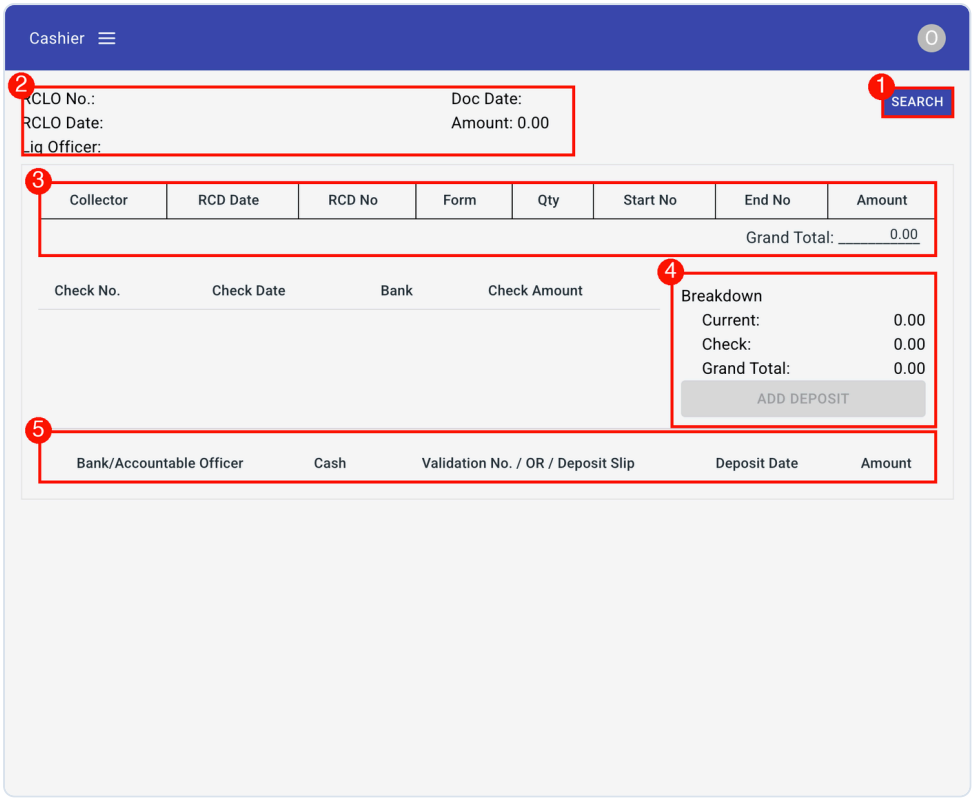

Figure 48. The report when it opens. 1 Search · 2 The details of the RCLO · 3 The RCDs · 4 The Breakdown · 5 The deposits.

Step 1. Click **Search**. The check boxes are **Liquidation Officer**, **Year**, **Month** and, after **OR**, a single **Date**.

