Municipality of Oas, Albay Unified Online Services

User Manual

Prepared by iConcept IT Solutions

Draft: Section 1, Introduction

SECTION 1

Introduction

This manual explains how to use the online services of the Municipality of Oas, Albay, which are delivered through one unified platform built by iConcept IT Solutions.

1.1 About OAS Unified Online Services

OAS Unified Online Services brings the municipality's online systems together under one website. Residents, business owners, property owners and builders can find the service they need in one place, and each service has its own dedicated system. Using these systems means faster processing, clearer information on the status of an application, and more efficient service from the local government.

1.2 Accessing the OAS website

1. Open a web browser (for example Google Chrome, Microsoft Edge or Safari).
2. Go to https://oas.lguapp.com.
3. The OAS home page opens. Scroll to the **What We Offer** section to see the **LGU Online Applications**.
4. Click the card for the service you need. Each card opens that system in the same browser window.

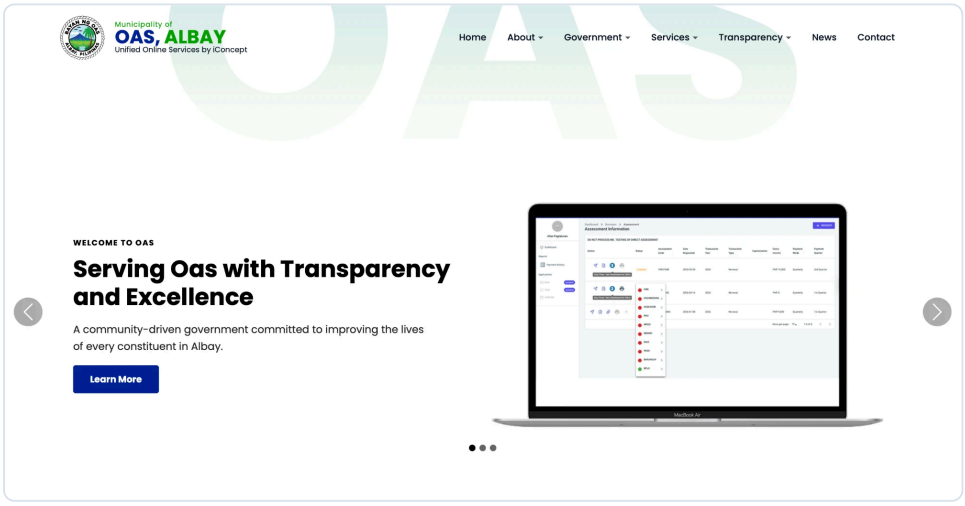

Figure 1.1. The OAS home page, with the menu bar (Home, About, Government, Services, Transparency, News, Contact) at the top.

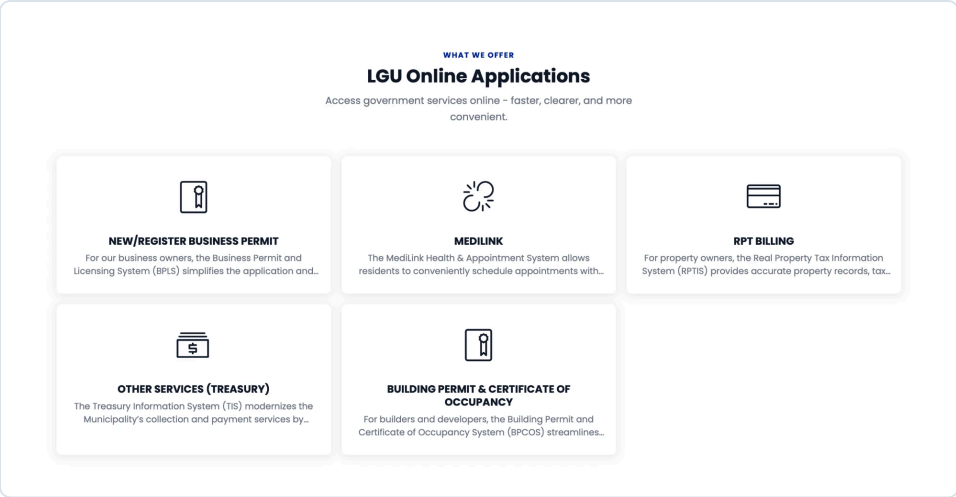

Figure 1.2. The LGU Online Applications section. Click a card to open that system.

1.3 LGU Online Applications

The home page lists five online applications. Choose the one that matches your need.

Application	Who it is for and what it does	Address
New/Register Business Permit (BPLS)	Business owners. The Business Permit and Licensing System simplifies the application and renewal of business permits, with faster processing and real-time application status.	ebpls.oas.lguapp.com
MediLink	Residents. The Health & Appointment System lets you schedule appointments with the Municipal Health Office, receive reminders and access health services with less waiting time.	medilink.oas.lguapp.com
RPT Billing (RPTIS)	Property owners. The Real Property Tax Information System provides property records, tax assessments and billing information.	rptpayment.oas.lguapp.com
Other Services (Treasury) (TIS)	Anyone paying the municipality. The Treasury Information System handles secure payment processing, official receipt generation, real-time transaction posting and financial reporting.	tis.oas.lguapp.com
Building Permit & Certificate of	Builders and developers. The system covers permit applications, compliance verification,	bpcos.oas.lguapp.com

Application	Who it is for and what it does	Address
Occupancy (BPCOS)	inspections and occupancy certification, in line with the National Building Code.	

> **Which system does this manual cover in detail?** The chapters that follow focus on the **Business Permit and Licensing System (BPLS)**: how applicants apply and renew, and how municipal staff process, assess, approve and release the Mayor's Permit.

1.4 Other information on the website

Besides the online applications, the OAS website publishes information from the local government. Use the menu at the top of the page to reach:

Menu	What you will find
About	History, municipal profile and the Mayor's message.
Government	Executive officials, departments and offices, and the Sangguniang Bayan.
Services	Service information, including Real Property Tax, Business Permit and the Citizen's Charter.
Transparency	Transparency reports, Full Disclosure Policy (FDP) reports, and Bids & Awards.
News	News and announcements from the Office of the Mayor, plus photo releases, speeches, achievements and the gallery.
Contact	How to reach the municipality.

1.5 How this manual is organized

- **Getting started:** creating an account, verifying it, signing in and recovering a password.
- **Guides by role:** step-by-step instructions for the applicant and for each office involved in the permit process.
- **Reports, troubleshooting and FAQ.**