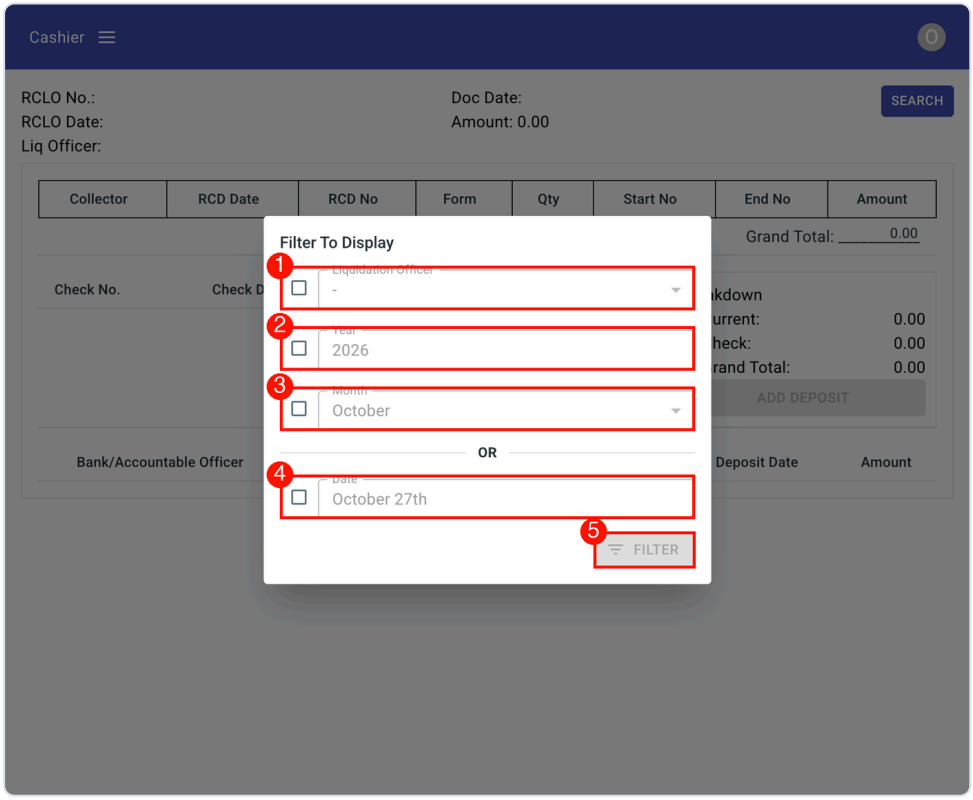

Figure 49. The filter window. 1 Liquidation Officer · 2 Year · 3 Month · 4 Date · 5 Filter.

Step 2. Tick a box (here the **Year**) and click **Filter**. The **RCLO No. List** opens.

Step 3. Click **Retrieve** on the RCLO that you want.

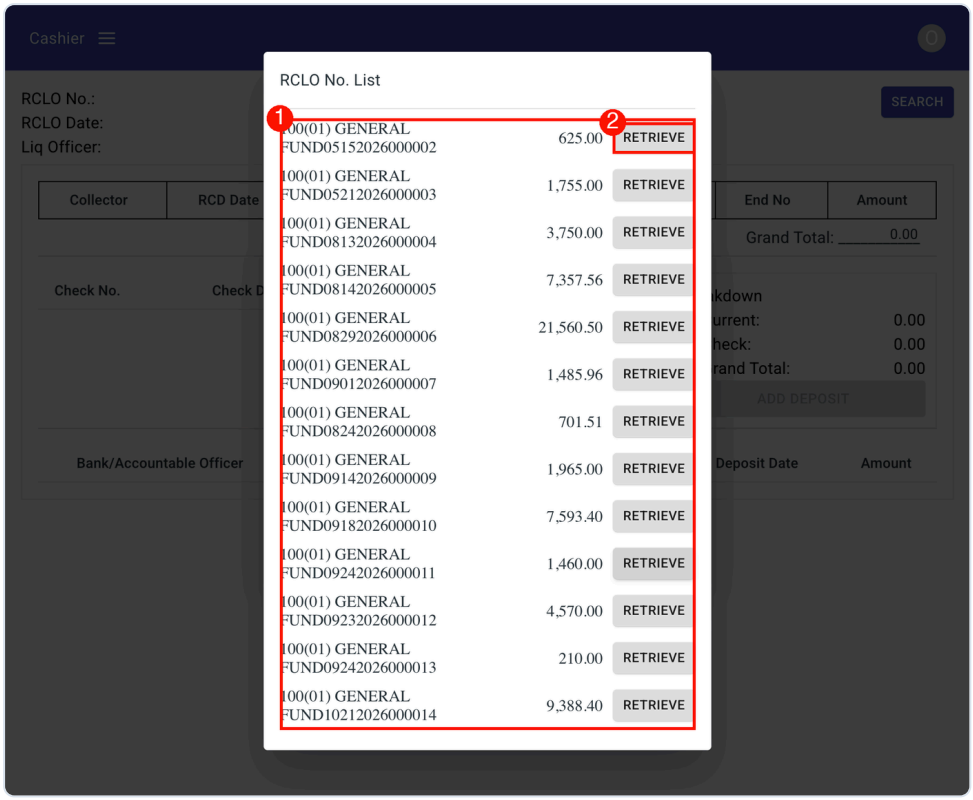

Figure 50. The window RCLO No. List. 1 The RCLOs and their amounts · 2 Retrieve.

The page shows the RCLO: the collector, the RCD date, the RCD number and, for each form, its quantity, start number, end number and amount, with a **Sub Total** and a **Grand Total**. The **Breakdown** adds up the cash (**Current**) and the **Check**.

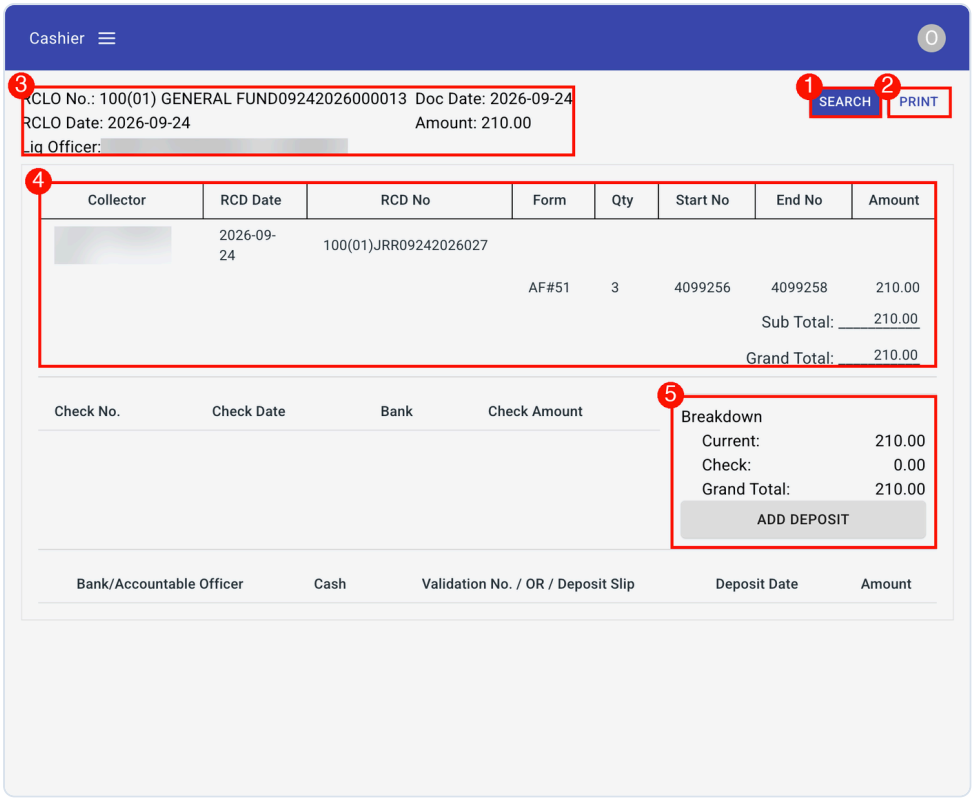

Figure 51. The RCLO after Retrieve. 1 Search · 2 Print · 3 The details · 4 The RCDs and totals · 5 The Breakdown and Add Deposit. The names are blurred.

Add Deposit. The money has to be deposited. **Add Deposit** (gray until an RCLO is on the page) opens a window: the **Bank / Accountable Officer**, the **Method** (cash or check), the **Validation No / O.R / Deposit Slip**, the **Deposit Date** and the **Amount**. **Create** saves the deposit and shows it in the table at the bottom.

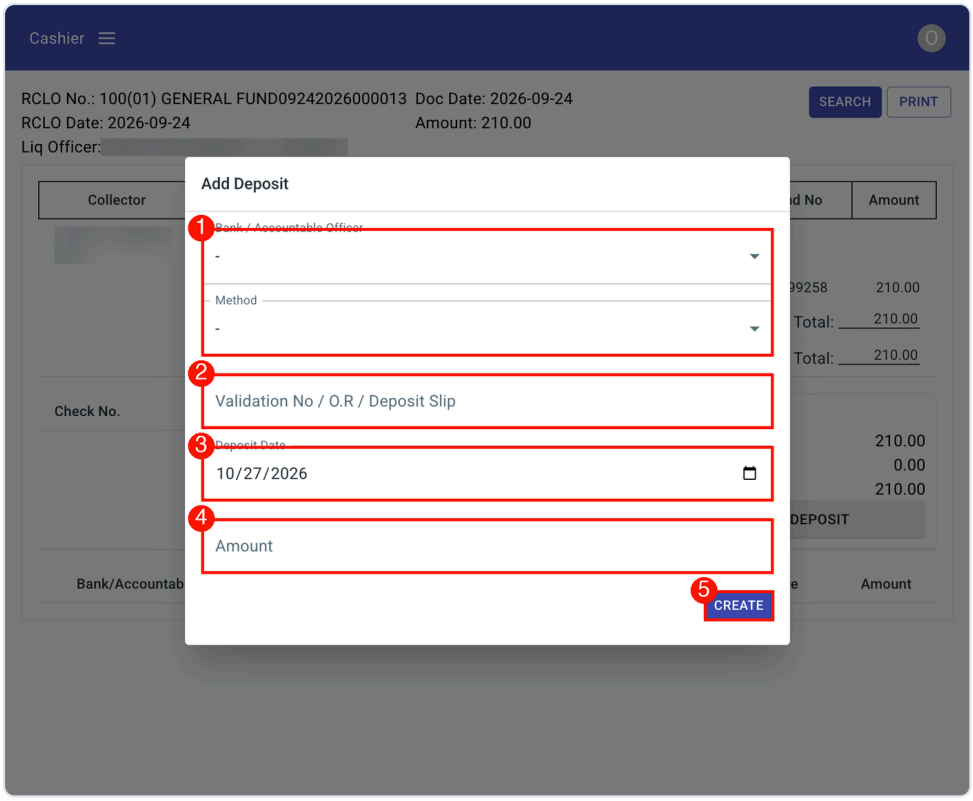

Figure 52. The window Add Deposit. 1 Bank / Accountable Officer and Method · 2 Validation No · 3 Deposit Date · 4 Amount · 5 Create.

Print. The button **Print** opens the **Report of Collections and Deposits** with the collections (date issued, serial numbers, payor, particulars, amount), the remittances and deposits, and the accountability for accountable forms. Click its own **Print** button to print it.

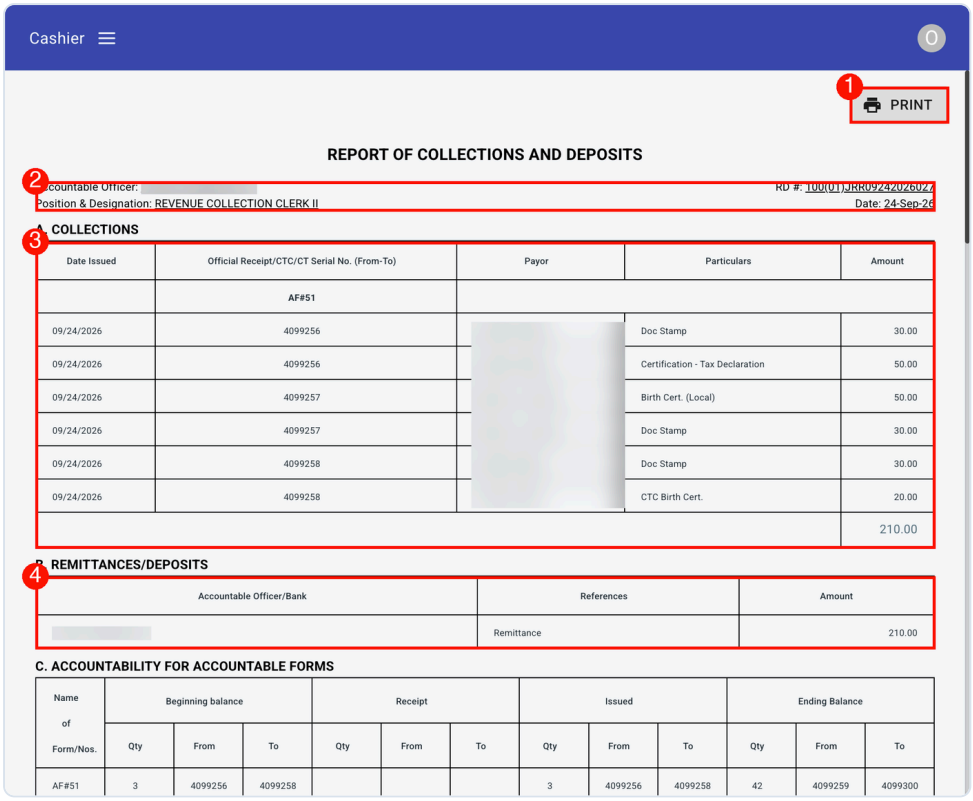

Figure 53. The print page. 1 Print · 2 The accountable officer and the RD number · 3 A. Collections · 4 B. Remittances/Deposits. The names are blurred.

5. What limits a cashier

- **Assigned officers.** A receipt can be handled only when its booklet belongs to an officer assigned to your user. Otherwise TIS shows `You are not allowed to proccess this personnel.`. The Collector list of RCD Processing offers only the assigned officers.
- **Assigned RPT users.** Import RPT offers only the RPT users assigned to your user.
- **No set-up pages.** Funds, accounts, collection types, officers, booklets and the OR templates are kept by the Admin. If one is missing, ask the Admin.
- **Erase.** The Erase button of the Business Permit page is shown only to the Admin.
